Release 24.9
Last Updated: 16 December 2024

CONTENTS

CHAPTER 1 – INEIGHT COMPLIANCE OVERVIEW	19
1.1 Compliance Overview	20
1.1.1 InEight Compliance workflow	20
1.1.2 Compliance modules	20
1.1.3 Templates manager	22
1.1.4 Form & Task execution	22
1.1.4.1 Mobile application	22
1.1.4.2 Web forms and tasks	23
1.1.4.3 Form and task builders	23
1.1.5 All Events and All Tasks	24
1.1.5.4 Exports	25
1.2 In-app reporting	27
CHAPTER 2 – GENERAL NAVIGATION	29
2.1 Compliance Launch	30
2.2 Compliance Landing Page	33
2.3 Module Landing Page	34
Navigate Module Landing Page	35
2.3.1 To do list	40
2.3 Step by Step 1 – Edit a To do list Item	41
2.3.2 Schedule a form	42
2.3 Step by Step 2 – Schedule a Form	42
2.3.2.1 Forms categories	43
2.3.3 Form and task favorites	44
2.4 Upcoming planned work tile	45
2.4.1 Considerations	46
2.4.2 Related information	46
2.5 Project structure	47

2.5.1 Considerations	47
CHAPTER 3 – COMPLIANCE SETTINGS AND ADMINISTRATION	49
3.1 Settings Overview	50
3.1.1 Considerations	50
3.1.2 Steps	50
Access organization level settings	50
Access project level settings	51
CHAPTER 3 – ORGANIZATION LEVEL SETTINGS	52
3.0.1 Considerations	52
3.0.2 Steps	53
3.1 Product settings	53
3.1.1 Considerations	53
3.1.2 Steps	53
3.2 Module management	54
3.2.1 Considerations	54
3.2.2 Steps	54
3.2.3 Related information	54
3.3 Template integrations	54
3.3.1 Considerations	55
3.3.2 Steps	56
Edit a template	56
3.3.3 Related topics	56
3.4 Module settings	56
3.4.1 Considerations	57
3.4.2 Steps	57
3.5 Module summary	57
3.5.1 Considerations	58
3.5.2 Steps	58
3.6 Configurations	58
3.6.1 Considerations	59
3.6.2 Steps	59
3.7 Alternate hierarchy	59
3.7.1 Considerations	60
3.7.2 Steps	60
Define alternate hierarchy attributes at the organization level in Platform.	60
Associate alternate hierarchy attributes at the project level	60
Apply alternate hierarchy to templates and user permissions	61

3.8 Automatic user assignments	61
3.8.1 Considerations	62
3.8.2 Steps	62
Add automatic user assignments	62
3.9 Language settings	63
3.9.1 Considerations	63
3.9.2 Steps	63
Add a language	63
3.9.3 Related information	64
3.10 Module organization	64
3.10.1 Considerations	64
3.10.2 Steps	64
Exclude projects or organizations	64
3.11 Reporting tags	65
3.11.1 Considerations	66
3.11.2 Steps	66
Add a reporting tag	66
Delete a reporting tag	66
3.12 Categories	67
3.12.1 Considerations	68
3.12.2 Steps	68
Add a category	68
Delete a category	68
3.13 Types	68
3.13.1 Summary	68
3.13.2 Considerations	69
3.13.3 Steps	69
3.14 Classifications	70
3.14.1 Considerations	71
3.14.2 Steps	71
Add a category	71
Delete a category	72
3.15 Statuses	72
3.15.0.1 Differences between a state and a status	74
3.15.1 Considerations	74
3.15.2 Steps	74
3.16 Email templates	75
3.16.0.1 Assigned, overdue, and reversed event workflow templates	76
3.16.0.2 Reminder of upcoming event and upcoming task	77

3.16.1 Considerations	78
3.16.2 Steps	78
3.17 Roles Overview	79
3.17.0.1 Organization and project's home page access to application	79
3.17.1 Considerations	79
3.17.2 Steps	79
3.17.3 Related information	79
3.18 InEight platform permissions	80
3.18.1 Considerations	81
3.18.2 Related information	81
3.19 Roles	81
3.19.1 Steps	83
Add a new role	83
Copy or delete a role or roles	83
Edit a role	83
3.19.2 Related links	83
3.20 Module permissions	83
3.20.1 Considerations	85
3.20.2 Steps	86
3.21 Events permissions	86
3.21.1 Steps	88
3.22 Roles and users permissions	88
3.22.1 Considerations	90
3.22.2 Steps	90
3.23 Templates permissions	90
3.23.1 Considerations	91
3.23.2 Steps	92
3.24 Project settings permissions	92
3.24.1 Considerations	94
3.24.2 Steps	94
3.25 History	94
3.25.1 Considerations	95
3.25.2 Steps	95
3.26 Read-only role	95
3.26.1 Considerations	96
3.26.2 Steps	96
3.27 User assignments	96
3.27.0.1 Assignments and History	98
3.27.1 Considerations	98

3.27.2 Steps	98
Add a User Assignment	98
Transfer user assignments	99
Remove user assignments	99
View user's assignment history	99
Add reporting tags	100
3.28 Inspection and test plans	100
3.28.1 Considerations	100
3.28.2 Steps	101
CHAPTER 4 – PROJECT LEVEL SETTINGS	103
4.1 Project level settings	103
4.1.1 Considerations	104
4.1.2 Steps	105
4.2 Inspection & test plans	105
4.2.1 Considerations	106
4.2.2 Steps	106
4.3 Automapping	107
4.3.1 Considerations	107
4.3.2 Steps	108
4.4 Project structure	108
4.4.1 Considerations	109
4.4.2 Steps	109
4.5 User groups	109
4.5.1 Considerations	111
4.5.2 Steps	111
Create User Groups	111
View, edit, or copy a group	112
Deactivate and Activate a group	112
Delete a group	112
CHAPTER 5 – TEMPLATE MANAGEMENT	113
5.1 Template Overview	114
5.1.0.1 Templates Manager page view	116
5.1.0.2 Versioning	116
5.1.0.3 Favorites	117
5.1.0.4 Additional Options	117
5.1.1 Filters	117
5.1.2 Favorites	118
5.2 Template Creation	119

5.2.1 Create a Form or Task Dialog Box	119
5.2 Step by Step 1 – Create a Template Form	121
5.2 Step by Step 2 – Build a Template Task	123
5.2.2 Activate, Deactivate, and Copy Published Tasks and Forms	124
5.2 Step by Step 3 – Deactivate a Task	125
5.2 Step by Step 4 – Activate a Task	125
5.2 Step by Step 5 – Copy a Published Task	126
5.2.3 Form and Task Builder - Build Tab	127
5.2.3.1 Layout Types	128
5.2.3.2 Question Types	129
5.2.3.3 Question Settings	133
5.2.3.4 Access	135
5.2.3.5 Logic	135
5.2.3.6 Classifications	137
5.2.3.7 Copying, Deleting and Moving Questions	137
5.2.3.8 Using the Form and Task Builder - Build Tab	138
5.2 Step by Step 6 – Build a Template Using the Task Builder	138
5.2 Step by Step 7 – Build a Template Using the Form Builder	139
Multi-Level Drop-Down Lists	147
Referenced Forms and Tasks	147
5.3 Classifications	148
5.3.1 Steps	148
Apply classification logic to a List or Choice question	148
Apply classifications logic to a section	149
5.4 Multilevel Drop-Down Lists	151
5.4 Step by Step 1 – Add a manual multilevel list question	152
5.4 Step by Step 2 – Add a multilevel list using the list starter template	154
5.5 Referenced Forms and Tasks	158
5.6 Integrated List	160
5.6.1 Summary	160
5.6.2 Steps	161
5.6.3 Related information	161
5.7 Template Properties	162
5.7.0.1 Task and Form Builder Options	163
5.7.0.2 Expiration Date	164
5.7.0.3 Template Availability	165
5.7.0.4 Integration Tag	165
5.7.0.5 Template Integration	165
5.7.0.6 Enable Print Functionality	165

5.7.0.7 Template Language Settings	165
5.7.0.8 Organization Association	166
5.7.0.9 Manage Custom IDs	167
5.7 Step by Step 1 – Add a Custom ID	168
5.8 Template Integration	170
5.8 Step by Step 1 – Add a template integration	170
5.8.1 Manage template integrations	171
5.9 Template Translation	173
5.9.1 Module Summary Setup	173
5.9.2 Template Language Settings	173
5.9 Step by Step 1 – Import Template Translations	174
5.9.3 Translation Excel Template	174
CHAPTER 5 – FORM FLOWS	176
5.1 Form flows overview	176
5.1.1 Considerations	179
5.2 Create a form flow	180
5.2.1 Steps	180
Create a form flow from the Build tab	180
5.2.2 Considerations	181
5.3 Setup additional form flow steps	181
5.3.1 Steps	184
Configure additional form flow steps from the Build tab	184
5.3.2 Considerations	184
5.4 Re-enable form flow	185
5.4.1 Considerations	186
5.5 Template History	187
5.5 Step by Step 1 – View User History on Templates	188
CHAPTER 6 – AUTOMAPPING	189
6.1 Overview	190
6.1.1 Considerations	193
CHAPTER 7 – HEADERS	195
7.1 Headers Overview	196
7.2 ITP Header Template	197
7.2.0.1 All components grid	197
7.3 Project Structure Header Template	199
7.3.1 Considerations	199
7.3.2 Steps	200

7.4 Dynamic Headers Toggle	201
7.5 Manage Associations	202
CHAPTER 8 – INSPECTION AND TEST PLANS	203
8.1 Inspection and Test Plans Overview	204
8.2 Configure ITPs At The Organization Level	205
8.2.1 Configure project settings ITP permissions in Roles	205
8.2.2 Considerations	206
8.3 Configure ITPs At The Project Level	207
8.3.1 Considerations	207
8.4 Create ITPs At The Organization Level	208
Navigate to Inspection and Test Plans at the organization level	208
Create an Inspection and Test Plan	209
Import ITP	209
8.4.1 Considerations	210
8.5 Create ITPs At The Project Level	211
Navigate to Inspection and Test Plans at the project level	211
Manually create a new ITP	211
Copy ITP from organization	212
Import ITPs	212
8.5.1 Considerations	212
CHAPTER 9 – FORM AND TASK EXECUTION AND MANAGEMENT	
(WEB)	213
9.1 Forms and Tasks	214
9.1.1 Launching a Form or Task	214
9.1.1.1 Locked forms or tasks	215
Launch a Form	216
9.2 Filling out a Form and Task - Web	219
9.2.1 Header Information	221
9.2.2 Copy a Section	222
9.2.3 Attachments	222
9.2.4 Form and Task Details	226
9.2.5 Smart Forms and Tasks	227
9.2.6 Form Within a Form or Task	228
9.2.7 Form Flows	229
9.2.8 View Active Form Flow	230
9.2.9 GPS Questions	231
9.2.10 Complete a Form or Task	231

9.2 Step by Step 1 – Fill Out a Form	232
9.3 Complete a Form or Task on the Web	235
9.3.1 Save a form or task	235
9.3.2 Assign a task	235
9.3.3 Submit a form or task	235
9.4 Event and Task Management	238
9.4 Step by Step 1 – Add additional columns to the list of all events or all tasks	240
9.4.1 Additional event or task functions	241
9.4.1.1 Edit properties	242
9.4 Step by Step 2 – Edit an event or task properties	242
9.4.1.2 Notifications	243
9.4 Step by Step 3 – Send notifications	244
9.4.1.3 Export events and tasks	244
9.4 Step by Step 4 – Export events or tasks	244
9.4.1.4 Print	245
9.4 Step by Step 5 – Print an event or task	245
9.4.1.5 Form and task information	245
9.4 Step by Step 6 – Navigate to event or task information slide-out	246
Additional Form information panel options	247
9.4 Step by Step 7 – View and download attachments	247
9.4 Step by Step 8 – View and edit references	248
9.4 Step by Step 9 – View form history	250
9.4.1.6 Delete an event or task	251
9.4.1.7 Copy an event or task	251
9.4 Step by Step 10 – Copy event or task	252
9.4.1.8 Query builder	252
9.4 Step by Step 11 – Using the query builder	253
9.4.1.9 Views	254
9.4.2 Managing events and tasks	254
9.4 Step by Step 12 – Manage an event	254
9.4 Step by Step 13 – Manage Tasks	255
9.4.2.10 Monitor due dates, overdue states and statuses	255
9.4 Step by Step 14 – View due dates, overdue states and statuses	256
9.4.2.11 Monitor form flow status	257
9.4.2.12 Assign user groups	259
9.4 Step by Step 15 – Assign user groups to an event or task	259
9.5 Event and Task Views	260
9.5.1 Save views	260

9.5 Step by Step 1 – Save your view	260
9.5.2 Send a view	261
9.5 Step by Step 2 – Send view to another user	261
9.5.3 Rename view	262
9.5 Step by Step 3 – Rename view	262
9.5.4 Delete view	263
9.5.5 Global view	264

CHAPTER 1 – INEIGHT COMPLIANCE OVERVIEW

1.1 COMPLIANCE OVERVIEW

InEight Compliance is an electronic system for managing forms and tasks that allow you to capture data within your organization, send out notifications and use the information in all types of reports and dashboards. This includes:

- Creating and storing form and task templates in the Template manager
- Selecting, filling out, and submitting events and tasks
- Tracking the status of and managing data on the Events and Tasks pages

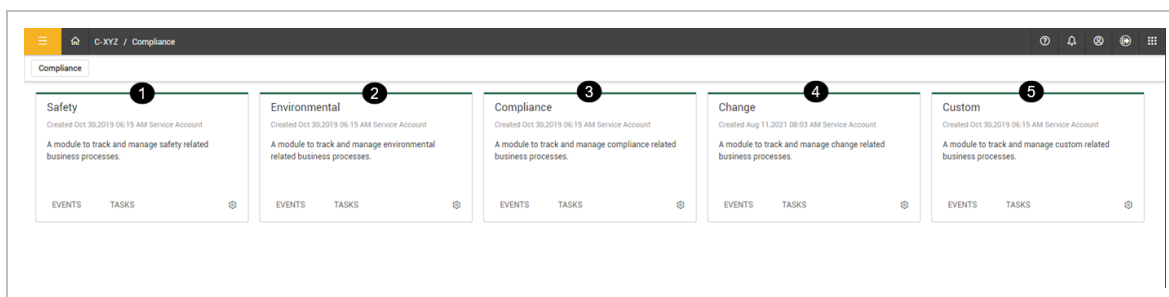

1.1.1 INEIGHT COMPLIANCE WORKFLOW

From within each of these modules, there is a workflow for creating templates, executing events and tasks, and managing them. The following diagram illustrates how forms and tasks are managed within the InEight Compliance application:

1.1.2 COMPLIANCE MODULES

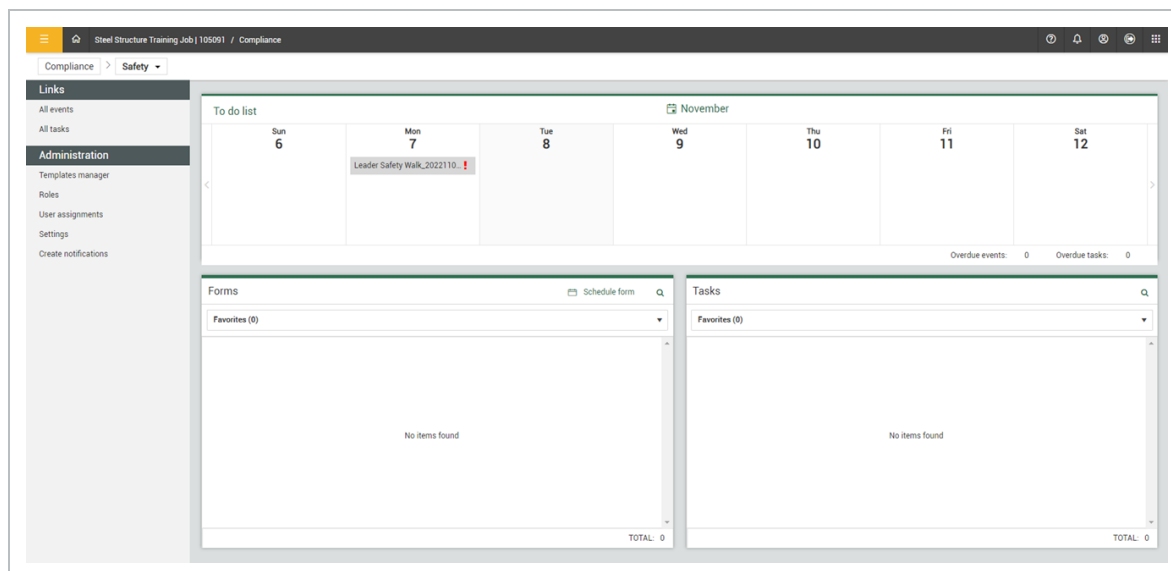

Compliance is organized into the following modules by default.

Overview - Compliance Modules

Section	Module Name	Description
1	Safety	Module within Compliance that contains standard templates for construction safety processes as well as ability to customize any other templates.
2	Environmental	Module within Compliance that contains standard templates for construction environmental processes as well as ability to customize any other templates.
3	Compliance	Module within Compliance that contains standard templates for construction compliance processes as well as ability to customize any other templates.
4	Change	Module to track and manage templates for integration with InEight Change.
5	Custom	Module to track and manage custom related business processes.

Specific to the module you selected, the Module landing page is the working page where you can view or click on both events and tasks lists or access Administration functions. Depending on your role, you might have the job of creating new events or tasks, which you can also do from the Module landing page, if you have the correct permissions.

1.1.3 TEMPLATES MANAGER

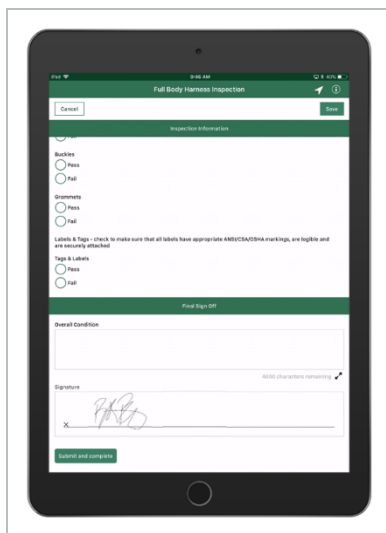

Within each Compliance module, you can access the Templates Manager to manage the templates for the module you are in (i.e., the Templates Manager for the Safety module contains safety-related templates).

Within the Templates Manager you can view the templates already created, along with their status (published, draft, or inactive). You can also create new templates using the Form Builder or Task Builder. The creation of form or task templates is an administrative function performed using the web-based Compliance application.

1.1.4 FORM & TASK EXECUTION

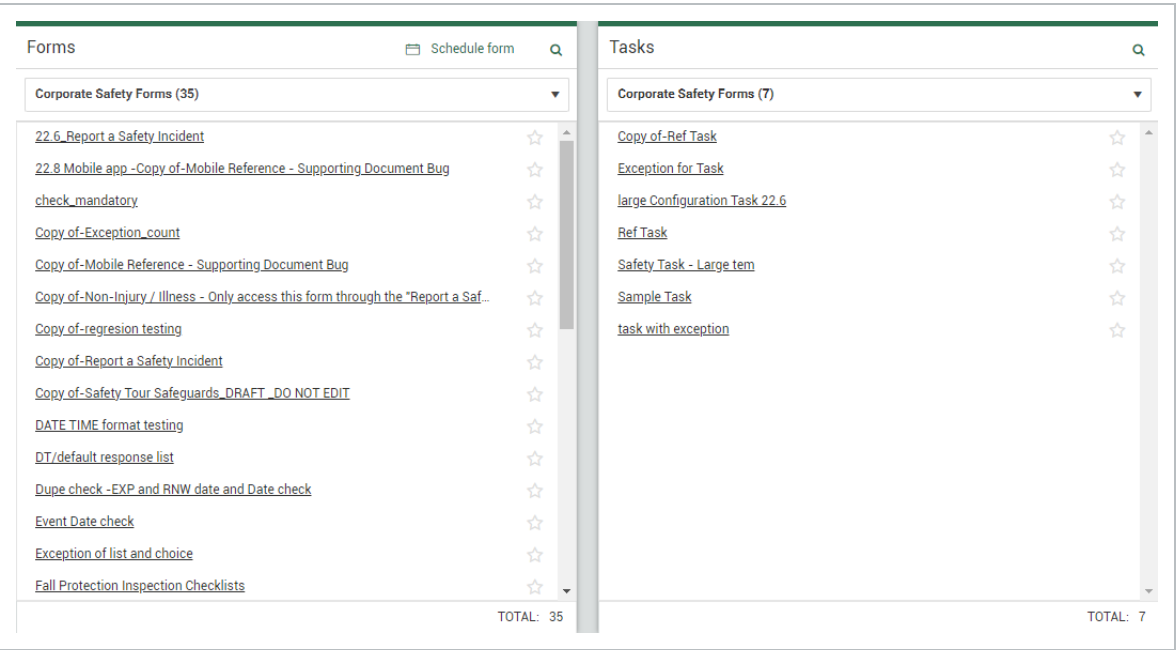

1.1.4.1 MOBILE APPLICATION

In the field, users can fill out and submit inspections, forms and questionnaires, and tasks using the Compliance Mobile application. You can complete the relevant event or task offline using the mobile app and synchronize the results when connected to a network. Additional information will be reviewed in 11.5 Filling out an Event or Task - Mobile on page 321.

1.1.4.2 WEB FORMS AND TASKS

There might be times when a user needs to fill out a form or task via the web application. From one of the modules , you can select and launch the form or task you need using the Forms or Tasks dialog boxes.

1.1.4.3 FORM AND TASK BUILDERS

Compliance has both an intuitive Form builder and Task builder that allows the desired level of complexity to be built into your forms/tasks. It yields numerous question types to collect the information you need from the field and provides functional-level permissions with customizable workflows for each form/task.

1.1.5 ALL EVENTS AND ALL TASKS

Once forms are submitted, you can track forms as events on the Events page of the web-based Compliance application. There is an Events page within each Compliance module, where you can track the status of your event in the approval process (e.g. Pending, With Claims Manager, Complete). Due dates shown in red indicate the event form is overdue.

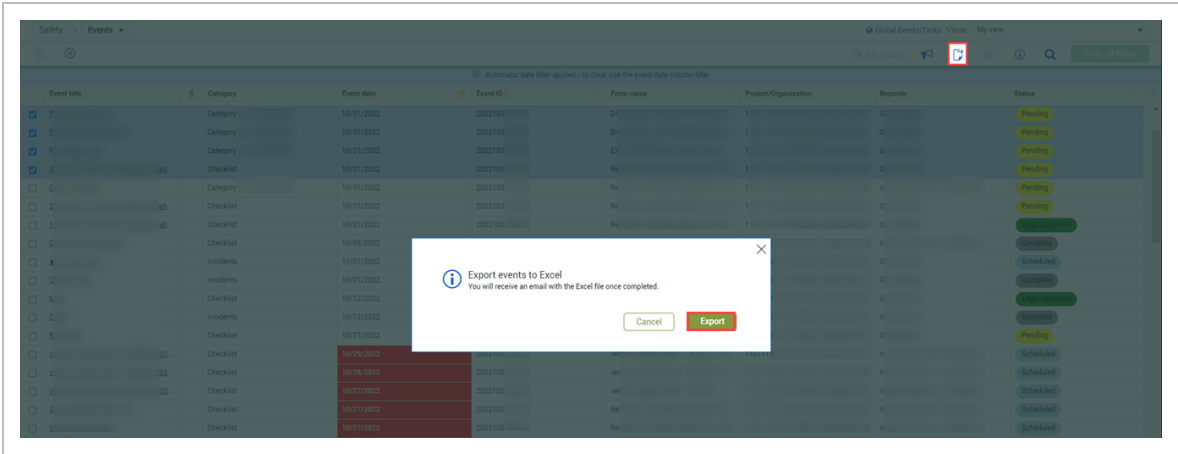

Event title	Category	Event date	Event ID	Form name	Project/Organization	Reporter	Status
Copy of T...	Category A - DO NOT EDIT	10/31/2022	20221031		(R1 HD Platform Replacement)		Pending

1.1.5.4 EXPORTS

Click on the **Export** icon so that you can export selected items from the All Events page or the All Tasks page. The system will generate a .ZIP file that can be extracted.

1.2 IN-APP REPORTING

As an administrator, you can configure which templates can be printed in the application. The application uses a standard report to print events and tasks for the configured templates. Event and task data is captured, and then copied to a reporting database every 15 minutes. The time of this process may vary depending on the environment. As a result, you may experience a delay before new or updated event or task data shows in the report.

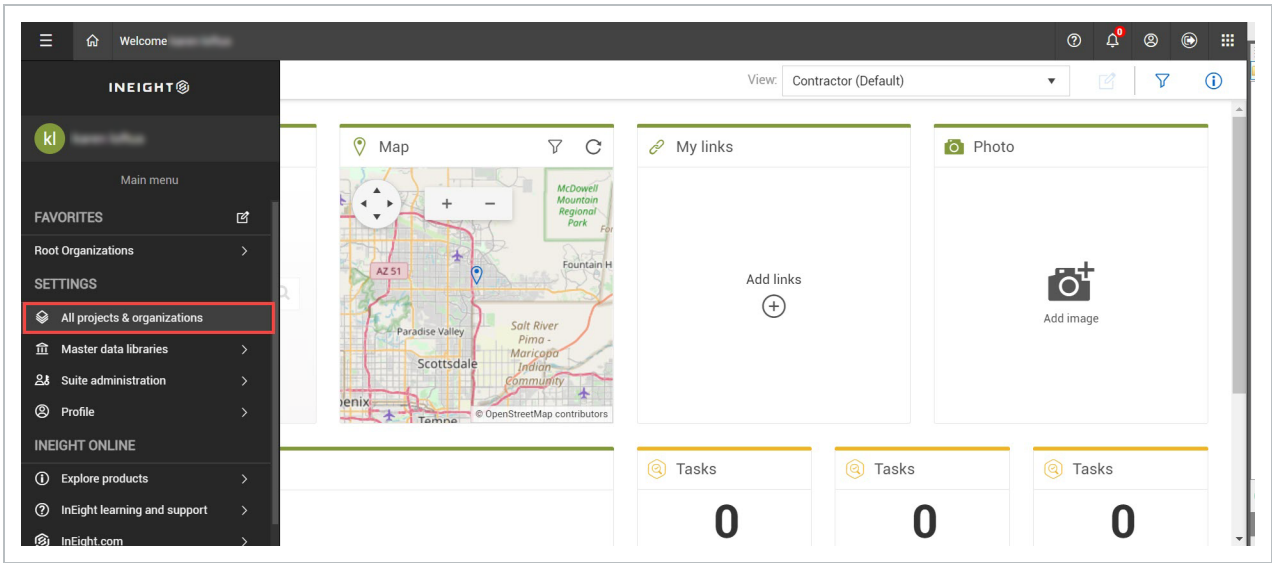

For more information about configuring template print options, see **Enable print functionality** in [Template Properties](#).

This page intentionally left blank.

CHAPTER 2 – GENERAL NAVIGATION

2.1 COMPLIANCE LAUNCH

To open a project in Compliance, use the link provided to you by your manager or other source. Click the **Main menu** icon at the top left, and then select **All projects & organizations**.

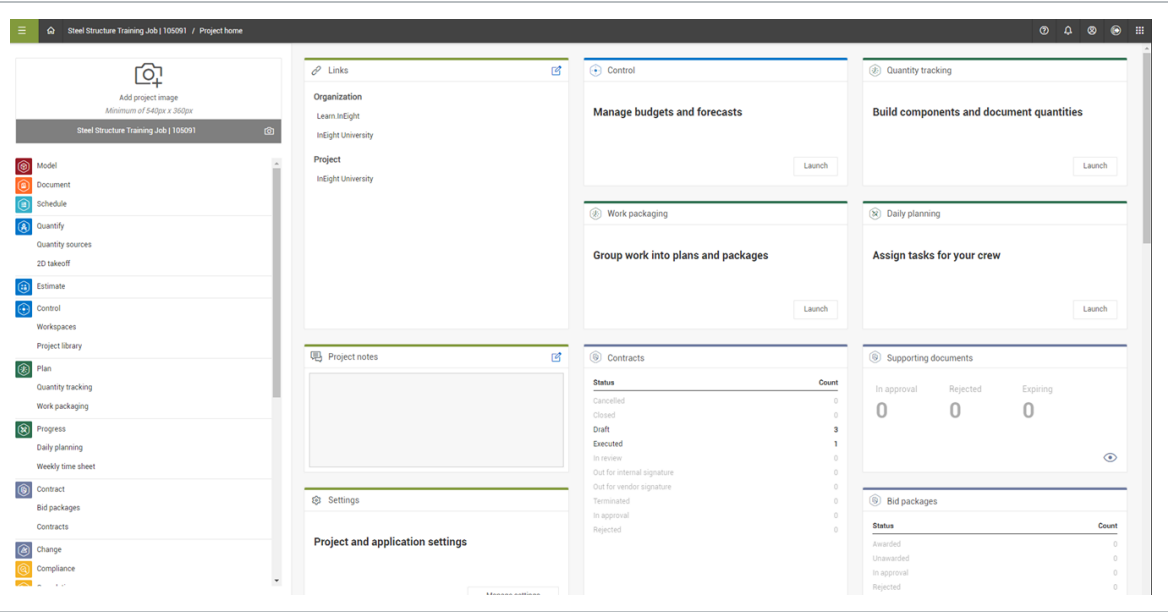

Click the **Name** hyperlink to open the project. You can use the Search function at the top right to find a specific project.

A screenshot of the 'All projects & organizations' page in the InEight software. The page has a header with 'All projects & organizations' and a search icon. Below the header are two tabs: 'PROJECTS' (selected) and 'ORGANIZATIONS'. The main area contains a table with the following columns: ID, Name, Stat..., Organization, Created by, Created on, Original contract..., Contract number, and Date project start... The table lists various projects, including 'Phoenix', 'Scottsdale', and 'Tempe'. The table is scrollable, and the bottom of the page shows a horizontal scrollbar.

If your project is not displayed, you can search by selecting the **Search** icon in the top right corner. This search function will search all terms in all columns.

The Project home page opens.

Click Compliance on the left navigation menu.

The Compliance landing page opens.

NOTE In the Projects home landing page you can launch Compliance in other ways not mentioned here.

2.2 COMPLIANCE LANDING PAGE

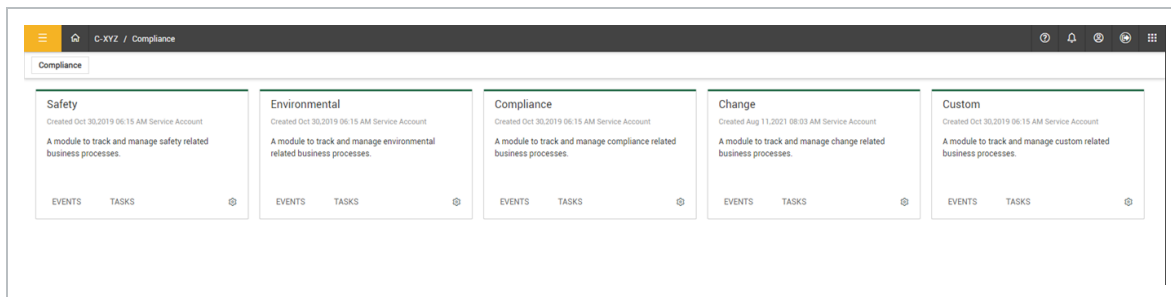

The Compliance landing page is the home page for Compliance. It is the starting point from which you can access any of the Compliance-related modules to track and manage forms.

The landing page contains the following modules by default:

- Safety
- Environmental
- Compliance
- Change
- Custom

When you click on a tile, it opens to that module's corresponding landing page, where you can access and manage the forms or tasks related to that category.

The modules shown on the Compliance landing page depend on your assigned permissions for the selected project. You can only see the modules you have access to.

2.3 MODULE LANDING PAGE

The Module landing page is the working page where you can look up and fill out forms or tasks related to the module you selected (e.g., Safety, Environmental, etc.). Depending on your role, you may have the job of creating new forms or tasks, which you can also do from the Module landing page, if you have the correct permissions. From the Compliance landing page, assume you select the Safety module tile. This takes you to the Safety Module landing page.

Overview - Module Landing Page

	Title	Description
1	Module navigation	Move from the current module landing page back to the Compliance landing page.
2	Left navigation menu	<p>From this menu you can access all events (filled out forms) or tasks for the module you are in and view their status.</p> <p>If you have Administrator settings, you can perform additional functions by selecting any of the following Administration options:</p> <ul style="list-style-type: none"> • Templates Manager - library of all forms/tasks in your organization, where you can manage blank forms/tasks and build new ones • Roles - Manage roles and permissions for Compliance • User Assignments - Assign users to organizations/projects, categories and roles • Settings - Edit modules, categories, statuses, roles, email templates, and user assignments • Create Notifications - Send email to users or roles with a personalized notification
3	To do list	A week's view of your current assigned and pending tasks and scheduled or pending events.
4	Forms or Tasks	To fill out a form/task, select the appropriate category from the Forms or Tasks drop down list, or search for it by its title. You can then select the form or task to fill it out. You can also schedule a form for a specific date by using the button in the top right corner of the Forms box.

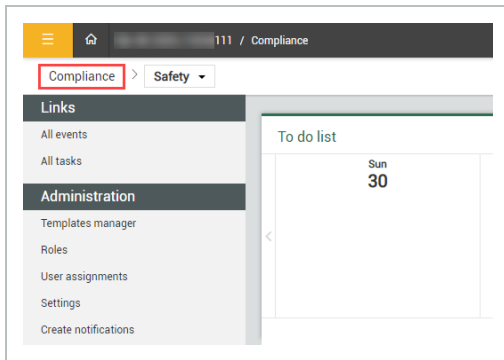

The following Step by Step walks you through navigation of the Module landing page. It assumes you have privileges to access the Administration settings.

NAVIGATE MODULE LANDING PAGE

1. From the Compliance project landing page, select the **Safety** module tile.

- The Safety Module landing page shows.
2. Click the **Compliance** button in the upper left of the page to go back to the Compliance landing page.

3. Click the other module tiles such as **Environmental**, to open their landing page.
4. Click the **Compliance** button to go back to the Compliance landing page.
5. Click the **Safety** module, and then click on **All events** on the left side bar menu.
 - This opens the Events page, where you can see all filled out Safety forms and their status

Project / Compliance		Safety > Events		Global Events/Tasks View: My view		549 projects		Clear all filters

InEight Inc. | Release 24.9

NOTE

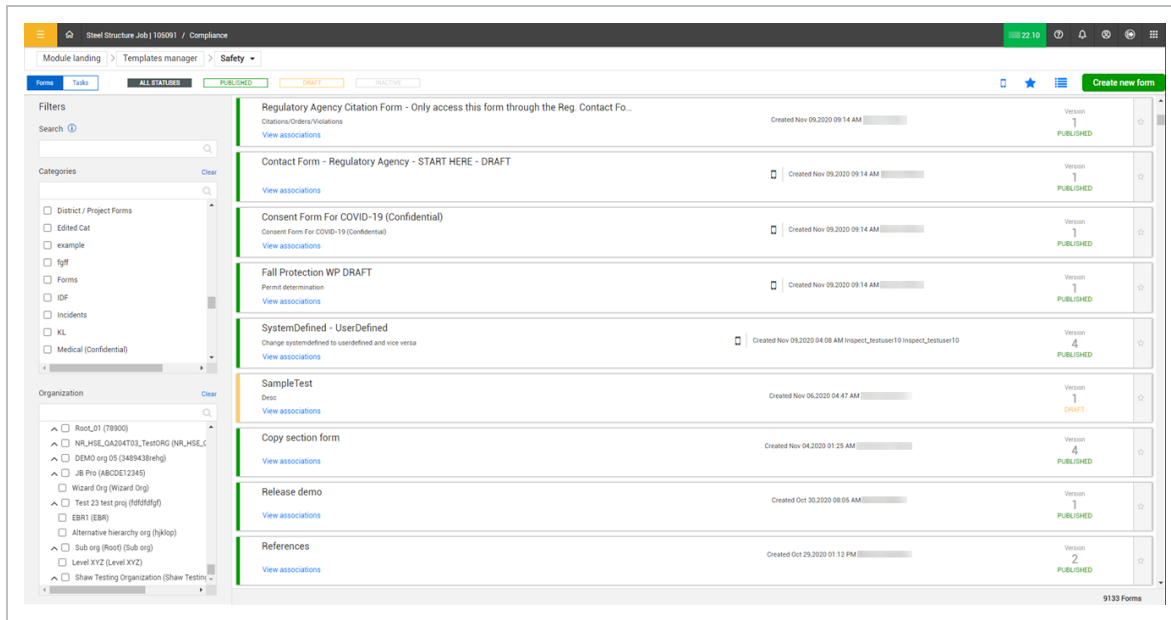

You can follow the same steps for tasks in the Tasks section.

You can manage and create new forms or tasks for your team or organization in Templates manager. In the module landing page, click **Templates manager** on the side bar menu to open the Templates manager page.

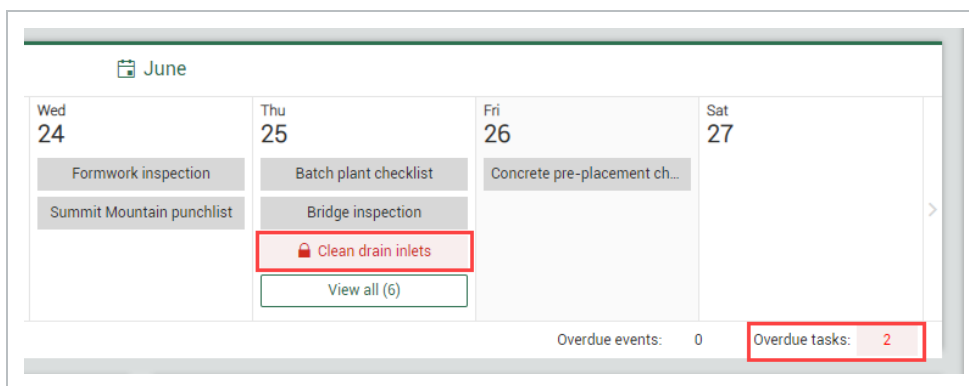

You can create new templates and manage existing ones. You can also filter forms or tasks by Categories or Organization.

2.3.1 TO DO LIST

The To do list shows the events and tasks assigned to you that need to be completed in the current week.

You can scroll forward or backward to view events and tasks for other weeks. To scroll, click the arrow icons to the left or right of the window. To go to a specific month, click the month button. Events are shown in dark gray, and tasks are light gray. When events or tasks are overdue, their text color changes to red. You can see how many overdue events and tasks you currently at the bottom right of the To do list.

You can click **View all** to see a list of all your assigned items for that day when you have several events or tasks assigned in one day.

The following Step by Step walks you through editing a To do list item:

2.3 STEP BY STEP 1 – EDIT A TO DO LIST ITEM

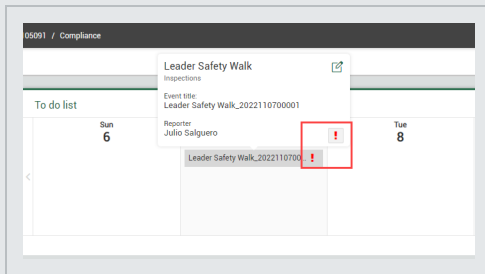

1. In the To do list, click an event or task.
 - A box shows you the item's name and reporter, a High importance icon to mark items of importance, and the Edit icon
2. Click the **Edit** icon.

- The Edit item dialog box opens
3. You can make changes to the following fields, if necessary:
 - Event title
 - Reporter
 - Event date
 - Importance

NOTE

When the Importance icon is red, the item is High importance, which is also reflected in the Events or Tasks pages.

Click **Save**.

2.3.2 SCHEDULE A FORM

You can schedule a form to be filled out for specific event dates. If the event goes beyond the scheduled date, the event state is changed to overdue.

The following Step by Step walks you through scheduling a form from the module landing page.

2.3 STEP BY STEP 2 – SCHEDULE A FORM

1. In the Forms box, click **Schedule form** in the top right corner.
 - The Schedule form dialog box opens
2. Fill out the required fields.
3. You can click the **High importance** icon to flag this event as important.
4. You can click **Schedule** to set this event to repeat daily, weekly, monthly, or yearly and fill out the required fields.

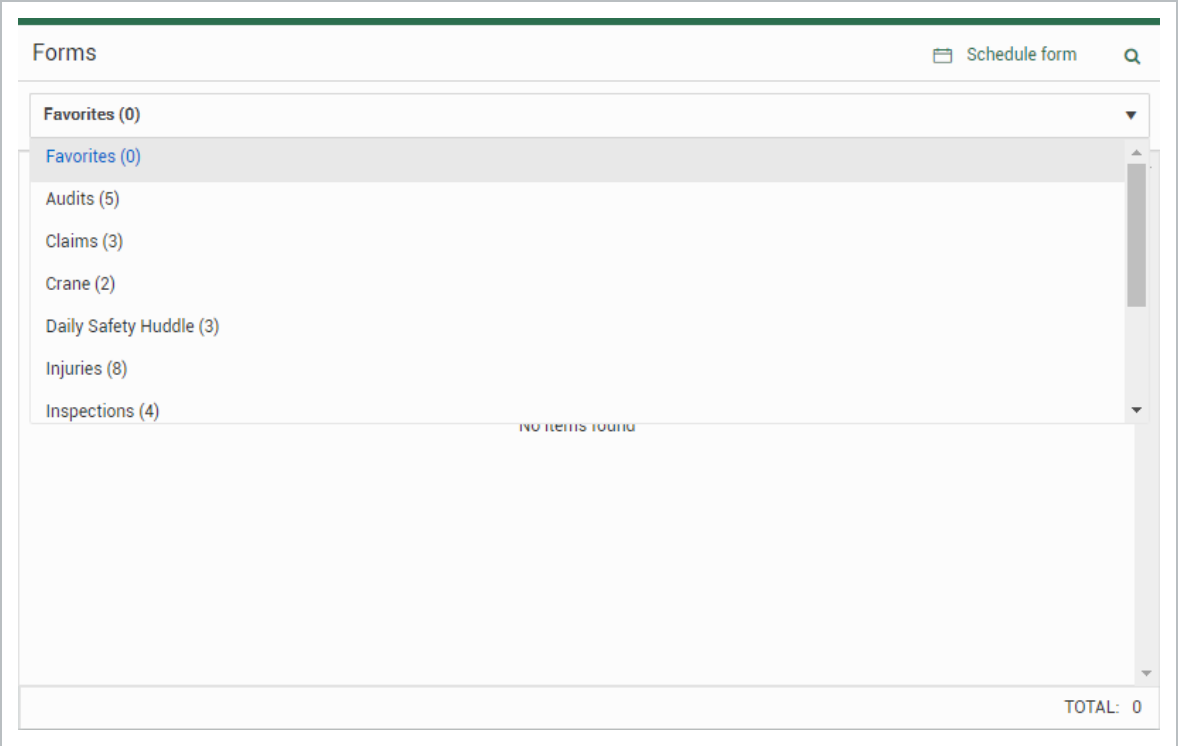

NOTE

If you select the **Exclude weekends** check box, Saturdays and Sundays are greyed-out and will be excluded, even if you already selected those days.

A screenshot of a 'Schedule form' dialog box. The dialog has a title bar with a close button. It contains several fields: 'Form name' and 'Category' are dropdown menus; 'Event title' is a text input; 'Reporter' is a dropdown menu. Below these is a 'Schedule' section with a 'Repeat' dropdown set to 'Weekly', a 'Start date' field with a calendar icon, and a 'Repeat every' field set to '1 week(s)'. A red box highlights the 'Exclude weekends' checkbox, which is checked. Below this are 'End' options: 'After 1 occurrence(s)' and 'On 11/07/2022'. To the right of the 'Repeat every' field is a 'Repeat on' section with checkboxes for S, M, T, W, T, F, S. At the bottom are 'Cancel', 'Save & start new event', and 'Save' buttons.

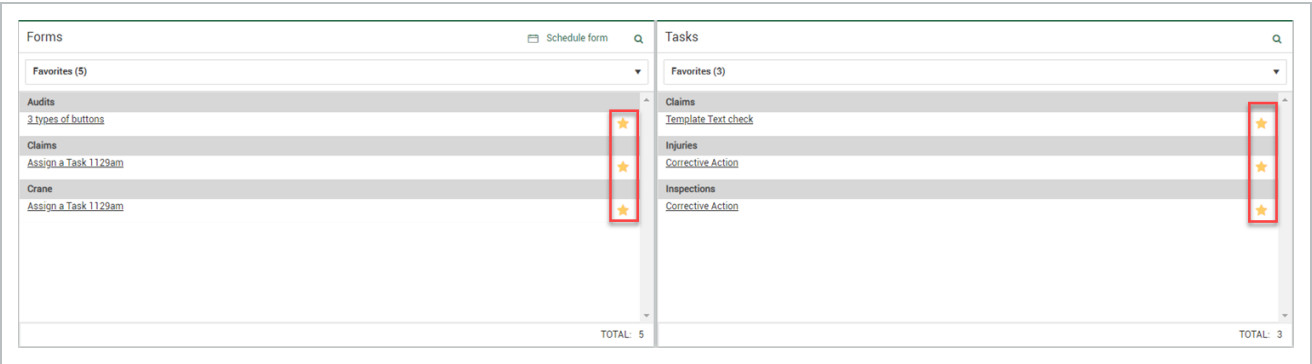

2.3.2.1 FORMS CATEGORIES

In the Module landing page, under Forms, you can select a category for the type of form you need. Only categories that have available templates show in the drop-down menu. The number of templates associated with the category shows next to each category title.

2.3.3 FORM AND TASK FAVORITES

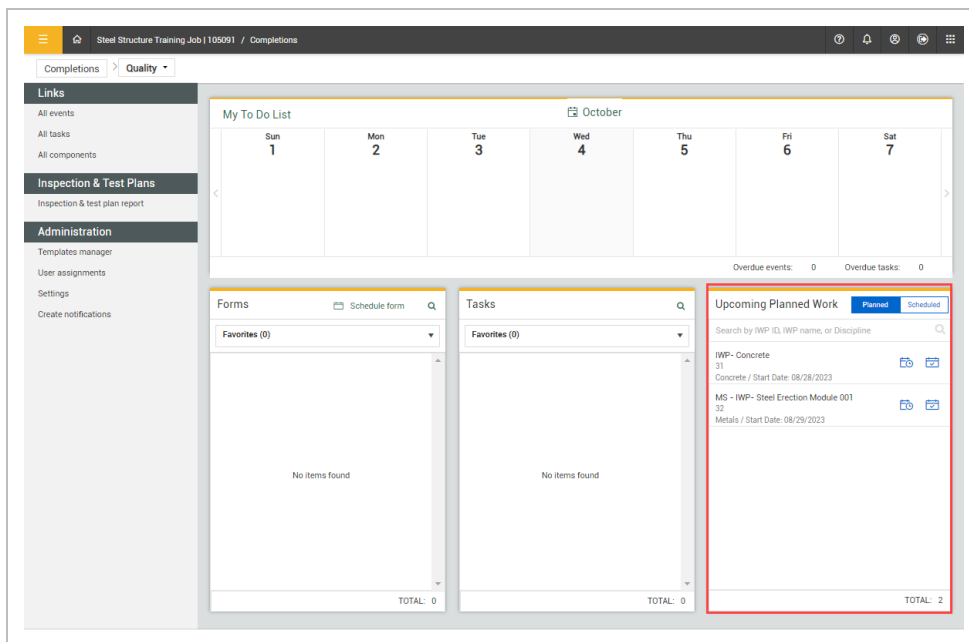

When you open the module, the default view for Forms and Tasks is Favorites. In each category, you can add your favorites by selecting the **Favorite** icon next to each category title. When you add forms to your favorites, they show listed in alphabetical order. To remove from your favorites, deselect the Favorite icon.

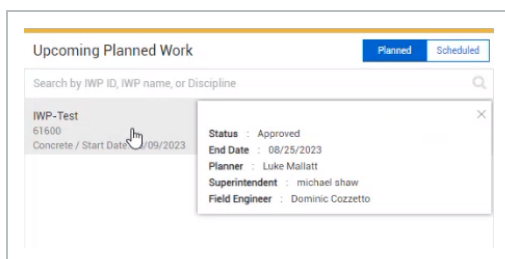

2.4 UPCOMING PLANNED WORK TILE

The IWP widget tile lets you track upcoming planned and scheduled work for InEight Plan IWP components that have been mapped to Inspection and Test Plans. You can schedule events from the IWP widget panel to components that have ITP mapped. For more information, see [Inspection and Test Plans](#). To enable the IWP widget, go to project > Module settings > Project Settings. Inspection & Test Plans and Integrate with Plan components must be enabled before you can enable the IWP widget. For more information, see [Project Settings](#).

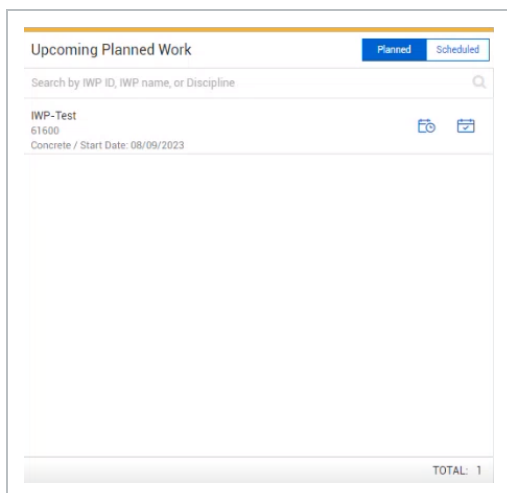

When enabled, the Upcoming Planned Work tile shows in the module landing page.

Click the IWP to show status, end date, planner, superintendent, and field engineer information.

You can schedule IWP forms from the Planned tab, and then mark them as scheduled to move them to the Scheduled tab.

Items marked as Scheduled are listed in the Scheduled tab. You can schedule additional items from the Scheduled tab if needed, or unschedule the item to move it back to the Planned tab.

2.4.1 CONSIDERATIONS

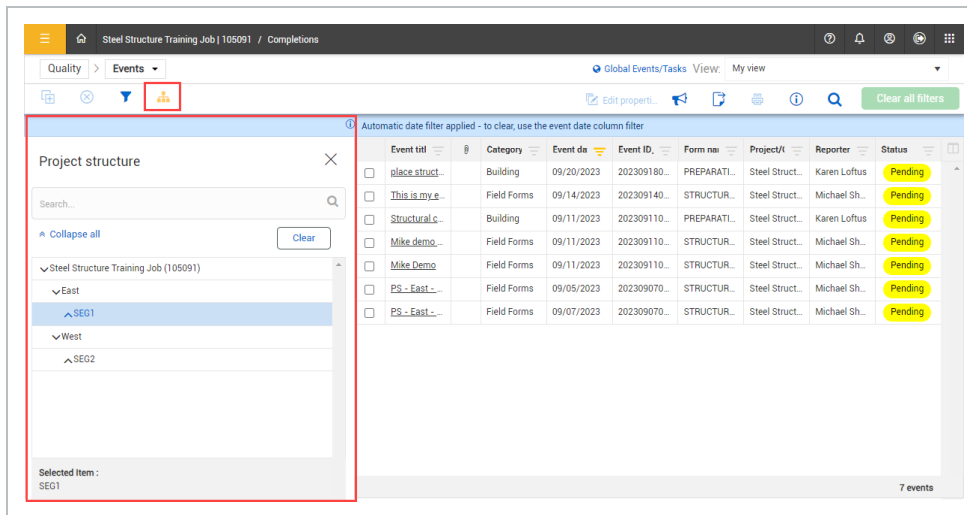

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- Components must first be associated to ITPs in InEight Plan
- IWPs must have a status of Approved or Work started.
- You must add your published template form to Required records – Compliance Forms in the ITP activity.

2.4.2 RELATED INFORMATION

InEight Plan Link activity components in [Work Package Creation](#)

2.5 PROJECT STRUCTURE

You can use the project structure hierarchy to view and filter the events performed on a project structure in the Events page. The relationships in the hierarchy list are defined in InEight Platform in Project values and Project Structure definition.

When the project structure feature is enabled, you can click the **Project structure** icon on the Events page to view the project structure. Component values are shown in the project structure, based on their configuration defined in InEight Plan. For more information, see InEight Plan [Work Package Creation](#).

2.5.1 CONSIDERATIONS

- It is imperative that the Platform project definition and Plan component configuration match exactly for components to show in the structure. For example, when the project structure definition is Area = North and Segment = 1, the Plan component configuration needs to be the same. If the Plan component configuration has an area = South Area and a segment = Segment 1, the component will not show in the structure.
- Commodity and Work Classification project structure values do not exist on a component and should not be used in the project structure definition.
- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

This page intentionally left blank.

CHAPTER 3 – COMPLIANCE SETTINGS AND ADMINISTRATION

3.1 SETTINGS OVERVIEW

Organization and project level settings provide the structure necessary to manage the application successfully.

At the Organization level, you can manage the following:

- Product Settings – Module management and template integrations.
- Module settings – Manage individual module settings and configurations.

At the Project level, you can do the following:

- View Product, Template integration and Module settings configured at the organization level.
- View and manage Roles, User assignments, and Project settings.

3.1.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform, an admin role in the assigned module or modules, or an assignment to the root organization based on permission configuration.
- There are other ways to navigate to the organization or project level settings not mentioned in this document.

3.1.2 STEPS

ACCESS ORGANIZATION LEVEL SETTINGS

1. From the Main menu, go to organization > **Settings**. The organization General Settings page opens.
2. Click the **Compliance** or **Completions** icon on the left navigation menu. The settings page opens to the Product Settings tab.
3. You can click the **Module Settings** tab to open the module tiles page. Click a module to open its settings.

ACCESS PROJECT LEVEL SETTINGS

1. From the project's home page, click **Settings** on the left navigation menu, and then the **Compliance** or **Completions** icon. The settings page opens to the Product Settings tab. In the Product Settings tab, you can view Module management and Template integration settings configured at the organization level.
2. Click the **Module Settings** tab to open the module tiles page.
3. Click a module to open its settings. The Module settings page opens. You can manage roles, user assignments, and project settings.
4. Click the **Project Settings** tab to open the Project Settings page.

CHAPTER 3 – ORGANIZATION LEVEL SETTINGS

As an administrator, you can set up the correct settings at the organization level to manage and organize the application successfully. These settings will apply to all projects in the organization. You can view organization level settings at the project level, depending on your permissions.

Organization level settings include the following:

- Product settings
 - Module management
 - Template integrations
- Module settings
 - Module summary
 - Categories
 - Types
 - Classifications
 - Statuses
 - Email-templates
 - Roles
 - User-assignments
 - Inspection and Test Plans

3.0.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.0.2 STEPS

To navigate to Organization settings, go to steps to access organization level settings in [Settings overview](#).

3.1 PRODUCT SETTINGS

At the organization level, the Product settings page contains settings that apply to the entire application in the following tabs:

- **Module management** - Manage modules for your organization and enable Inspection and Test Plans for individual modules.
- **Template integrations** - Manage templates that integrate with other InEight applications for your organization.

3.1.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.1.2 STEPS

To open Product Settings, see steps to access organization level settings in [Settings overview](#).

3.2 MODULE MANAGEMENT

In Module management you can view the list of available modules. You can filter the module's view using the **Filter** icon. You can also choose from the available columns to update your list view using the **Column chooser** icon.

In each module, you can enable the **Inspection and Test Plans** (ITP) feature. Inspection and Test Plans are disabled by default.

PRODUCT SETTINGS		MODULE SETTINGS	
Module management		Template integrations	
Module name	Description	Secondary module name	Inspection and Test Plans ⓘ
Safety	A module to track and manage safety related business processes.	Safety	<input checked="" type="checkbox"/>
Environmental	A module to track and manage environmental related business processes.	Environmental	<input type="checkbox"/>
Compliance	A module to track and manage compliance related business processes.	Compliance	<input checked="" type="checkbox"/>
Change	A module to track and manage change related business processes.	Change	<input checked="" type="checkbox"/>
Custom	A module to track and manage custom related business processes.	Custom	<input type="checkbox"/>

3.2.1 CONSIDERATIONS

- You can only view available default modules.
- You can filter and update views at the organization level only.

3.2.2 STEPS

To open Module management, see steps to access organization level settings in [Settings overview](#).

3.2.3 RELATED INFORMATION

[Inspection & test plans](#)

3.3 TEMPLATE INTEGRATIONS

In Template integrations you can view, edit, and delete the list of templates created in the form builder.

3.3.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

- Currently template integration only integrates with InEight Change tasks.
- You can only edit and delete integration templates at the organization level.
- You cannot add new integration templates in this section.

3.3.2 STEPS

To open Template integrations, see steps to access organization level settings in [Settings overview](#).

EDIT A TEMPLATE

1. Click the Templates Integration title. The Edit template integration dialog box opens.
2. Complete your edits, and then click **Save**.

3.3.3 RELATED TOPICS

3.4 MODULE SETTINGS

Configuring module settings at the organization level provides the structure necessary to organize and manage the application successfully. In Module settings, you can configure:

- Module summary
 - Configurations
- Categories
- Types
- Classifications
- Statuses
- Email templates
- Roles
- User assignments
- Inspection & Test Plans

In settings, select the **Module Settings** tab, and then a module to open its settings.

The Activate module toggle can be used to activate or deactivate the module for the entire InEight product portfolio, organization, and project. Each module is self-contained and does not share

information with the other modules. The changes made to a module will be shown throughout the product portfolio, module page, tabs, landing page and mobile device.

3.5.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To activate the module, you must select at least one module organization, a category, and a published template.
- To make the module available, you must select the **Activate module** toggle.

3.5.2 STEPS

To navigate to Module summary, go to steps to access organization level settings in [Settings overview](#).

To save any changes in Module summary, click **Save**.

3.6 CONFIGURATIONS

On the Module summary tab, you can configure additional settings in Configurations. Each link shows an information dialog box you can hover over for more details.

The screenshot shows the 'Module summary' page. On the right side, there is a 'Configurations' section highlighted with a red box. This section contains five links, each with a gear icon and an information icon: 'Alternate hierarchy', 'Automatic user assignments', 'Language settings', 'Module organization', and 'Reporting tags'. The main form on the left includes fields for 'Module name' (containing 'Safety'), 'Description' (containing 'A module to track and manage safety related business processes.'), 'Email address' (containing 'InEight.Mail@INEIGHT.COM'), and an 'Activate module?' toggle which is currently turned on.

Configuration	Description
Alternate hierarchy	Future children assignments applied to organization level nodes on the default organization or project structure are

Configuration	Description
	applied to the child project per their additional relationship.
Automatic user assignments	Automatically add users from InEight Platform into Compliance/Completions.
Language settings	Select which languages you want to use in this module.
Module organization	Include or exclude organizations or project in the structure from seeing the current module.
Reporting tags	Secure information displayed in reports.

3.6.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- Configuration settings must be done at the organization level.

3.6.2 STEPS

To go to Configurations, see steps to access organization level settings in [Settings overview](#).

3.7 ALTERNATE HIERARCHY

An alternate hierarchy is separate from the default organization and project hierarchy in InEight Platform. You can set up an alternate hierarchy when you need to share templates and user permissions across projects that do not follow the default hierarchy. For example, if your default hierarchy is organized into legal entities for financial reporting purposes, you can create an alternate hierarchy based on project locations. A project in the infrastructure division might need to share templates and user permissions with a project in the Energy division because both are in the Western region.

To set up an alternate hierarchy, you must perform the following steps:

1. Define hierarchy attributes in Platform.
2. Associate hierarchy attributes at the project level with other projects or organizations.
3. Extend templates and user permissions between future child projects or organizations via hierarchy attributes in Completions organization settings.

3.7.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.7.2 STEPS

To navigate to Alternate hierarchy, see steps to access organization level settings in [Settings overview](#).

DEFINE ALTERNATE HIERARCHY ATTRIBUTES AT THE ORGANIZATION LEVEL IN PLATFORM.

1. From the Main menu, go to organization > **Settings**. The organization's Home Page opens.
2. Click the **General** icon on the left navigation menu, and then click the **Attribute Definitions** tab.
3. Click the **Add** icon. The Add attribute side panel opens.
4. Enter the required fields.

NOTE For hierarchy purposes, the Data type field is most often set to text or data. When the type is set to Data, you must select a data source.

NOTE In a location-based hierarchy example, an attribute might be named Region, Data type set to Data, Data source set to Organization, and Category set to Location, which lets you associate organizations with regions.

ASSOCIATE ALTERNATE HIERARCHY ATTRIBUTES AT THE PROJECT LEVEL

1. From the Main menu, go to **All projects & organizations**.
2. Select the check box next to the project, and then click the **Edit project** icon.
3. Select the **Attributes** tab. For each attribute you want to associate, select an organization from its drop-down list or enter a project ID in its field, depending on the attribute's data source.
4. Click **Save**.

NOTE

In a location-based hierarchy example, you might associate an attribute named Region with an organization that represents the Western region. If you set this association in a project in the infrastructure division of your default hierarchy, you are saying that project is also part of the Western region in an alternate location-based hierarchy.

APPLY ALTERNATE HIERARCHY TO TEMPLATES AND USER PERMISSIONS

1. On the Module summary tab, click **Alternate hierarchy** under Configurations. The Alternate hierarchy dialog box opens.

2. Select attributes from the drop-down lists for user permissions and template associations.

NOTE

User permissions and template associations are applied to all future child organizations or projects of the attributes you select. If you remove the attributes, the associations themselves are not removed.

NOTE

In the example of a location-based hierarchy, if you add the Region attribute to these fields, for projects that are both associated with the Western region, templates and user permissions will be automatically assigned to users in future children of the Western region organization.

3.8 AUTOMATIC USER ASSIGNMENTS

The Automatic user assignments configuration lets you save administrative setup time by automatically assigning a Compliance or Completions role and categories to all InEight Platform users.

Users will need to be assigned a role and a Project assignment in Platform, and then they will automatically get the following from automatic user assignments:

- User assignments for the role and category you provide.
- Assignment into any project they are related to in Platform.

The updates run nightly.

3.8.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

Automatic user assignments will not be assigned when organization level is chosen as the assignment in InEight Platform.

3.8.2 STEPS

To navigate to Automatic user assignments, see steps to access organization level settings in [Settings overview](#).

ADD AUTOMATIC USER ASSIGNMENTS

1. Click **Automatic user assignments** under Configurations. The Automatic user assignments dialog box shows.

2. Select a role and categories from the drop-down menus, and then click **Save**.

3.9 LANGUAGE SETTINGS

You can select different languages to use in modules. All user-configurable fields can be translated into the languages you select.

After you configure your languages, to translate user-configurable fields, click the **Manage Translations** icon to select a language from the drop-down list.

To apply translations to a template, use the import function in a template's Properties tab. For more information, see [Template translation](#).

3.9.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.9.2 STEPS

To navigate to Language settings, see steps to access organization level settings in [Settings overview](#).

ADD A LANGUAGE

1. Click Language settings under Configurations. The Language settings dialog box shows.

2. Click in the **Select which languages you would like to use with this module** field to view the language drop-down list, and then select a language or languages.
3. Click **Save**.

3.9.3 RELATED INFORMATION

[Template Translation](#)

3.10 MODULE ORGANIZATION

The Module organization lets you exclude any organization or project from seeing the current module. By default, all organizations and projects are included. When you exclude organizations or projects, you will not see the current module in those organizations or projects. When you exclude a project, the project cannot be used in user assignments or templates.

You might want to exclude the safety module from your project, if for example, the project is using a different software to keep track of safety data.

3.10.1 CONSIDERATIONS

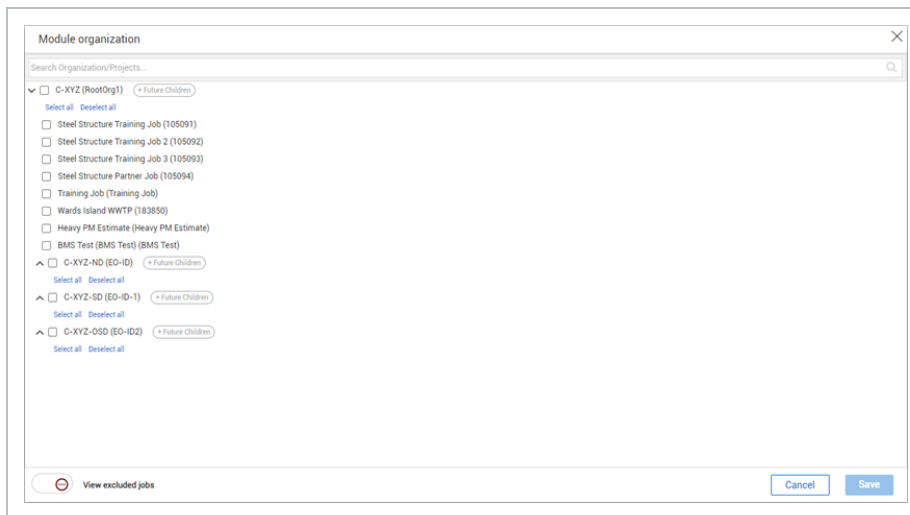

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.10.2 STEPS

To navigate to Module organization settings, see steps to access organization level settings in [Settings overview](#).

EXCLUDE PROJECTS OR ORGANIZATIONS

1. Click **Module organization** under Configurations. The Module organization dialog box opens. The hierarchy shown is your organization's operational structure.

**NOTE**

You can expand and collapse organizations to view their projects.

2. Uncheck the organization or project to exclude it from seeing the module, and then click **Save**.

To select or deselect all projects in the organization click the **Select all** or **Deselect all** buttons. You can also click the **+Future Children** button to automatically include future children projects. When selected, the button will turn green.

To view all excluded organizations or projects, enable the **View excluded jobs** toggle.

3.11 REPORTING TAGS

Within Compliance or Completions individual modules, you can configure reporting tags to secure information shown in reports. Reporting tags drive permissions when running reports. If a question is assigned a reporting tag and you are not assigned that reporting tag, you cannot see the response to the question in a report. Reporting tags are defined per module.

After you add reporting tags, you can assign reporting tags to users in Module settings > **User assignments**.

When you build your form, you can define who can see the question reporting data in Template manager > Form builder > **Access** section.

3.11.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.11.2 STEPS

To navigate to Reporting tags, see steps to access organization level settings in [Settings overview](#).

ADD A REPORTING TAG

1. Click the **Add tag** icon.
2. Enter the reporting tag name, and then click **Save**.

DELETE A REPORTING TAG

1. Select a tag or tags.
2. Click the **Delete tag** icon.

3.12 CATEGORIES

You can create and manage categories in your organization to divide your templates into topics that have shared characteristics. Categories are module specific and can be applied as another layer of permissions to drive security within the module.

Each template must be associated with at least one category. You can associate categories to a template in Template Properties > **Category association**. In the Templates manager page, under **Filters**, you can also filter your templates by categories.

In User assignments, you must designate categories as part of the assignment. For more information, see [User assignments](#).

By creating categories, you can partition the module into smaller areas that can help define the module's purpose.

For example, you could break your module down into four different categories, such as:

- Work types
- Disciplines
- Processes
- Subcontractors

Categories can be created for anything you need based on your company's business processes.

3.12.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To activate the module, you must add at least one category created, in addition to a published template.
- You cannot delete categories that are designated in user assignments or used in published templates.

3.12.2 STEPS

To navigate to Categories, see steps to access organization level settings in [Settings overview](#).

ADD A CATEGORY

1. Click the **Add category** icon.
2. Enter the category name, and then click **Save**.

DELETE A CATEGORY

1. Select a category or categories.
2. Click the **Delete category** icon.

3.13 TYPES

3.13.1 SUMMARY

Type values can be used to classify an event or task for association to filters and reporting. They allow you to add identifiers to a template to further define the activity. These are typically associated with identifying the risk of the event or task. Defining types lets you bring awareness to those risks during the closing of a phase in your project.

Types can be defined and added in the Module settings > **Types** tab. They can then be used in the Template Managers properties section, and on the reference question type.

Module summary Categories **Types** Classifications Statuses Email templates Roles Use

Types

Create any desired number of types for the module. ⓘ

- ☐ Types
- ☐ Type A
- ☐ Type B
- ☐ Type C

In Templates manager, when creating a new form, the Types option is available to select or deselect in the Create new form page. Select the option to associate types to the template. When selected, the Types drop-down menu shows where you can then select from the list of defined types and make them available to use in the template form.

Create new form

Form name: Types template form

Description: Form to use Types feature

Category association: ☒ Types

Organization association: C-XYZ (RootOrg) + Future Children

Select all Deselect all

Cancel Create

When building the form, Types is automatically populated as a section header.

Like other question types, you can create a chain of associated events, setup default values, associate classifications, add form details, among other options, depending on your business process. After the template form is created, you can enable or disable the Type option in the template properties tab.

When filling in the form, the types option shows as a question. You can select from the pre-defined list.

3.13.2 CONSIDERATIONS

You must have permission Create and edit types.

3.13.3 STEPS

To navigate to Types, see steps to access organization level settings in [Settings](#).

To add a Type value:

1. Click the **Add** icon.
2. Enter the Type name.
3. Click **Save**.

To delete a Type value:

1. Select a type or types.
2. Click the **Delete** icon.

3.14 CLASSIFICATIONS

Classifications are used to further classify forms and associate them to filters and reporting, as well as facilitate logic within a form. You can use classifications on any template in the module.

You can use classifications to apply logic to template headers.

The screenshot displays the 'Finalize quality review process' task builder interface. The left sidebar contains a 'Logic' section, which is highlighted with a red box. This section includes a dropdown menu labeled 'Show this section for the following classifications' and an 'Integration tag' field. The main area of the interface shows the task configuration, including a 'Due date' field, a 'Name of person conducting the next quality review' field, a 'Date of upcoming quality review' field, and a 'Quality step' field. The interface also includes a 'Draft' button in the top right corner and a 'Save' button in the bottom right corner.

Go to Template creation > Form and Task Builder – Build Tab > **Classifications** section for more information.

3.14.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- You cannot delete classifications used in published templates.

3.14.2 STEPS

To navigate to Classifications, see steps to access organization level settings in [Settings overview](#).

ADD A CATEGORY

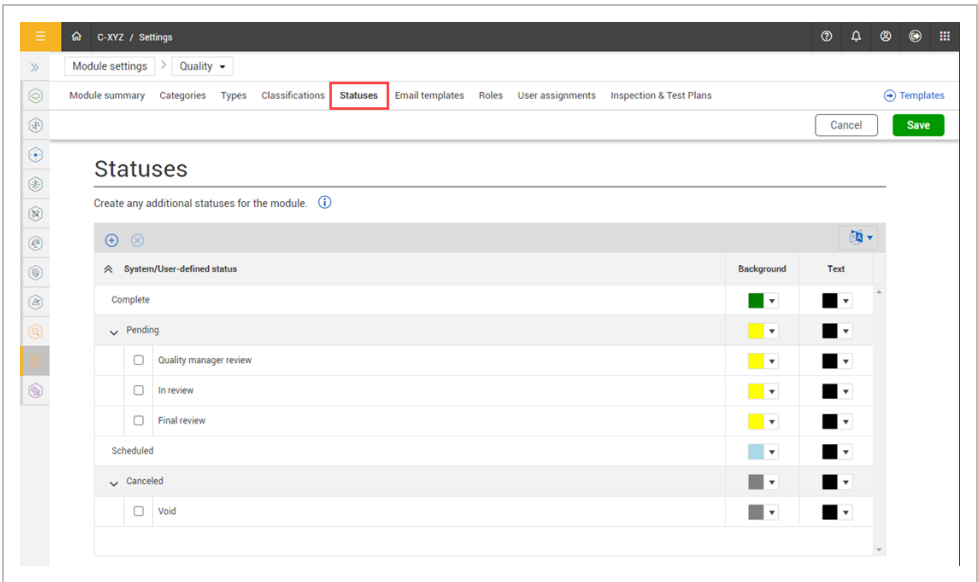

1. Click the **Add Classification** icon.
2. Enter a name, and then click **Save**.

DELETE A CATEGORY

- 1. Select a Classification or Classifications.
- 2. Click the **Delete classification** icon.

3.15 STATUSES

Statuses represent the condition of a form or task. Default statuses of complete, pending, scheduled, and canceled are applied to each module. New sub statuses can be created under Complete, Pending, and Canceled statuses to facilitate your business processes. You can also change or add background and text colors to statuses to customize your view.

You can apply statuses to a template, and when used as an option on the perform form, either through a button or form flow, it will show on the Events and Tasks pages.

Event title	Category	Event date	Event ID	Form name	Reporter	Status	State	Classifications	Types
Safety Conve...	District / Pr...	08/29/2023	202303310...	Safety Conversa...	Randall Ross	Scheduled	Overdue

The following table provides more information on the default statuses.

Status	Notes when:	Customizable	Permissions	Can Be Overdue	Editable
Complete	Form or Task is completed, and workflow is done.	Yes	It has permissions tied to it such as when completed form or task locks and cannot be reopened by certain roles.	No	Permission based
Pending	Form or Task is started and is in this status until completed.	Yes	All roles have permission to this status.	Yes	x
Scheduled	An Event or Task has been scheduled.	No	All roles have permission to this status.	Yes	x
Canceled	An Event or Task was	Yes	All roles have permission to this	No	x

Status	Notes when:	Customizable	Permissions	Can Be Overdue	Editable
	started but there is no intent to complete it.		status.		

3.15.0.1 DIFFERENCES BETWEEN A STATE AND A STATUS

The state of a form or task is another indication of their condition that is different from a status. Unlike statuses, states cannot be changed or customized. States are driven actions you take in forms or tasks. For example, they let you know that a work item is overdue regardless of its status in your workflow or process.

The following table provides more information about states:

State	Notes when:	Work item types
In Process	Form or Task is pending.	Forms and tasks.
Complete	Form or Task is complete.	Tasks only.
Overdue	Form or task workflow or due date has passed.	Forms and tasks.
Saved	Task is not yet assigned.	Tasks only.
Scheduled	Form or task has been scheduled.	Forms and tasks.
Canceled	Form or task was started but there is no intent to complete it.	Forms and tasks.

3.15.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- The standard statuses cannot be renamed or deleted.

3.15.2 STEPS

To navigate to Statuses, see steps to access organization level settings in [Settings overview](#).

3.16 EMAIL TEMPLATES

You can apply system generated email templates to send to responsible parties when events and tasks are assigned, overdue, or reversed, and to send reminders of upcoming events and tasks before they are due.

Name	Description	Created by	Created on	Last updated on	Last updated by
Assigned event	Assigned event template	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account
Assigned task	Assigned task template	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account
Overdue event	Overdue event template	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account
Overdue Event workflow step	Overdue Event workflow step tem...	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account
Overdue task	Overdue task template	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account
Reminder of upcoming event	Reminder of upcoming event tem...	Ineight Service Account	06/27/2023	06/27/2023	Ineight Service Account
Reminder of upcoming task	Reminder of upcoming task templ...	Ineight Service Account	06/27/2023	06/27/2023	Ineight Service Account
Reversed Event Workflow Notifica...	Reversed Event Workflow notifica...	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account

The system-generated emails leverage predefined templates that are configurable by module administrators.

Template	Description
<ul style="list-style-type: none"> Assigned event Assigned task 	Emails are sent to responsible parties when you assign a task or event.
<ul style="list-style-type: none"> Overdue event Overdue Event workflow step Overdue task. 	Emails are sent to responsible parties when their assigned event, task, or workflow step has passed its due date.
<ul style="list-style-type: none"> Reminder of upcoming event Reminder of upcoming task 	Emails are sent to responsible parties prior to the event or task due dates.
<ul style="list-style-type: none"> Reversed Event Workflow Notification 	Emails are sent to responsible parties when a workflow is reversed back to a step already completed by the responsible party.

You can edit the following items in the email templates:

- Template name.
- The body of the email, including the font.
- Change the email language.
- Add variables so that users can enter information such as reporter names or event titles into emails. To add a variable, type @, and then select an option from the drop-down list.
- Click the **Restore default template** button to restore a template to its original state.

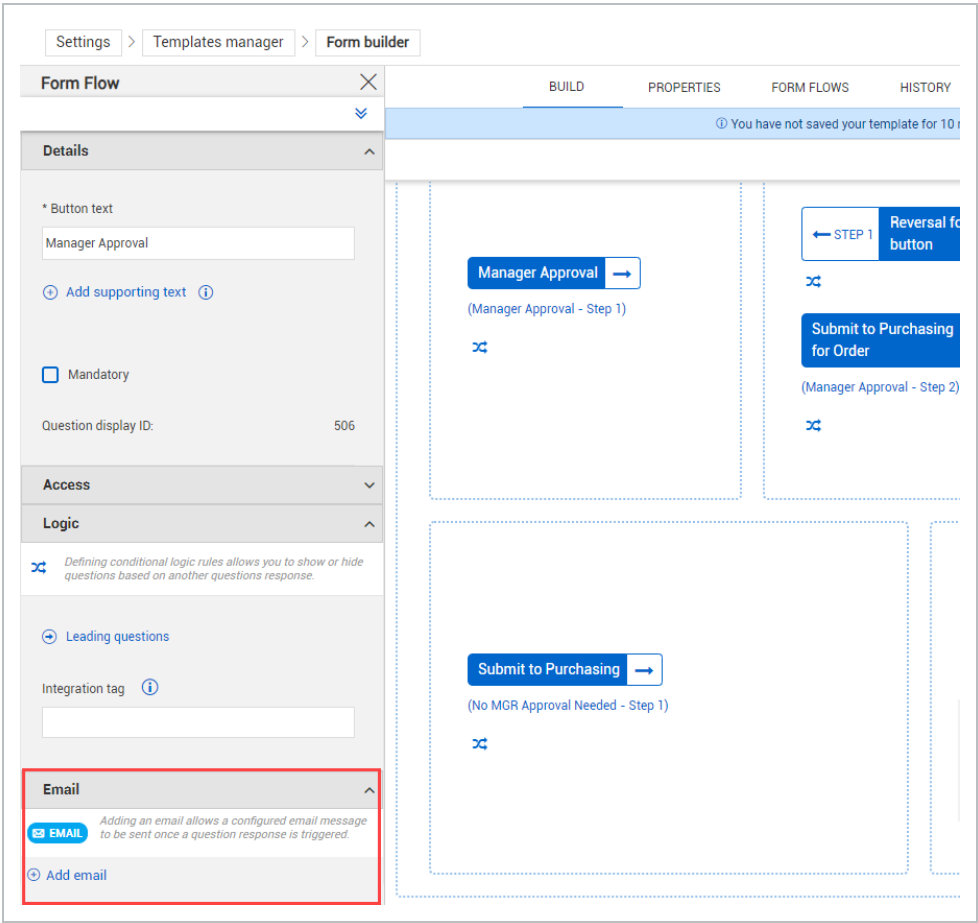

Click the **Restore default template** button to restore a template to its original state.

3.16.0.1 ASSIGNED, OVERDUE, AND REVERSED EVENT WORKFLOW TEMPLATES

When building your template, you can use Email templates in the following form questions:

- Button
- Form Button
- Form Flows
- Number
- People picker
- Text questions

Question types that support email notifications can be configured by selecting the question and expanding the Email option on the question property panel.

3.16.0.2 REMINDER OF UPCOMING EVENT AND UPCOMING TASK

The feature can be enabled on a template-by-template basis when creating a new form or in existing templates.

When creating a new form, select **Enable reminder notifications**, and then enter the number of days of the reminder prior to the due date.

Create new form

Add template integration

NOTE

The default reminder notification is 7 days, and the maximum number of days allowed is 99. You will not receive a reminder when the number of notification days is past the due date.

3.16.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.16.2 STEPS

To navigate to Email templates, see steps to access organization level settings in [Settings overview](#).

3.17 ROLES OVERVIEW

Roles and permissions are maintained in both InEight Platform and the Compliance or Completions applications respectively.

In Compliance or Completions, you can configure roles and permissions in the Roles tab. You can add, copy, delete, and edit roles.

When creating or updating a role, you can configure permissions for the following items:

- Module
- Events
- Roles/Users
- Templates
- Project Settings

The History tab shows in existing roles.

3.17.0.1 ORGANIZATION AND PROJECT'S HOME PAGE ACCESS TO APPLICATION

The Compliance and Completions icons show in your home's landing page left navigation menu and tiles regardless of permissions.

When you click to open Compliance or Completions and do not have the applicable permissions assigned, a message shows requesting you to coordinate permissions setup with your administrator.

3.17.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.17.2 STEPS

To navigate to Roles, see steps to access organization level settings in [Settings overview](#).

3.17.3 RELATED INFORMATION

InEight Platform [Roles and permissions](#)

3.18 INEIGHT PLATFORM PERMISSIONS

InEight Platform account administrators must have Level 3 – Account Admin permissions and full access to all modules to manage and set up Compliance or Completions roles and permissions. By default, these permissions are assigned to the Account Administrator and Dev/Ops roles. These roles should be assigned with discretion.

In Platform, you can access permissions by navigating to Main menu > Suite administration > **Roles and permissions**. Permissions for Compliance and Completions are found in the **Organization and project** drop-down menu.

NOTE

There is no drop-down menu for the Compliance or Completions application in Platform Permissions.

During initial setup, a Platform role lower than level 3 will not have access to Compliance or Completions. Other permissions to access Compliance or Completions outside of the Level 3 role need to be configured and obtained within Compliance or Completions.

Platform level 3 roles are set up to edit all modules. These settings override all other Compliance or Completions level permissions. There are no settings or permissions in Platform that will allow a level lower than a Level 3 to access Compliance or Completions as an administrator.

A level 3 user must be the first user to log into the application to set up users and configure the module or modules or set up a module administrator in the application to perform these tasks. It is common practice for level 3 administrators to set up additional administrative roles in Compliance or Completions.

The following table shows examples of InEight Platform's user roles and definitions:

Role	Definition	Example
Platform account administrators	Level 3 - Account Admin - with edit and view permissions of all modules - Highest level access.	<ul style="list-style-type: none">• Account administrator
Compliance or Completions product Administrator	Level 3 - Responsible for creating or modifying the roles for Compliance or Completions Admins within each module.	<ul style="list-style-type: none">• Quality Dept Administrator• Compliance or Completions Product Administrator

3.18.1 CONSIDERATIONS

- In general, the average Compliance or Completions user does not need Platform permissions to access the product. Users (other than a level 3 user) are maintained directly in Compliance or Completions. A level 3 user assignment overrides all Compliance and Completions-level assignments.
- The level 3 role must be maintained correctly in Platform to add subsequent users in Compliance or Completions.

3.18.2 RELATED INFORMATION

InEight Platform [Roles and permissions](#)

3.19 ROLES

The setup and design of Compliance and Completions roles and permissions are different than any other of the InEight cloud platform applications. A Level 3 – Account Admin role, with full permissions of all modules must be present and maintained correctly in Platform for subsequent users to get added to the Compliance and Completions application. The level 3 administrator can set up module administrators and configure modules according to business needs.

The image below shows the default seated roles:

Name	Description	Created by	Created on	Last updated on	Last updated by
<input type="checkbox"/> Module administrator	Module administrator - Pr...	Service Account	11/04/2019	06/26/2023	Julio
<input type="checkbox"/> Read-only	Read-only - Allows users r...	Service Account	11/04/2019	11/04/2019	Service Account
<input type="checkbox"/> Reporter	Reporter - Allows performi...	Service Account	11/04/2019	11/04/2019	Service Account

Name	Definition
Module	Full access to all the permissions.

Name	Definition
administrator	
Reporter	A general role that allows the execution of forms in any category or project assigned. It does not allow manipulation of other users, role creation, or template creation.
Read-only	A general role that allows the viewing of events and tasks in assigned categories or projects. It does not allow manipulation of other users, roles, templates, events, or tasks.

Role permissions are module specific. They are comprised of permissions that you can perform in a specific module. You can create different roles with specific permissions as needed to facilitate any process you plan to do in a module. When you create a new role, it will default to Reporter role permissions. After you create a role, you can update its permissions.

The following table shows examples of user roles and definitions:

Role	Definition	Example names
Module Administrator	Responsible for administering Compliance or Completions daily per the organizational assignments.	<ul style="list-style-type: none"> Compliance or Completions Module administrator
Other general roles	Specific job roles with limited access.	<ul style="list-style-type: none"> Form Creator Crane Manager

NOTE In User assignments, you must designate roles as part of the assignment. The users in the assignment will inherit the permissions in the designated role. For more information, see [User assignments](#).

The roles tab page shows the following role columns:

- Name
- Description
- Created by
- Created on

- Last Updated on
- Last updated by

You can filter the columns and use the Column chooser to customize your view.

3.19.1 STEPS

To navigate to Roles, see steps to access organization level settings in [Settings overview](#).

ADD A NEW ROLE

1. Click the **Add role** icon. The Add role dialog box opens.
2. Fill in the required role name and optional description.
3. Select the designated permissions, and then click **Save**.

COPY OR DELETE A ROLE OR ROLES

1. Select the checkbox next to the role or roles.
2. Click the **Copy role** icon to copy or the **Delete role** icon to delete.

EDIT A ROLE

1. Click the role name link. The Edit role dialog box opens.
2. Edit the role, and then click **Save**.

3.19.2 RELATED LINKS

InEight Platform [Roles and permissions](#)

3.20 MODULE PERMISSIONS

Within Compliance or Completions individual modules, you can configure permissions for the module. To go to Module permissions, go to Module settings > **Roles**. Select **Add role** or click an existing role to

edit the role, and then select the **Module** tab.

The screenshot shows the 'Edit role' dialog box. At the top, there are fields for 'Name' (containing 'Module administrator') and 'Description' (containing 'Module administrator - Provides access to all administration features'). Below these are tabs: 'MODULE', 'EVENTS', 'ROLES/USERS', 'TEMPLATES', 'PROJECT SETTINGS', and 'HISTORY'. The 'MODULE' tab is selected and highlighted with a red box. Under the 'MODULE' tab, there is a list of permissions with checkboxes: 'Edit module summary', 'Edit email templates', 'Create notifications', 'Create and edit categories', 'Manage module organization exclusions', 'Create and edit types', 'Create and edit statuses', and 'Create and edit classifications'. All checkboxes are checked. At the bottom left, there is a checkbox labeled 'Make this role read only' with a help icon. At the bottom right, there are 'Cancel' and 'Save' buttons. The 'Save' button is highlighted.

The following table is a summary of permissions in the Module tab:

Permission	Location	Allowed actions
Edit module summary	Module settings > Module summary tab. Compliance/Completions landing page. Module landing page.	<ul style="list-style-type: none"> Edit Module name and description. Activate and deactivate module toggle. Manage Configurations. View module tiles according to your assignments. View side menu Settings link.
Edit email templates	Module settings > Email templates tab. Template manager > Form builder or Task builder .	<ul style="list-style-type: none"> Edit email templates. Use Email templates in form questions.
Create notifications	Events and tasks lists (Project level).	<ul style="list-style-type: none"> Create notifications for projects, roles, and users

Permission	Location	Allowed actions
		in your assignments.
Create and edit categories	Module settings > Categories tab.	<ul style="list-style-type: none"> Add and delete categories.
	User assignments.	<ul style="list-style-type: none"> Designate categories.
	Template properties.	<ul style="list-style-type: none"> Associate categories.
Manage module organization exclusions	Module settings > Module summary > Configurations > Module organization .	<ul style="list-style-type: none"> Exclude or include organizations or projects.
Create and edit types	Module settings > Types tab.	<ul style="list-style-type: none"> Add and delete types.
	Template manager > Create new form .	<ul style="list-style-type: none"> Select or deselect Type drop-down option.
	Template manager > Form builder > Properties tab.	<ul style="list-style-type: none"> Select or deselect Types option.
Create and edit statuses	Module settings > Statuses tab.	<ul style="list-style-type: none"> Add statuses. Edit statuses background and text color. Delete a status.
	Form or task.	Edit statuses when performing an event.
Create and edit classifications	Module settings > Classifications tab.	Add classifications. Delete Classifications.
	Template manager > Form builder or Task builder .	Select classifications in template headers under the Logic drop-down.

3.20.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see [Read only role](#).

3.20.2 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.21 EVENTS PERMISSIONS

Within Compliance or Completions individual modules, you can configure permissions for Events. To go to Events permissions, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select the **Events** tab.

The screenshot shows a 'Edit role' dialog box with a close button (X) in the top right corner. At the top, there are two input fields: 'Name' (containing 'Module administrator') and 'Description' (containing 'Module administrator - Provides access to all administration features'). Below these is a tabbed interface with five tabs: 'MODULE', 'EVENTS' (which is selected and highlighted with a red rectangle), 'ROLES/USERS', 'TEMPLATES', and 'PROJECT SETTINGS'. The 'EVENTS' tab contains a list of permissions, each with a checkbox and a help icon (i). The permissions are: 'Edit completed events/tasks' (checked), 'Delete events/tasks' (checked), 'View deleted categories in the event/task list' (checked), 'Edit event/task properties' (checked), 'Copy events/tasks from event/task list' (checked), 'Edit event/task proj/org' (checked), 'Edit event/task category' (checked), 'Edit event/due date' (checked), 'Edit event/task status' (checked), 'Edit event/task Reporter/Responsible party' (checked), 'Edit event/task title' (checked), 'Only provide access to own forms/tasks on the event/task list' (unchecked), 'Categories' (with an empty text input field), 'Allow access to event/task history' (unchecked), and 'For the following categories' (with an empty text input field). At the bottom left, there is a checkbox 'Make this role read only' (unchecked). At the bottom right, there are 'Cancel' and 'Save' buttons.

The following table is a summary of permissions in the Events tab:

Permission	Location	Allowed actions
Edit completed events/tasks	Events and Tasks lists Event (inside)	<ul style="list-style-type: none">• Reopen a completed event/task to pending status.• Use the Complete button after a

Permission	Location	Allowed actions
	Task (inside)	closed event or task is edited.
Edit event/task properties (The sub-permissions below can be selected and deselected after Edit event/task properties is selected.)	Events list Task list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit and event or task in your assignments using the Information slide-out panel.
	Form flow panel for event.	<ul style="list-style-type: none"> Edit user on the current active step.
<i>Edit event/task proj/org</i>	Events list Tasks list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the project and organization field of any event or task in your assignments using the Information slide-out panel.
<i>Edit event/task category</i>	Events list Tasks list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the Category field of any event or task in your assignments using the Information slide-out panel.
<i>Edit event/task due date</i>	Events list Tasks list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the Event date and Due date fields of any event or task in your assignments using the Information slide-out panel.
<i>Edit event/task status</i>	Events list Task list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the Status field of any event or task in your assignments using the Information slide-out panel.
<i>Edit event/task Reporter/Responsible party</i>	Events list Task list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the Reporter and Responsible party fields of any event or task in your assignments using the Information slide-out panel.
<i>Edit event/task title</i>	Events list Task list Event (inside) Task (inside)	<ul style="list-style-type: none"> Edit the title field of any event or task in your assignments using the Information slide-out panel.

Permission	Location	Allowed actions
Delete events/tasks	Events list Task list	<ul style="list-style-type: none"> Delete any event in the assignments area.
Copy events/tasks from event/task list	Events list Task list	<ul style="list-style-type: none"> Copy an event or task. You cannot copy an event with form flow.
View deleted categories in the event/task list	Events list Task list	<ul style="list-style-type: none"> Filter to show inactive categories.
Only provide access to own forms/tasks on the event/task list (Select one or more categories from the drop-down list)	Event list Task list	<ul style="list-style-type: none"> View only events where you are a reporter. You cannot see any other events or tasks you did not initiate as a reporter.
Allow access to event/task history (Select one or more categories from the drop-down list)	Event and task information panel	<ul style="list-style-type: none"> View the history of the event or task.

The **Make this role read-only** option is available in all tabs, except for the History tab. See [Read-only role](#) for more information.

- Considerations
- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see [Read-only role](#).

3.21.1 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.22 ROLES AND USERS PERMISSIONS

Within any Compliance or Completions individual modules, you can configure roles and user permissions. To go to Roles/Users permissions, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select the **Roles/Users** tab.

The following table is a summary of permissions in the Roles/Users tab:

Permission	Location	Allowed actions
Create and edit roles	Roles	<ul style="list-style-type: none">• Add, edit, copy, and delete roles.
	Add and edit role dialog box	<ul style="list-style-type: none">• Add and edit name.• Add and edit description.• Add and edit all permissions.
Create and edit user assignments (The sub-permissions below can be selected and deselected after Edit event/task properties is selected)	Compliance/Completions Landing page	<ul style="list-style-type: none">• View tiles according to your assignments.
	User assignments	<ul style="list-style-type: none">• Add, remove and transfer user assignments.• Add reporting tags.
	Compliance/Completions landing page	<ul style="list-style-type: none">• View module tiles according to your

Permission	Location	Allowed actions
	Module landing page	assignments. <ul style="list-style-type: none"> View side menu User assignments link.
Restrict the ability to assign users to the following roles:	Add user assignments wizard Remove user assignments	Restrict roles available to create and edit user assignments. Remove icon is available only from roles list associated with the permissions.
Restrict the ability to assign users to only the following reporting tags:	Add reporting tags dialog box in User assignments	Can only assign the selected reporting tags to users.

3.22.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

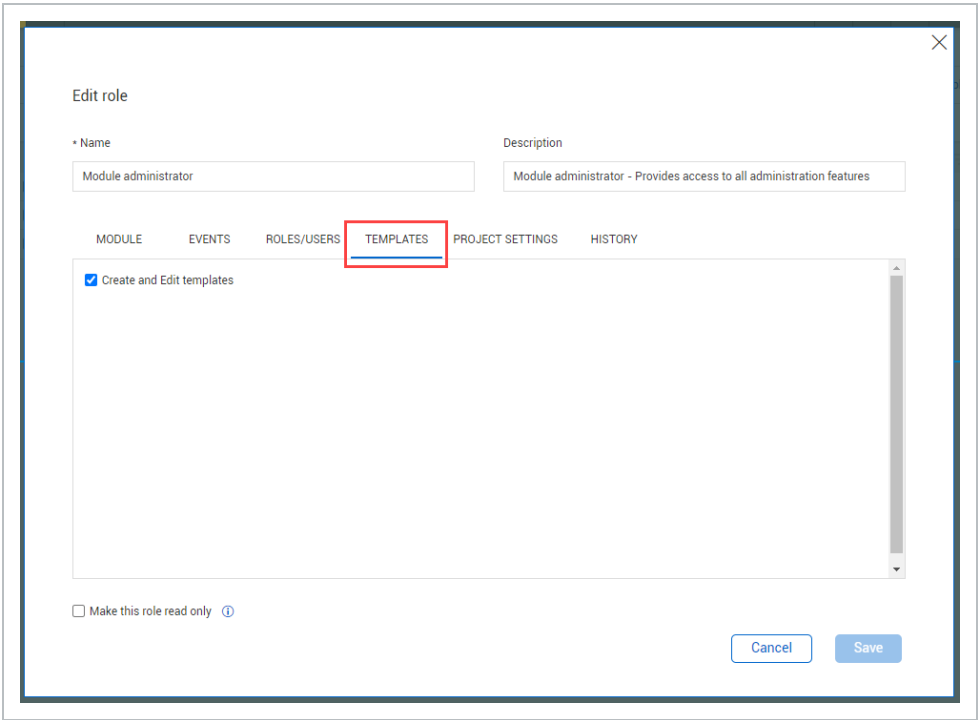

The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see [Read-only role](#).

3.22.2 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.23 TEMPLATES PERMISSIONS

Within any Compliance or Completions individual modules, you can configure template permissions. To go to Templates permissions, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select the **Templates** tab.

The following table is a summary of permissions in the Templates tab:

Permission	Location	Allowed actions
Create and edit templates	Templates manager forms	<ul style="list-style-type: none">• Create, edit, copy, deactivate and delete forms.
	Templates manager tasks	<ul style="list-style-type: none">• Create, edit, copy, deactivate and delete forms.
	Form builder	<ul style="list-style-type: none">• Use all functions including form flows.
	Task builder	<ul style="list-style-type: none">• Use all functions.
	Compliance/Completions landing page	<ul style="list-style-type: none">• View module tiles according to your assignments.
	Module landing page	<ul style="list-style-type: none">• View side menu Templates manager link.

3.23.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see [Read only role](#).

3.23.2 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.24 PROJECT SETTINGS PERMISSIONS

You can configure project settings permissions within the individual Compliance modules or in Completions that can be associated to roles.

Project Settings permissions are in Module settings > **Roles**. Select **Add role**, or click an existing role to edit the role, and then select the **Project Settings** tab.

The screenshot shows a modal window titled "Add role" with a close button (X) in the top right corner. Inside the modal, there are two input fields: "Name" and "Description". Below these fields is a tabbed interface with five tabs: "MODULE", "EVENTS", "ROLES/USERS", "TEMPLATES", and "PROJECT SETTINGS". The "PROJECT SETTINGS" tab is currently selected and highlighted with a red box. Under this tab, there is a list of permissions, each with a checkbox:

- ☐ Enable/ Disable Project Structure
- ☐ Edit header template
- ☐ Manage Automapping
- ☐ Setup Automapping criteria
- ☐ Perform Automapping
- ☐ Manage Project Inspection and Test Plans
- ☐ Create and edit Inspection and Test Plans
- ☐ Edit header template
- ☐ Manage Project User Groups
- ☐ Create and edit User groups

 At the bottom left of the modal, there is a checkbox labeled "Make this role read only" with an information icon (i). At the bottom right, there are two buttons: "Cancel" and "Save".

The following table is a summary of permissions in the Project Settings tab:

Permission	Description
Enable/ Disable Project Structure	Enable or disables the ability to manage, add, and edit project structure header templates, and add them to forms, based on user assignments at the project level.

Permission	Description
Edit header template	<p>When selected, the Edit header template checkbox is automatically selected.</p> <p>Enable the ability to edit header templates associated with the project structure process at the project level.</p>
Manage Project Inspection and Test Plans	<p>Enable the ability to manage, add, and edit Inspection and Test Plans (ITPs), and edit ITP header templates in Module settings > Inspection and Test Plans tab at the project level. You can access the Inspection and Test plan report in the module landing page in the left navigation menu.</p> <p>When enabled, the Create and edit Inspection and Test Plans and Edit header template check boxes are automatically selected.</p>
Create and edit Inspection and Test Plans	<p>Enable the ability to create and edit Inspection and Test Plans (ITPs) at the project level in Module settings > Project Settings > Inspection and Test Plans section. You can access the Inspection and Test plan report in the module landing page in the left navigation menu.</p>
Edit header template	<p>Enables the ability to edit the header template associated with the Inspection and Test Plan process at the project level.</p>
Manage Project User Groups	<p>Enable the toggle to manage, create and edit User Groups at the project level in the Module settings > Project Settings > User Groups section.</p> <p>When selected, the Create and edit User groups check box is automatically selected.</p>
Create and edit User groups	<p>Enable the ability to manage, create and edit user groups in the project settings.</p>
Manage Automapping	<p>Enable the ability to manage, setup criteria for, and perform automapping at the project level in the Module settings > Project Settings > Automapping section.</p> <p>When selected, the Setup Automapping criteria and Perform Automapping check boxes are automatically selected.</p>
Setup Automapping criteria	<p>Enable the toggle to manage Setup Automapping criteria in Project settings.</p>
Perform Automapping	<p>Enable the toggle to allow users with permission to run automapping. The toggle ability is associated with the Manage Automapping option that you can enable at the project level.</p>

3.24.1 CONSIDERATIONS

You must have a Level 3 – Account Admin role in InEight Platform or a Compliance or Completions role with the applicable permissions.

The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see [Read-only role](#).

3.24.2 STEPS

To navigate to Module permissions, follow the instructions in [Settings Overview](#).

3.25 HISTORY

Within any Compliance or Completions individual modules, you can view the history of any changes performed in a role. To go to the history of a role, go to Module settings > **Roles**. Click an existing role to edit the role, and then select the **History** tab.

The History tab provides a list of changes made to a role. You can also edit the role's **Name** and **Description** fields. As with other InEight features, data in these columns can be filtered or sorted.

Each time a role is updated and saved a new entry is created. Each change constitutes a new line item on the History tab.

For auditing purposes and to meet ISO requirements, changes to roles are recorded with date and version history.

The following is a summary of the contents in the History tab:

Column name	Description
Permission category	Name of the category where the change occurred. Module, Events, Roles/Users, Templates, or Project Settings.
Permission	Specific permission in the category that was changed.
Action	The action that was performed.
Change date	The date the change took place.
Changed by	The name of the user responsible for the change.

3.25.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.25.2 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.26 READ-ONLY ROLE

Within Compliance or Completions individual modules, you can configure roles with read-only permissions. To enable **Make this role read only**, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select **Make this role read only**. You can select the option in the Module, Events, Roles/Users, Templates, or Project Settings tab.

The Make this role read-only option allows you to only view events and tasks based on their user assignments.

The following table is a summary of the read-only role:

Location	Description
Compliance or Completions landing page	<ul style="list-style-type: none"> View module tiles according to your assignments.
Module landing page	<ul style="list-style-type: none"> View links, forms, and tasks To-do list is not shown because forms and tasks cannot be assigned.
Events page	<ul style="list-style-type: none"> View events according to your assignments.

Location	Description
	<ul style="list-style-type: none">• View information side panel.• Cannot enter information in fields.
Tasks page	<ul style="list-style-type: none">• View tasks according to your assignments.• View information side panel.• Cannot enter information in fields.

3.26.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- When you select **Make this role read only option**, any other permissions previously selected will be automatically deselected.

3.26.2 STEPS

To navigate to Module permissions, see steps to access organization level settings in [Settings overview](#).

3.27 USER ASSIGNMENTS

You can use user assignments to assign any InEight Platform user to a Compliance or Completions organization, project, category, and role. The user will have access to manage Compliance or Completions, according to their assignment.

The User assignments tab page shows all users from InEight Platform. The user's name, email, and status are pulled from their profiles in Platform. The designated Roles, Reporting tags, and Last updated information from their assignments are also shown.

In the Add user assignment wizard an assignment consists of one or more users, organizations, projects, categories, and roles.

3.27.0.1 ASSIGNMENTS AND HISTORY

When viewing a user assignment, the user assignment page shows the Assignments and History tabs. The Assignments tab lists all user assignments. You can filter them by Organization/Project, Role, or Category. The History tab lists the history of all assignment's changes. You can filter them by Change type, Role, Category, Organization/Projects, Reporting tags, Change date, and Changed by.

3.27.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.27.2 STEPS

To navigate to User assignments, see steps to access organization level settings in [Settings overview](#).

ADD A USER ASSIGNMENT

1. Click the **Add** icon, and then select **Add user assignments** from the drop-down list.
2. Select users to add assignments to, and then click **Next**.

NOTE When you add multiple users, the assignment is listed individually for each user.

3. Select the organizations, projects, categories, and roles to designate for the selected users, and then click **Done**.

NOTE

You can be assigned multiple assignments. Assignments do not affect existing Platform roles.

TRANSFER USER ASSIGNMENTS

1. Click a user's name. The user assignment window opens that shows all user's assignments.
2. Click the **Transfer assignment** icon next to the role you want to transfer.
3. In the assignment wizard, select the user, categories, organizations and projects to transfer the assignment to, and then click **Next**.
4. In the Confirmation step, click **Transfer**. You can click the Transfer drop-down, and select **Transfer and select next user**, or **Transfer and close**.

NOTE

You can only transfer one role's assignment at a time.

REMOVE USER ASSIGNMENTS

1. Click a user's name, and then click the **Remove assignment** icon next to the role. The Remove user assignment wizard opens.
2. Select organizations, projects, and categories to remove, and then click **Done**.

NOTE

Email notifications are sent when adding, transferring, and removing assignments.

VIEW USER'S ASSIGNMENT HISTORY

1. Click a user's name, and then select the **History** tab.
2. Click **Close** to close the window.

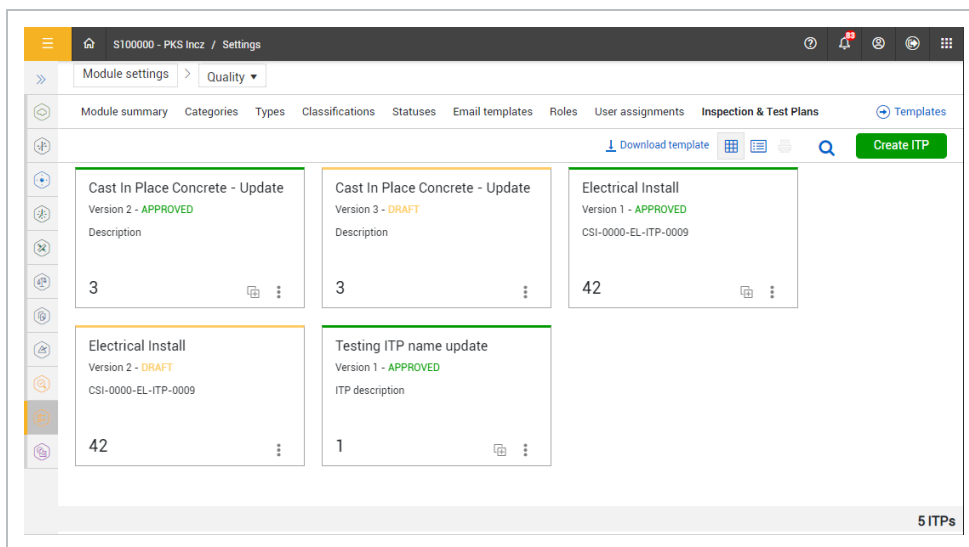

ADD REPORTING TAGS

1. Click the **Add** icon, and then select Add reporting tags.
2. Select users to add reporting tags to, and then click **Next**.
3. Select reporting tags to include, and then click **Save**.

NOTE To create reporting tags, see [Reporting tags](#).

3.28 INSPECTION AND TEST PLANS

You can manage Inspection and Test Plans (ITP) in the Inspection & Test Plans tab. You can create, edit, copy, create new versions, and import ITPs at the organization level.

For more information about managing ITPs, see [Inspection & Test Plans](#).

3.28.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To access Inspection & Test Plans, it must be enabled for the module in org > Product Settings > **Module management**. For more information, see [Module management](#).

3.28.2 STEPS

To navigate to the Inspection and Test Plans tab, see steps to access organization level settings in [Settings overview](#).

For more information about creating ITPs at the organization level, see [Create ITPs At The Organization Level](#).

This page intentionally left blank.

CHAPTER 4 – PROJECT LEVEL SETTINGS

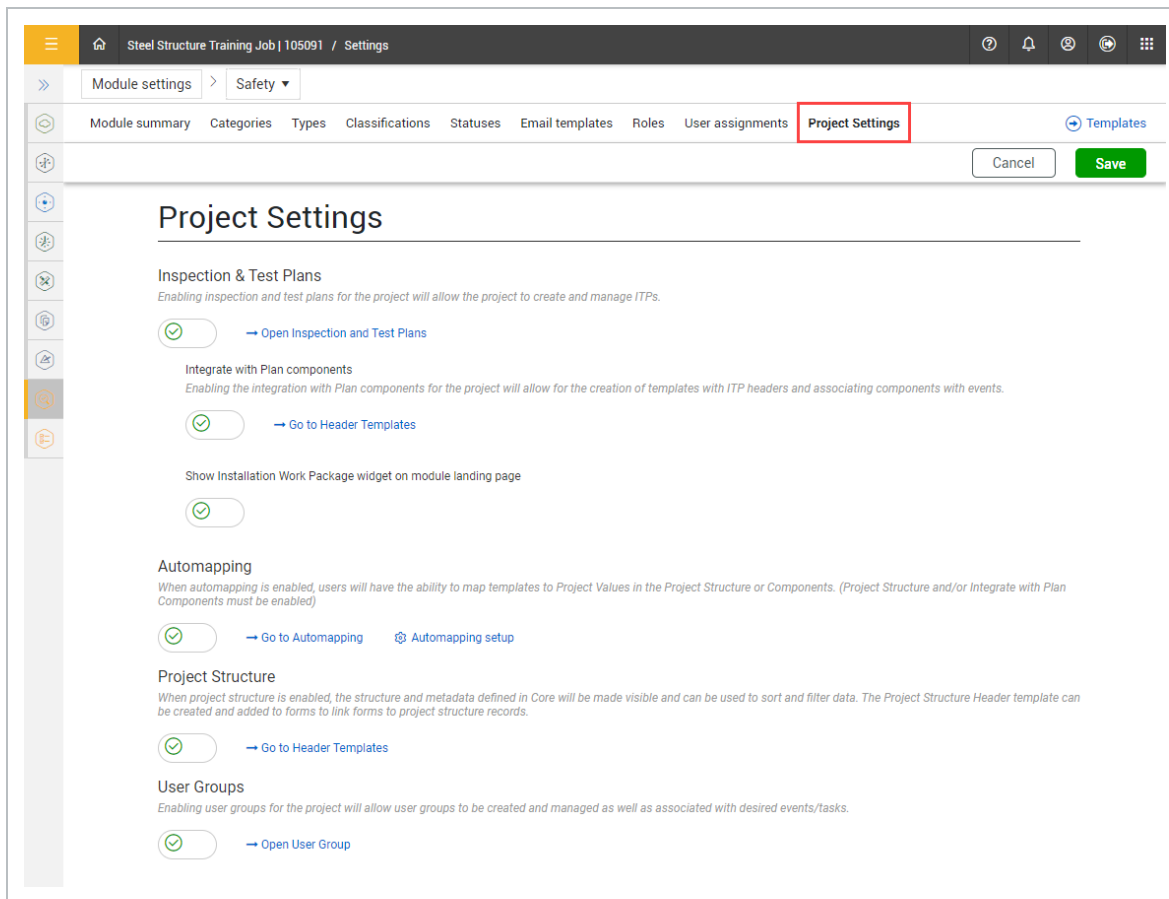

4.1 PROJECT LEVEL SETTINGS

You can enable project-level settings in either the individual Compliance modules or in Completions to successfully manage projects' business processes. The settings are applied throughout the project.

In Project Settings, you can manage the projects' ability to use the following features:

- Inspection & Test Plans
 - Integrate with Plan components
 - Show Installation Work Package (IWP) widget on the module landing page
- Automapping
- Project Structure
- User Groups

These functions can be enabled on a project-by-project basis.

At the project level, administrators can manage roles and user assignments. For more information about managing role, see [Roles](#). For more information about managing user assignments, see [User assignments](#).

4.1.1 CONSIDERATIONS

- You must have a Level 3 - Account Admin role in InEight Platform or a Compliance or Completions role with the applicable permissions.
- You are only allowed to view and not manage other product and module settings that have been configured at the organization level. To manage, click the **Modify at the root level organization** icon at the top of the page.

- For more information about the project settings at the organization level, see [Project settings permissions](#).

4.1.2 STEPS

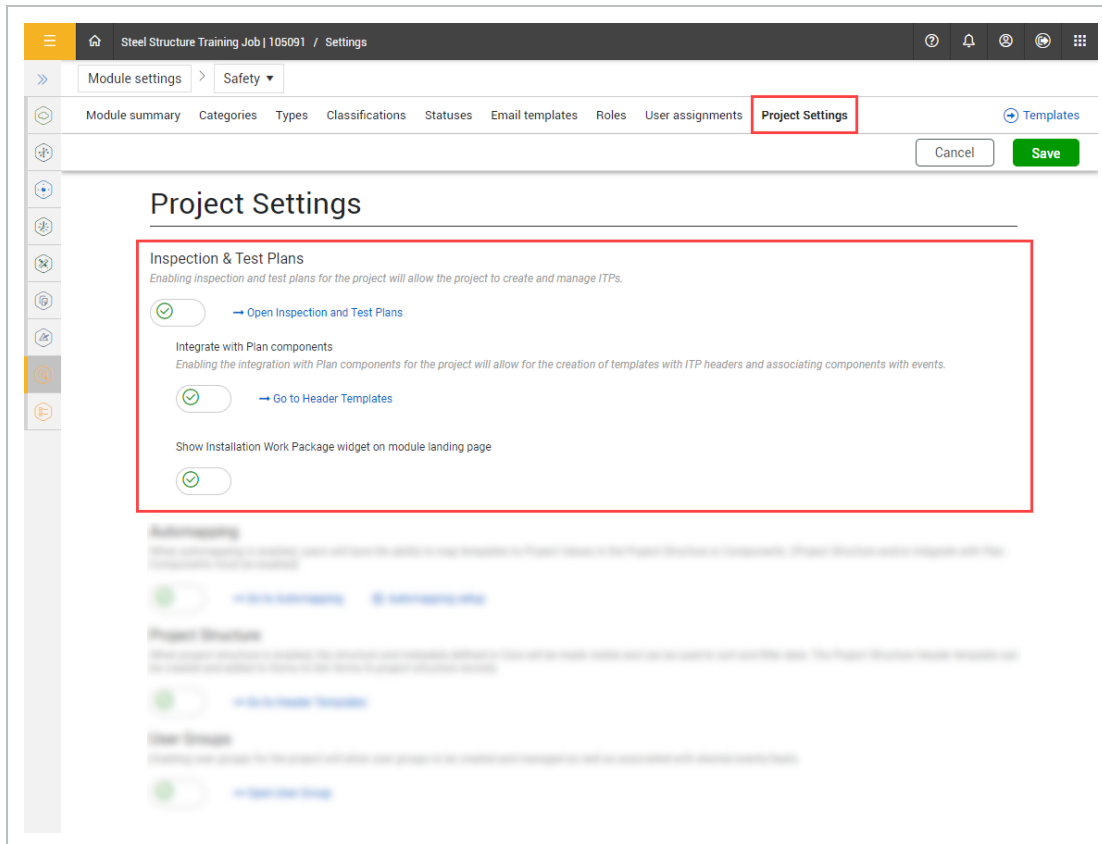

To navigate to Project settings, follow the instructions in [Settings overview](#), and then click the **Project settings** tab.

4.2 INSPECTION & TEST PLANS

You can enable and manage the following Inspection and Test Plans settings and related features in either the individual Compliance modules or in Completions. The settings are applied throughout the project:

- **Inspection & Test Plans (ITP)** - Create and manage ITP's for your project. For more information, see [Inspection & Test Plans](#).
- **Integrate with Plan components** – Create templates with ITP headers and associate InEight Plan components with events. For more information, see [ITP header template](#).
- **Show Installation Work Package (IWP) widget on module landing page** – You can view and manage IWP's from the module landing page in the Upcoming Planned Work tile. For more

information, see [Upcoming Planned Work tile](#).

4.2.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To integrate with Plan, you must enable ITP mapping between Completions and Plan in InEight Plan project settings.

4.2.2 STEPS

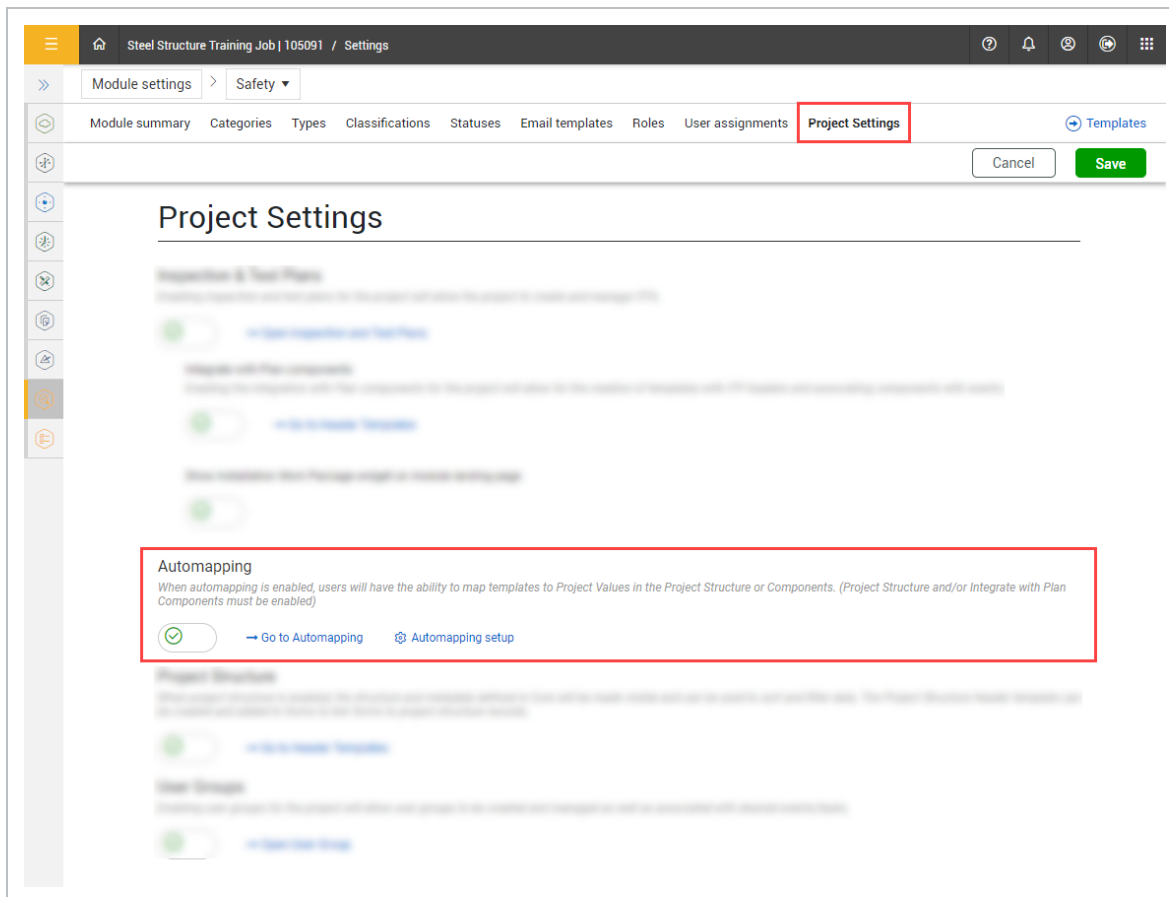

To navigate to Project settings, see steps to navigate to project level settings in [Settings overview](#), and then click the **Project settings** tab.

4.3 AUTOMAPPING

You can enable the Automapping setting for your project in either the individual Compliance modules or in Completions. The setting is applied throughout the project.

When enabled, you can map templates to project values in the project structure or components and create a series of checklists for project structure levels (nodes) or inspection and test plans.

Automapping is enabled on a project by project basis in project > Settings > Project Settings > **Automapping**. This enables the **Go to Automapping** and **Automapping setup** links.

When enabled, you can configure automapping in Go to Automapping, Automapping setup, Map project structure, and Map templates. For more information, see Automapping [Overview](#).

4.3.1 CONSIDERATIONS

- You must have a Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

- The setting Project structure or Integrate with Plan components must be enabled in addition to published templates.
- ITP or Project Structure associations must be configured.
- A project structure and values must be set up in InEight Platform.

4.3.2 STEPS

To navigate to Project settings, follow the instructions in [Settings overview](#), and then click the **Project settings** tab.

4.4 PROJECT STRUCTURE

You can enable the Project Structure setting in either the individual Compliance modules or in Completions. The settings are applied throughout the project.

When enabled, a Project Structure Header is created in the Headers tab and the structure and metadata defined in InEight Platform shows in the header template. You can use the structure to sort and filter data.

To do this, enable the **Project Structure** toggle. This will enable the **Go to Header Templates** link to access the Headers page.

In the Headers page, you can oversee and manage Project Structure Headers for projects. For more information, see [Project structure header template](#).

4.4.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

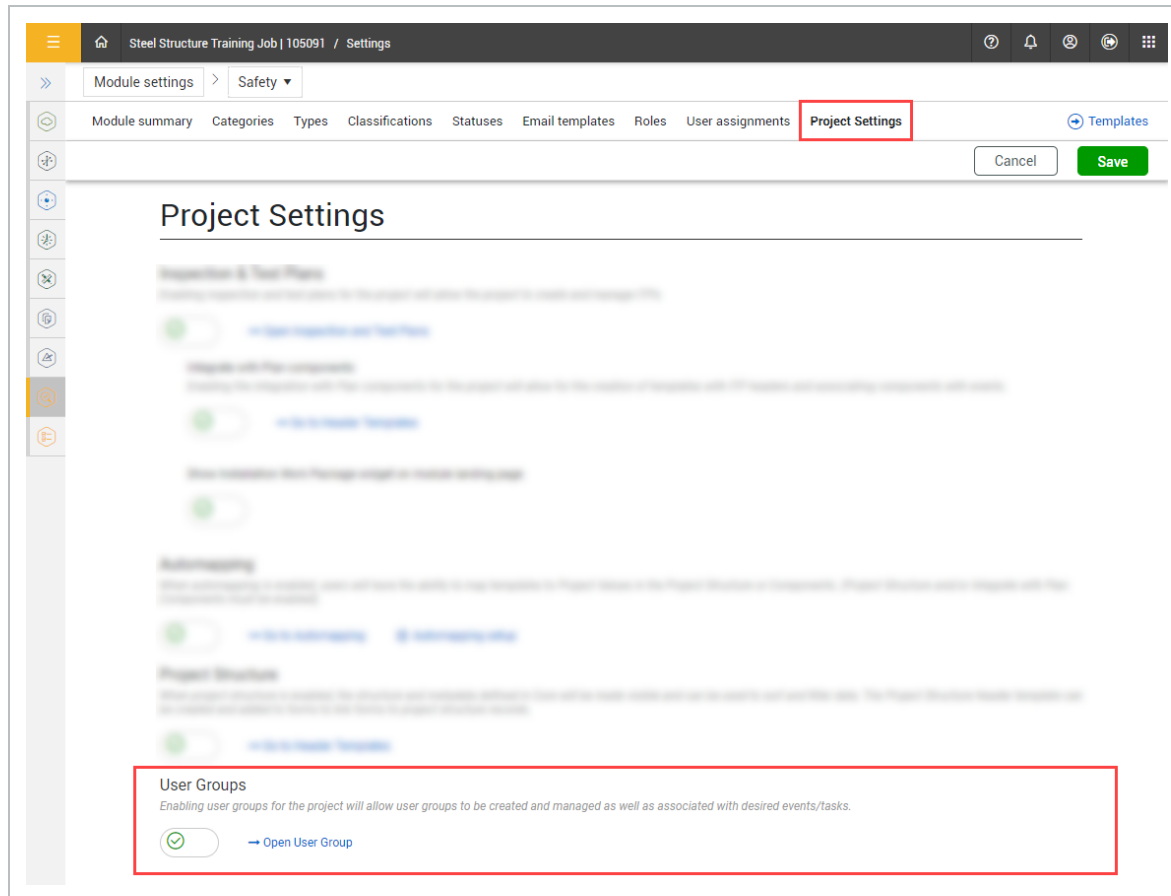

4.4.2 STEPS

To navigate to Project settings, follow the instructions to access project level settings in [Settings overview](#), and then click the **Project settings** tab.

4.5 USER GROUPS

You can enable user groups to be created and managed for your project in either the individual Compliance modules or in Completions. The settings are applied throughout the project.

User groups provide access to events and tasks that may be beyond the usual permissions.

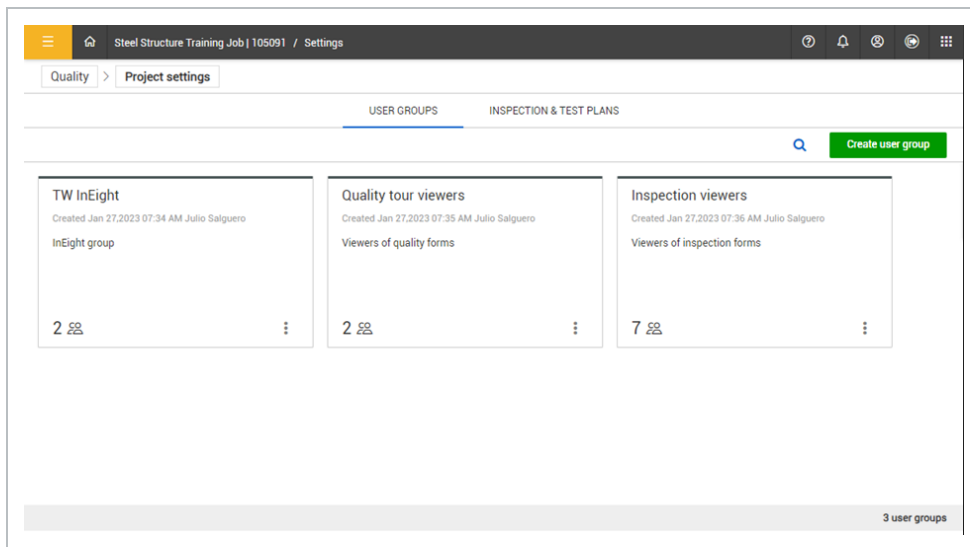

You can use a user group to give access to events and tasks to members of that group, even if they would normally not have permission to view events or tasks in selected categories. User groups can also be used in a template's From Flow option as responsible parties.

After you create a user group, you can assign the user group to individual forms or tasks when you fill them out or when you open an event or task after it has been started.

For example, when a subcontractor is performing work on a project, and another entity is doing quality assurance, the subcontractor will not be part of the project's NCR process and will not be assigned the category for the form. However, if a piece of the subcontractor's work was non-conforming, users from the subcontractor can be associated to a specific user group, and the user group associated with the events (NCRs) to address them.

Click **Open User Group** to open the User groups page tab. In User Groups you can create, edit, copy, deactivate, and delete user groups.

4.5.1 CONSIDERATIONS

- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To delete a user group, you must deactivate it first, and then remove all users from the group.
- Only users with assignments to the project are shown on the list of Available users. For more information, see [User assignments](#).

4.5.2 STEPS

To navigate to User Groups, follow the instructions to access project level settings in [Settings overview](#), and then click **Open User Group**.

CREATE USER GROUPS

1. Click the **Create user group** button, and then fill in the User group name, Description, and select users from **Available users** to include in the group. You can use the search box and select users or use the Select all option.
2. Click **Save**. The new group tile will show. The tile will show the group name, date and creator name, description, and number of users in the group.

VIEW, EDIT, OR COPY A GROUP

1. Click a group tile. The group opens and shows the Detail and History tab. In the history tab, you can view the history of changes, names, change dates, and changed by information.
2. In the Details tab, make your changes, and then click **Save**. Select the **Show selected users only** toggle to view the selected users only.
3. To copy, click the ellipses in the group tile, and then select **Copy**. A copy of the group is created.

DEACTIVATE AND ACTIVATE A GROUP

1. Click the ellipses in the group tile, and then select **Deactivate**. The group tile will turn gray when deactivated.
2. Click the ellipses in the group tile, and then select **Activate** to activate the group.

DELETE A GROUP

1. You must first deactivate the group, and then remove all users from the group by editing the group.
2. Click the ellipses, and then select **Delete**.

CHAPTER 5 – TEMPLATE MANAGEMENT

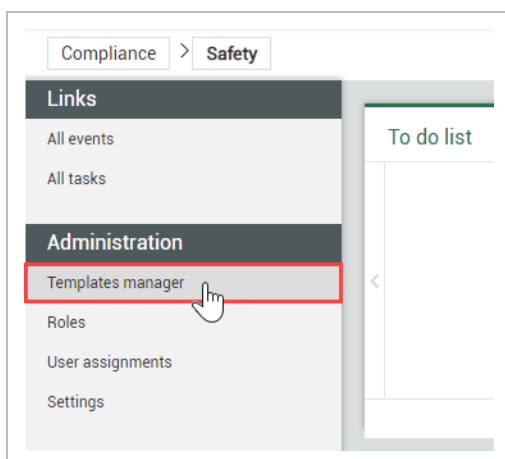

5.1 TEMPLATE OVERVIEW

A template is a task or a form (or checklist) set up in advance for inspections and other tasks that require documentation during the life cycle of your projects.

You can use templates to standardize your organization's form and data capturing process. For example, if your projects always require a safety tour, you can create a safety tour template, so the same safety tour form is used for every project. This leads to capturing the same data from project to project, and to reporting that is clear, concise and meaningful. At the same time, should your project have unique requirements for a safety tour, you can customize your template for your specific project needs.

The Templates Manager is the storehouse for all your template forms. You access the Templates Manager from any of your Module landing pages.

NOTE

Depending on your permissions, you may not have access to edit or create new template forms/tasks, but you will still have access to copy them.

Overview - Templates Manager

	Title	Description
1	Filters	Search for a template by keyword or filter down your templates by selecting the appropriate category and/or organization.
2	Form/Task toggle	Toggles between each the Form and Task templates, per module.
3	Template status	Each template has a status: Published - available to fill out via web or mobile device Draft - being built and not yet available for use to fill out Inactive - not drafts, but available to activate when needed Selecting a status option filters to only templates with that status.
4	Template form	Provides key information about the template, including: form name and ID, associations, creation date, time and author, and version. When hovered over, options appear to delete the form (if it is a draft) or to edit, copy, or deactivate the form (if it is published).
5	Available on mobile	This option visually identifies if a template is available on a mobile device. [Shown as the column "Mobile" when in the List View for Tasks.]
6	Favorites	This option filters to templates tagged as favorites.
7	Create new form/task	Click this button to launch the Form Builder/Task Builder page, where you can create a new template form or task.

5.1.0.1 TEMPLATES MANAGER PAGE VIEW

Each template form or task shows key information about the form or task, including:

- Name and Description of the form/task
- Associations
- Availability on Mobile
- Creation date, time, and author
- Version
- Status

5.1.0.2 VERSIONING

A new version is created when a draft is published. Even if no information has changed on the template. Once it enters a draft status and that draft is published it will move to the next version.

5.1.0.3 FAVORITES

You can select the **star** at the right-end of the card to mark the template as a favorite.

5.1.0.4 ADDITIONAL OPTIONS

When you hover over the card, additional options appear for the form/task. For draft templates, a delete option appears.

For published templates, options appear to either edit, copy, or deactivate the form/task.

5.1.1 FILTERS

The left panel of the Templates Manager contains a search bar to look up templates by keyword, as well as filtering lists to narrow down your template list.

There are two filtering categories: Categories and Organization. Checking the box for one of the filter options filters the view to just the templates associated with that filter.

The screenshot displays the 'Templates manager' interface. On the left, a 'Filters' sidebar is highlighted with a red box. It contains a 'Search' field, a 'Categories' list with checkboxes for Audits, Claims, Crane, Daily Safety Huddle, Injuries, Inspections, JHA's, and JSA's, and an 'Organization' list with checkboxes for C-XYZ (RootOrg1) and several sub-organizations. The main area shows a list of templates with columns for name, creation date, version, and status. The 'Status' column indicates 'PUBLISHED' or 'DRAFT'. A 'Create new form' button is located in the top right corner.

NOTE

The only items that appear as choices within the Filters side panel are the ones that have templates associated to them. In other words, you can have more categories or projects in the system, but they won't display in the Filters panel unless you have created a template that uses them.

TIP

All the filters work together. If you are not seeing what you need, clear all the filters and start with a fresh search.

5.1.2 FAVORITES

Selecting the **Favorites** icon filters down your view to just the templates you tagged as favorites. This is a quick way to narrow down to only the templates you use most often.

5.2 TEMPLATE CREATION

With the correct permissions, you can create new form and task templates in the Templates manager.

From the Templates manager page, to create a new template, click the **Create new form** or **Create new task** button.

This launches a two-step process:

1. Creates a dialog box, which leads to:
2. The Form builder or Task builder

5.2.1 CREATE A FORM OR TASK DIALOG BOX

On the Create a form or Create a task dialog box, fill out basic information and settings for the form or task.

NOTE

You only have the options to create templates for organizations, projects and categories for which you already have assignments.

Each new form or task requires these initial entries:

Overview - Create a Form Dialog Box

	Title	Description
1	Form or task name and Description	The name or title you give to the template. An optional description can also be added.
2	Category and Organization associations	Associating the form or task with categories and organizations makes it easy to find the form or task using the category and organization filters on the Templates manager page. Categories also determine who can use the forms or tasks. If you do not have assignments to that category, you will not be able to view the form or task to fill it out.
3	Availability on mobile devices	A switch you can turn on to make it available on iOS mobile devices.

Overview - Create a Form Dialog Box (continued)

	Title	Description
4	Event title and date settings	These settings indicate whether the date and title will be filled out automatically with the system default or if they will be filled out with a custom title and date by the person filling out the form or task. An expiration date can also be added if the check box is selected.

Create

After being filled out, clicking **Create** creates a new template form or task and the system automatically progresses to the appropriate Form builder or Task builder page. You can continue building your form or task or come back later.

The following steps walk you through creating a new template form.

5.2 STEP BY STEP 1 – CREATE A TEMPLATE FORM

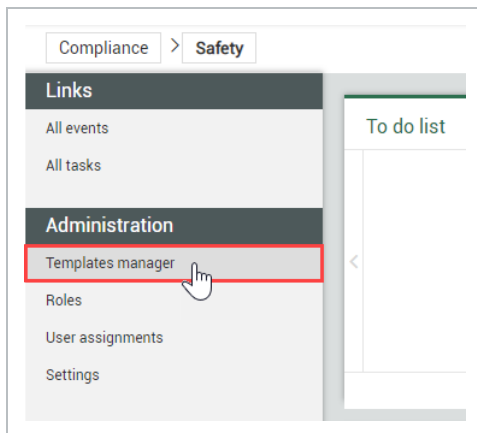

1. From the Project home landing page, select **Compliance** from the left navigation menu.

2. Select the **Safety** module.

3. Select **Templates manager** from the side menu.

4. From the Templates Manager page, select **Create new form**.

5. On the Create a form dialog box, type **Project Manager Safety Walk** in the Form name field.
6. For Category association, select an appropriate item from the drop-down list.
7. Under Available on mobile, switch to the **green check mark** to indicate it will be available on a mobile device.
8. Change Event title and Event date to **User defined**.

TIP

Selecting **User defined** allows the user to add a future or past date. If you want to control this, consider the option to use.

9. For Organization association, select the check box for the highest organization level to make the template available for the entire association.
10. Click **Create**. The Form builder opens with a section already created and Event title and Event date already populated on the form.

5.2 STEP BY STEP 2 – BUILD A TEMPLATE TASK

1. Select the **Safety** module.
2. Select **Templates manager** from the side menu.
3. Select the **Tasks** item type in the upper-left.

4. From the Templates manager page, select **Create new task**.
5. Add a Description if needed. On the Create a new task dialog box, type **Finalize Safety Walk Process** in the Task name field.
6. For Category association, select an appropriate item from the drop-down list.
7. Under Available on mobile, switch to the **green check mark** to indicate it will be available on a mobile device.
8. Set Task title to **System Default**.

- The Due date field provides a mandatory date question on the template where the user can provide a date that will become the due date
9. Select the **Add expiration date** check box.
 10. For Organization association, select the check box for the highest organization level to make the template available for the entire association.
 11. Select the **+ Future Children** button.
 12. Click **Create**.
 - The Task builder opens in the appropriate Category, in a section already created and with Description, Responsible party, Due date and Assign fields already populated on the task
 13. In the Description field, change the Question text to **Identify steps in the process**.
 14. Change the Assign button text to become **Assigned**, keeping the status as Scheduled.
 15. Click **Save**.
 16. Click the **Publish** icon.

5.2.2 ACTIVATE, DEACTIVATE, AND COPY PUBLISHED TASKS AND FORMS

Both tasks and forms can be deactivated, reactivated, and copied after being published. The following step-by-steps use a specific task to walk through the processes.

5.2 STEP BY STEP 3 – DEACTIVATE A TASK

1. From the Templates manager, hover your cursor over your desired published task.
2. Click the **Deactivate** icon.

- The task remains visible in the Templates manager, but shows as Inactive in the Status column.

5.2 STEP BY STEP 4 – ACTIVATE A TASK

1. From the Templates manager, locate your desired inactive task.
2. Select the check box to the left of the ID.
 - After being clicked, two additional icons are shown: Activate and Delete tasks
3. Click the **Activate** icon.

- The task is shown in Draft mode in the Status column

5.2 STEP BY STEP 5 – COPY A PUBLISHED TASK

1. From the Templates manager, locate a published task.
2. In Tile view, hover over the task. On the right side of the tile, three icons are available: Edit, Copy, and Deactivate tasks.
3. Click the **Copy task** icon.

4. In the dialog box, edit all fields.

A screenshot of the "Copy a task" dialog box. The dialog has a title bar with a close button (X). It contains several fields and sections:

- Task name:** A text input field containing "Finalize Safety Walk Process NEW".
- Description:** A text input field.
- Category association:** A section with a dropdown menu showing "Incidents" and a close button (X). Below it, a note says "Select categories you want to associate to your tasks".
- Available on mobile?:** A toggle switch that is currently turned on (green checkmark).
- Task title:** A dropdown menu showing "System default" with an information icon (i).
- Organization association:** A section with a search bar and a list of organizations. The first organization is "S100000 - PKS Inc" with a green "+ Future Children" button next to it. Below the list, a note says "Select organizations you want to be able to perform this task".
- Buttons:** "Cancel" and "Copy" buttons at the bottom right.

5. After all fields are filled out, the Copy button change colors. Click **Copy**. The Task builder opens for further edits.
6. **Save** if edits are made, and then click the **Publish** icon.
7. After being published, the Templates manager opens with the copied task shown.

NOTE

The process is the same for copying, activating, and deactivating a form.

5.2.3 FORM AND TASK BUILDER - BUILD TAB

The form builder and task builder consist of the following tabs:

- Build
- Properties
- Form flows (forms only)
- History

This section focuses on the Build tab.

Overview - Form and Task Builder: Build Tab

	Title	Description
1	Layout types	Drag and drop columns and sections onto your form or task.
2	Question types	Drag and drop attachments, buttons, dates, times, form buttons, form flows, GPS, integrated lists, references, lists, numbers, people, signatures, and text fields to your form or task.
3	Building area	The blank area you drag your sections and questions onto. It represents the template you are creating.
4	Edit	For existing templates, allows you to edit the existing template.
5	Publish	When finished building the template, click this button to make the template available for use.
6	Section	Lists each section on the form or task.
7	Save	Saves the form or task in its current state. If not yet published, it is saved as a draft.

NOTE

If you click **Cancel**, all changes are deleted since your last save. The system does not automatically save.

5.2.3.1 LAYOUT TYPES

Layout types let you divide your form or task into sections. Perhaps your form or task covers different topics or areas and you want to organize the form or task accordingly.

When you first drag a section onto the form or task, it creates a section that extends the width of the form or task.

You can let users copy sections when filling out a form or task. This feature lets users determine if duplicate sections are needed, instead of creating templates with duplicate sections in advance.

To let users copy a section, click the section header, and then select the **Enable copy section** check box in the side panel.

You can change the text of the button. By default, it is named Copy section.

NOTE

You can enable the copy section option only for sections without mandatory questions, form buttons, or associated tasks.

The screenshot shows the 'Section' configuration panel. On the left, the 'Details' tab is selected, and the 'Enable copy section' checkbox is checked. The 'Copy button text' is set to 'Copy section'. The main form area displays a 'GPS' section with fields for Latitude, Longitude, and Elevation, and a 'Crew Information' section with a 'Select crew member' dropdown. A 'Copy section' button is visible in the top right of the form area.

5.2.3.2 QUESTION TYPES

In the sections you create, you have different types of questions you can drag onto your form or task.

The screenshot shows the 'Form builder' interface. On the left, the 'Question types' panel is visible, with the 'Text' type highlighted. A red arrow points from the 'Text' type to a 'Text' field in the form area. The form area shows a 'SECTION HEADER' with two text fields: 'Event title' and 'Event date'. A red box highlights the 'Text' field in the form area, and a red arrow points from the 'Text' type in the panel to it.

The following is a brief overview of each question type and its key characteristics.

Overview - Question Types

Question Type	Image	Description
Attachment		<p>Enables an attachment (for example, photos, documents) to be added to the form or task. You can include additional text with this question if needed (for example, for instructions.) Attachments can be marked as Mandatory. If integration with InEight Document is set up, attachments can be supporting documents from the Document application.</p>
Button		<p>Adds a button to the form or task. You can set the button to close and/or change the status of the form or task. The button type can also be marked as single-use or multi-use. Buttons can be marked as Mandatory.</p>
Choice		<p>Adds a question with two options. Settings include icons and predefined text answers (e.g., yes/no, pass/fail, and accept/reject) or you can customize your own. Choices can be marked as mandatory. You can mark answers as exceptions.</p>
Date - Time		<p>Adds a field to fill out either date and time, just the date, or just the time. Dates can be marked as Mandatory.</p>

Overview - Question Types (continued)

Question Type	Image	Description
Form Button		<p>Adds a button that opens another template from within your form or task. It can be designated as single-use or multi-use. Form buttons can be marked as Mandatory. You can set this button to change the form or task's status when it is clicked. Status change does not affect the form or task that is opened by the button.</p>
Form Flow Button		<p>Adds a button that facilitates a specific step in a form flow. Form flow buttons can also go back to a previous step.</p>
GPS		<p>Lets users enter their location coordinates. Coordinates can be entered manually or by clicking the button.</p>
Integrated list		<p>Adds the integrated list question type to your form that integrates with InEight Platform Master data list resources.</p>
Reference		<p>Adds a supporting document attachment, event or task, or a hyperlink to other pertinent information. References cannot</p>

Overview - Question Types (continued)

Question Type	Image	Description
		be marked as Mandatory.
List	<div>Indicate the quality of this section</div> <div><div><input type="radio"/> Very Good</div><div><input type="radio"/> Good</div><div><input type="radio"/> Fair</div><div><input type="radio"/> Poor</div><div><input type="radio"/> Very Poor</div></div>	<p>Adds a multiple-choice question to the form or task. Answer options include radio buttons, check boxes, drop-down lists, or multi-level drop-down lists. You can select answers from predefined lists or create your own. Lists can be marked as Mandatory.</p> <p>You can set default values for radio buttons, check boxes, and drop-down lists. Default values are selected when a user opens a form or task and requires the user to manually select a different value.</p> <p>You can mark answers as exceptions.</p> <p>For more information about multilevel drop-down lists, see Multilevel Drop-Down Lists.</p>
Number	<div>How many widgets were fastened?</div> <div><input type="text"/></div>	<p>Adds a question that requires a numerical answer to the form or task. The number can be formatted to be currency, decimal, \$, %, or phone number. Numbers can be marked as Mandatory.</p>
People Picker	<div>Who led the tour?</div> <div><input type="text"/></div>	<p>Adds a question that must be answered by selecting users from the drop-down list. People pickers can be marked as Mandatory. You can let end users</p>

Overview - Question Types (continued)

Question Type	Image	Description
		select multiple users or none. You can also select whether end users can choose from only assigned users, who have a Compliance role, or all project-level operational resource, which includes users who do not have Compliance roles. You can also show users' employee IDs with their names and set up an email to send when a user is selected. Operational resources are managed in project home page > Assigned operational resources.
Signature		Adds a signature block to the form or task. Signatures can be marked as Mandatory.
Text	<p>How many wins?</p> <div><div></div><div>(150 characters remaining)</div></div>	Adds a question that requires text for the answer. The field can be short or long text, or you can use this question type to only be a label with no text field. Text can be marked as Mandatory.

5.2.3.3 QUESTION SETTINGS

After a question is added, you can click the question in the section.

A screenshot of a question input field in a template builder. The field is a light gray rectangle with a red border. Inside, the text "Click to type your question" is displayed in a light gray font. A hand cursor icon is positioned over the text. To the right of the field are three small icons: a plus sign, a close button (X), and a zoom icon. Below the field, a status bar indicates "(200 characters remaining)".

A slide-out panel is shown on the left. You can type your question and define the settings related to the question. As you type the question, the question populates into your template.

A screenshot showing the question settings slide-out panel on the left and the template preview on the right. The slide-out panel has a title "* Question text" and a text input field containing "Location of Safety Tour". Below the field is the prompt "Type your question". Under the "Type" section, there are three radio buttons: "Short" (selected), "Long", and "Label only", followed by an information icon. At the bottom is a "Supporting text" field with an information icon. The template preview on the right shows a blue "SECTION HEADER" box and a text input field below it containing "Location of Safety Tour". A red arrow points from the text in the slide-out panel's input field to the text in the template's input field. A hand cursor icon is over the template's input field.

TIP

You can also click on the text within the question type on the form or task and it will enter the text on the slide-out panel.

All question settings include the option to make the question mandatory. This means the person filling out the form or task is not able to submit the form or task until the question is answered.

You can mark responses to list and choice questions as exceptions. This feature is useful to indicate responses that are undesired or outside of normal business processes in some way and have those exceptions show in reporting. To set a response as an exception in the form or task builder, select a response to a list or choice question. In the Details side panel, select the **Exception** check box. An Exception icon is added to the right of the response. This icon is visible only in the builder.

The screenshot shows the 'Form builder' interface. On the left, the 'Details' tab is active, showing an 'Option text' field with 'No' and a 'Type your option' label. Below this, the 'Exception' checkbox is checked. The 'Logic' and 'Email' tabs are also visible. The main area shows a 'SECTION' header with two questions: 'Where is the safety walk being performed?' and 'Event date'. Below these is a question 'Is PPE being worn correctly?' with radio buttons for 'Yes' and 'No'. The 'No' option is selected. The interface includes a 'Cancel' button and a 'Save' button at the top right.

5.2.3.4 ACCESS

Settings for each question and section also include an Access section with a Manage access button. In the Manage access dialog box, you can control which users or roles can view or answer each individual question or entire sections when filling out the form or task. If they do not have access, they do not see the question on the form or task.

View and edit permissions are set separately from each other. You can manage access for all sections and questions in a template in the dialog box. It does not matter which section you choose when you click the **Manage access** button.

To control who can see data in reports on question responses, add reporting tags in the Access section. Users with the same reporting tags that you set here are able to see this data when using reports.

5.2.3.5 LOGIC

The Logic setting lets you show or hide a question based on the response from another question on the form or task. For example, you are creating template for a safety tour, and have added the Choice question "Did you recognize any safety wins?"

Did you recognize any safety wins?

☐ Yes

☒ No

Following this question, you add a Text question for them to indicate the wins they had, but you only want this question to show up if they answered yes to the previous question (did you recognize any safety wins?).

Under the Logic section of the Text question's properties, you select **Leading questions**.

The screenshot displays the 'Question text' editor on the left and a preview of the form on the right. In the editor, the 'Question text' field contains 'Safety wins: explanation'. The 'Type' section has 'Short' selected. The 'Supporting text' field is empty. The 'Mandatory' checkbox is unchecked. The 'Access' and 'Logic' sections are visible. The 'Logic' section is expanded, showing a red box around the 'Leading questions' option, which is being clicked by a mouse cursor. Below it, the 'Integration tag' field is empty. The preview on the right shows the form layout: 'Location of Safety Tour' (text field), 'Did you recognize any safety wins?' (radio buttons with 'No' selected), and 'Safety wins: explanation' (text field).

A Leading questions dialog box opens, where you set the Text question to show when the user answers Yes to the “Did you recognize any safety wins?” question.

TIP

Depending on the form or task, you can show or hide the question depending on how the other question is answered.

TIP

If there is a form flow button that can be reversed, you can apply separate leading logic sets to the reverse form flow button and the form flow button that advances to the next step.

5.2.3.6 CLASSIFICATIONS

You can use classifications to apply logic in your forms in List and Choice questions. For more information, see [Classifications](#).

5.2.3.7 COPYING, DELETING AND MOVING QUESTIONS

When hovering over a question on your template, three options are shown:

- Copy creates a duplicate question in the same section.
- Delete removes the question from the template.
- Move lets you drag and drop the question to a different area on your template.

TIP

You can move questions by clicking and holding anywhere on the question and dragging it into place.

5.2.3.8 USING THE FORM AND TASK BUILDER - BUILD TAB

The following Step by Steps walk you through building out a template using the Task builder and Form builder.

5.2 STEP BY STEP 6 – BUILD A TEMPLATE USING THE TASK BUILDER

1. From the Task builder page of the **Finalize Safety Walk Process** template you created in the previous Step by Step, confirm your form mirrors this design:

2. Drag and drop the **People Picker** question type into the existing section underneath the Due date question.
3. Click on the question and type **Name of person conducting the next Safety Walk** in the Question text field.
4. Select the Mandatory check box.

5. Click the **People Picker X** to close the settings slide-out panel.
6. Drag and drop the **Date - Time** question type to the right edge of the Name of person conducting the next Safety Walk question, so it becomes a second column on the same row.
7. Make the title of the Date-Time field, **Date of upcoming Safety Walk**.
8. On the Details panel, change the Type to **Date** so the answer selection will only be for a date, not a time.
9. Close the settings slide-out panel.
10. Click the **Assigned** button and notice the "Close task upon the button selection" is selected and grayed out. Ensure that Change status to is **Scheduled**.
11. In the upper-right corner, click **Save** to save your new template task. A notification is shown indicating the time the change was saved.
12. To make the template available for use, click the **Publish** icon.

5.2 STEP BY STEP 7 – BUILD A TEMPLATE USING THE FORM BUILDER

1. From the Form builder page of the Project Manager Safety Walk template you created in the previous Step by Step, confirm your form mirrors this design:

SECTION

SECTION HEADER

Location of Safety Tour

(200 characters remaining)

Safety Tour date

03/24/2020

Did you recognize any safety wins?

☐ Yes

☐ No

Safety wins: explanation

(4000 characters remaining)

- 2. As needed, close a settings slide-out panel.
- 3. Drag and drop the **People Picker** question type into the existing section underneath the Location and Date questions.

Question types

Attachment Button

Choice Date - Time

Form Button Form Flow

GPS Reference

List Number

People picker Signature

Text

SECTION HEADER

* Location of Safety Tour

(250 characters remaining)

* Safety Tour date

01/28/2021

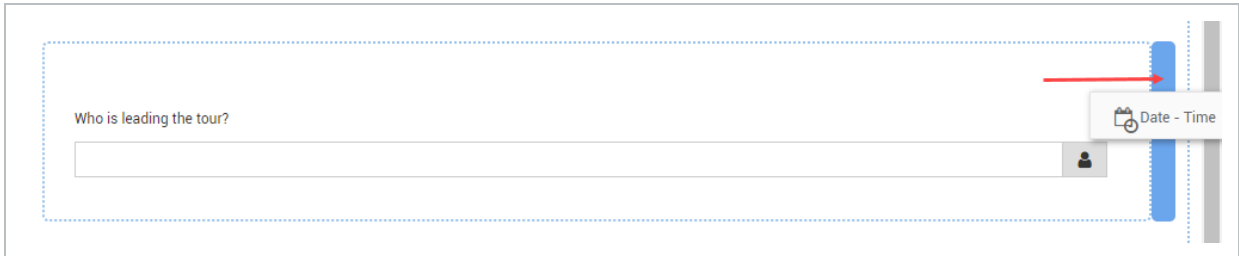

Did you recognize any safety wins?

☐ Yes

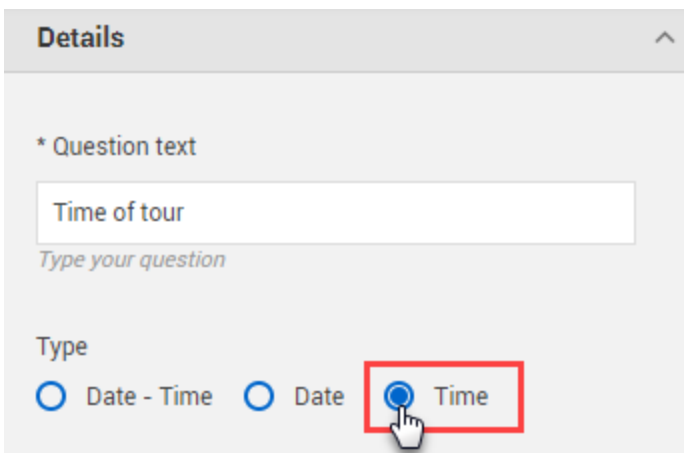

☐ No

- 4. Click on the question and type **Who is leading the tour?** in the Question text field.

5. Close the People Picker settings slide-out panel.
6. Drag and drop the **Date - Time** question type to the right edge of the "Who is leading the tour" question, so it becomes a second column on the same row.

7. Click on the Date - Time question and type **Time of tour** in the Question text field.
8. Under Type, select **Time** so the answer selection will only be for a time, not a date.

9. Close the **Date - Time** settings slide-out panel.
10. Drag and drop the **Text** question below these two questions.
11. Click on the question and type **Explain the agenda for the tour** in the Question text field.
12. Under Type, select **Long** so the user has more room (4000 characters) to enter a response when filling out the form.

* Question text

Explain the agenda for the tour

34. Under Change status to, select **Complete** from the drop-down list.
35. Expand the Email section, and select **Add email**.
36. From the dialog box, add a Subject line such as **"Tour has been completed"**; select role and/or user; and add content to the body of the email such as **"Please review at your convenience."** Select the **@Reporter** if desired.

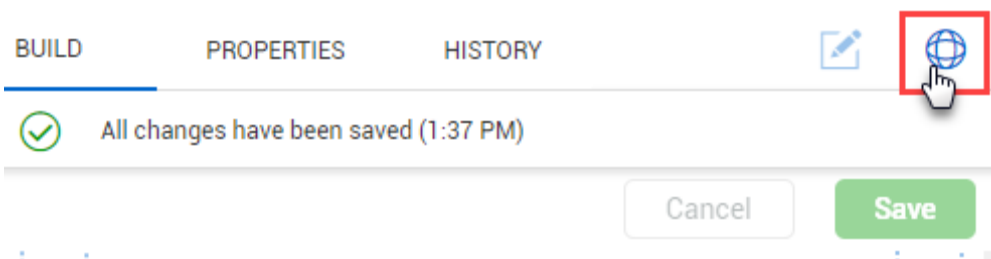

37. Click **Save**.

38. In the upper-right corner, click **Save** to save your new template form.

- A dialog box is shown indicating the time the change was saved.

39. To make the template available for use, click the **Publish** icon.

MULTI-LEVEL DROP-DOWN LISTS

Using the **List** question type, you can build branching questions using a multilevel drop-down list. For more information, see [Multilevel Drop-Down Lists](#).

REFERENCED FORMS AND TASKS

When you create a task or an event from another task or event, you see the referenced item in both associated tasks or events, letting you see which events and tasks are associated. For more information, see [Referenced Forms and Tasks](#).

5.3 CLASSIFICATIONS

You can use classifications to drive logic in your forms in List and Choice questions. Classifications provide the following benefits:

- You can apply logic at a section level so that when the classifications are selected on a form question in the template, only that section with the classification is shown.
- In the events and tasks lists, you can sort and filter by classification.

The entire section of questions is hidden in the event or task until the classification question or choice entry is selected so that you do not have to apply question level logic to each question in the section.

To create classifications, see [Classifications](#) in Module settings.

Two steps are required to use classifications in logic as shown in the Steps section below.

5.3.1 STEPS

APPLY CLASSIFICATION LOGIC TO A LIST OR CHOICE QUESTION

1. In the Form builder, select an entry from the List or Choice question.
2. In the Logic section in the left panel, click the Designate the following classifications field, and then select from the list of classifications. You can select more than one.

The screenshot displays the 'Form builder' interface for a 'Non-Injury / Illness' form. The left sidebar contains a 'Details' panel with a 'Logic' section highlighted by a red box. This section allows users to designate options to display sections based on specific classifications. A list of classifications is shown, including 'Work Related', 'COVID-19', 'Crane', 'CRANES', 'Crush Points', 'CSA', and 'CSU'. The main form area contains several fields: 'Additional re-classification' (with a red box around 'Secondary re-classification required'), '2nd Re-Classification approved by', '2nd Legal reason for classification change', '2nd - Re-classification Date', '2nd - Current Classification (From)', and '2nd - New Classification (To)'.

3. Save the form.

APPLY CLASSIFICATIONS LOGIC TO A SECTION

1. After the classifications are assigned to the list or choice entry, select the section you want to be shown by clicking the section header text.
2. On the left panel, in the Logic section, click Show this section for the following classifications field, and then select from the list of classifications. You can select more than one.

5.4 MULTILEVEL DROP-DOWN LISTS

Using the List question type, you can build branching questions using a multilevel drop-down list. When you make a selection from a list of question options, your response branches off to another question. This functionality helps you manage list items better for greater control of data in the database.

A multilevel drop-down list can be nested at several levels. For example, this type can be useful for showing a complicated organizational structure.

In the List side panel, there are options to make features of a multilevel drop-down list mandatory:

- **Mandatory** – The multilevel drop-down list question must be answered.
- **Mandatory terminal response** – The user must go all the way to the last level of the list to make a selection, instead of just clicking through without expanding the list beyond the first level. If you select this option, you cannot select Mandatory required level.
- **Mandatory required level** – You must select a mandatory required level from a drop-down list that determines how many levels down users must expand the list to make a selection, instead of clicking through without expanding the list beyond the first level. If you select this option, you cannot select Mandatory terminal response.

When you click **Manage list options**, the List options dialog box lets you organize list options manually or through Excel import.

In the dialog box, there are buttons to add and remove options, as well as move them up and down in the list, and in and out of other options to create a hierarchy.

List options

[Download multi-level list starter template](#)

List

	List options
<input type="checkbox"/>	Option1
<input type="checkbox"/>	Option2
<input type="checkbox"/>	Option3

[Cancel](#) [Save](#)

NOTE

There can be up to a maximum of 10,000 items in the complete list, including all items in the levels.

5.4 STEP BY STEP 1 – ADD A MANUAL MULTILEVEL LIST QUESTION

1. In a form, drag the **List** question type onto the form or task.
2. In the Question text field, type in the question.
3. In the Type drop-down list, select the **Multi-level drop-down** option.

TIP

When a check box to the left of an option is selected, the up and down arrows are shown to let you move that question response up or down in the listing.

NOTE

If available, indenting can be done with the **Move List in to** and **Move List Out of** arrows.

Add list option and **Delete list option** icons are available for you to use.

4. Select the check box of the second list item, and then select the indent or the **Move list option in to** icon.
 - That option now falls below, or within, the item above it.
5. Unselect the second list item.
6. Select the third list item.
7. Indent the third list option using the **Move list option in to** icon.
 - Your List option dialog box should look similar to this example:

The screenshot shows a dialog box titled "List". At the top, there is a toolbar with icons for adding (+), moving up (↑), moving down (↓), moving left (↶), moving right (↷), and deleting (×). Below the toolbar is a table with a checkbox column and a text column. The first row is a header row with a checkbox and the text "List options". The second row has a checkbox and the text "Yes". The third row has a checkbox and the text "Yes, absolutely". The fourth row has a checkbox and the text "Yes, but with concern". The "Yes" item is selected, and the "Yes, absolutely" item is indented under it.

8. Add three more list options, using the **Add List Item** icon.
9. With the final two items, use the **Move list option in to** icon to indent them.
 - Your List option dialog box should look similar to this example:

List

+ ↑ ↓ ↶ ↷ ×

<input type="checkbox"/>	≡ List options	
<input type="checkbox"/>	▼ Yes	
<input type="checkbox"/>	Yes, absolutely	
<input type="checkbox"/>	Yes, but with concern	
<input type="checkbox"/>	▼ No	
<input type="checkbox"/>	No, though I have a question	
<input type="checkbox"/>	No, no questions asked	

10. Click **Save**.
11. Click **Publish**.
 - As a result, when the form or task is opened, the first question can be answered, which then leads to branched options for the second question.

To create a multilevel drop-down question using the template from Excel, first click the **Download multi-level list starter template**. The template has one Example sheet with instructions on how to use it. You can then fill out the Import sheet with list options for as many levels as necessary.

This step-by-step walks you through adding items through the multilevel list start template.

5.4 STEP BY STEP 2 – ADD A MULTILEVEL LIST USING THE LIST STARTER TEMPLATE

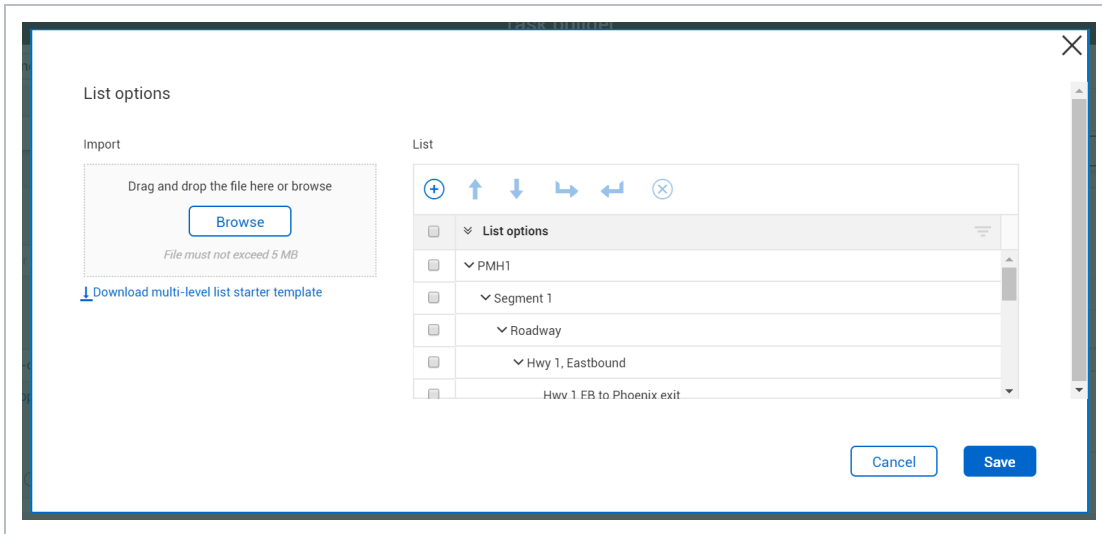

1. In a form, drag the **List** question type onto the form or task.
2. In the Question text field, type in the question.
3. In the Type drop-down list, select the **Multi-level drop-down** option.
4. Click on **Manage List Options**.

5. Click the **Download multi-level list starter template**. The Excel file downloads.
6. Click **Enable Editing** if needed.
7. **Save the template file** to your desired location.
 - There are two tabs, the Example tab, and Import, the latter of which you use to create your multilevel branching template.
8. Open the **Import** tab.
9. Create a **Level 1** item in Column A, PMH1 in the example.
10. In Column B, create the **Level 2** item, Segment 1 in the example.
11. In Column C, create the **Level 3** items, or decision points, Roadway, Structure, and Walls in the example.
 - This means that when a user selects a Column B segment, they will have three additional choices from Column C in the next drop-down list
12. In column D, add **Level 4** options.
 - In the example shown, there are only Level 5 options in Column E for Hwy 1, Eastbound and Hwy 1, Westbound

	A	B	C	D	E
1	Level 1	Level 2	Level 3	Level 4	Level 5
2	PMH1				
3	PMH1	Segment 1			
4	PMH1	Segment 1	Roadway		
5	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	
6	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	Hwy 1 EB to Phoenix exit
7	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	Hwy 1 EB to Central Ave
8	PMH1	Segment 1	Roadway	Hwy 1, Westbound	
9	PMH1	Segment 1	Roadway	Hwy 1, Westbound	Hwy 1 WB to 101
10	PMH1	Segment 1	Roadway	Hwy 1, Westbound	Hwy 1 WB to Scottsdale Rd
11	PMH1	Segment 1	Structure Segment 1		
12	PMH1	Segment 1	Structure Segment 1	1st Ave	
13	PMH1	Segment 1	Structure Segment 1	TUC #2 overpass	
14	PMH1	Segment 1	Structure Segment 1	101 WB overpass	
15	PMH1	Segment 1	Walls Segment 1		
16	PMH1	Segment 1	Walls Segment 1	TUC A0	
17	PMH1	Segment 1	Walls Segment 1	TUC A1	

13. **Save** the Excel file.
14. Go to Compliance, and then click **Browse**.
15. Navigate to the folder where your Excel file is located.

16. Select the file, and then click **Open**.
17. The Excel data populates. Click **Save**.

**TIP**

There are no limits on how many levels can be added. Many levels down might not be the best when using the list.

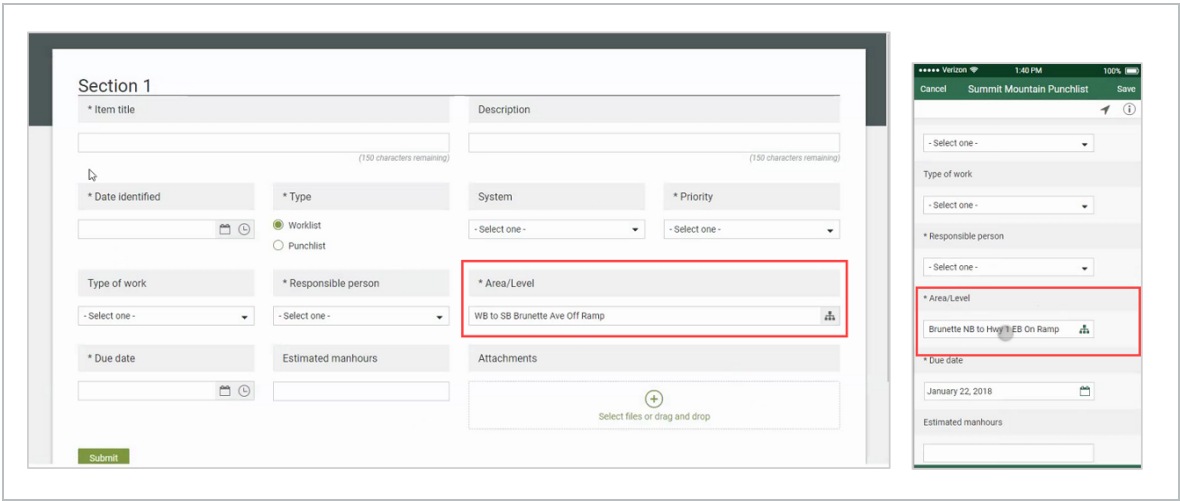

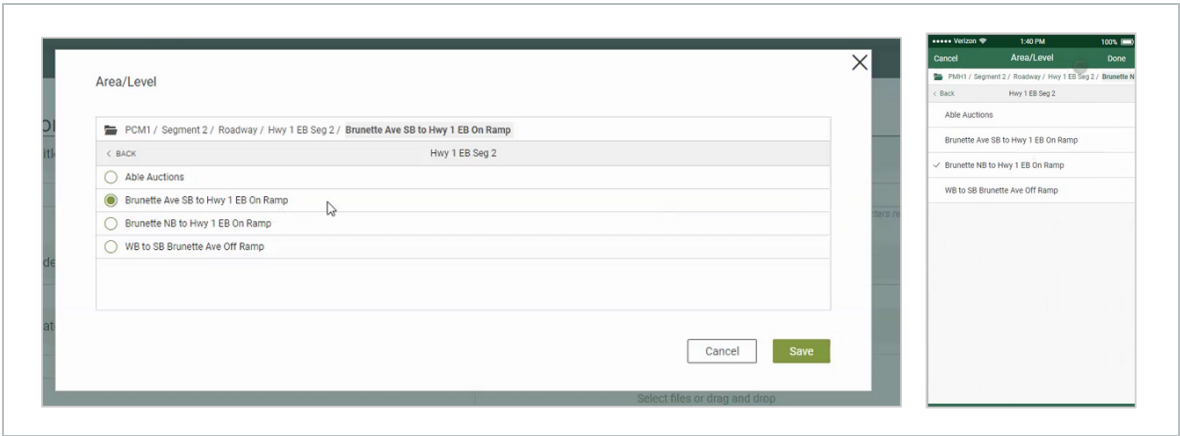

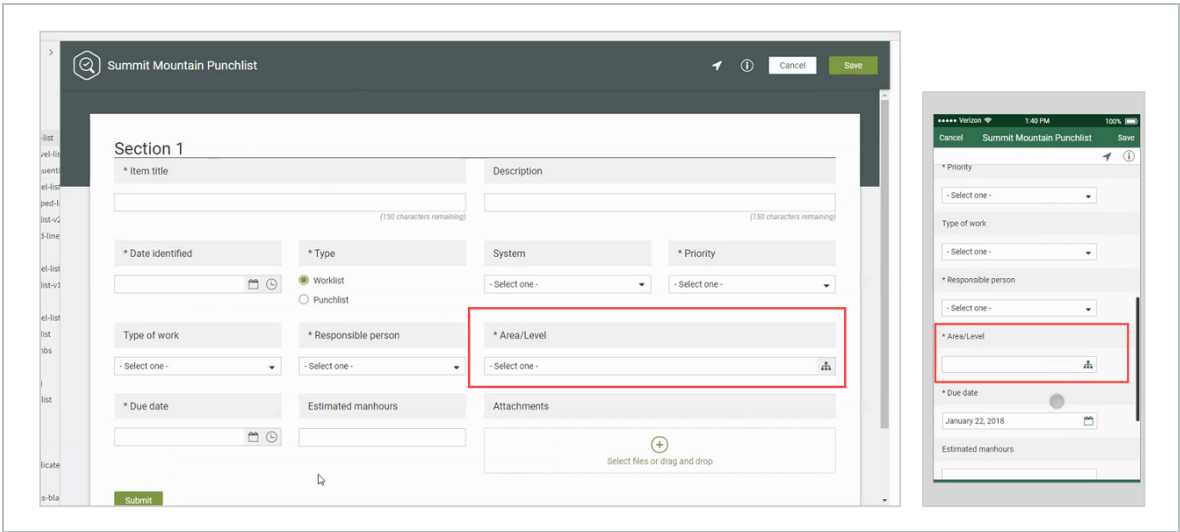

TIP

There is a maximum of 10,000 items in the complete list including all items in the levels.

TIP

There is a maximum of 200 characters, including spaces, for each item. Items that exceed 200 characters are truncated.

In a form, a multilevel list option looks similar in either the web or mobile versions:

5.5 REFERENCED FORMS AND TASKS

When you create a task or an event from another task or event, you see the referenced item in both associated tasks or events, letting you see which events and tasks are associated.

When you create a new event, you can select the **Associate Task** check box.

The screenshot shows the 'Form builder' interface. At the top, there's a dark header with 'Form builder' text. Below it, a breadcrumb trail shows 'Module landing > Templates manager > Form builder'. The main area is divided into a left sidebar and a right main panel. The sidebar has a 'Section' header with a close button and a dropdown arrow. Below it is the 'Details' panel, which contains a '* Label' field with 'SECTION HEADER' text, a red-bordered checkbox labeled 'Associate task' (which is checked), and a 'Supporting text' field with an information icon. The right main panel has tabs for 'BUILD', 'PROPERTIES', and 'FORM FLOWS'. The 'BUILD' tab is active, showing a 'SECTION HEADER' label and a text input field with the placeholder '* Location of Safety Tour' and a character count '(250 characters remaining)'.

When you do that, two things occur. First, the Task Button is shown, in this case in the Section Header. Second, a number of changes in the Details panel occur, including:

- The Task Button Text area shows up where you can modify the name of the button
- The Type lets you choose from Single-Use or Multi-use
- The Template to Open Upon Button Selection drop-down list requires you to select a Task template

- And the Associated Categories drop-down list requires a selection

The screenshot displays the 'Form builder' interface. On the left, the 'Details' panel for a 'Section' is visible, with a circled '2' next to the 'Task button' field. The panel includes fields for 'Label' (SECTION HEADER), 'Associate task' (checked), 'Task button text' (Task button), 'Type' (Multi-use selected), 'Template to open upon button selection' (Corrective Action), 'Associated categories' (Inspections), and 'Supporting text'. On the right, the form layout shows a 'SECTION' header with a circled '1' next to the 'Task button'. Below the header are two input fields: 'Location of Safety Tour' and 'Safety Tour date'. At the bottom, there is a text input field with the placeholder 'Click to type your question'.

After any other changes are made, select **Save**.

TIP

You are also able to start a task from the Section area of an event, not just a question, which is useful for reporting purposes.

5.6 INTEGRATED LIST

5.6.1 SUMMARY

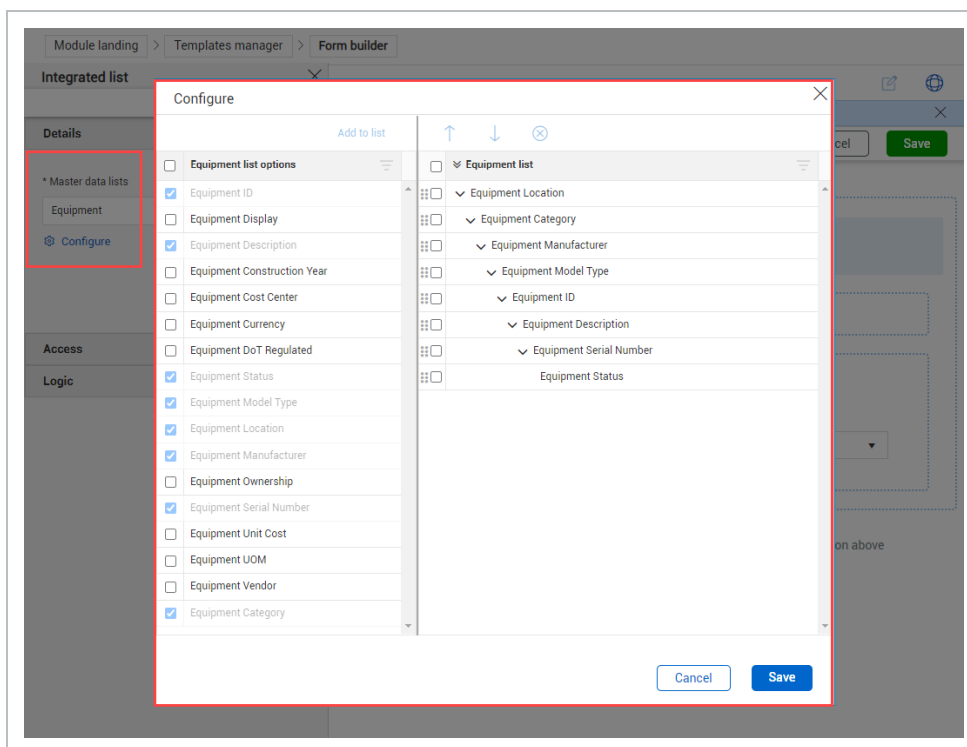

When building your template form, the Integrated list question lets you build lists that integrate with InEight Platform master data library. The Integrated list question lets you add resource column fields in a series of cascading questions. You can use cascading questions to narrow down the selection of a resource. For example, you can add Vendor Region, Vendor Country, and Vendor City column fields of cascading questions to narrow the selection down to a city. The list pulls data from Platform's resources in Main menu > **Master data library**.

NOTE

Currently, the Integrated list feature is only available for Operational resources equipment and Vendors master data.

After you add the integrated list question, select the question, and then click the **Configure** button to choose from your selected resource's column headings to add to the list.

The series of selected column headings fields show as a hierarchy and can be modified in any order.

After saving your integrated list configuration, each column heading option in the hierarchy shows as a series of cascading questions in your template form. You can add multiple series of lists to your integrated list.

The screenshot displays the 'Form builder' interface within the 'Templates manager'. The left sidebar contains 'Layout types' (Column, Section) and 'Question types' (Attachment, Button, Choice, Date-Time, Form Button, Form Flow, GPS, Integrated list, Reference, List, Number, People picker, Signature, Text). The main workspace shows a 'SECTION' with a 'SECTION HEADER' and a grid of eight questions, each with a dropdown menu and a label: 'Equipment Location' (Equipment 1-1), 'Equipment Category' (Equipment 1-2), 'Equipment Manufacturer' (Equipment 1-3), 'Equipment Model Type' (Equipment 1-4), 'Equipment ID' (Equipment 1-5), 'Equipment Description' (Equipment 1-6), 'Equipment Serial Number' (Equipment 1-7), and 'Equipment Status' (Equipment 1-8). A red box highlights this grid. At the bottom, a note reads: 'Add fields to your form by dragging types from the left panel to the blank section above'. The top bar includes tabs for 'BUILD', 'PROPERTIES', 'FORM FLOWS', and 'HISTORY', along with a warning: 'You have not saved your template for 10 minutes. Please consider saving.' and 'Cancel'/'Save' buttons.

5.6.2 STEPS

To add and configure an integrated list:

1. In a new or unpublished form, drag the **Integrated list** question into the form.
2. Click the Integrated list question.
3. In the left slide-out panel, select from the **Master data lists** drop-down resources.
4. Click the **Configure** icon, and then select the fields to add to the list.
5. Click **Add to list**.

Each field becomes a drop-down question in the form or task template and shows in a cascading manner. You can use the **Move up** and **Move down** arrows to modify the columns in a logical order according to your business process.

6. Click **Save**.

You can reorder, add, and delete from your list by clicking on any of the list column attributes, and then clicking **Configure**.

5.6.3 RELATED INFORMATION

InEight Platform [Master Data Libraries](#)

5.7 TEMPLATE PROPERTIES

On the appropriate Form builder or Task builder page, the Properties tab contains the basic information entered when the form was created (on the Create a form or Create a task dialog box). This includes a header section containing the following:

- Form or Task ID (this is automatically assigned when the form or task is created)
- Version
- Status
- Module
- Creation date
- Creation time
- Created by

The screenshot shows the 'Order Safety Item' Properties tab. At the top, there's a breadcrumb trail: 'Module landing > Templates manager > Form builder'. Below this is a navigation bar with tabs: 'BUILD', 'PROPERTIES' (active), 'FORM FLOWS', and 'HISTORY'. On the right of the navigation bar are 'Cancel' and 'Save' buttons. The main content area is titled 'Properties' and contains a table with the following data:

Form ID	Version	Status	Module	Creation date	Creation time	Created by
15	7	Draft	Safety	05/20/2021	10:02 AM	

Below the table, there are three sections for editing:

- Form name:** A text field containing 'Order Safety Item'.
- Description:** A text field.
- Category association:** A dropdown menu showing 'JS&V' with a search icon and a note: 'Select categories you want to associate to this form'.
- Organization association:** A list of organizations with checkboxes. The list includes:
 - ☒ C-XYZ (with a '+ Future Children' button)
 - ☒ Steel Structure Training Job
 - ☐ Steel Structure Training Job 2
 - ☒ Steel Structure Training Job 3
 - ☐ Steel Structure Partner Job
 - ☐ Training Job
 - ☐ Wards Island WWTP
 - ☒ Heavy PM Estimate
 - ☒ BMS Test (BMS Test)
 - ☐ C-XYZ-ND (with a '+ Future Children' button)
 - ☐ C-XYZ-SD (with a '+ Future Children' button)

At the bottom of the organization list, there is a note: 'Select organizations you want to be able to perform this form'.

The Properties tab also includes the following fields, which you can edit at any time with the right permissions:

- Form or Task name
- Description
- Category association with + Future Children functionality

- Organization association
- Options

5.7.0.1 TASK AND FORM BUILDER OPTIONS

In Form builder, both the Event title and Event date fields have the option of being System defined or User defined. Both can be used strategically to personalize your form.

Options

Available on mobile ?
☐

Event title ⓘ
System default ▾

Event date ⓘ
System default ▾

☐ Add expiration date ⓘ

Available through form button only? ⓘ
☐

Integration tag ⓘ

Enable print functionality
☐

Form Builder: Event Options

	System Default	User Defined
Event title	The event title defaults to the "name of the form_ event ID" and is presented on the event list as the event title.	This provides a mandatory text question on the form where the user can provide a title that is presented on the events list as the event title.
Event date	The event date defaults to the date the form was started.	This provides a mandatory date question on the form where the user can provide a date that is presented on the events list as the event date.

In Task builder, both Task title and Due date can be used strategically to personalize your task.

Task Builder: Task and Due Date Options

	System Default	User Defined
Task title	The task title defaults to the "name of the task_ task ID" and is presented on the task list as the task title.	This provides a mandatory text question on the template where the user can provide a title that is presented on the task list as the task title.
Due date	Not applicable	This provides a mandatory date question on the template where the user can provide a date that is presented on the task list as the due date.

5.7.0.2 EXPIRATION DATE

Notice that when the Add expiration date check box is selected, the Add renewal date option is shown.

Selecting Add expiration date makes this a mandatory field on the form. If selected, the Add renewal date also provides a mandatory question on the form.

Form Builder: Date Options

	Definition
Add expiration date	This selection provides a mandatory date of expiration question on the form. This question and the value show on the event list as well after the form has been filled out.
Add renewal date	This selection provides a mandatory date of renewal question on the form. This question and the value show on the event list as well after the form has been filled out.

NOTE

After the form is published, only certain fields in the properties may be changed without putting the form into a draft status.

5.7.0.3 TEMPLATE AVAILABILITY

To hide a template from being started as a stand-alone form or task, turn on the **Available through form button only?** toggle. When hidden, these templates can be used only through association with the Form Button.

5.7.0.4 INTEGRATION TAG

You can add an integration tag to a template to include the form in reporting. Specific questions in that form with the same integration tag are then reported on. This applies only to standard reports.

5.7.0.5 TEMPLATE INTEGRATION

Template integration is helpful when you need to use a task in InEight Change. For more information about template integration, see [Template Integration](#).

5.7.0.6 ENABLE PRINT FUNCTIONALITY

You can enable a template to be printable from the Events or Tasks page, and from the event or task detail page.

NOTE

Pay special attention when enabling the print feature. This feature does not contain any permissions associated with the event or task. If you have access to the work item and can print it, you can print all questions and answers in the work item.

To enable a template to be printable, turn on **Enable print functionality**, and then select which report to run. Currently, only the Compliance General Forms Integration is available.

5.7.0.7 TEMPLATE LANGUAGE SETTINGS

Template language settings let you import translations for each question and section in a Microsoft Excel spreadsheet. For more information about how to import translations, see [Template Translation](#).

5.7.0.8 ORGANIZATION ASSOCIATION

On the Properties tab, selecting a project is as simple as selecting the check box next to the project name.

In any parent level, you can click the **Select all** or **Deselect all** option, if appropriate.

Projects not available to you are grayed out.

Clicking the **+ Future Children** button in a parent organization allows you to associate templates and users with that parent organization and all its children with just one click. The association can also persist through any new children (projects) that get associated after the original selection, so you do not have to manually add each project.

TIP

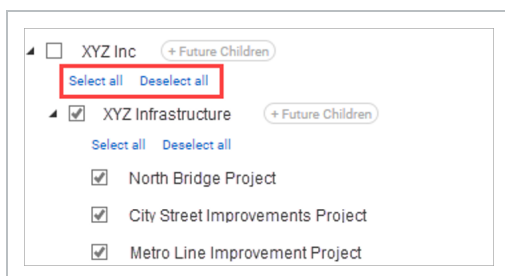

After the **+ Future Children** button is selected, it changes color.

SELECT ONLY THE PARENT ORGANIZATION

When you select a parent organization, only that organization is selected. If the parent organization has child suborganizations or projects, those children are not automatically selected when you select their parent. This change gives you the flexibility to fine-tune which children to associate.

SELECT OR DESELECT ALL CHILD ORGANIZATIONS OR PROJECTS

The **Select all** and **Deselect all** buttons are available for each parent organization with children. When you use these buttons, only the children are selected or deselected. The parent organization is not affected.

NOTE

When you select all, only existing children are selected. New projects are not automatically selected unless you use the + Future Children option. See the next section for more information.

PERSISTENTLY ASSOCIATE FUTURE CHILDREN

The + Future Children button is available for each parent organization. If you enable this option, all new children of that parent are automatically selected. This option prevents having to constantly select each new project when you create one.

**NOTE**

The + Future Children option works independently of the Select all option. For example, if you want to select all future new projects, but not necessarily all existing ones, you could select a few existing projects, or none, and still enable + Future Children.

5.7.0.9 MANAGE CUSTOM IDS

Custom IDs let you sort and filter forms and tasks for better management of your events and tasks. You can also assign multiple custom IDs to one template and add or remove properties for existing custom IDs.

NOTE

Once a custom ID is configured on a template, it will be associated with any new forms or tasks that are created. Custom IDs do not need a published template to start appearing on events or tasks. However, please note that custom IDs are not applied to scheduled events or tasks. Once a scheduled event or task is performed and saved, the next available custom ID will be used for that event or task.

The following Step by Step shows you how to create a custom ID.

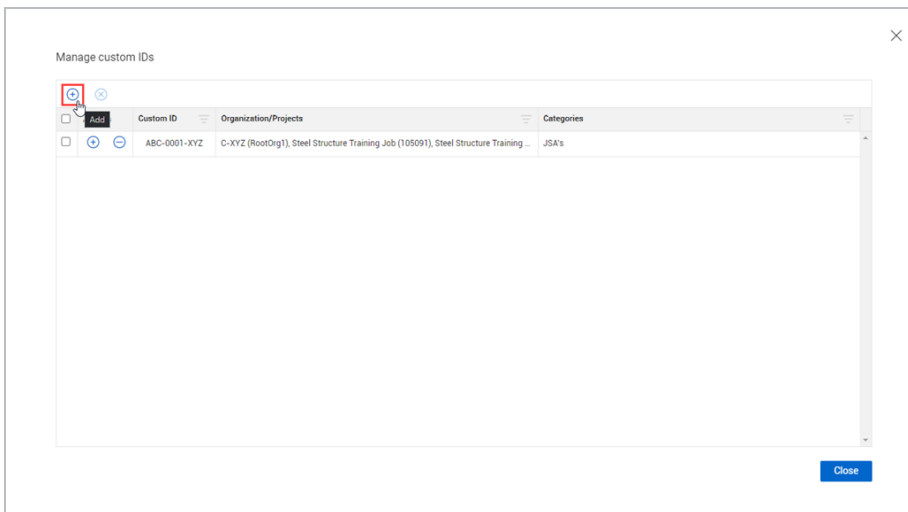

5.7 STEP BY STEP 1 – ADD A CUSTOM ID

1. Click Actions > **Manage custom IDs** in the upper-left of the Form or Task builder's Properties tab.

- The Manage custom IDs dialog box opens

2. Click the **Add** icon to open the Add custom ID wizard.

3. Enter values in the Prefix, Starting number, and Suffix fields, and then click **Next**.

NOTE

You must fill out at least one of the fields, but you are not required to fill out all of them.

NOTE

Each of the fields can be up to 10 characters long. Prefix and Suffix are alphanumeric, and Starting number is only numeric.

4. Select the organizations and projects you want the custom ID associated with.
5. Optionally, select **Apply this custom ID to each selected project**.

NOTE

When this option is selected, the custom ID number increases independently for each project. For example, if the custom ID starts at CUS-200-ID and this option is selected, when you perform the form or task twice in Org/Project 1, the ID increases from CUS-200-ID to CUS-201-ID. If you then perform the same form or task twice in Org/Project 2, the ID also increases from CUS-200-ID to CUS-201-ID independently from the ID numbering in Org/Project 1.

6. Click **Next**.
7. Select the categories you want the custom ID associated with.
8. Click **Save & close**.

TIP

You can also click **Save & add new** to immediately add another custom ID.

5.8 TEMPLATE INTEGRATION

Template integration lets you make tasks available for use with InEight Change. For example, you might need to complete a task associated with a change issue.

NOTE Template integration works only with InEight Change tasks.

The functionality to add an integration is in the template Properties tab. To add a template integration to a template, you must have a level 3 admin role, and the template must have already been published. If you do not have a level 3 admin role, you can see the Add template integration button, but you cannot use it.

The following steps explain how to add an integration to a template.

5.8 STEP BY STEP 1 – ADD A TEMPLATE INTEGRATION

1. On the Properties tab of the task builder, under Options, click **Add template integration**. The Add template integration dialog box opens.

The screenshot shows the 'PROPERTIES' tab of the task builder. The 'Options' section is visible, containing several settings: 'Available on mobile?' (toggle), 'Event title' (dropdown), 'Event date' (dropdown), 'Add expiration date' (checkbox), 'Available through form button only?' (toggle), 'Integration tag' (text input), and 'Enable print functionality' (toggle). A blue button labeled 'Add template integration' is highlighted with a red box. Above the 'Options' section, there are two lists: 'Category association' and 'Select organizations you want to be able to perform this form', both with checkboxes and 'x' icons for removal.

2. Fill out the required fields:

- Integration title
- Category association - One category associated with this integration. For more information about categories, see [Categories](#).
- Associated products - Text-only field that indicates which InEight application this integration is for.
- Organization association - Organizations and projects that this integration is associated with. For more information about organization association, see [Template Properties - Organization Association](#).
- You can also optionally fill out the Description field.

The screenshot shows a 'Add template integration' dialog box. It features a header for 'Online order' with the ID '27114', module 'Safety', and creation details. The main form includes fields for 'Integration title', 'Description', 'Category association' (a dropdown), and 'Associated products'. A right-hand pane for 'Organization association' contains a search bar and a list of organizations, with 'Root Organizations (RootOrg1)' selected and its children visible. 'Cancel' and 'Save' buttons are at the bottom right.

3. Click **Save**.

5.8.1 MANAGE TEMPLATE INTEGRATIONS

There are several ways to view existing integrations for a single template and for all your organization's templates

After at least one integration has been added for a template, the number of integrations is shown to the right of the Add template integration button. To view the current template's integrations, click the number next to the button. The Template integrations dialog box shows all integrations for the current template.

To view or edit all existing integrations for your organization, click the **Actions** button in the upper left of the Properties tab, and then select **Manage template integrations** in the drop-down menu. The Template integrations page opens. On this page, you can edit or delete integrations.

PRODUCT SETTINGS MODULE SETTINGS

Module management **Template integrations**

	Integration title	Template name	Module	Category	Associated products
<input type="checkbox"/>	Change Issue form	Online order	Change	Tasks	Change
<input type="checkbox"/>	Change Task	Change - Task	Change	Tasks	Change

You can also access the Template integrations page from the Product Settings page. For more information about product settings, see [Product Settings](#).

5.9 TEMPLATE TRANSLATION

Templates can be translated into multiple languages with a Microsoft Excel template. When a template has translations applied, users can change the language in their user profile and view events and tasks in their selected language. Translation requires language setup in Module summary settings and Excel template export and import in Template properties. The export functionality gives you a template spreadsheet file with all of the questions and sections to fill out and import back into the form or task template.

5.9.1 MODULE SUMMARY SETUP

To make a language available in a module, go to Settings > Compliance > Module > **Module summary**, and then select the language in the Module language settings section. See [Language settings](#) for more information.

5.9.2 TEMPLATE LANGUAGE SETTINGS

You can export and import the translations Excel file in the template Properties tab under Template language settings.

The screenshot shows the 'Incident Report #2' form builder interface. The 'PROPERTIES' tab is selected. The 'Template language settings' section is highlighted with a red box. It contains a dropdown menu with 'English' and 'Español (América Latina)' selected, and buttons for 'Export' and 'Import'.

NOTE

You must publish the template before exporting the Excel file. The Export and Import buttons are enabled only after you publish a template.

The following Step by Step shows you how to import translations.

5.9 STEP BY STEP 1 – IMPORT TEMPLATE TRANSLATIONS

1. In the Template language settings, select a language from the drop-down menu.

NOTE

If you do not see the language you want, go to Settings > Compliance > Module > **Module summary**, and then select the language in the Module language settings section.

2. Click **Export**.

- A Microsoft Excel spreadsheet file is downloaded with all of the template questions and sections in rows

NOTE

After you export the Excel template, do not edit the published template until after you import translations. If the template is edited, you must publish the new version, and then export the Excel file again. If you try to import the old version of the Excel file, it results in an error.

3. Under the column for your chosen language, enter translations for each question and section.

NOTE

See the section below for more detailed information about translation template columns.

4. Save the file.

5. In the Template language settings, click **Import**, and then select the saved spreadsheet file.

TIP

If you make any further changes to the template, you must publish the template again, and then repeat the steps above.

5.9.3 TRANSLATION EXCEL TEMPLATE

The translation template Excel file is created from the current published version of the form or task template.

	D	E	F	G	H

The Excel file consists of the following columns:

- A. (hidden) **Object ID** – Do not edit this column. These are specific IDs for form or task items. The numbers change between published versions of the form or task.
- B. (hidden) **Characteristic type** – Do not edit this column. This is the question type and is required for the migration path of information used in the import.
- C. (hidden) **Object type** – Do not edit this column. This is the type of form or task item and is used in the import process. The types are section, section supporting text, question, question supporting text, option, option supporting text, hyperlink text to display, and form flow title.
- D. **Type** – Do not edit this column. This shows each type of question.
- E. **Info** – Do not edit this column. This shows what object type and part of the template the row refers to. The object types are section, section supporting text, question, question supporting text, option, option supporting text, hyperlink text to display, and form flow title.
- F. **Section/Section supporting text/Question/Question supporting text/Option/Option supporting text/Hyperlink text to display/Form Flow Title** – This is the English version of entered text for each object type.

NOTE

Language Code of EN indicates English. Do not change the language code for any column.

- G. All columns following F are for other languages. Enter your translations for each object in these columns for each language.

TIP

You can apply HTML formatting such as bold, highlighted, and underlined to supporting text. HTML code is shown in column F. If you want to apply the same formatting to other language columns, you must manually enter or copy the HTML code to the other columns. If you do not enter or copy the code in the translated columns, the translation is shown as plain text.

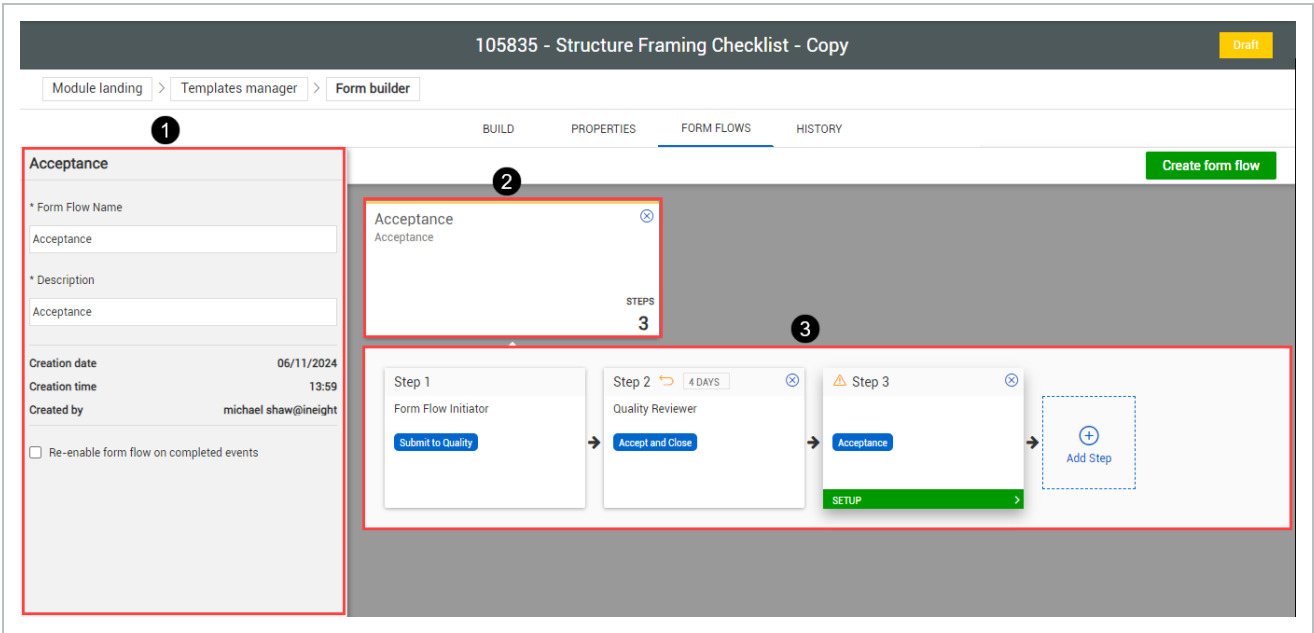

CHAPTER 5 – FORM FLOWS

5.1 FORM FLOWS OVERVIEW

The Form Flows tab of the Form builder lets you manage all the form flows associated with a form template. A form flow adds workflow functionality to your form so that responsible parties can be actively engaged in an event’s process life cycle. Including a form flow can be helpful if your business process needs to be handed off from the reporter to another individual or department. Each step of a form flow has an associated form flow button in the template that you, as a responsible party, can click to complete your part.

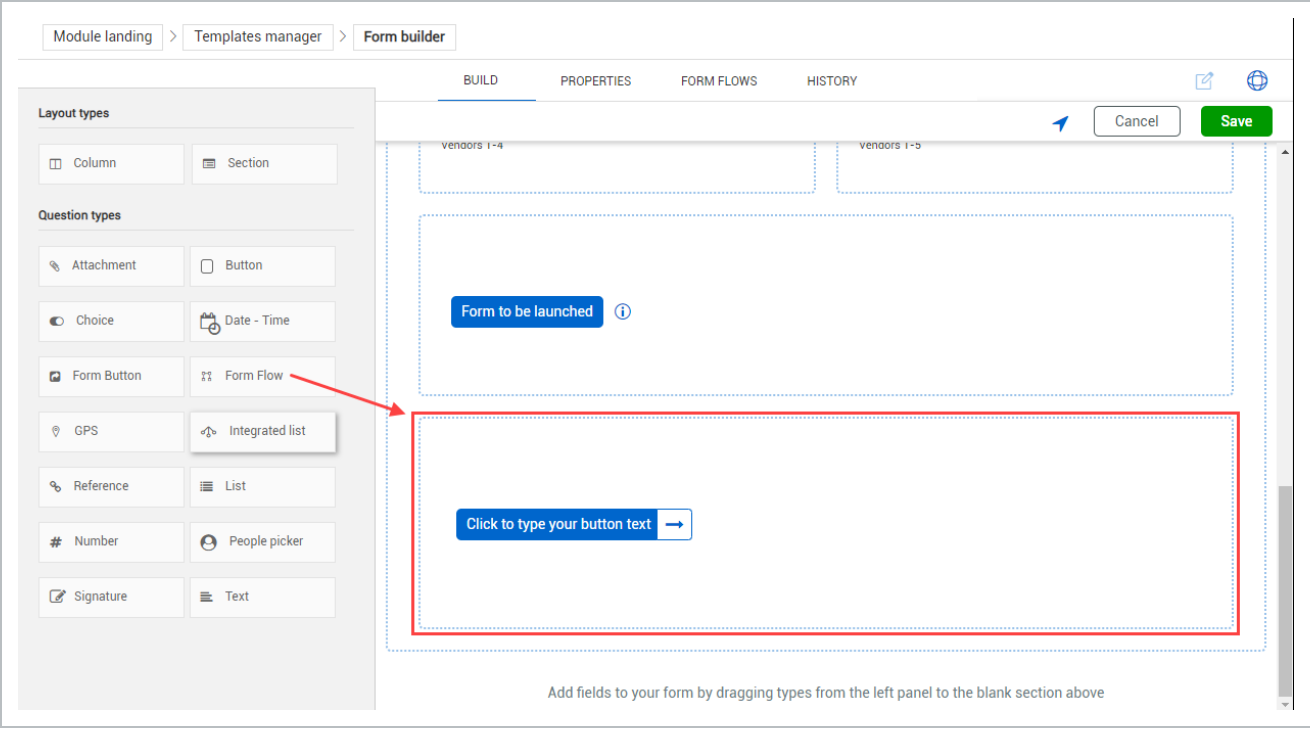

You can add multiple form flows to a form to suit your specific business processes. For example, when filling out a form, a manager's approval may or may not be required to proceed. In this case, you can use a form flow for when manager approval is required, and another form flow when it is not required. Each form flow’s steps are independent of each other but contained in the same form.

The following image and table show the Form Flows tab sections:

	Form flow overview
1	The side panel lets you edit fields associated with the selected form flow or step.
2	Each form flow is shown as its own card with a description and number of steps.
3	When a form flow is selected, each of its steps is shown as a card with information like the associated button, the responsible party, and the number of days until the step is overdue. You can click the Add Step button to add additional steps.

In the Form builder, you can add Form Flow questions as shown in the following image.

You can set up the Form Flow question details by selecting the Form Flow question, and then configure the details on the left panel as shown in the following image.

5.1.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

5.2 CREATE A FORM FLOW

To create a form flow, you must use both the Build and Form Flows tabs to associate form flow questions with a form flow and its steps. To plan and create a form flow efficiently, you can build your form with its form flow questions before moving to the Form Flows tab and associate those questions with steps.

You can create a form flow from the Build tab or the Form Flows tab.

- **Build tab** - In the Form Flow Button's side panel under Details, click **Step setup**, and then click **Next** when you see a dialog box that says no form flows exist. When there are existing form flows, the Form Flows tab opens.
- **Form Flows tab** – Click the **Create form flow** button.

5.2.1 STEPS

CREATE A FORM FLOW FROM THE BUILD TAB

1. Add a Form Flow question.
2. Select the new form flow button question, and then on the left panel, under Details, fill in the Button text name.
3. Click **Step setup**. The No form flows exist dialog box shows. If you have existing form flows, you will automatically land in the Form Flows tab.
4. In the No form flows exist dialog box, click **Next**. The Create form flow dialog box shows.
5. In the Create form flow dialog box, enter the **Form flow name** and **Description**, and then click **Create**. A new form flow shows with Step 1 as the first default card.
6. Select the **Step 1** card.
7. On the left panel under Step 1, in Step details, select the following:
 - **Who will be responsible for this step** – Original Reporter or Form Flow Initiator
 - **Which form flow button will be used for this step** – The buttons that are available have

been added and configured in the Build tab in step 1 and 2.

The screenshot shows the 'Form builder' interface for a checklist titled '105835 - Structure Framing Checklist - Copy'. The 'FORM FLOWS' tab is active, showing a sequence of steps: Step 1 (Form Flow Initiator), Step 2 (Quality Reviewer), and Step 3 (Acceptance). A red box highlights the 'Step 1' details panel on the left, which includes fields for 'Who will be responsible for this step?' (Form Flow Initiator), 'Which form flow button will be used for this step?' (Submit to Quality), and an 'Email' section. The main area shows the flow steps with buttons like 'Submit to Quality', 'Accept and Close', and 'Acceptance'. A 'Create form flow' button is visible in the top right.

8. Optionally, if you want to send an email notification to the responsible party for this step, click **Add email** in the Email section and complete the dialog box. The email notification indicates the start of the step after clicking its form flow button, not the completion of the step.

NOTE Access configuration is not available in Step 1. You can configure access for each individual step thereafter.

5.2.2 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

5.3 SETUP ADDITIONAL FORM FLOW STEPS

Add additional steps to your form flow using the Add Step button in the Form Flows tab.

You must have form flow buttons on the form’s Build tab available before you add a step. You can configure each step independent of each other.

The Add Step wizard has the following 5 configurable options:

	Option	Description
1	Step details	<p>Select who is responsible for this step. The options are dependent on who is selected.</p> <ul style="list-style-type: none">Who will be responsible for this step?Select the role responsible for this step.Allow the opportunity to choose a single user from this group when the button is selected.When can this step move to the next step ? <p>When you select Users, you must select a specific user. When you select Role, you must select which role and whether the user can choose an individual from the selected role to be responsible.</p>
2	Email	<p>You can select to add an email notification that notifies responsible recipients each time this step is reached. When selected, you can configure your email notification contents. The email notification indicates the start of the step after clicking its form flow button, not the step’s completion. You can also add variables so that users can enter information such as reporter names or</p>

	Option	Description
--	--------	-------------

event titles into emails. To add a variable, type @, and then select an option from the drop-down list.

3	Actions	<ul style="list-style-type: none">• What should the status be when in this step?• How many days until this step become overdue from initiated date or from previous step.?• Make this step reversible - The make this step reversible option allows users to reverse to a previous step. Select which step to go back to, whether to cc recipients to the email, and whether to require a comment when reversing. When you make a step reversible, you must go back to the Build tab after the step setup to edit the text of the new button, which is named Reversal form flow button by default. The reverse form flow button can have leading logic applied to it independently from the button that advances to the next step.
---	---------	--

4	Step access	You can set view or edit access by role for each form question or section when the event is in this step. When you select a cell, a panel shows options for all roles, select role, or no roles . Step access does not supersede question access set up in the template.
---	-------------	--

The user permissions set up in InEight Platform supersedes access configured for the step.

5	Button details	<ul style="list-style-type: none">• What form flow button will be used to advance to the next step?• Will this button complete the form flow ?• The Button details is available after step 1.
---	----------------	---

You can edit any of the step's information by selecting the step card and editing the fields in the left panel.

5.3.1 STEPS

CONFIGURE ADDITIONAL FORM FLOW STEPS FROM THE BUILD TAB

NOTE

To configure additional form flow steps from the Build tab, you must have at least one form flow question or a form flow set up.

1. In the Build tab, add a new form flow question.
2. Select the new form flow button question, and then on the left panel, under Details, fill in the Button text name and other optional items.
3. Click **Step setup**. You will automatically land in the Form Flows tab.
4. The form flow step shows with a green link named **SETUP**. When there are multiple form flows, choose a form flow to add the step to.

5. Select the new form flow button, and then configure the Step details on the left panel.

NOTE

When you start the Add Step wizard from the Build tab, the form flow button shows as the next step in the flow.

5.3.2 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

5.4 RE-ENABLE FORM FLOW

You can let users re-enable the form flow of a completed event by selecting a form flow, and then selecting the **Re-enable form flow on completed events** check box in the side panel.

The screenshot shows the 'Form builder' interface in the 'Templates manager' section. The left sidebar contains the configuration for a form flow named 'Acceptance'. The configuration includes fields for 'Form Flow Name' and 'Description', both containing the text 'Acceptance'. Below these are fields for 'Creation date' (05/29/2024), 'Creation time' (5:14), and 'Created by' (michael shaw@ineight). At the bottom of the sidebar, the checkbox 'Re-enable form flow on completed events' is highlighted with a red border. The main area on the right shows a preview of the form, which includes a title 'Acceptance', a description 'Acceptance', and a 'Step 1' section with a 'Form' field and a 'Submit' button.

When executing a form, click the **Re-enable form flow** button.

The screenshot displays the 'Equipment Test form flow' interface. At the top, a header bar shows the form flow title 'Equipment Test form flow_2024061300002' and 'Equipment Test form flow' with 'Event ID: 2024061300002'. To the right, a progress bar indicates 'SECTIONS 1', 'QUESTIONS 2', 'ANSWERED 2', and 'EXCEPTIONS 0'. Below this, a toolbar contains buttons: 'Complete', 'Re-enable form flow' (highlighted with a red box), 'Cancel', 'Save', and 'Save & close'. The main content area is titled 'SECTION HEADER' and contains a form with fields for 'Equipment ID #' (value: 463-5TN), 'Submit to Equipment' (with a right arrow icon), 'Reviewed by:' (value: Julio Salguero - Julio.salguero@ineight.com), and 'Equipment Closes' (with a right arrow icon). A modal dialog box titled 'Re-enable form flow' is open in the foreground. It contains the text 'Select which form flow step to re-ena...' with a dropdown menu showing 'Submit to Equipment'. At the bottom of the dialog are 'Cancel' and 'Re-enable' buttons.

When you re-enable a form flow, you can move it back to the step of their choice. All the completed form flow step data is saved unless you change an answer in a way that leads to different questions based on logic. Only the selected form flow is re-enabled, not all form flows associated with the template. If a re-enabled form flow leads to another form flow that is not re-enabled, the user cannot see the other form flow.

5.4.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

5.5 TEMPLATE HISTORY

The History tab provides a listing by date of changes made to a form or task.

Not all changes made to a template are shown in the history.

Form builder

Module landing > Templates manager > Form builder

CHAPTER 6 – AUTOMAPPING

6.1 OVERVIEW

Automapping is a feature that lets you create a series of events in bulk for project structure levels (nodes) or components associated with inspection and test plans. Automapping is enabled on a project-by-project basis.

By leveraging mapped values, you can associate them with project structure nodes and templates. Leveraging values sets the mapping of templates and the quantities for each template to be created for each project structure level or component value, which eliminates the need to manually create and schedule processes.

When enabled, you can configure automapping in the following areas:

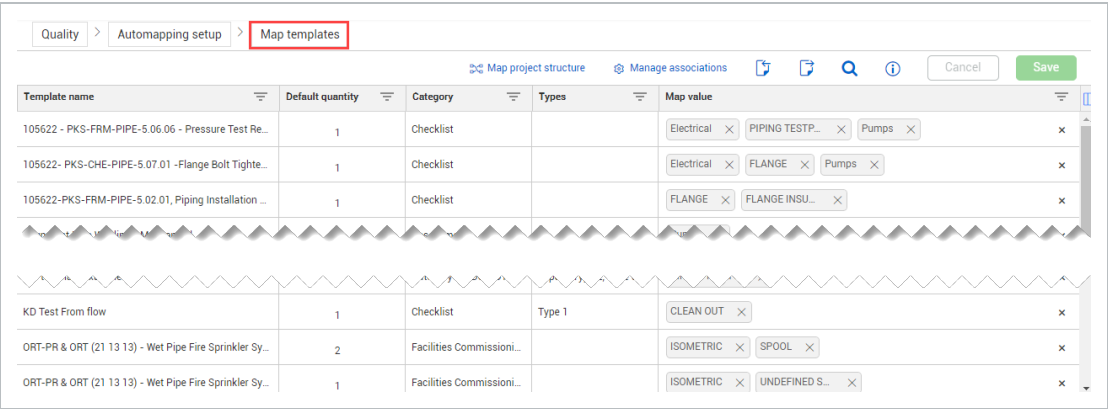

- **Automapping setup** - Create map values to associate to the project structure. The map values serve as tags to associate them to the project structure node levels and templates.

- **Map project structure** - Associate map values to the project structure nodes such as areas, subsystems, and commodities. This creates a relationship between the tag values and the project structure levels. You can map multiple values to a project structure node.

- **Map templates** – From the list of published templates, you can select mapped values, associating them to the template. This creates a relationship between the tag values and the templates. You can map multiple values to a template.

- **Go to Automapping** – To run the mappings configured in Project Settings, click **Go to Automapping**. Select a mapped value, category, project structure nodes, templates, and default quantities to create forms (events) for each level. You can filter by type to narrow list results.

6 templates

When you run the selected automapping items, a dialog box opens to confirm the creation of the activities. An email confirmation is sent to you with a Microsoft Excel file showing a summary of the new forms.

The new events show in the Events list in a *Scheduled* status where you can add an event date, and a reporter. As soon as a reporter and event date are provided, the user is notified.

You can view events associated to the project structure in Events > **Project structure**.

6.1.1 CONSIDERATIONS

- The setting Project structure or Integrate with Plan components must be enabled to use the Automapping feature. For more information, see [Project level settings](#) .
- You can enable Automapping at the project level in Project settings. For more information, see [Automapping](#) in Project Settings.

This page intentionally left blank.

CHAPTER 7 – HEADERS

7.1 HEADERS OVERVIEW

You can create Inspection and Test Plan (ITP) and Project Structure templates headers in the Headers tab. When you enable the project's header feature in Project settings, the headers are automatically created. The header templates ensures that the data captured remains consistent through the use of question types.

7.2 ITP HEADER TEMPLATE

When you enable Inspection & Test Plans for the project, you can also enable the ability for the form to seamlessly integrate InEight Plan components using a template header. This ensures that component data captured from Plan remains consistent through the use of question types.

To do this, enable the **Integrate with Plan components** toggle. This will enable the Go to Header Templates link to access the Headers page.

Click the **Go to Header Templates** link to open the Headers page. You can oversee and manage ITP Headers for projects.

7.2.0.1 ALL COMPONENTS GRID

View all component activities and their status in the All components option. You can track the work performed against a component in the module landing page, under **Links**.

The All components option groups events by component.

Quality > Components

	Event ID	Event title	Event date	Reporter	Status	Form name	Types
▼ 2778	20230621000...	Event title	06/21/2023	Michael	Pending	Reporting - Shaw Testing Form	Mahi 3
▼ 2795	20230627000...	K Lofus 27.01	06/27/2023	Karen	Complete	Reporting - Shaw Testing Form	Mahi 4

7.3 PROJECT STRUCTURE HEADER TEMPLATE

You can use a Project structure template header to seamlessly integrate with InEight Platform master data. The project structure configured in Platform is shown in the header template. This ensures data consistency and provides a single source for InEight Platform data.

To do this, enable the **Project Structure toggle** in Project settings. This will enable the **Go to Header Templates** link to access the Headers page. For more information, see **Project structure** under **Project level settings**.

In the Headers page, you can oversee and manage Project Structure Headers for projects.

Under Organization, you can view the list of projects that have the Project Structure processes enabled. Select a project to view the associated template headers. You can click a project structure header to open and manage it.

To use a Project structure header in a template, you must associate it to the template. Click **Manage associations** to associate the template. For more information, see [Manage associations](#).

7.3.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

To integrate Project Structure header with Platform, all Project Structure values and definitions for your project must first be made in InEight Platform.

7.3.2 STEPS

To navigate to Project settings, see steps to navigate to project level settings in [Settings overview](#), and then click the **Project settings** tab. Click the **Go to Header Templates** link.

7.4 DYNAMIC HEADERS TOGGLE

ITP and Project Structure dynamic template headers are used to enhance your template forms. You can enable and disable the use of header templates created for your project using the **Enable dynamic headers?** toggle feature in your template properties.

Settings > Templates manager > Form builder

7.5 MANAGE ASSOCIATIONS

You can associate published header templates with template forms in the Manage associations page. In the Headers page, click **Manage associations**.

The screenshot shows the 'Headers' page for the 'Steel Structure Training Job (105091)'. The 'Manage associations' link is highlighted with a red box. The page displays a list of headers with their details and a 'Manage associations' button.

Organization	Header Name	Created	Version	Status
Steel Structure Training Job (105091)	Project Structure Header	Created Jul 13, 2023 12:25 PM Karen Loftus	Version 3	PUBLISHED
Steel Structure Training Job (105091)	ITP Header	Created Jun 27, 2023 11:11 AM Karen Loftus	Version 3	PUBLISHED

2 Headers

On the Manage associations page, you can view templates with dynamic headers that meet specific conditions. In the header associations column, you can select which header templates to associate with each template. If both header templates are selected, you can choose the header template that shows when filling out the form. If the header association is not set, the header templates will not show in the form.

The 'Manage associations' dialog box shows a table with columns: Template name, Header associations, and Default header. The table lists three templates: Incident Form, Quality review - Dynamic Header Enabled, and test KL Dynamic Header. The 'Header associations' column shows selected headers (Project structure, ITP) for the first two templates, and a 'Select header associations...' link for the third. The 'Default header' column shows 'ITP' for the first two and 'Not set' for the third.

Template name	Header associations	Default header
Incident Form	Project structure x ITP x	x ITP
Quality review - Dynamic Header Enabled	Project structure x ITP x	x ITP
test KL Dynamic Header	Select header associations...	Not set

Cancel Save

CHAPTER 8 – INSPECTION AND TEST PLANS

8.1 INSPECTION AND TEST PLANS OVERVIEW

Inspection and Test Plans (ITP) is a feature that can be activated for templates to let you gather ITP information for a project. They can also integrate with InEight Plan. You can collect information to understand where you stand from a project perspective. At the organization level, administrators have the option to enable Inspection and Test plans for any given module.

At the project level, with the applicable permissions, you can enable Inspection and Test plans on a project by project basis.

8.2 CONFIGURE ITPS AT THE ORGANIZATION LEVEL

You can enable and disable Inspection and Test plans for a given module at the organization level in Product Settings.

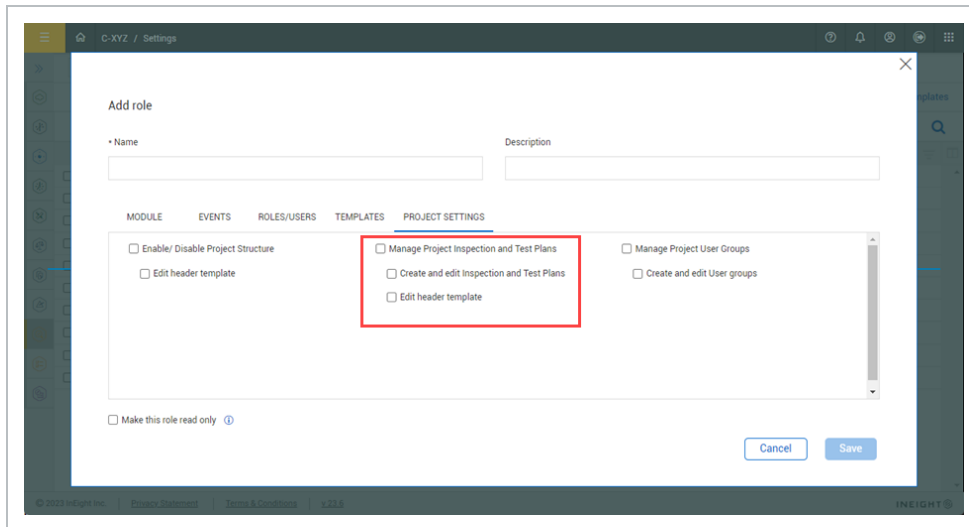

To enable and disable ITPs, in the Organizations home page, click **Settings** on the left navigation panel, and then click the **Compliance** or **Completions** icon.

Use the toggles to enable and disable ITPs for the module. When you enable ITPs, its related functions will show throughout the module. ITPs are disabled by default.

8.2.1 CONFIGURE PROJECT SETTINGS ITP PERMISSIONS IN ROLES

When Inspection and Test Plans are enabled for a given module, you can then enable Project Settings ITP permissions in Roles.

You can select the following options:

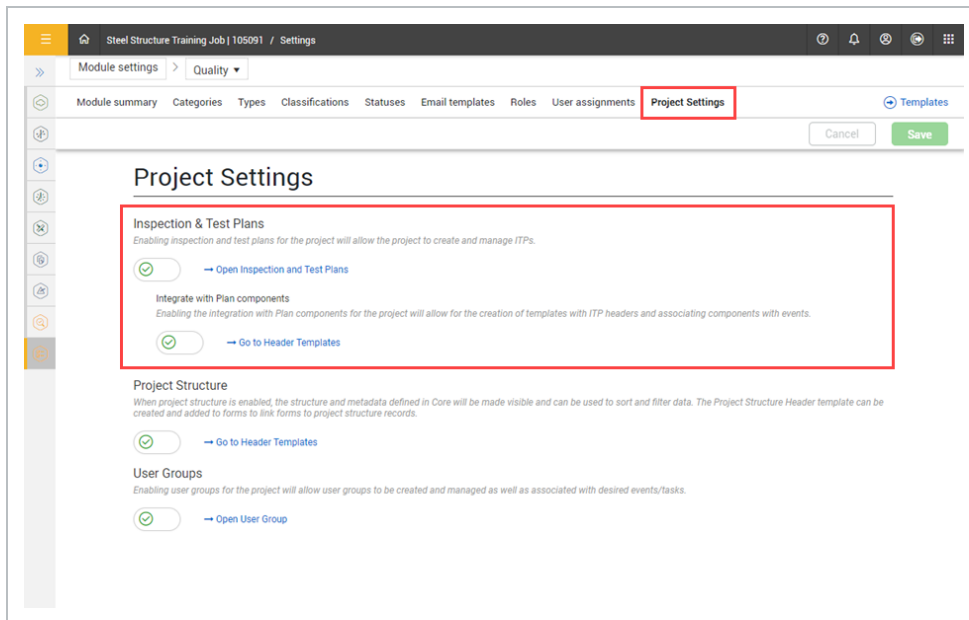

- Manage Project Inspection and Test Plans – When selected, this option includes Create and edit Inspection and Test Plans and Edit header template options.
- Create and edit Inspection and Test Plans – Lets you create and edit ITPs at the organization level.
- Edit header template – Lets you access and edit ITP header templates.

8.2.2 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

8.3 CONFIGURE ITPS AT THE PROJECT LEVEL

In the project's module settings > **Project Settings** tab, you can enable Inspection & Test Plans for the project to create and manage ITPs. This will also enable the **Open Inspection and Test Plans** link to open the Inspection and Test Plans page where you oversee and manage ITPs.

To integrate ITPs with InEight Plan, enable the **Integrate with Plan components** toggle. This will allow you to create templates with ITP headers and associate components with events. For more information see the Header templates topic.

8.3.1 CONSIDERATIONS

- To integrate with Plan, you must enable **ITP mapping between Compliance and Plan** option at the project level in InEight Plan settings.
- You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

8.4 CREATE ITPS AT THE ORGANIZATION LEVEL

After Inspection and Test Plans have been enabled for the module, you can create and manage ITPs at the organization level. Create new ITPs manually or import them using a template. The template is available to download from the **Download template** link.

NAVIGATE TO INSPECTION AND TEST PLANS AT THE ORGANIZATION LEVEL

1. From your organization home page click **Settings**, and then select **Compliance** or **Completions**. The Module management page shows the available modules under Product Settings.

NOTE

The Inspection and Test Plans toggle must be enabled for the module.

2. In the Product Settings landing page select the **Module Settings** tab, and then select a module. The Module settings landing page shows.
3. Select **Inspection & Test Plans**.

CREATE AN INSPECTION AND TEST PLAN

1. Click **Create ITP**. The create ITP dialog box opens.

A screenshot of the 'Create ITP' dialog box. The dialog has a title bar with a close button (X). Inside, there are four input fields: 'ITP name' (with a red asterisk), 'Account code' (with a placeholder 'Assign account code...'), 'Discipline' (a dropdown menu with 'Select one' and a downward arrow), and 'Description' (with a red asterisk). At the bottom, there are four buttons: 'Download template' (with a download icon), 'Cancel', 'Select file to Import', and 'Save'.

2. Enter the ITP information, and then click **Save**.

IMPORT ITP

1. In the Inspection & Test Plans page, click the **Download template** link. The Inspection and Test Plan Import Template is downloaded to your downloads folder.
2. Fill in the ITP information. Included in the template are the Instruction and Example sheets.
3. Click **Create ITP**. The Create ITP dialog box shows.
4. Enter the required fields, and then click **Select file to Import**.
5. Select the ITP template, and then click **Open**. The ITPs will show in the Inspection & Test Plan page.

8.4.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

8.5 CREATE ITPS AT THE PROJECT LEVEL

At the project level, you can create new ITPs manually from scratch, copy ITPs created at the organization level, or import them using a template. The template is available to download from the Download template button.

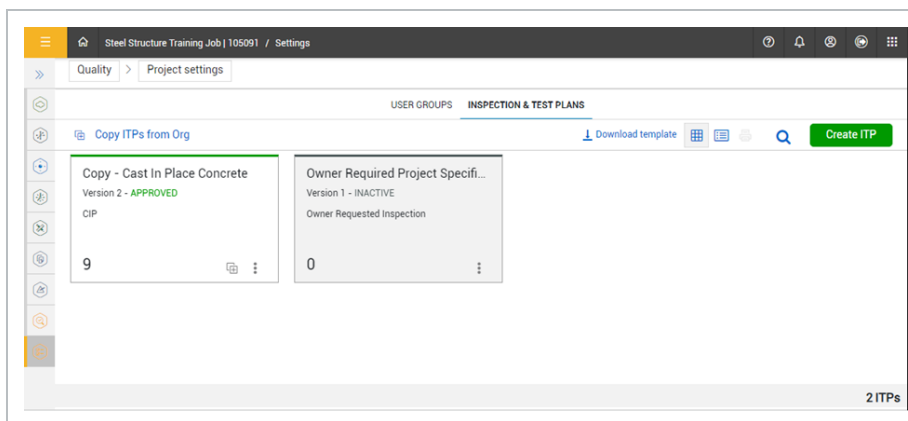

NAVIGATE TO INSPECTION AND TEST PLANS AT THE PROJECT LEVEL

1. From your project home page click **Settings**, and then select the **Compliance** or **Completions** icon. The Module management page shows the available modules under Product Settings.

NOTE

The Inspection and Test Plans toggle must be enabled for the module.

2. In the Product Settings landing page select the **Module Settings** tab, and then select a module. The Module settings landing page shows.
3. Select the Project settings tab, and then click the **Open Inspection and Test Plans** link. The Inspection & Test Plans page opens.

MANUALLY CREATE A NEW ITP

1. In the Inspection & Test Plans page, click **Create ITP**. The Create ITP dialog box shows.
2. Enter the ITP information, and then click **Save**.

COPY ITP FROM ORGANIZATION

1. Click **Copy ITPs from Org**. The Copy ITPs from Org dialog box opens.
2. Select ITPs from the list and then click **Copy**. You can select up to 20 ITPs at a time.
3. The ITPs now show in draft mode in your projects Inspection & Test Plans page.

IMPORT ITPS

1. In the Inspection & Test Plans page, click the **Download template** link. The Inspection and Test Plan Import Template is downloaded to the downloads folder.
2. Fill in the ITP information.

NOTE

Included in the template are the Instruction and Example sheets.

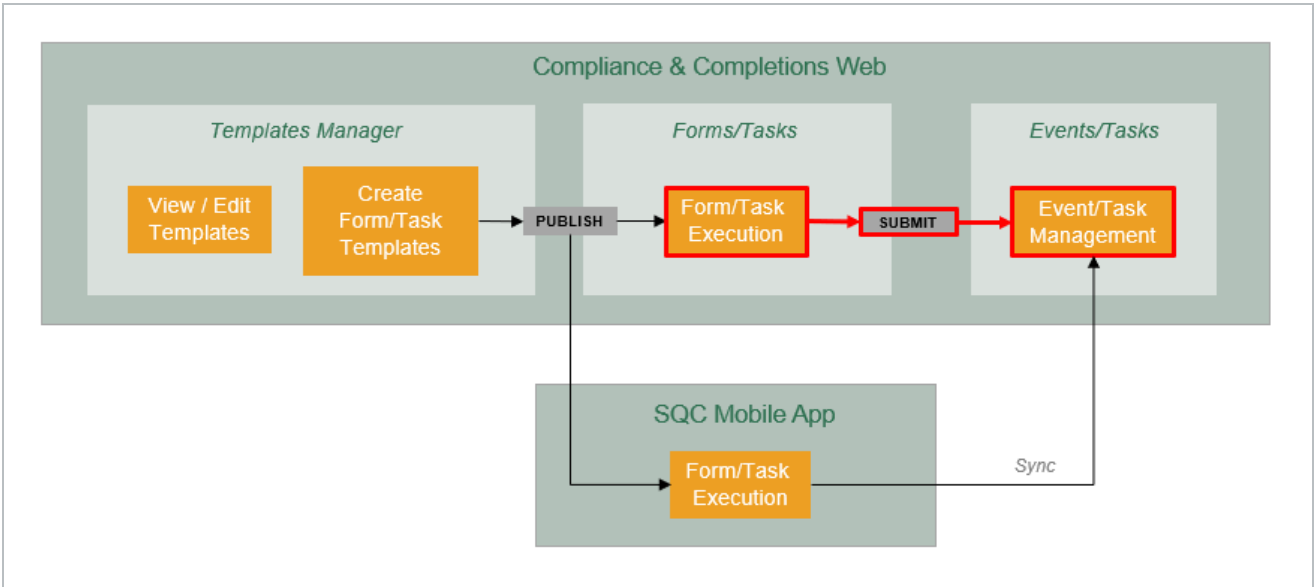

3. Click **Create ITP**. The Create ITP dialog box shows.
4. Enter the required fields, and then click **Select file to Import**.
5. Select the ITP template, and then click **Open**. The ITPs will show in the Inspection & Test Plan page.

8.5.1 CONSIDERATIONS

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

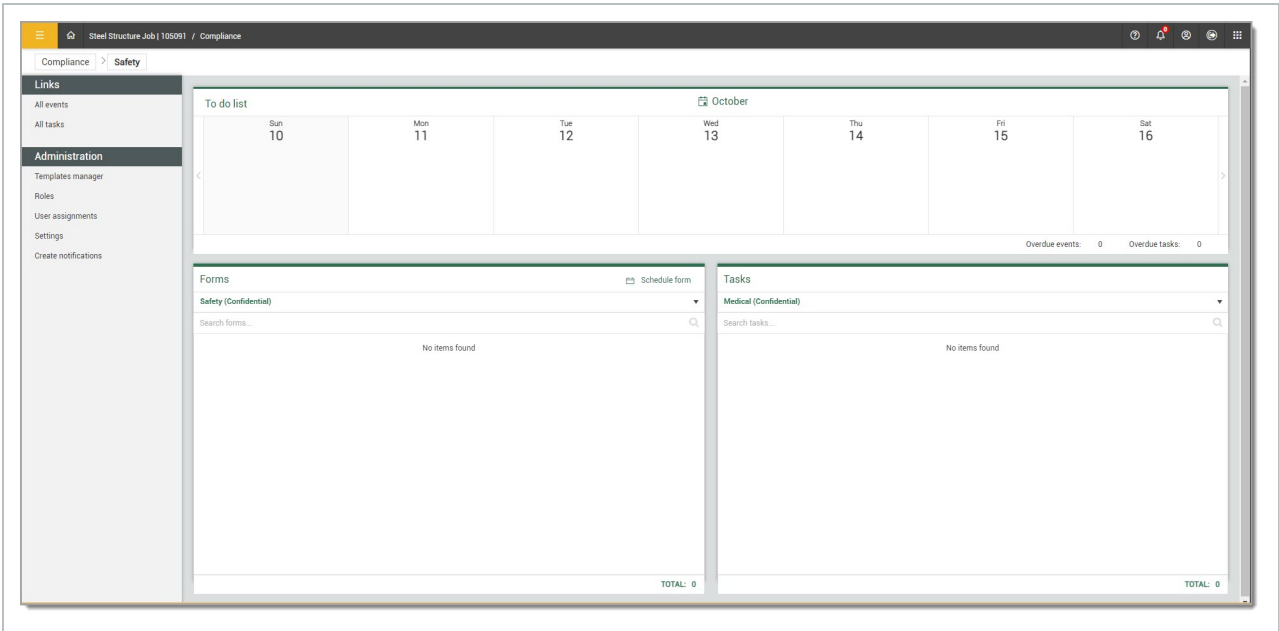

CHAPTER 9 – FORM AND TASK EXECUTION AND MANAGEMENT (WEB)

9.1 FORMS AND TASKS

9.1.1 LAUNCHING A FORM OR TASK

You can launch a form or task by navigating to the Compliance landing page, and then choosing a category in the Forms or Tasks window.

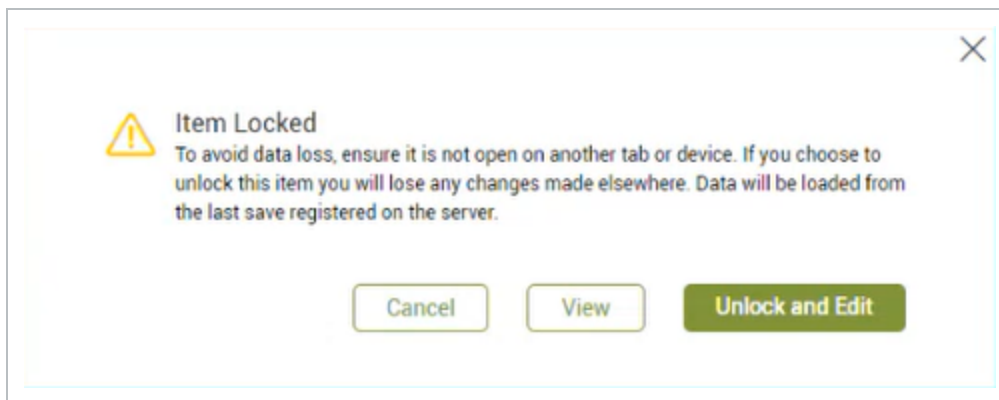

In the Forms and Tasks windows you can select the Favorites drop-down list, and then a category associated with the module needs to be selected. A category contains the forms or tasks that are associated with Compliance. If you do not see a category that applies, it means you do not have Compliance assignments to that category for that project.

9.1.1.1 LOCKED FORMS OR TASKS

An Item Locked message shows when the application detects that you or another user has the same form or task open on another device or browser instance or when the system did not remove the lock.

When the application detects that you have the same form or task open, the Unlock and Edit option shows in the Item Locked message. The message warns you that if you choose to unlock and edit the form or task, any changes made to the form or task in other devices or instances will be lost, and the application will load the form or task data from the last save performed on the server.

NOTE The duration of the lock is 15 minutes.

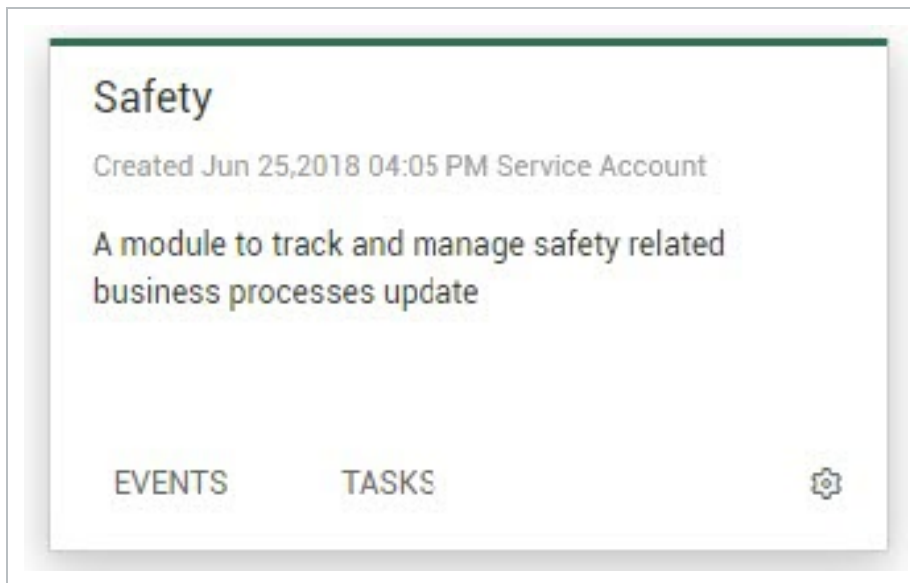

You can choose from the following options:

- **Cancel** – Returns you to the previous page. Clicking the **Close** icon to close also returns you to the previous page.
- **View** – Opens the form to see the last saved form data in View mode.
- **Unlock and Edit** – Unlocks the form or task for further editing. Any changes to the previous form or task are discarded upon saving or submitting. This option shows when the application detects the same user has the form or task open elsewhere.

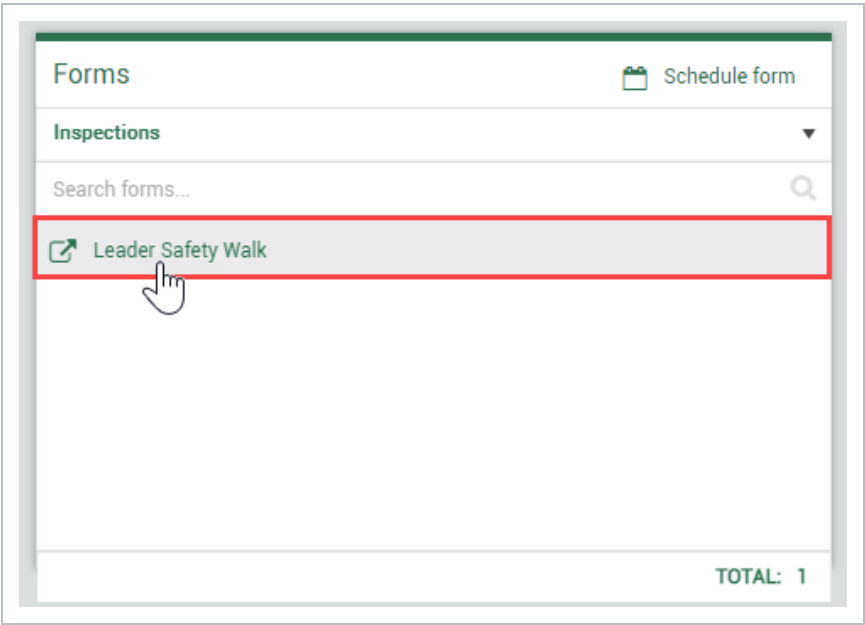

LAUNCH A FORM

1. Open the InEight project portfolio web application.
2. Navigate to the **Compliance** Landing page module.
3. Select the **Safety** module card.

4. On the Module landing page find the Forms box, and then select a category from the drop-down menu.

- A list of forms appears on the screen associated to the category selected

5. Select a form.

A new window opens showing the selected form

A screenshot of a form titled 'Leader Safety Walk'. The form has a dark header bar with the title and a logo. On the right side of the header, there are statistics: 'SECTIONS 3', 'QUESTIONS 18', and 'ANSWERED 0'. Below the header, there are buttons for 'Cancel', 'Save', and 'Save & close'. The main content area is titled 'AREA / TASK OBSERVED'. Below this, there are instructions: 'ASK / CONSIDER THE FOLLOWING QUESTIONS:', 'STEP 1: Stop and observe work. Ensure it is safe to enter by asking "Can I enter your workspace?"', and 'STEP 2: Introduce yourself if you are not know to the person. "Hi, I'm _____ the General Manager of _____"'. There are four input fields: 'Date & Time' (with a calendar icon), '* People Observed' (with a dropdown menu), '* Activity Observed' (with a text area), and 'Specific Job Task' (with a text area). Each text area has a character count '(250 characters remaining)'.

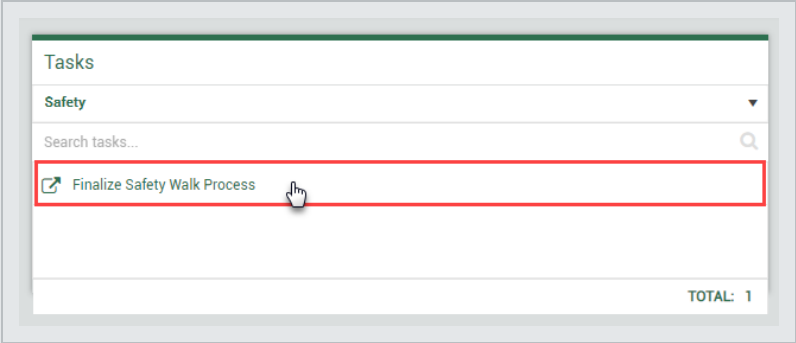

You can close the form by selecting **Cancel** on the top right corner

NOTE

Selecting Cancel results in the loss of any data you have entered since the last time you saved. The system does not autosave your work.

TIP

Launching a Task follows a very similar process. After selecting the appropriate tile (Safety in this case), you select the Task from the Task dialogue, selecting the appropriate category and then task.

9.2 FILLING OUT A FORM AND TASK - WEB

After selecting the desired form from the Module landing page, it is now time to fill out the form and submit it. A task might also need to be completed.

There are many types of question formats which can include different types of fields: free text fields, calendar fields, time drop-downs, and more. Short free text fields have a 250 character limit. Long free text fields have a 4000 character limit.

NOTE

Form and task types can vary depending on the module type, and what is required to complete prior to submitting. The below overview is only an example of what a typical form might require.

Overview - Forms or Tasks Page

	Title	Description
1	Form name	Name of the template.
2	Quick info	The number of sections, questions, questions answered, and answers considered exceptions. If you click the number of sections or exceptions, a table of contents opens for easy navigation.
3	User groups	Select what user groups have access to this form or task. This button is available only at the project level.
4	Print	Print a PDF of the form or task.
5	Information	The number of questions that have been answered. It also shows you several details pertaining to the form or task.
6	Cancel and Save	<p>Cancels the form or task. Any changes made since the last time you saved are lost.</p> <p>Saves the form or task in its current state, and you can continue to fill it out if necessary. You can also save and close to exit the form. For tasks, you can choose to save and start a new task.</p>
7	Question types	<p>Various ways of asking questions within a form or task. Examples include:</p> <ul style="list-style-type: none"> • Attachments • Choice

Overview - Forms or Tasks Page (continued)

	Title	Description
		<ul style="list-style-type: none">• Date-time• Form button• Form Flow• People picker
8	Signature block	Some forms or tasks might require a user to sign off prior to submitting it.
9	Button	The outcome of clicking on a form or task button vary depending on the button's configuration. The name of the button is defined by the administrator who created it (for example, Submit the form).
10	View active form flow	Lets you view which step and status in the form flow you are in. This only shows active after a form flow has started. If a form flow has not been started, the option is disabled.

Form example:

The top screenshot displays a form header for "Leader Safety Walk" (callout 1). It includes a progress bar with statistics: 3 sections, 18 questions, 0 answered, and 0 exceptions (callout 2). Below the statistics are icons for a checklist, people, a printer, and an information icon (callout 10). Action buttons for "Cancel", "Save", and "Save & close" are present (callout 6). A "View active form flow" button is also visible (callout 3). The main content area is labeled "AREA / TASK OBSERVED" (callout 4). The bottom screenshot shows a detailed form with fields for "Supervisor's name" (callout 7), "Supervisor's Signature" (callout 8), "Duration in hours", "Start Time", and "Stop Time". A "Approve for Work" button is at the bottom (callout 9).

Task example:

Select files or drag and drop

9.2.1 HEADER INFORMATION

Most forms contain basic identifying information such as date, time, and location of the event, or free text fields asking for details about the event. The header information is higher-level material needed to complete a form. Not all forms have header information, however, as this is determined by the person creating the template of the form. Filling out the required information accurately is important for workflow and reporting reasons.

Tasks might also have header information as, at minimum, the Description, Responsible party and Due date are programmed fields.

Accident Information

Description of the accident

(200 characters remaining)

* Date of incident

month/day/year

Time the incident occurred

hours:minutes

(4000 characters remaining)

Please add any pertinent photos

9.2.2 COPY A SECTION

Depending on how the form or task template is set up, you might be able to copy a section. If the copy option is enabled, use the Copy section button in the section header to copy the section below the current section.

NOTE The Copy section button might have a different name, depending on how the form or task template was set up.

NOTE On the web, the Copy section button is shown in both the upper-right and lower-right of the header.

You can also click the **Remove** icon to remove a copied section.

9.2.3 ATTACHMENTS

Some forms or tasks might include an option to include attachments such as photos. You can also include any annotations to describe the attachment in greater detail. Annotations help clarify what the photo represents.

Please add any pertinent photos

Select files or drag and drop

1 file(s) attached

This screenshot shows a web interface for adding photos. At the top, a light gray bar contains the text "Please add any pertinent photos". Below this is a white rectangular area with a green circular icon containing a plus sign and the text "Select files or drag and drop" below it. A red rectangle highlights this area. At the bottom of the interface, a light gray bar shows "1 file(s) attached" with a red arrow pointing to it from the left.

For example, you can include an attachment photo for an incident showing an injured thumb. After you click **Save**, it is saved in the form or task. You can also annotate the photo by drawing a red arrow to the specific injured mark on the thumb or adding descriptive text.

On mobile devices, a time stamp updates when edits are made.

If integration with InEight Document is set up, you can attach supporting documents from the Document application. Click **Select files or drag and drop**, and then click **InEight Document** in the dialog box.

A new window opens where you can sign into Document, and then enter search criteria. Click **Search**. Results are shown according to your Document user permissions. Select one or more documents, and then click **OK**.

9.2.4 FORM AND TASK DETAILS

The form might require you to fill out additional details. For example, for an incident-related form you may need to determine if the incident required any first aid or if it was a near miss.

INCIDENT DETAILS

Incident classification

☐ First aid

☐ Lost time

☐ Restricted duty

☐ Other rec.

☐ Non-work related

☐ Near miss

☐ Auto / Equipment

☐ Utility strike

☐ Fatality

* Did the injured party receive any kind of medical treatment?

☐ Yes

☐ No

What is the job type of the injured party?

Select one

What was the cause of the injury?

Select one

What is the type of injury?

Select one

What was the injured party doing just before the incident occurred?

Other form questions might include determining if the injured party received any medical attention, or what caused the injury.

What was the injured party doing just before the incident occurred?

TIP

Tasks might also require you to fill out additional details.

9.2.5 SMART FORMS AND TASKS

Smart forms and smart tasks generate additional questions based on how the original question was answered. For example, the below image is showing that only if the question "Was anyone injured during the accident" is answered Yes, is the following question, "Did the injured party receive any kind of medical treatment?," shown.

Leading questions

Did the injured party receive any kind of medical treatment?

9.2.6 FORM WITHIN A FORM OR TASK

There might be a need to open a new form from within the existing form or task you are working in. For example, while working on an Incident form you might need to start a Worker's compensation claim report.

CLOSURE OF INVESTIGATION

If you believe that a claim is required on this incident, please start the process by clicking here

Click here to start a workers comp claim report

By selecting the Workmans comp claim report form button, a new form generates, and you follow the steps of that form to fill it out. After filling out the required information, you submit the form, which returns you to the original form or task you were working in.

When you click a form or task button, the status of the current form or task might change, depending on how it is set up by your administrator.

9.2.7 FORM FLOWS

When the form you are filling out has a form flow associated with it, there are special buttons to complete each step in the flow. These form flow buttons appear similar to other form buttons but have an arrow icon next to them.

Form flow buttons that move the flow to the next step have a right arrow. Form flow buttons with a left arrow revert to a previous step.

Who was present at the incident?

Select one

Submit to manager for review →

When you click a form flow button after filling out all mandatory information, the form saves and closes.

Some form flows can be re-enabled after an event is completed, depending on the form flow's setup. Click the **Re-enable form flow** button in the upper-right of the page, if it is shown. When you re-enable a form flow, you can move it back to the step of your choice. All step data is saved from previously completing the form flow unless you change an answer in a way that leads to different questions based on logic.

If you re-enable a form flow, only the selected form flow is re-enabled, not all form flows associated with the template. If a re-enabled form flow leads to another form flow that is not re-enabled, you cannot see the other form flow.

NOTE

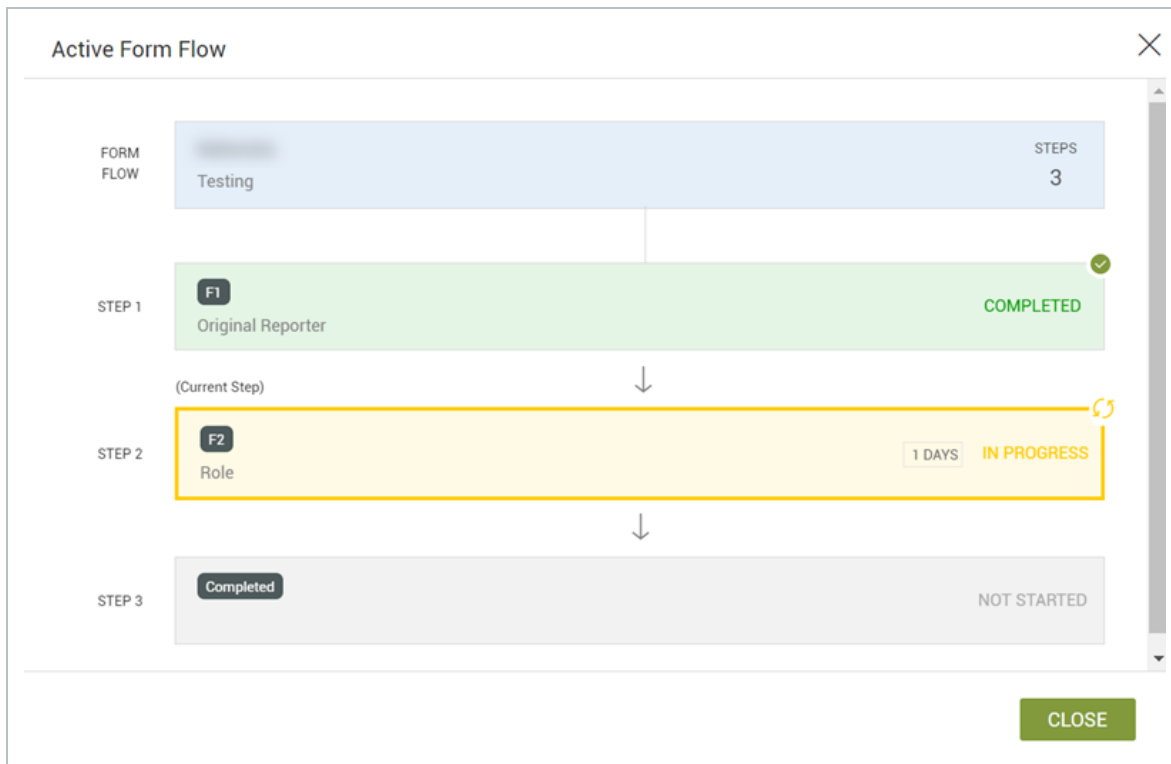

You must have permission to edit completed events to re-enable a form flow.

9.2.8 VIEW ACTIVE FORM FLOW

When you open an event from the Events page, and the event has a form flow that has been started, you can click the View active form flow icon at the top of the page. The Active Form Flow dialog box opens.

At the top of the dialog box is the name and description of the form flow and the number of steps. Below them, each step is shown with its status and responsible party.

NOTE If a form flow is not started, this option is disabled.

9.2.9 GPS QUESTIONS

A GPS question lets you provide your location by clicking **GPS** or by entering your coordinates directly in the fields. You can also click **Clear GPS** to remove information if you need to enter a different location.

NOTE If you enter GPS coordinates automatically, you cannot manually edit the coordinates.

9.2.10 COMPLETE A FORM OR TASK

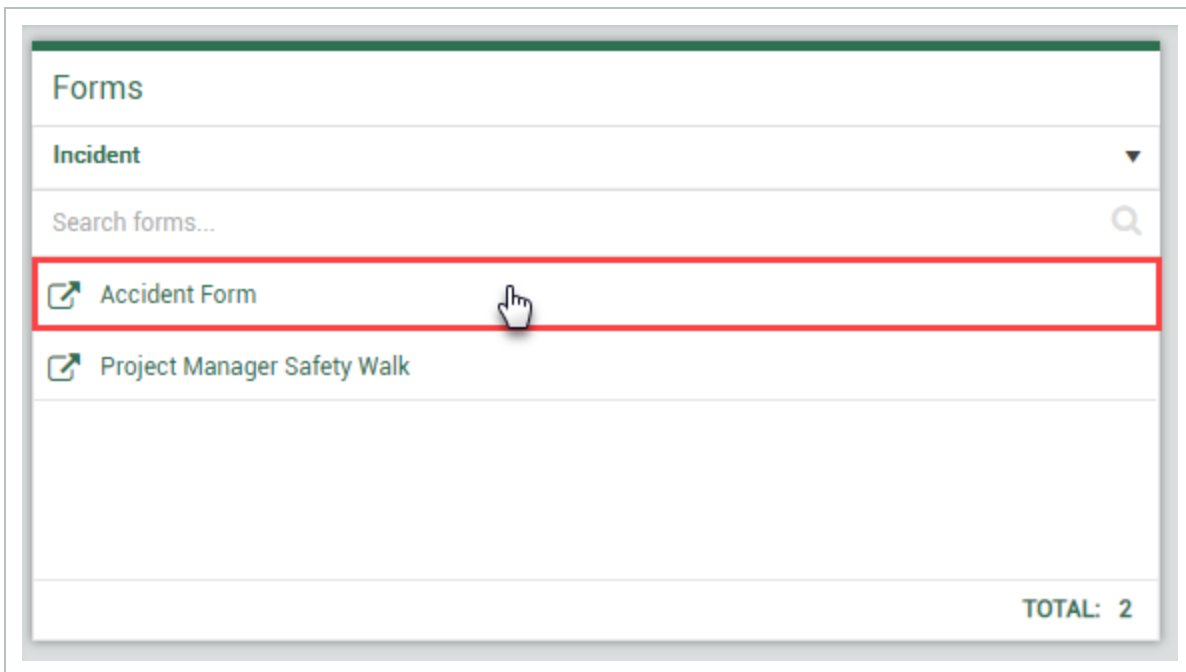

For more information on how to save and submit a form or task, see [Complete a Form or Task](#).

9.2 STEP BY STEP 1 – FILL OUT A FORM

1. From the Compliance landing page, select a card module, Safety in this case.

2. From the Module landing page, select a category from the drop-down menu under Forms.
3. Under the category, select a form.

4. Complete all fields in the form, paying particular attention to those with an asterisk, which are mandatory fields, as they preclude you from moving ahead.

Has the incident been fully investigated and completed?	Reconstruction photos were added to the incident
<input type="radio"/> Yes	<input checked="" type="radio"/>
<input type="radio"/> No	<input type="radio"/>

Some items require free-form data entry such as Description of the accident. Others require selecting a time or date.

Accident Information

Description of the accident	* Date of incident
<input type="text"/>	<input type="text" value="month/day/year"/> 
(200 characters remaining)	

Other question types may require attaching documents. Use the annotation feature to add text or drawing to an image. In this case, you could draw an arrow showing the direct location of an injury.

Some questions require selecting from radio buttons or icon type questions.

Has the incident been fully investigated and completed?	Reconstruction photos were added to the incident
<input type="radio"/> Yes	<input checked="" type="radio"/> 
<input type="radio"/> No	<input type="radio"/> 

5. To update the photograph's annotations, Select the **Save** check mark.

6. On the top right of the form, select the **Information** button to see form information.

A screenshot of a web application showing a 'Workers Comp Claim' form. The form is displayed in a modal window with a title bar containing 'Cancel', 'Save', and 'Save & close' buttons. The form content includes fields for 'Event Title' (Workers Comp Claim), 'Organization/Project' (C-XYZ), 'Module' (Safety), 'Category' (Claims), 'Event Date' (06/08/2021), 'Start Date' (06/08/2021), 'Status' (Pending), 'Reporter' (a blurred name), and 'Version' (1). At the bottom of the form, there are two buttons: 'Attachments' and 'History'.

7. Forms most often have a button at the end to move the form along in its process. In this case, the **Click here to start a workers comp claim report** button initiates the form within a form feature, where the system branches to another form, in this case the Workers Comp claim form.

CLOSURE OF INVESTIGATION

A screenshot of a web application showing the 'Closure of Investigation' form. The form is displayed in a modal window with a title bar containing 'Cancel', 'Save', and 'Save & close' buttons. The form content includes a 'Signature of Safety Manager' field, a text input field with a placeholder 'X', and a 'Close and complete this incident' button. A red box highlights the 'Click here to start a workers comp claim report' button, which is located at the bottom right of the form.

NOTE

The process for completing a task is very similar to filling out a form.

The process is similar whether checking the status of a form or task.

9.3 COMPLETE A FORM OR TASK ON THE WEB

There are several ways to finish filling out a form or task depending on how it is set up by your administrator and what the next steps are.

9.3.1 SAVE A FORM OR TASK

There might be times when you do not have enough time to complete a form or task in its entirety. When you do not have enough time to complete a form or task, or not all information about the event is readily available, you can save your work and continue or save and close and come back later to complete and submit it.

NOTE

You can use the Button question type to facilitate a simple workflow outside of using the form flow feature.

If you are filling out a task and want to start a new task immediately after saving the current task, click the **Save & close drop-down** button, and then select **Save and start new task**.

When the form or task is locked, an Item Locked message shows. For more information about locked forms or tasks, see **Locked forms or tasks** in [Forms and Tasks](#).

9.3.2 ASSIGN A TASK

As part of filling out a task, you might have to assign it to someone else to complete a portion of it. To assign a task, click the **Assign** button. If you want to start a new task immediately after assigning the current task, click **Assign and start new task**.

9.3.3 SUBMIT A FORM OR TASK

When you have all the needed information in the form or task, you are ready to submit it or send for manager review. This is the end of what you need to complete. An email notification, if applied, is typically sent to the manager.

NOTE

You can use the Button question type to facilitate a simple workflow outside of using the form flow feature.

Send for manager review

As part of closing out the form or task, you might need to sign it, and the button varies depending on what type of form or task it is.

CLOSURE OF INVESTIGATION

[Click here to start a workers comp claim report](#)

Signature of Safety Manager

A rectangular box containing a handwritten signature in black ink. The signature is stylized and appears to be written over a horizontal line.

Close and complete this incident

Before submitting the form or task, you can click the **Information** icon to see if there are any other questions left to be answered.

The screenshot shows a web application window titled "Incident Report" with a close button (X) in the top right corner. At the top, there are three buttons: "Cancel", "Save", and "Save & close". A red arrow points to the "Save" button. The form contains the following fields:

- Event Title: VXCXV
- Organization/Project: Steel Structure Job (105091)
- Module: Safety
- Category: Incidents
- Event Date: 06/01/2021
- Report Date: 06/01/2021
- Status: Pending
- Reporter: [Redacted]
- Version: 3

At the bottom of the form, there are three tabs: "Attachments", "History", and "References".

NOTE If there are mandatory questions on the form or task, you are not able to submit it until they are answered.

TIP The Edit button is only visible to those with authority to edit forms.

9.4 EVENT AND TASK MANAGEMENT

A Compliance event is an occurrence that has already happened; it therefore refers to forms that have already been filled out. Because events are part of a workflow, you can add more information to events, review existing data in the event, or move the event through the workflow.

The Events page shows a repository of forms in various statuses such as pending, with claims manager, manager review, and complete. The Task page is also a repository of forms that provides the same functionality as the Events.

The following are common column headings and their descriptions:

#	Event ID	Project/Organization	Category	Form name	Event title	Reporter	Status	Event date	Location
1	2023010400016	North Platform (103442)	!!! QA Performance !!!	Quality ITP Header 1 - Simple - DO NO.	Multi Component 1	Jyothirmay	Pending	01/04/2023	On Web

	Title	Description
1	Attachment	Indicates whether an event or task has attachments. Click the icon to see the attachments.
2	Event or Task ID	The unique value assigned to each event or task.
3	Project/Organization	The project or organization associated with the event or task.
4	Category	The category associated with the event or task. It is specific per module and defined by the organization. Allows the module to be partitioned into smaller areas and assigned permissions.

(continued)

	Title	Description
5	Form or Task name	The name of the form or task template.
6	Event or Task title	The title given to the event or task by the user or generated by the system.
7	Reporter or Responsible party	For events, the user who initially submitted the form. For tasks, the responsible individual.
8	Event date or Due date	Date the event occurred or the due date of a task.
9	Status	Four default statuses are provided, Complete, Pending, Scheduled, and Canceled. Admins can create sub statuses under each that best align with their business processes.
10	Location	Shows whether the event or task location is On web or On mobile. When an event or task is scheduled and synced to a mobile device, a lock shows next to the Task title.

You can access events or tasks by going to the module landing page, and then selecting **All events** or **All tasks**.

The event ID, Event title are shown on the Events page. The Event status is also shown, and changes based on the state of the event.

#	Event ID	Project/Organization	Category	Form name	Event title	Reporter	Event date	Status	Location
<input type="checkbox"/>	20230112	Platform	Category A	Quality ITP Header 2	Quality ITP Header 2	Mahesh	01/12/2023	Pending	On Web

The Tasks page also shows columns such as Task ID, Project/Organization, Category, and Status. Columns unique to the Tasks page include Task name, Responsible party, and Due date. Tasks automatically become overdue when the assigned due date expires. The tasks page shows a visual indication of overdue states. Sorting and filtering capability in the lists lets you to quickly associate tasks to individuals, categories, status, etc.

Quality > Tasks

Global Events/Tasks

View

My view

Automatic date filter applied - to clear, use the due date column filter

Clear all filters

#	Task Id	Project/Organization	Category	Task name	Task title	Responsible party	Due date	Status
<input type="checkbox"/>	20230111	S100000 - PKG Inc (RootOrg1)	Assessment	Report photo	Reference	Julio	01/26/2023	Pending
<input type="checkbox"/>	20230111	Van Nuys North Platform (E000000)	GA Performance	Integrated list question - Do not edit	Reference	Jyothirmay	01/17/2023	Pending

In the Tasks page, like the Events page, you can update columns by clicking the Column chooser icon, and then selecting or deselecting the check boxes for columns you want to add or remove.

NOTE When a task is assigned, the responsible party receives an email with a link to complete the task.

NOTE Sorting or filtering by the Assigner and/or Responsible party, may be helpful.

9.4 STEP BY STEP 1 – ADD ADDITIONAL COLUMNS TO THE LIST OF ALL EVENTS OR ALL TASKS

1. In the module landing page click **All events** or **All tasks**.
2. Click the **Column chooser** icon.

3. Select **Assigner** and **Responsible party**.

☒ Attachment

☒ Task Id

☒ Project/Organization

5

6

7

 Edit properti...

Clear all filters

	Icon	Description
1	Edit properties	Edit properties of one or many selected events or tasks. All the selected events or tasks must be from the same template and you must have permission to edit them.

	Icon	Description
2	Notifications	Send notifications with messages to specific users, and roles for the specific project. This is available only at the project level.
3	Export events or tasks	Export data from the Events or Tasks list to Excel, with an email generated once the file export is completed.
4	Print	Print a PDF report of the selected event or task. The ability to print is based on template configuration.
5	Information	Open a slide-out panel to the right that outlines data about a specific EventID or TaskID. You can also see the history of changes to the event or task.
6	Search	Open a slide-out panel to search all columns in your view for specific terms.
7	Clear all filters	Revert the listing to its unfiltered state if filters have been used.

9.4.1.1 EDIT PROPERTIES

9.4 STEP BY STEP 2 – EDIT AN EVENT OR TASK PROPERTIES

1. In the All events or All tasks list page, select events or tasks by clicking the check boxes.
2. Click the Edit properties button.

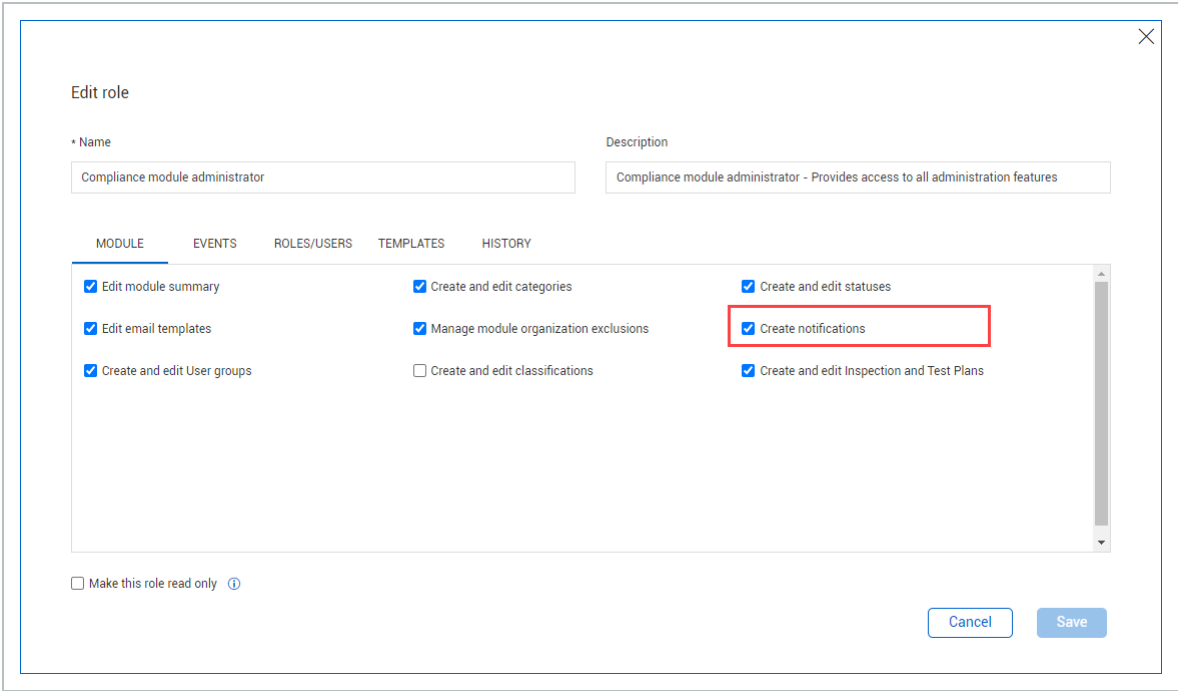

The Edit properties dialog box opens.

3. After making your changes, click **Save**.

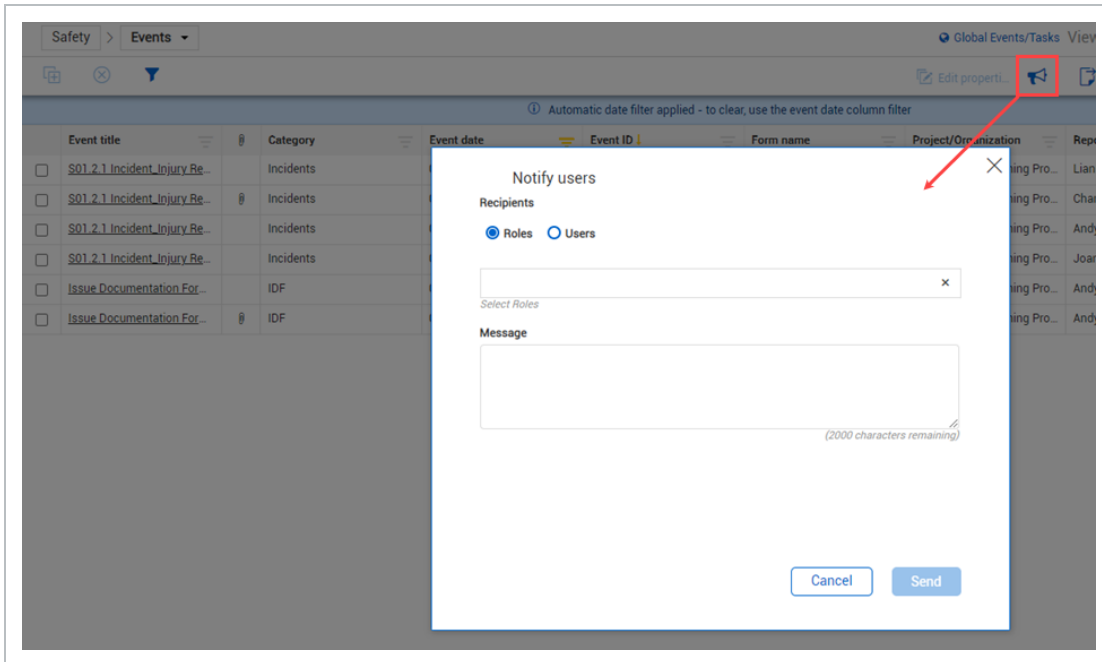

9.4.1.2 NOTIFICATIONS

As an administrator at the system level, you can control the ability to send notifications to roles and user in Organization home > Settings > Compliance > Module > **Roles** tab. You can also restrict users to send notifications to their assigned projects only.

9.4 STEP BY STEP 3 – SEND NOTIFICATIONS

1. At the project level, click the **Notifications** icon.
The Notify users dialog box shows.
2. Select **Roles** or **Users** recipients, and then use the drop-down lists to select recipients.

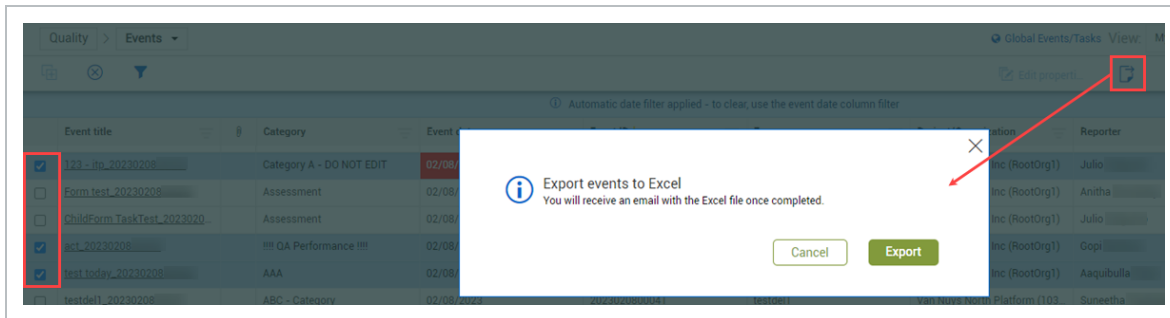

3. Enter your message in the Message box. Messages can be up to 2000 characters.
4. Click **Send** when complete.

9.4.1.3 EXPORT EVENTS AND TASKS

9.4 STEP BY STEP 4 – EXPORT EVENTS OR TASKS

1. In the **All events** or **All tasks** list page, click the **Export** icon.
The Export dialog box opens.
2. Select **Export** to export all items.

The export contains the filtered grid set that shows in your view. You can also export selected events or tasks by checking each item's check box, and then clicking the Export icon.

9.4.1.4 PRINT

You can print a report of an event or task that has been enabled to be printed. Print functionality can be enabled in the template's Properties tab. See [Template Properties](#) for more information.

9.4 STEP BY STEP 5 – PRINT AN EVENT OR TASK

1. In the **All events** or **All tasks** list page, select an event or task.
2. Click the **Print** icon to print the event or task.

A PDF of the report will open for the selected item in a new browser tab.

NOTE The Print feature only works for one event or task at a time. To print in bulk, you can use InEight Report.

9.4.1.5 FORM AND TASK INFORMATION

You can view data, references, and history changes of an event or task and edit their properties in the Form information slide-out panel.

9.4 STEP BY STEP 6 – NAVIGATE TO EVENT OR TASK INFORMATION SLIDE-OUT

1. In the **All events** or **All tasks** list page select an event or task, and then click the **Form information** icon.

The Form information slide-out opens where you can view the form data.

2. Click **Edit properties**.

The editable fields show so you can edit them.

The screenshot displays a mobile application interface for event management. At the top, a navigation bar includes icons for a document, a printer, an information icon (highlighted with a red box), a magnifying glass, and a 'Clear all filters' button. Below the navigation bar, a slide-out panel titled '23.2 Template quality' is open. The panel features a circular progress indicator showing 'QUESTIONS ANSWERED 1/2'. An 'Edit properties' button (highlighted with a red box) is located below the progress indicator. The main content area of the slide-out lists various form fields: 'Proj/org' (S100000), 'Category' (!!!! QA Performance !!!!), 'Event date' (02/01/2023), 'Status' (Pending), 'Reporter' (Meghana), 'Event title' (23.2 Template quality _20230201), 'Date started' (02/01/2023), 'Module' (Quality), and 'Version' (1). At the bottom of the slide-out, there are three links: 'Attachments', 'References', and 'History'. Finally, 'Cancel' and 'Save' buttons are positioned at the very bottom of the slide-out.

- 3. After editing any fields, click **Save**.

NOTE

You must have permission to open the Form information panel.

ADDITIONAL FORM INFORMATION PANEL OPTIONS

You can also view attachments, references, and form history using the buttons at the bottom of the slide-out.

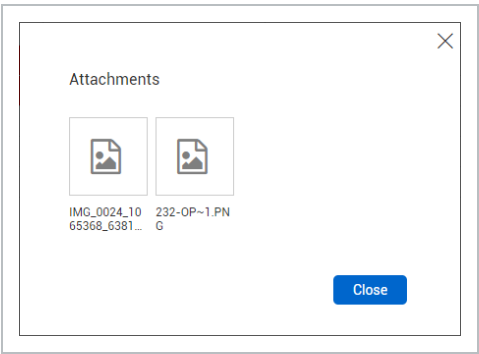

ATTACHMENTS

You can view and edit attachments other events and tasks referenced in a certain event or task.

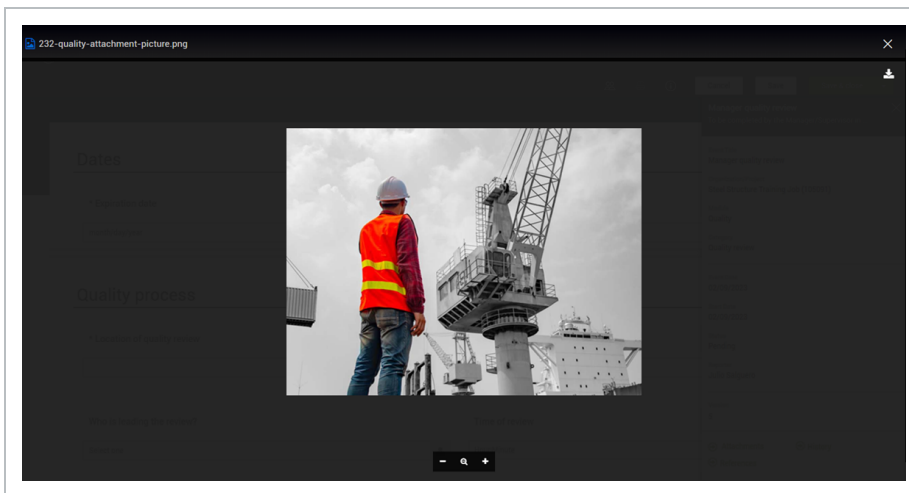

9.4 STEP BY STEP 7 – VIEW AND DOWNLOAD ATTACHMENTS

- 1. In the Form information slide-out, click **Attachments**.

The attachments dialog box opens.

2. Click an attachment to view.

3. You can zoom in or out using the **Zoom** icons.
4. You can click the **Download** icon in the upper right to download the attachment to your computer.
5. To close the attachment, click the **Close** icon in the upper right.
6. Click **Close** to close the Attachments dialog box.

NOTE The Attachments button is greyed out when there are no attachments in the form.

NOTE You can also view an event or task's attachments by clicking the attachment icon in the Attachment column on the Events or Tasks pages.

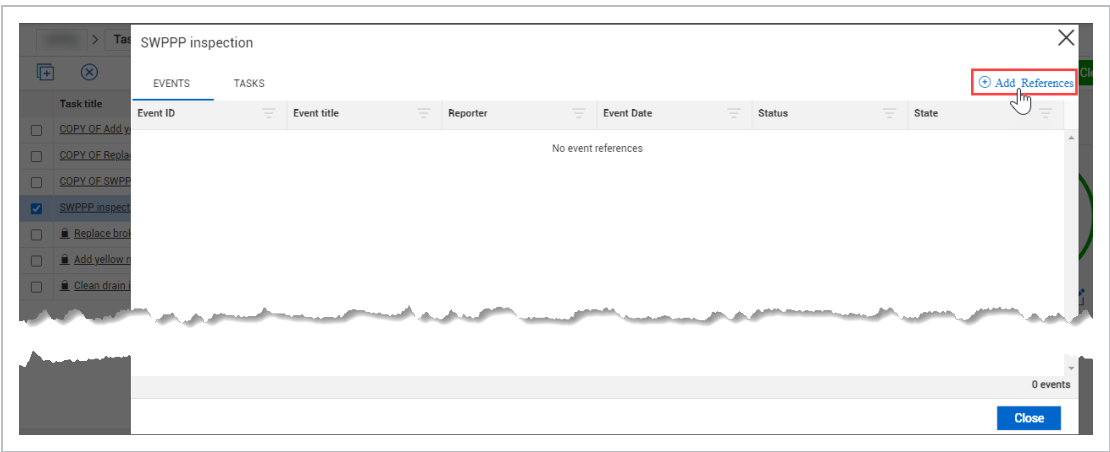

REFERENCES

You can view other events and tasks referenced in a certain event or task.

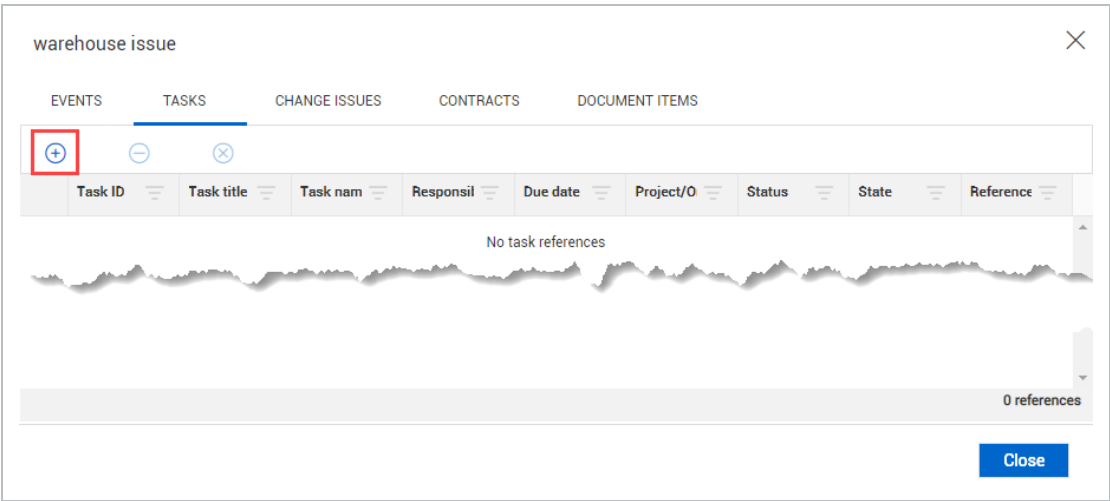

9.4 STEP BY STEP 8 – VIEW AND EDIT REFERENCES

1. In the Form information slide-out, click **References**.

The References dialog box opens where you can view and add references.

2. To add a reference, select Events, Tasks, or other available tabs, and then click the **Add References** icon.

NOTE Integration is available with InEight Change, InEight Contracts, and InEight Document.

- The Add References dialog box opens.
3. Select the **Events** or **Tasks** or other available tabs, and then select events or tasks to be referenced.

Add References
×

- To remove references, select the reference, and then click the **Remove references** icon.
- After editing references, select **Close**.

NOTE

In Tasks, you can use the Delete task option to delete tasks.

In the References dialog box, a column named **Reference type** will show information on the reference association.

The Reference type column can have the following values:

- Associated form** – Started from a form or task button from within the form or task.
- Internal reference** – Associated with a reference question.
- External reference** – Associated by using the Add References button in the reference dialog box.

HISTORY FOR EVENTS AND TASKS

You can view the history of changes for events or tasks. You can sort and filter the list view.

9.4 STEP BY STEP 9 – VIEW FORM HISTORY

- In the Form information slide-out, click **History**.

The history page opens where you can view changes made to the event or task.

History ✕

Close

2. Click **Close** when done viewing.

NOTE

You must have permission to view the History dialog box.

9.4.1.6 DELETE AN EVENT OR TASK

To delete an event or task, select events or tasks, and then click the **Delete** icon.

Environmental > Events

+

✕

⌵

Delete form

	Event title		Category
<input checked="" type="checkbox"/>	Renew WWDP - Janitorial		Matrix
<input type="checkbox"/>	MB 535 - Rental Barge Weekly Inspec...		Forms

NOTE

Your role must contain permission to delete.

9.4.1.7 COPY AN EVENT OR TASK

The ability to copy a task, or an event, along with its associated tasks and attachments, is useful when you have many tasks and attachments that mimic the last event, such as an environmental permit event. You can copy one event at a time or multiple tasks at the same time.

9.4 STEP BY STEP 10 – COPY EVENT OR TASK

1. In the **All events** or **All tasks** list page select an event or tasks to be copied, and then click the **Copy form** icon.

When you copy one or multiple items from All tasks, the copied tasks are created with *COPY OF* in front of the task title.

When you copy an event from All events, the Copy event page opens to edit form details, attachments, and tasks.

2. In the Details page, you can edit the copied event, and then click **Next**.
3. In the Attachments page, you can uncheck any existing attachments to remove them, and then click **Next**.
4. In the Tasks page, you can uncheck any existing tasks to remove them, and then click **Next**.
5. Click **Copy** to create a copy of the form.

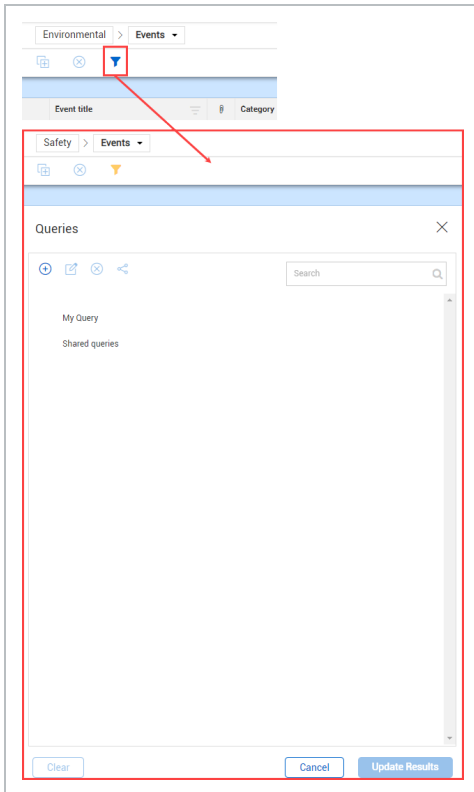

9.4.1.8 QUERY BUILDER

The Query builder feature can be used on event and task list pages. It provides a more granular filtering and querying option for events and tasks. These filtering options are an alternative to the options found in the grid page columns.

9.4 STEP BY STEP 11 – USING THE QUERY BUILDER

1. Click the Query Builder icon.

The query builder dialog box shows.

In the query builder you can add, edit, delete, and share queries. Your saved queries are listed under the My Query menu, and your shared queries are listed under the Shared queries menu.

NOTE Queries can only be shared with users in the same project.

2. Click the **Add** icon to add a new query, and then enter the conditions to your query.
3. Click **Apply**.

You can then use the Reset, Cancel, and Save Query buttons at the bottom of the query window. If you update an existing query, you can save the new query using the Save Query As button.

Query builder column condition choices are dependent on events or tasks. For example, if you select Events, you see column choices that are related to events.

Query Builder

Column	Operator	Value
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>
<div><div></div>And<div>- Select one -</div></div>	<div><div></div>- Select one -</div>	<div><div></div></div>

NOTE

You can enter up to seven conditions in a query.

9.4.1.9 VIEWS

For more information on how to save and send views and use the Global Events/Tasks option, see [Event and Task Views](#).

9.4.2 MANAGING EVENTS AND TASKS

9.4 STEP BY STEP 12 – MANAGE AN EVENT

1. From the Compliance landing page, select a **module** card.
2. Select the **All events** link.

All events and tasks links are shown under Links in the upper left side of the page.

- 3. On the Events page, select an event or task that requires additional review based on business process requirements. For example, an event with a pending status.

Event ID	Project/Organizati	Category	Form name	Event title	Reporter	Event date	Status
2019101100004	S100000 - PKS Inc	Incident	Project Manager Safe...	Johnson Branch facili...	Karen Loftus	10/09/2019	Manager Review

- 4. Advance the event or task to the next form flow step, as required.
- 5. The status of the event will update depending on how your form workflow is setup.

Managing tasks follow a very similar process, as shown below.

9.4 STEP BY STEP 13 – MANAGE TASKS

- 1. Select the **All Tasks** link on the left side of the page.

- 2. Select a task by clicking on a **Task title**.
- 3. Advance the task to the next form flow step, as required.

9.4.2.10 MONITOR DUE DATES, OVERDUE STATES AND STATUSES

You can monitor the events or tasks due dates, states, and status, and their adherence.

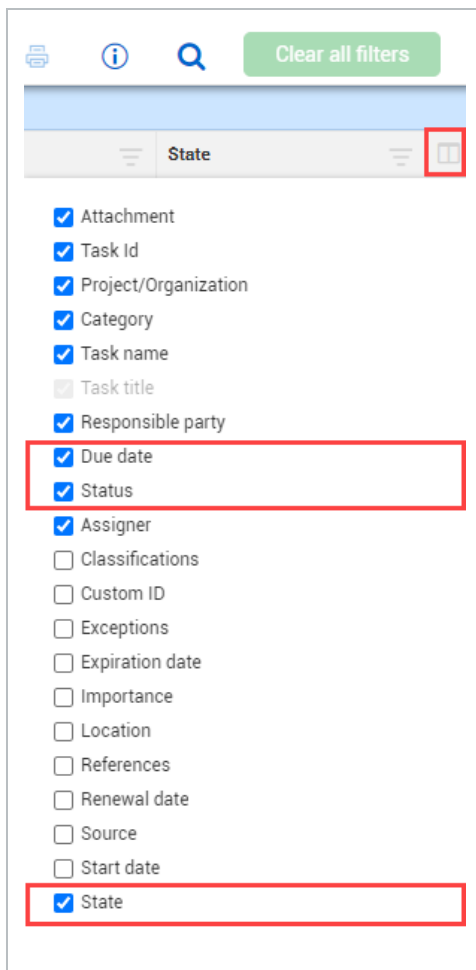

9.4 STEP BY STEP 14 – VIEW DUE DATES, OVERDUE STATES AND STATUSES

1. From a module landing page, click **All tasks**.

You can also go to **All events**.

2. In the tasks page, find the Due date (or Event date for events), Status, and State columns.

Click the **Column chooser** icon to add the columns if they are not in the view.

3. Click the **Column chooser** again to close.

An overdue event or task will make the Due date and State columns turn red. An overdue email

is also automatically triggered.

Due date	Status	State
02/01/2023	Scheduled	Overdue
02/23/2023	Scheduled	In Process
03/01/2023	Scheduled	In Process
02/17/2023	Scheduled	In Process
01/31/2023	Scheduled	Overdue
02/24/2023	Scheduled	In Process
02/28/2023	Scheduled	In Process
02/08/2023	Scheduled	Overdue
02/08/2023	Scheduled	Overdue
02/09/2023	Pending	Saved
03/07/2023	Scheduled	In Process
02/07/2023	Pending	Saved
01/25/2023	Pending	Saved

NOTE

The State column changes to Overdue after the due date.

9.4.2.11 MONITOR FORM FLOW STATUS

When an event has an active form flow, you can click its Status column to open a dialog box with detailed information about the current status of the form flow.

The current status box has the following areas:

North Bridge Foundation

	Description
1	Current step.
2	Current status.
3	Current state.
4	Number of days until the form flow step becomes overdue.
5	Total days the form has been open.
6	Estimated form completion date.
7	All steps and their responsible parties.

For each step you will see the step name, start date, responsible parties, and their roles. Responsible parties have colored bars according to their sign-off status for each step:

Color	Description
Green	Complete
Yellow	Pending
Red	Overdue
Grey	Step not started

You can select different users to be responsible parties, depending on how a step is set up. The ability to select different responsible parties allows for updating users who no longer participate in the project, their roles have changed, etc.

9.4.2.12 ASSIGN USER GROUPS

At the project level, you can give user groups permission to view events or tasks. User groups must first be set up for the project. For information on setting up User Groups, see [User Groups](#).

9.4 STEP BY STEP 15 – ASSIGN USER GROUPS TO AN EVENT OR TASK

1. Open the event or task, and then click the User groups icon in the upper-right of the page.

2. In the **User groups** side panel, select the groups you want to give permission to.
3. Click **Save**.

9.5 EVENT AND TASK VIEWS

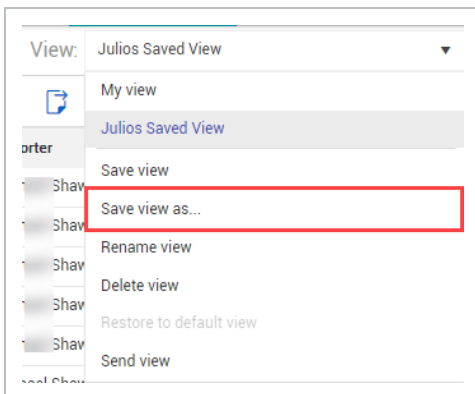

You can filter, sort, and arrange columns in the Events and Tasks pages. The updated view can be saved for quick access. Views can also be sent to other users to view outside the current organization and project. In the module landing page, you can access the All events or All tasks pages links, under Links in the upper left of the page.

9.5.1 SAVE VIEWS

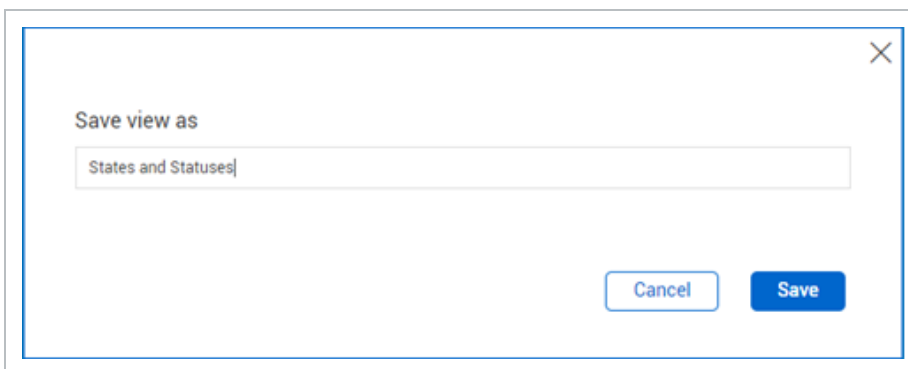

After you filter, sort, or arrange your view, you can save the updated view to easily access it in the View list.

9.5 STEP BY STEP 1 – SAVE YOUR VIEW

1. Click the **My view** drop-down, and then select **Save view as....**

2. In the **Save view as** dialog box, enter the view name, and then click **Save**.

You can access the saved view in the My view list.

When a saved view is created, it is also available under Links at the top left of the module landing page.

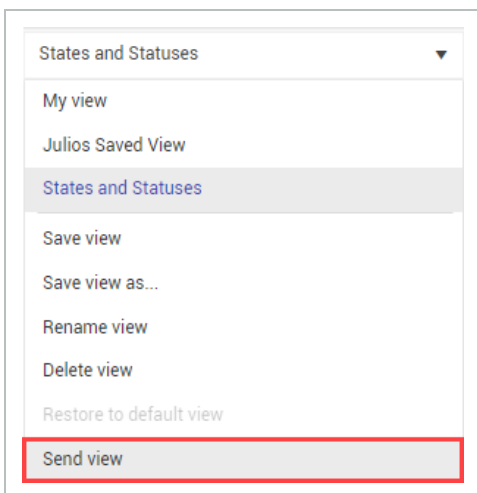

9.5.2 SEND A VIEW

You can send your saved view to others. When you send a view, you are sending the organization, project, and applied filters defined by the view, not the exact same forms and tasks that you can see.

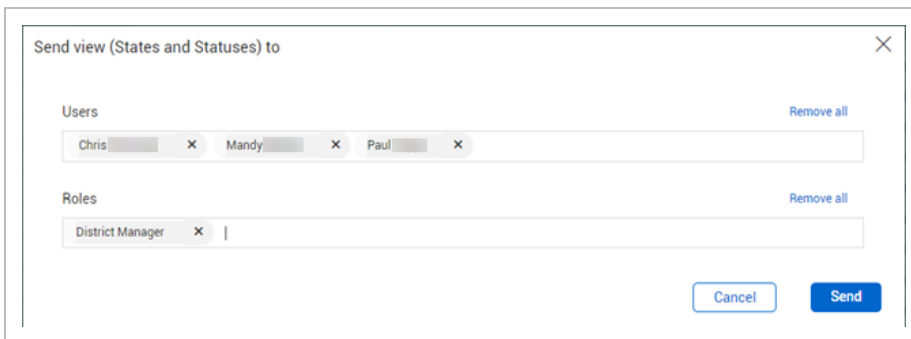

What receiving users see depends on their permissions. If they do not have permission to view forms or tasks within the parameters, they cannot see them.

9.5 STEP BY STEP 2 – SEND VIEW TO ANOTHER USER

1. Click the **My view** drop-down menu, and then select your saved view.
2. Click the **My view** drop-down, and then select **Send view**.

3. In the dialog box, select the users and roles to whom you want to send the view, and then click **Send**.

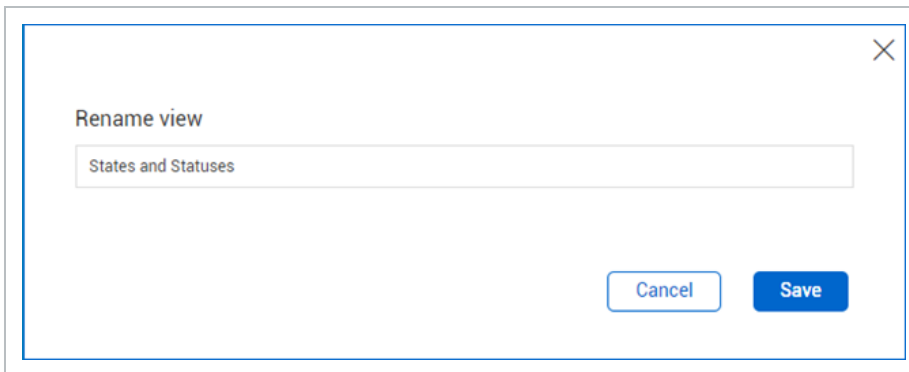

9.5.3 RENAME VIEW

9.5 STEP BY STEP 3 – RENAME VIEW

1. Click the **My view** drop-down menu, and then select your saved view.
2. Click the **My view** drop-down again, and then select **Rename view**.

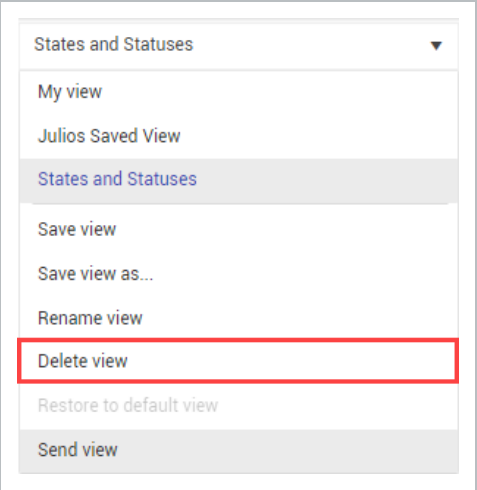

3. In the dialog box, rename your view and then click **Save**.

9.5.4 DELETE VIEW

1. Click the **My view** drop-down menu, and then select your saved view.
2. Click the **My view** drop-down again, and then select **Delete** view.

3. In the dialog box, click **Yes** to delete view.

9.5.5 GLOBAL VIEW

Global Events/Tasks view lets you see events and tasks outside of the organization or project you are currently viewing. To show the Events or Tasks page in global view, click **Global Events/Tasks** at the top-right of the page.

In the global events and tasks page, you can narrow or expand your view using the query builder in the side panel. You can narrow or expand according to module, organizations, and projects you are assigned to.

InEight Inc. | Release 24.9

Page 265 of 380

This page intentionally left blank.

10.1 PINNED TASKS

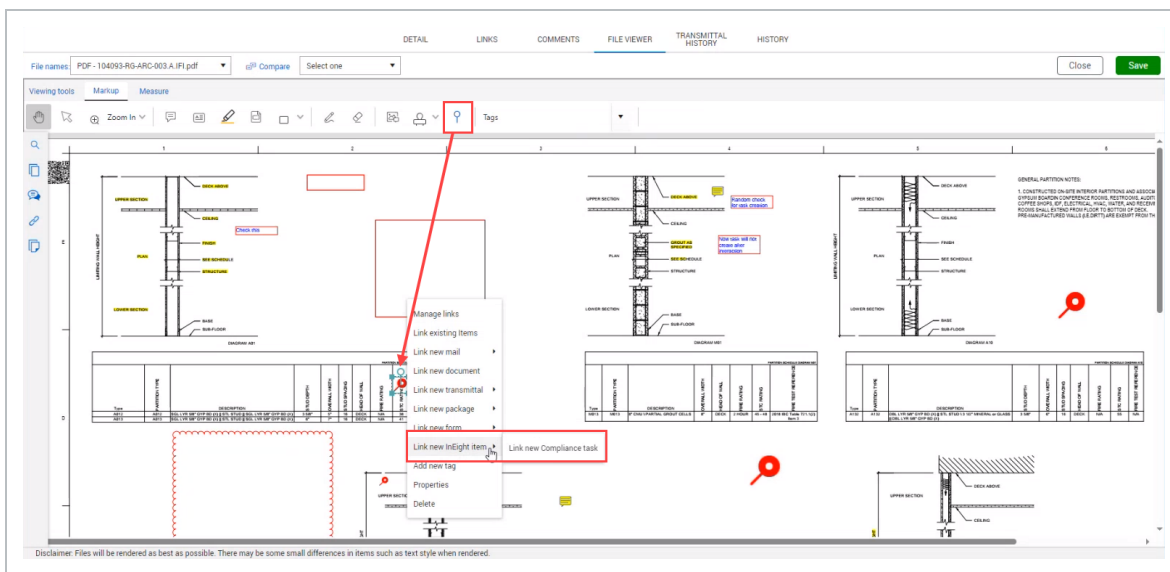

10.2 PINNED TASKS OVERVIEW

The pinned task feature integrates InEight Document's Pinned links feature and Compliance tasks. Oftentimes, project members need to mark on a file or drawing to fix or address a finding and assign it to the right team member for action. The pinned task feature lets users create and pin a new task from the Document viewer and sync it with the Compliance application.

NOTE

Although Compliance is referred to throughout the topic, the Pin Task feature is available for both Compliance and Completions.

As an administrator, you can use the pinned task feature between both applications by configuring the feature in Document and Compliance. After you configure the integration, you can go to Document > File Viewer > **Markup** and place a pin on a drawing. From the pin, you can link it to a task in Compliance based on configuration. To do this, right-click the pin, and then select Link new InEight item > **Link new Compliance task** from the menu.

You can also create a new task in Links > Add > **Link new InEight item**.

When you select **Link new Compliance task**, a dialog box shows to enter details for the task.

New Compliance Task

* Task Name

Replace ceiling tile in office 4A

* Task due date

12-22-23

User contact

Tyler Ellerbeck

Description

Ceiling tile is damaged and needs to be replaced.

Cancel

Save

After saving the task, and then saving the markup in File Viewer, a link is saved in the Links tab that is associated with the task created in Compliance.

The following image shows the link in the Document > **Links** tab:

Task Name	Task Due Date	Task Start Date	Responsible User	Status	Completion Date
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	
Replace ceiling tile in office 4A	12-22-23		Tyler Ellerbeck	Scheduled	

You can launch the task by clicking the link in the Document Links page after the task has been created. When you click the link, the task opens in the Compliance web application. When the task has not been completed, a dialog box shows to create the task.

The following image shows the associated task created in Compliance:

Task title	Category	Due date	Projects/Organization	Responsible party	Status	Task Id	Task name
Replace ceiling tile in office 4A	Checklist	12/22/2023	Project 4A (100000)	Tyler Ellerbeck	Scheduled	2023120600024	Pinned Task
Replace ceiling tile in office 4A	Category B - 001-0017-0001	12/19/2023	Project 4A (100000)	Gregory B. Bowers	Scheduled	2023120600025	Pinned Task
Replace ceiling tile in office 4A	Category B - 001-0017-0001	12/19/2023	Project 4A (100000)	Gregory B. Bowers	Scheduled	2023120600026	Pinned Task
Replace ceiling tile in office 4A	Category B - 001-0017-0001	12/19/2023	Project 4A (100000)	Gregory B. Bowers	Scheduled	2023120600027	Pinned Task

Assigned tasks will be available to complete in Compliance web or the SQC mobile application as shown in the following images:

Pinned Task

* Issue name
Replace ceiling tile in office 4A
217 characters remaining

* Issue due date
12/22/2023

☐ Schedule

* Responsible user
Tyler Ellerbeck

Issue number

☐ Not Applicable

* Description
Ceiling tile is damaged and needs to be replaced.

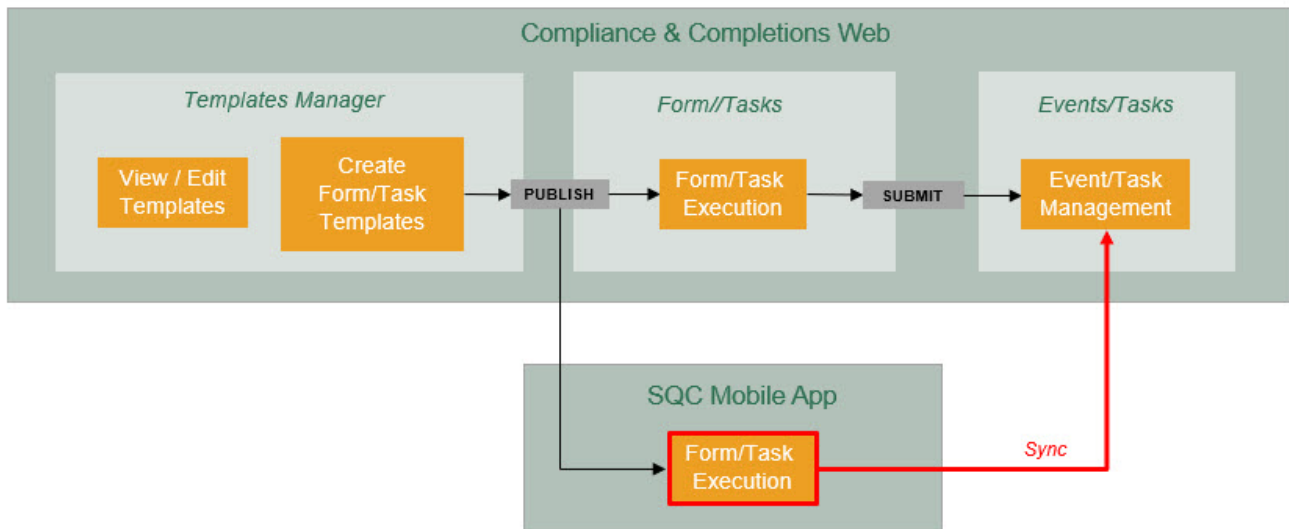

Any updates to task values, such as task start date, issue date, and responsible user are synced with the pinned task in the Document links page.

10.2.1 CONSIDERATIONS

- Although Compliance is referred to in the topic, the Pin Task feature is available for both Compliance and Completions.
- In Document, you must configure the integration in Address book > Companies > <company> > **InEight Integrations** tab.
- In Compliance, you must configure a module template that integrates with Document. For more information, see the Pinned task setup guide in [Integrated Solutions](#).

CHAPTER 11 – SQC MOBILE

11.1 OVERVIEW

The InEight SQC mobile app lets you incorporate technology when completing inspections and tasks instead of a traditional method of using a paper form. The SQC mobile app is available to download from the Apple App Store.

You can perform inspections and complete tasks using the forms, questionnaires, and tasks created in the Compliance or Completions web application. You can complete them while connected online or complete them offline, and then synchronize the results when online using your iPhone or iPad. You can also easily locate your forms or tasks based on your project assignment.

For more information about mobile device requirements, see [Client System and Mobile Device Requirements Specification](#).

11.2 NAVIGATION

In the mobile application you can view your project assignments, use notifications, and navigate to your forms or tasks. After opening a project, you can then select a module, category, and then choose your assigned forms or tasks in the Templates page.

11.2.1 LIST VIEW

You can view listed items as a list or tiles. Switch by tapping the List or Tiles icon at the top right of the page. This option is available on every list page, such as the Projects and Modules page.

You can also tap the **Sync** icon at the top of any list page to manually sync the data when you are in a connected environment. For more information, see [Sync](#) .

11.2.2 BOTTOM MENU

You can navigate to the Projects, To-Do List, Notifications, and the Menu pages from the buttons at the bottom of the page. The following image and table show the bottom navigation buttons and descriptions:

Bottom navigation buttons

Name	Description
Projects	View and select projects for which you have permission.

Bottom navigation buttons (continued)

Name	Description
To-Do List	View forms and tasks under the Saved or Assigned tabs that need attention. Forms and tasks are listed within organizations and projects you have been assigned to.
Notifications	Send notifications with messages to specific users, roles, projects, or organizations.
Menu	Go to Sync Status, Settings, Submission History, Kiosk Mode, and Sign Out.

11.2.3 NAVIGATE TO FORMS AND TASKS

From the Projects window, you can navigate to your forms and tasks. [Read more](#)

GO TO YOUR ASSIGNED FORMS OR TASKS.

1. In Projects, select from the list of projects assigned to you.

11.2.4 CONSIDERATIONS

All projects, modules, and categories are assigned by your administrator through permissions on the Compliance or Completions web application.

11.3 PROJECTS

On the Projects page, you can view all projects or the two most recent downloaded projects using the All or Recent tabs at the top of the page. You can also tap the **Search** icon to find a specific project.

InEight Inc. | Release 24.9

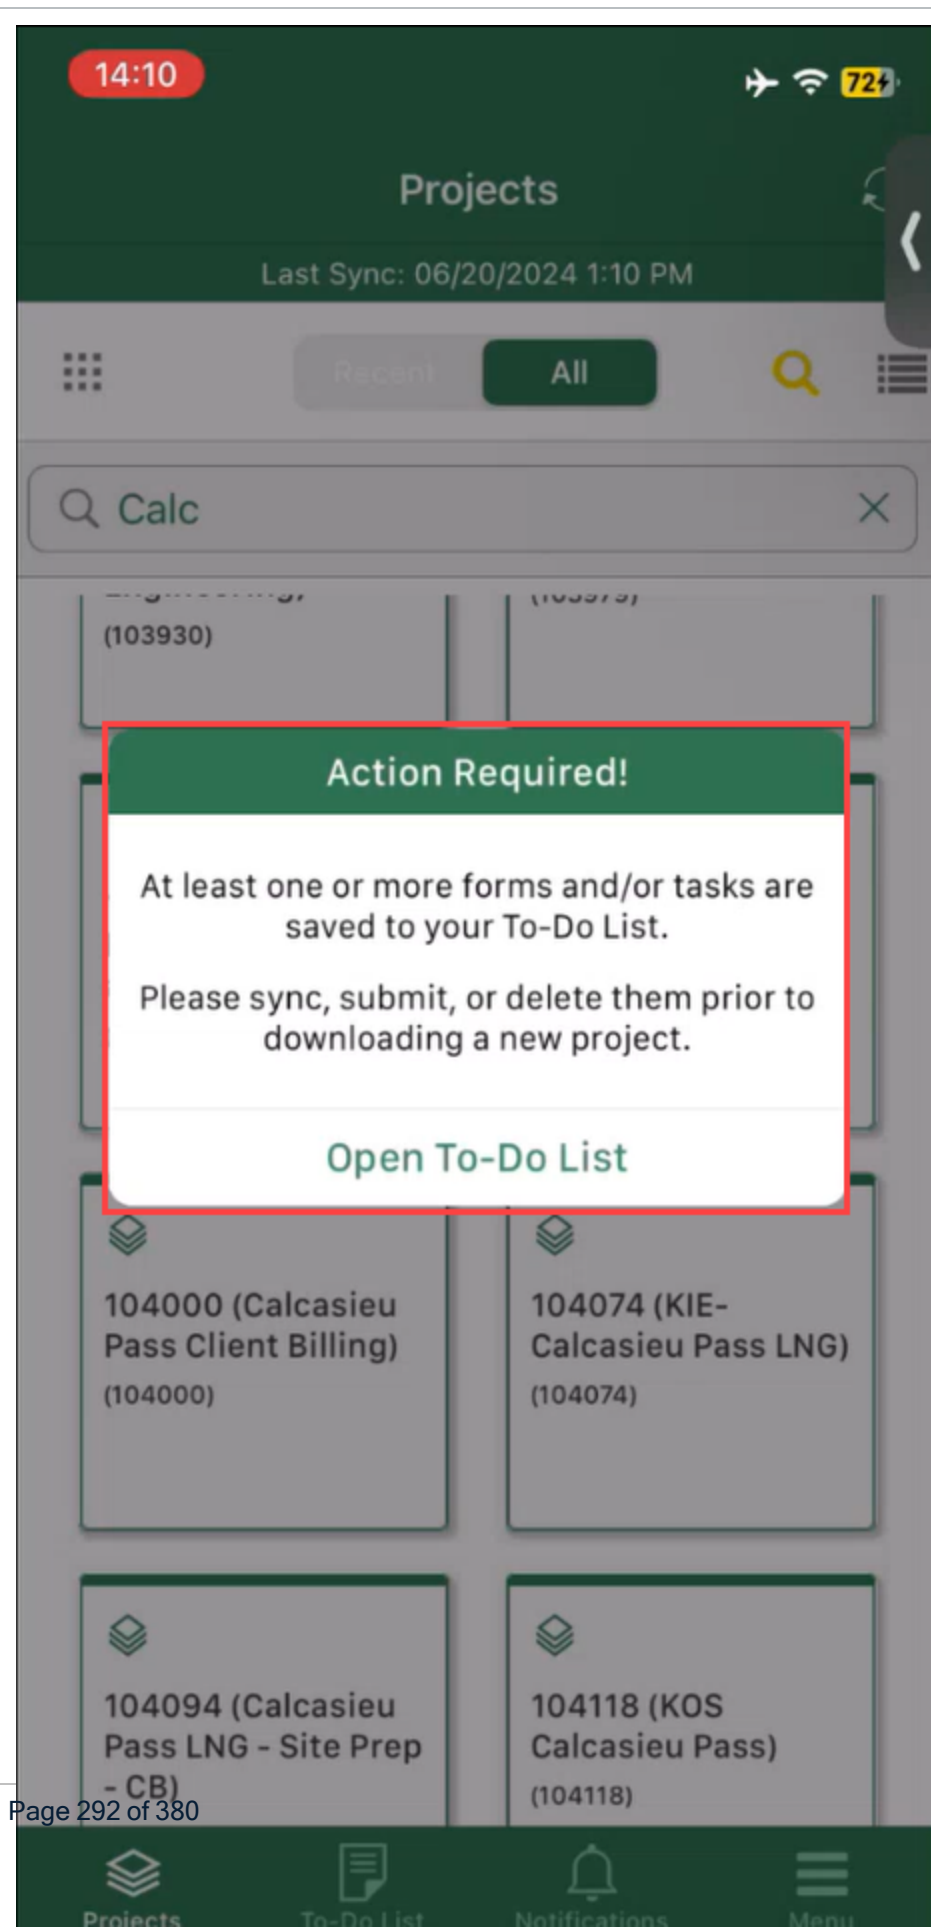

Page 289 of 380

You can have one active project at a time. In the Recent tab, the current open project shows as *Active*.

11.3.0.1 OPENING A PROJECT WITH PENDING PROJECT CHANGES

Any project changes must be synced prior to opening another project. When you have an active (open) project with pending saved forms or tasks, and select to open another project, an alert message prompts you to go to your To-Do List Saved tab to sync, submit, or delete the items in the list prior to opening a new project:

- **Sync** – Swipe right on the form or task, and then tap the **Sync** icon.

- **Submit** – Open the form or task and complete a workflow or complete the form or task to submit to the web.
- **Delete** – Swipe left on the form or task, and then tap the **Delete** icon.

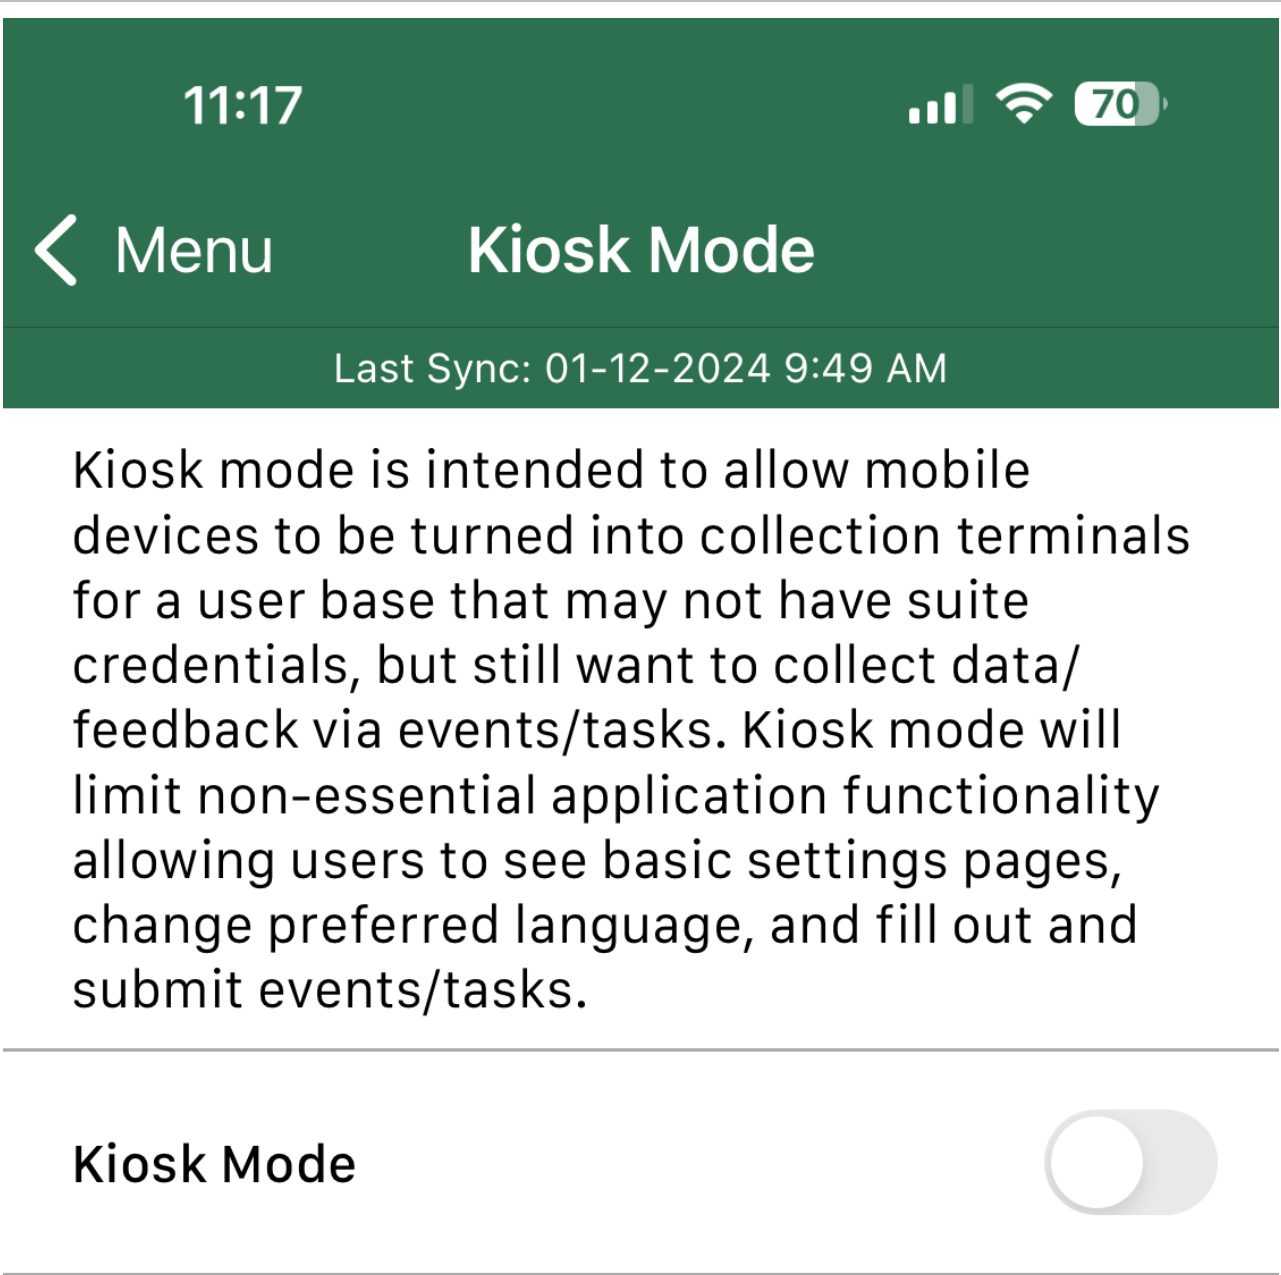

11.3.1 CONSIDERATIONS

- In the Recent tab, you can remove the project by tapping the screen and holding it until you see the Delete icon. Select to delete the project.
- The Recent tab shows the current and previous active project. When you switch back to the previous active project, the existing data is updated, improving the sync performance.

11.4 KIOSK MODE

Kiosk mode limits mobile functionality to filling out and submitting forms or tasks without requiring users to sign in. Kiosk mode is useful if your project has subcontractors who are not users in your system, but who need to report information.

To enable kiosk mode, go to Menu > **Kiosk mode**, and then switch the toggle to *On*.

Kiosk mode is intended to allow mobile devices to be turned into collection terminals for a user base that may not have suite credentials, but still want to collect data/feedback via events/tasks. Kiosk mode will limit non-essential application functionality allowing users to see basic settings pages, change preferred language, and fill out and submit events/tasks.

Kiosk Mode

If you want to limit kiosk mode to a default project, module, or category, you can set those in Menu > **Settings** when kiosk mode is off. After you set defaults, and then enable kiosk mode, you can only see forms within the default settings.

CHAPTER 11 – SYNC

11.1 SYNC

The application must be synced to get the most recent updates from the web application, such as the latest template revisions, permissions, or access to newly assigned projects.

When you are in a connected environment, tap the **Sync** icon at the top of any list page to manually sync the data. A banner at the top of the application informs you when the last sync took place.

You can access Sync Status and Sync Settings from the Menu page.

Last Sync: 01-12-2024 9:49 AM

Version 23.12.0 (23.12.130.8)

Customer Code:
training-qa-2312

11.2 SYNC STATUS

You can check the status of your syncs in Menu > **Sync Status**.

11.3 SETTINGS

You can customize how the mobile application syncs with the web application in Menu > Settings > **Sync Settings**.

- **Sync in advance** - Syncing in advance lets you choose whether to sync items from the web in 7, 14, or 21 days in the future. [Read more](#)

As events and tasks are assigned, they need to be available on your mobile device days ahead of the due date so that they can be done on time.

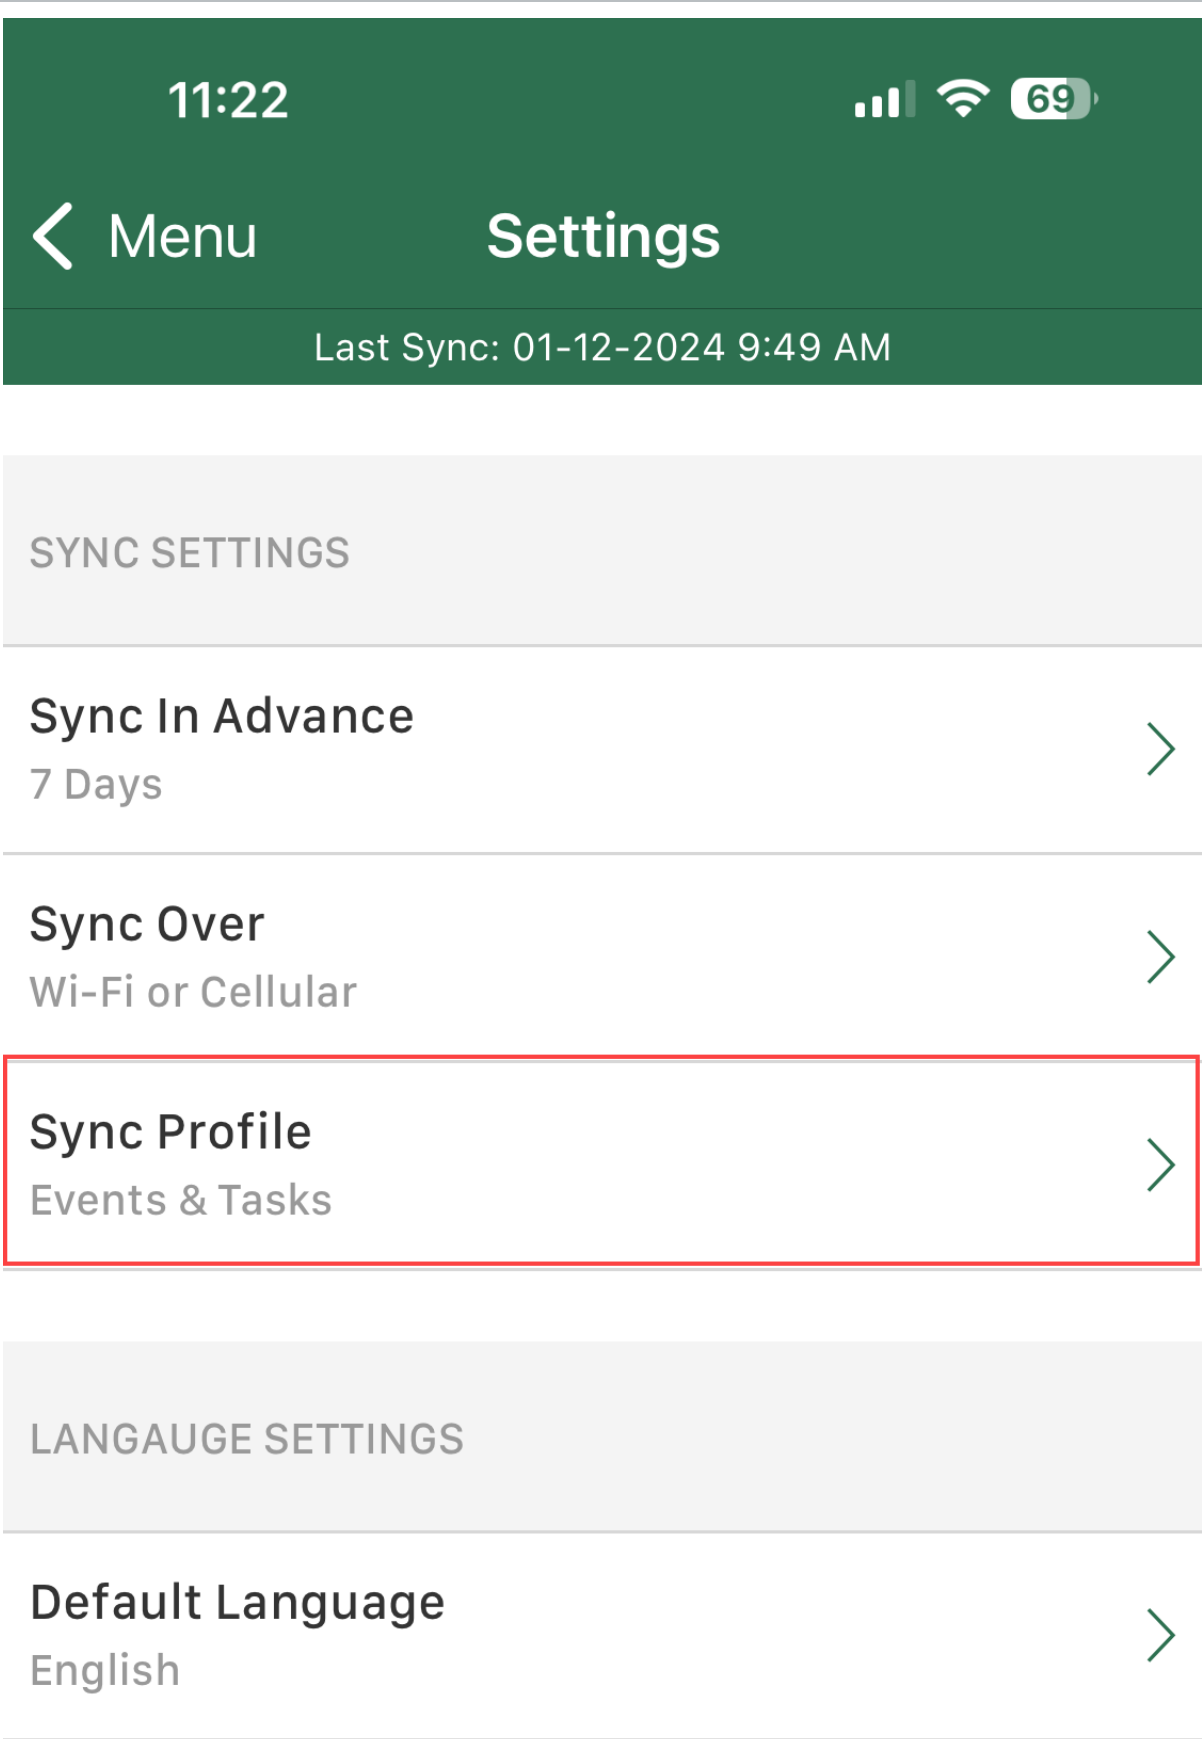

- **Sync over** - You can choose whether to allow syncing only over Wi-Fi or over both Wi-Fi and Cellular. [Read more](#)

This gives you the flexibility of choosing the most reliable connection available in your location.

- **Sync profile** - The Sync Profile settings lets you sync assigned work items to your device. [Read more](#)

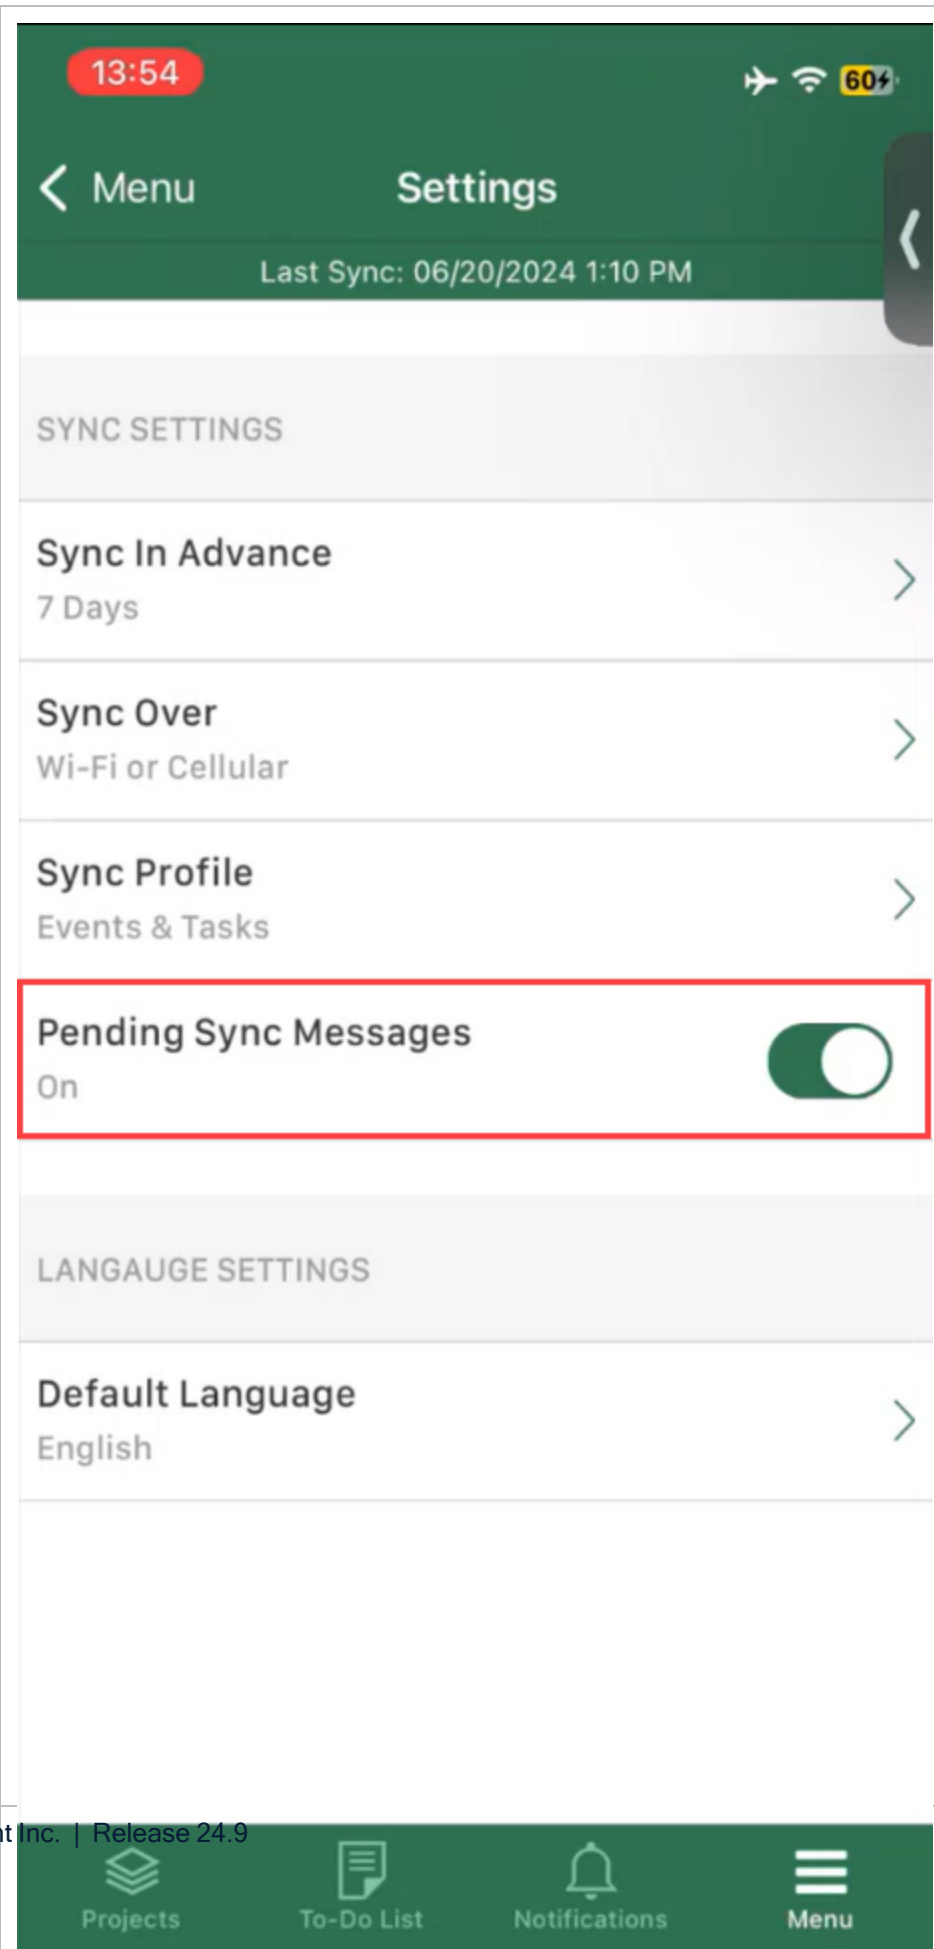

You can select to enable syncing for events and tasks. Both are disabled by default.

When you have assigned work items on your device, and then disable one of the sync toggles, you are asked to confirm whether you want to remove the work items from your assignments and unlock them on the web.

- **Pending sync messages** - You can receive pending sync alert messages when you launch the SQC application. [Read more](#)

The Pending Records alert messages remind you that there are submitted events or tasks that have not synced to the web. You can manage the setting in Menu > Settings > **Pending Sync Messages**.

You can manage the feature by setting the toggle to *On* or *Off*. The feature is set to *On* by default.

When you open the SQC application and have pending forms or tasks that need to be synced, a **Pending Records** message prompts you to perform a sync.

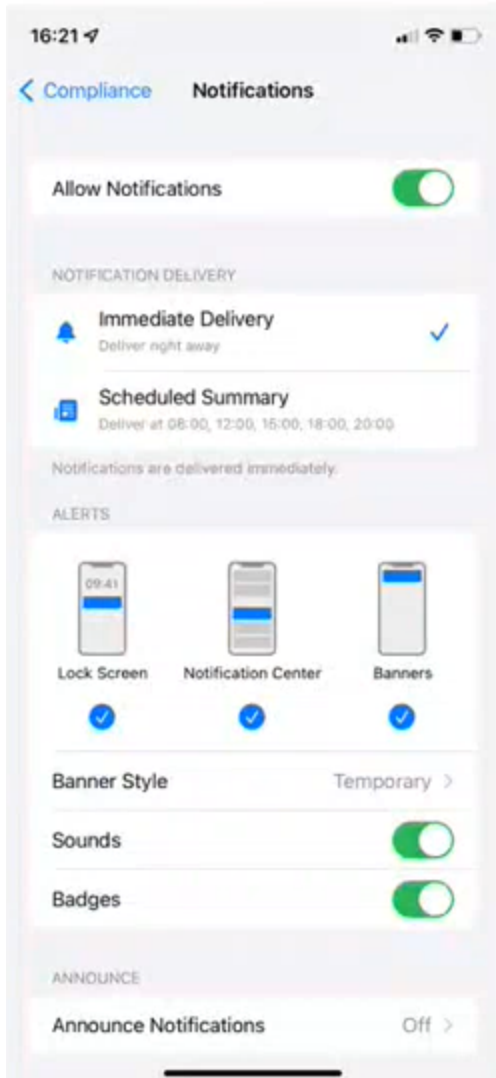

To perform a sync, you must open the SQC application in a connected environment, and the application must remain active in the foreground until the sync is complete.

You can choose to not show the message again by setting the toggle to *On*, and then tapping **OK**.

11.4 PUSH NOTIFICATIONS

You can setup push notifications on your iOS mobile device to alert you of any updates of assigned events and tasks. Use the iOS notification settings to control notification alerts.

When an assigned item is set up, you receive a notification on your mobile device.

You can tap on the notification to launch the application automatically. If you are logged in, it takes you directly to the item in the To do list. You must be logged into the application to receive notifications.

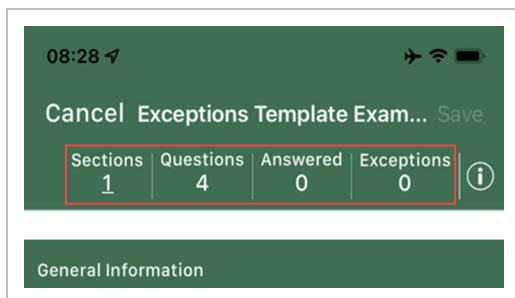

11.5 FILLING OUT AN EVENT OR TASK - MOBILE

TIP

Mobile tasks have all the same abilities as using tasks on the web with the added ease and efficiency of offline use.

When filling out a form or task, the top of the page shows the following information:

- Sections – The number of sections. Tap this number to open a slide-out panel of sections that you can navigate to without scrolling.
- Questions – The total number of questions.
- Answered – The number of questions answered.
- Exceptions – The number of answers flagged as exceptions. Tap this number to open a slide-out panel of questions answered with exceptions. You can go to those questions by tapping them in the panel.

Next to the header numbers is the Information icon. When you tap this icon, a slide-out panel opens that provides more information about this event, which functions the same way with a task.

In the below example, there are four questions on this event, three of which are answered.

Accident Form

Some questions on an event or task might be mandatory. They are denoted with an asterisk (*). On some occasions, an Information icon provides more information. When selected, they provide information such as cautions or general information to help you complete the event or task.

The image displays two screenshots of a mobile application interface for reporting an accident.

Left Screenshot: Accident Form

- Header: "Accident Form" with a location pin icon and an information icon.
- Buttons: "Cancel" and "Save".
- Section: "Accident Information".
- Field: "Description of the accident" with a red box around the information icon. The text "On Friday morning I ran into" is entered. A character count "172 characters remaining" is shown.
- Field: "* Date of incident" with a calendar icon.
- Field: "Time the incident occurred" with a clock icon.
- Field: "Specific location where the accident occurred" with a character count "4000 characters remaining".

Right Screenshot: Details

- Header: "Back" and "Details".
- Section: "Description of the accident".
- Text: "Please do not includes individuals names in this field".

You can use voice dictation within the Compliance mobile application. Select the microphone from the keyboard on the screen and speak.

11.5.2.4 PEOPLE PICKER

A people picker is available to use to select those users that have access to the module at the organization level in which the event or task is being performed against.

To access the names, begin typing the name or select the **People Picker** icon. Depending on how the administrator sets up the question, you can select multiple users or none, and the list of users can include either only users with Compliance roles or all users in the project.

A new page is shown with the names of users. Select the name and it appears in the indicated field on the event or task.

Depending on how the question is set up, the selected user can receive an email notification.

The image displays two screenshots from a mobile application. The left screenshot shows the 'Incident form' with a 'Name of the injured party' field highlighted by a red box and a people picker icon. The right screenshot shows the 'People picker' screen with a list of users including bhavna gupta, Brandi Heffner, bridgette quintero, paul bennion, and Susan Cappelloni.

NOTE

The people who show in the list are the users who have a Compliance assignment to the project for which the event or task is being filled out.

11.5.2.5 ATTACH PHOTOS

The Compliance mobile application lets you to take photographs and annotate on the areas of focus while filling out the event or task. In the application, select **Attach photos**. It opens a page from which you can select an option from the Photo Library or Take Photo with your smart phone.

For example, you might attach reconstruction photos of safety incidents, photo proof of a fix to a non-conformance, or a picture of a certification of compliance.

The screenshot displays the 'Accident Form' interface on a mobile device. At the top, the status bar shows 'VZW Wi-Fi', '3:04 PM', and '70%' battery. The app header is green with 'Accident Form' and navigation icons. Below the header are 'Cancel' and 'Save' buttons. The 'Accident Information' section includes a text input field with a '3969 characters remaining' indicator. A red rectangular box highlights the 'Attach photos' section, which contains the text 'Please add any pertinent photos', a camera icon with a plus sign, and the text 'Attach photos'. Below this, it shows '0 photo(s) attached'. At the bottom, there is a section for the 'Manager's signature' with three buttons: 'Photo Library', 'Take Photo', and 'Cancel'.

After the picture is taken, you can edit the photo by selecting the **Edit** button on the top right of the page. This opens editing and annotation options. There are colors, widths, and text options available. A time stamp is added when edits are made, and the stamp can be moved around the screen for optimal viewing. You can also edit the name of the image file to be more meaningful than the default name given by your device.

Prior to the image being saved, the Undo icon in the lower left removes edits.

When finished, tap **Done** and return to the event or task page. Here you see the photos you included. If you want to view the photo, select the image and it takes you back to the photos. Alternatively, if you want to include more photos, tap **Attach photos** again.

If you have set up integration with InEight Document, you can also see if supporting documents from the Document application are attached when performing a form or task. Document links are shown in the list of attachments with the Document icon and document version numbers.

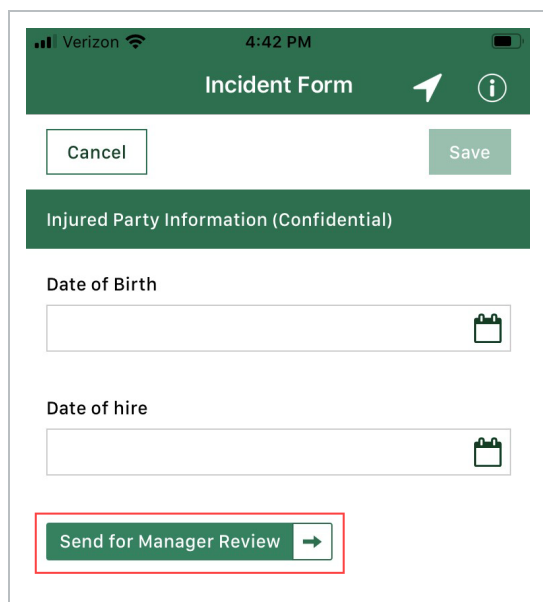

To remove an attachment, swipe left, and then tap the **Remove** icon.

11.5.2.6 FORM FLOW

A form flow button can complete the first step of a form flow from the mobile application. Additional steps must be completed by responsible parties in the Compliance web application.

Form flow buttons have a right arrow next to them.

11.5.2.7 GPS

A GPS question lets you provide your location by tapping **GPS** or by entering your coordinates directly in the fields. You can also tap **Clear GPS** to remove the information if you need to enter a different location.

To use the GPS button on your mobile device, you must allow the Compliance app to access your location when prompted.

NOTE

If you enter GPS coordinates automatically, you cannot manually edit the coordinates.

11.5.2.8 REFERENCE AND INTEGRATION QUESTION TYPES

Integrated list question are lists that integrate with InEight Platform master data library. The Integrated list question include resource column fields in a series of cascading questions. You can use cascading questions to narrow down the selection of a resource. For example, you can add Vendor Region, Vendor Country, and Vendor City column fields of cascading questions to narrow the selection down to a city. The list pulls data from Platform's resources and will only work when connected to the internet. For more information on Integrated lists, see [Integrated List](#).

11.5.3 COMPLETE A FORM OR TASK

For more information on how to save and submit a form or task, see [Complete a Form or Task](#).

The following steps walk you through performing an event on a mobile device.

11.5 STEP BY STEP 1 – FILL OUT AN EVENT - MOBILE

1. Open the Compliance mobile application by tapping the **InEight SQC** icon on your mobile device. and log in.
2. Log in and select Compliance if selection is shown (You may be directly taken to the Compliance projects screen).
3. The Projects screen is shown.

TIP

The mobile application saves your password for quicker log-in.

4. Open a project for which there is a report.
If your access allows, select the project **105091 – Steel Structure Job**

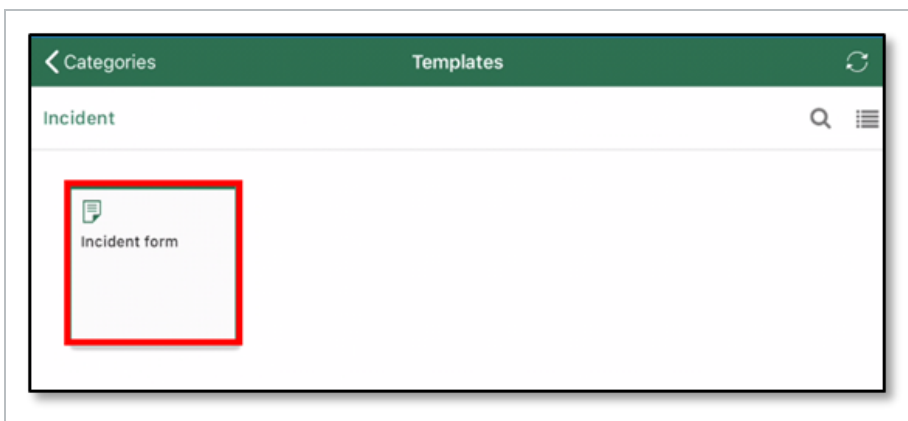

5. Select a module, in this case **Safety**.

6. Find and select a Safety category, in this case, **Incident**, from the Categories screen.

7. Select an event from the templates list, in this case, **Incident form**.

8. Fill in the form.

11.6 COMPLETE A FORM OR TASK ON MOBILE

There are several ways to finish filling out a form or task depending on how it is set up by your administrator and what the next steps are.

11.6.1 SAVE A FORM OR TASK

If you do not have enough time to complete a form or task, or not all information about the event is readily available, you can tap **Save** to save your work. You can then continue or close the form or task, and then come back later to complete and submit it.

11.6.2 ASSIGN A TASK

As part of filling out a task, you might have to assign it to someone else to complete some of it. To assign a task, tap the **Assign** button. If you want to start a new task immediately after assigning the current task, tap **Assign and start new task**.

11.6.3 SUBMIT A FORM OR TASK

After you have completed your event or task, tap the button to submit it. In this example, the button is labeled **Submit form**. This syncs with the Compliance web application for manager approval.

TIP

If you have not completed your event or task, you can tap **Save**, and it goes to the to-do list, where you can retrieve it when you are ready to complete it.

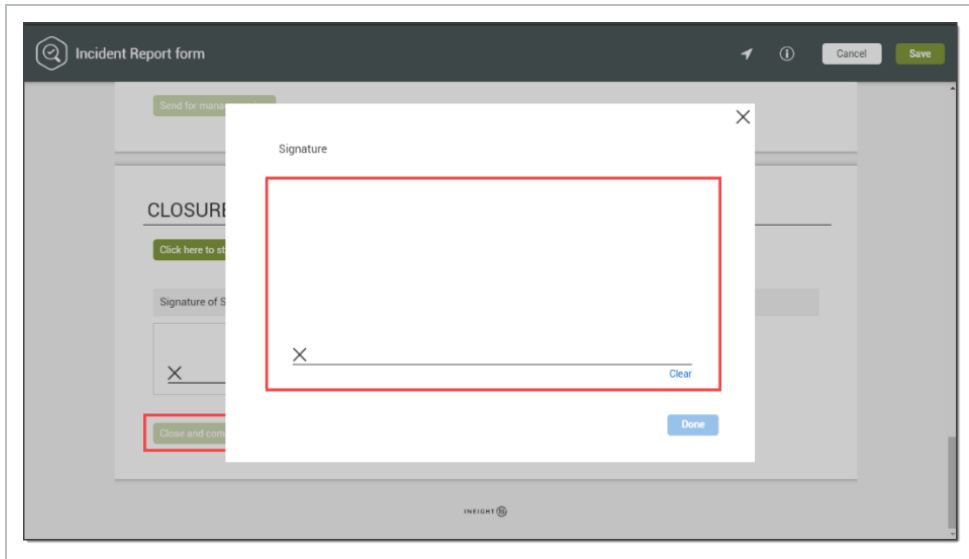

NOTE

After you sync the event or task to the web, it is removed from your device.

For the event used in this example to be completed, open it in the Compliance web application under Safety > **Events**. In this example, the status for your event is **With Claims Manager**.

S100000 - PKS Inc		Compliance					
Safety > Events		View: All					
				Clear all filters			
Event ID	Project/Organization	Category	Form name	Event title	Reporter	Event date	Status
2019101100005	S100000 - PKS Inc	Incident	Accident Form	Accident Form_20191...	Karen Loftus	10/16/2019	With Claims Mana...

The manager can now sign off on the event in the web application. Click the event title to open the event to the closure of investigation section. This is where the manager signs and taps on the Close and complete this incident button to complete the form.

After the event is signed and completed, the status of the event on the Events page changes to Complete.

A screenshot of the 'Events' page in a web application. It displays a table with columns: Event ID, Project/Organization, Category, Form name, Event title, Reporter, Event date, and Status. The first row is highlighted, and its 'Status' is 'Complete', which is circled in red. Other rows show 'With Claims Manager' and 'Pending' statuses. The table is filtered for 'SAFETY 2-HVT' and 'Events'.

Event ID	Project/Organization...	Category	Form name	Event title	Reporter	Event date	Status
2019082700003	Steel Training Job	Incident	Incident Report form	Hammer hit thumb - J.S.	Karen Loftus	08/27/2019	Complete
2019082700002	Steel Training Job	Incident	Workers Comp Claim	Workers Comp Claim_20	Karen Loftus	08/27/2019	With Claims Manager
2019082700001	Steel Training Job	Incident	Incident Report form	Hammer hit thumb - J.D.	Karen Loftus	08/27/2019	With Claims Manager
2019082600002	Steel Training Job	Incident	Incident Report form	Incident Report form_20	Karen Loftus	08/26/2019	Pending

The following steps walk you through performing an event on a mobile device.

11.7 LOCKED EVENTS AND TASKS

When working through a task or event on a mobile device, a locking mechanism is in place to ensure your completion of the task or event. This means another individual cannot open your task or event as long they are synced to the mobile device and the list shows the item as locked.

Event ID	Project/Organization	Category	Form name	Event title	Reporter	Event date	Status
2019112700063	iSmart	iSmart_001	All_Questions_Oct_15	Testing now 27	Krishna Prasad	11/27/2019	Locked
2019112700060	iSmart	iSmart_001	All_Questions_Oct_15	Testing for web lock	Krishna Prasad	11/27/2019	Locked
2019112700055	iSmart	iSmart_001	All_Questions_Oct_15	Testing for checking do list	Krishna Prasad	11/27/2019	Locked
2019112700047	iSmart	iSmart_001	All_Questions_Oct_15	Testing for email associated	Pradeep Kumar	11/27/2019	Locked

If the Event title of a locked item is tapped, the event opens, but will be unavailable for edits or saving as long as the Locked icon is shown.

NOTE

If the Information icon is selected, edit properties are also unavailable.

 Forms/Tasks

11.7.0.1 UNLOCK

If you prefer to complete a task on the web rather than on mobile, you can delete the task from your To-Do List.

To delete a task, go to To-Do List > **Assigned**. Swipe to the left on the task, and then tap the trash can icon that is shown to the right.

**NOTE**

When you remove a task from the To-Do List, you must be connected to the internet via Wi-Fi or cellular. If you remove when not connected, the task is removed but not unlocked on the web. In this case, you must resync when connected, and then remove again.

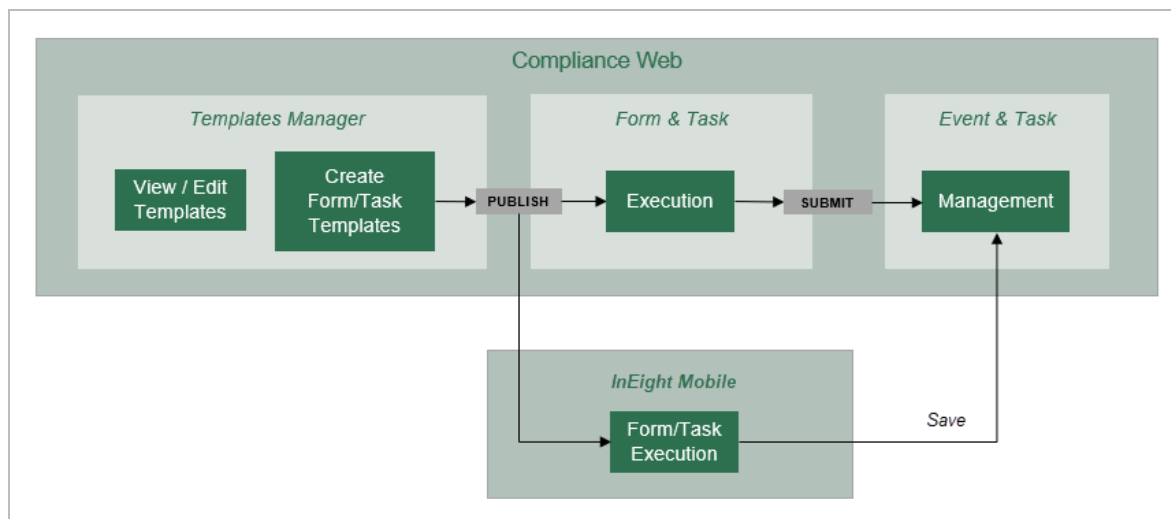

After you remove a task from the To-Do List, it is recommended that you not sync your device until the assigned task's status is changed from Scheduled to Pending in the web application. To update the status, you can start the task on the web or, if you have permission to edit properties, you can bulk update unlocked tasks.

NOTE

If the task status remains Scheduled the next time you sync, the task is locked and downloaded to your device.

11.8 INEIGHT MOBILE

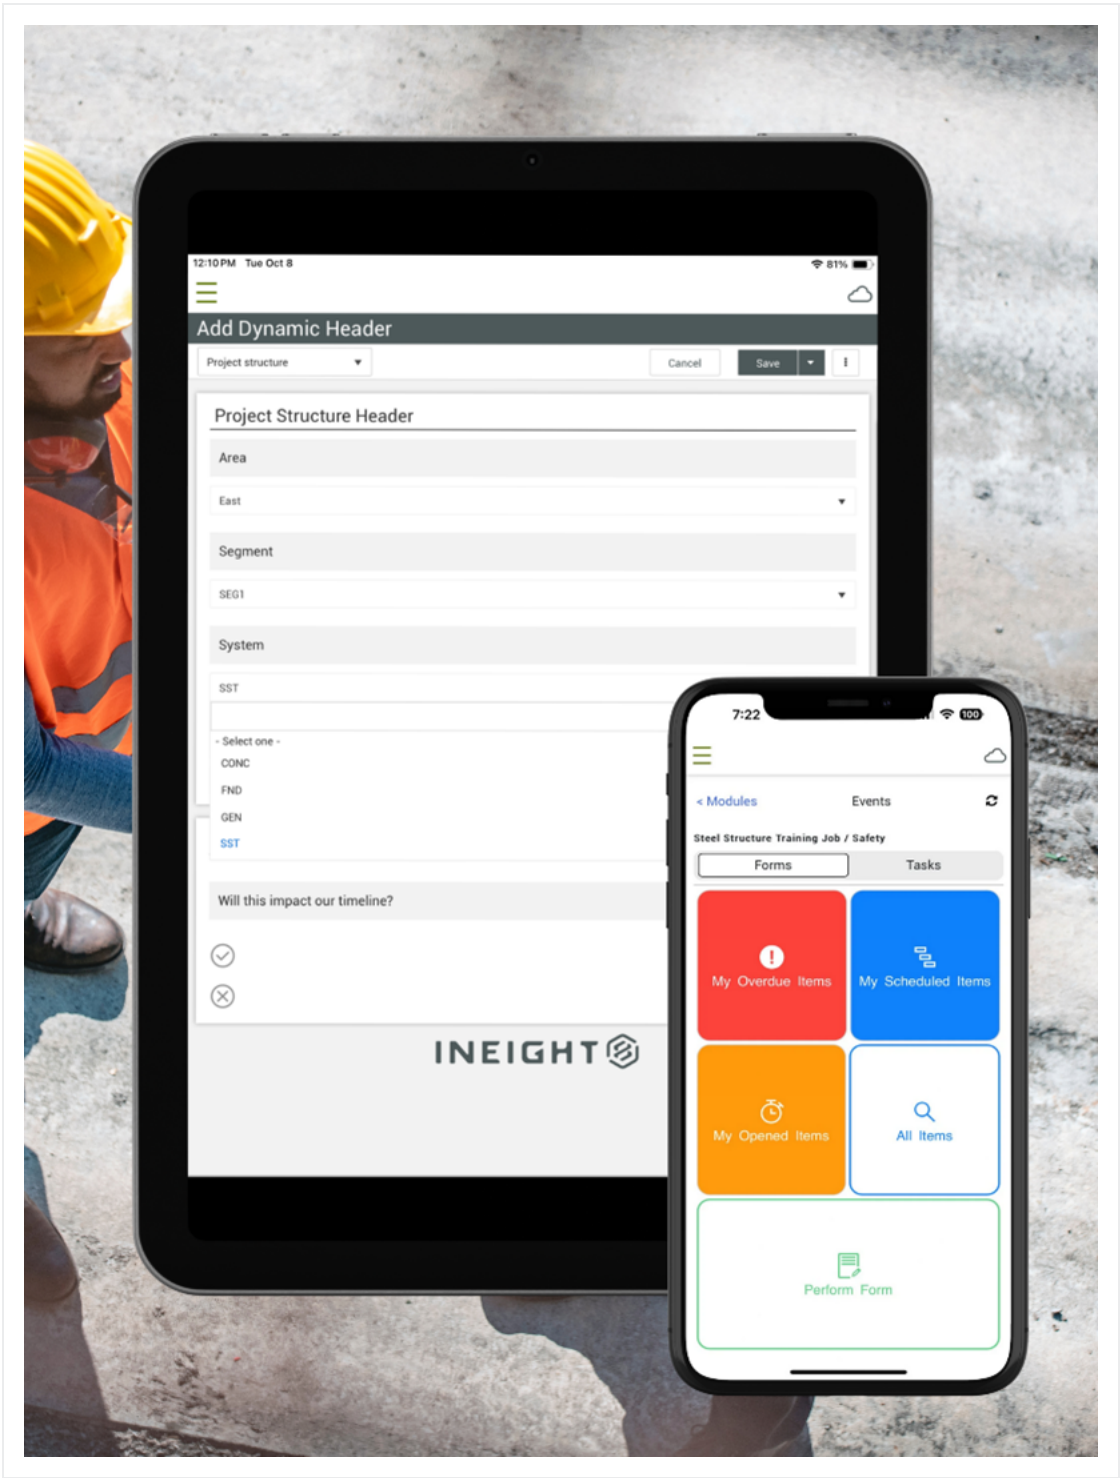

11.9 INEIGHT MOBILE OVERVIEW

The InEight mobile application lets you incorporate technology when completing inspections and tasks instead of using a paper form. It can be downloaded from the Apple App Store for iPhone or iPad devices.

Like the SQC mobile application, you can perform inspections and complete tasks using the forms, questionnaires, and tasks created in the Compliance or Completions web application. However, you must have an active connection to the Internet to use the InEight mobile application. You can access forms or tasks based on your project assignment and permissions, including forms with active form flow.

The application offers a Live (online only) and Remote apps option, where you can select the connection that best suits your environment. The Remote apps option references the existing SQC mobile application.

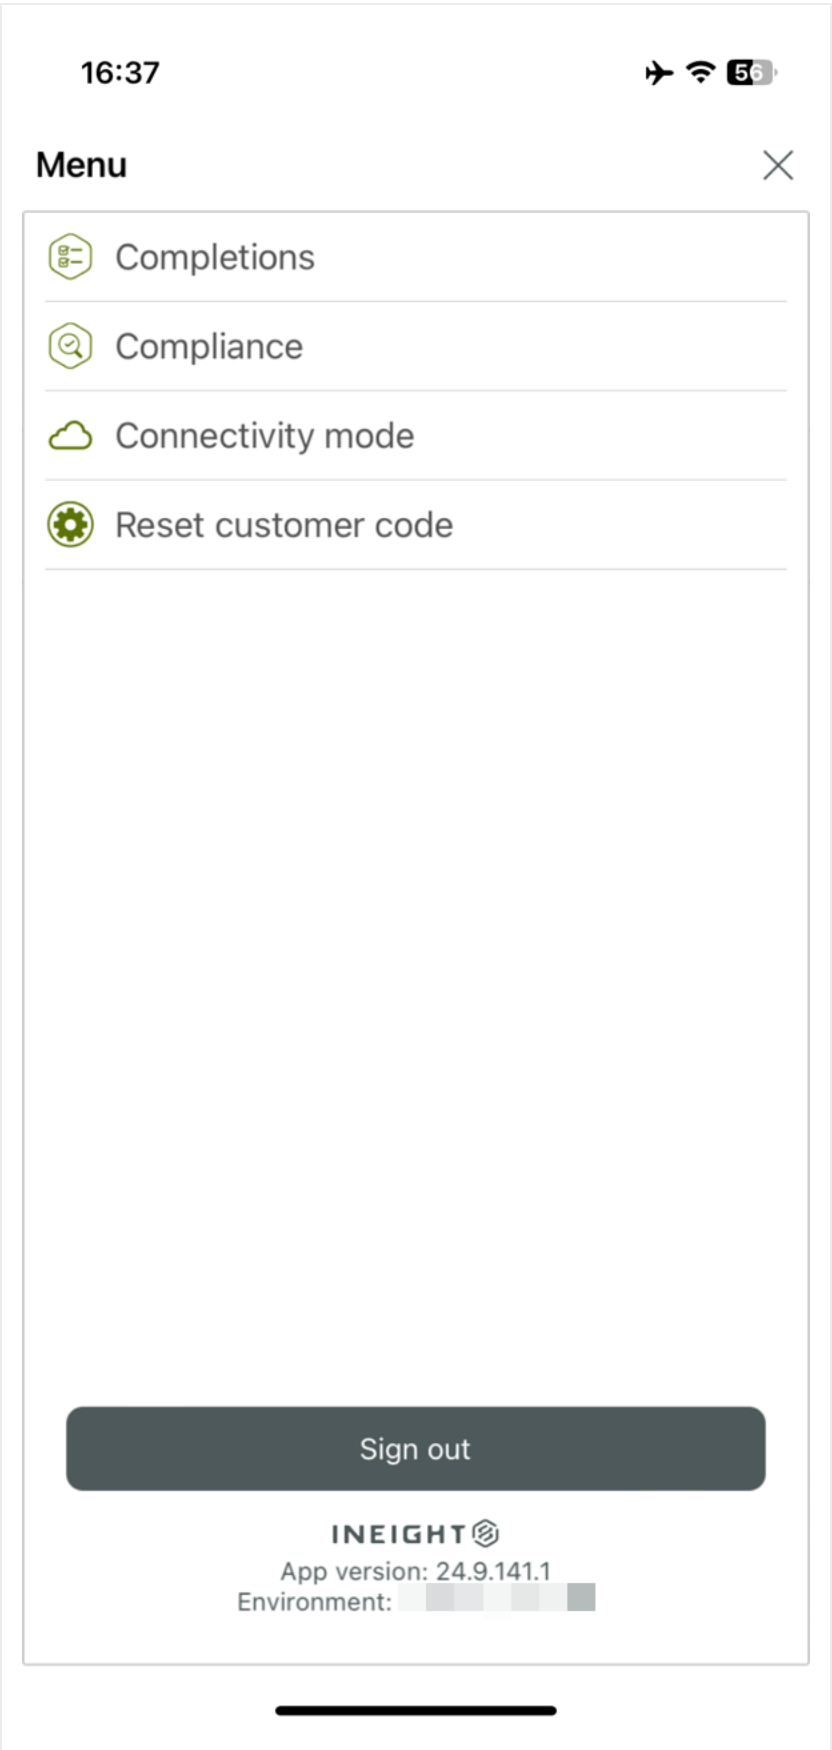

For more information about mobile device requirements, see [Client System and Mobile Device Requirements Specification](#).

11.10 NAVIGATION

In the InEight mobile application, the Live (online only) option will display Completions and/or Compliance based on your permissions and assignments. Once you have selected the desired application, a list of projects for which you have assignments will be provided. After opening a project, you can then choose a module. The Forms and Tasks screen provide quick access to your overdue, scheduled, and in-progress items. The All Items option will display all events or tasks for the project based on your permissions. The perform form option will display your favorite forms and categories for the project to which you have access.

11.10.1 HAMBURGER MENU

The available options under the hamburger menu let you to navigate between the Completions and Compliance applications. There is also an option to choose a different connectivity mode based on your environment and whether internet connectivity or stability is questionable. The Reset customer code option is available to access a different customer code. If the user no longer requires access to the InEight application or if a device is shared device between users, the *Sign out* option is available.

Hamburger navigation options

Name	Description
Completions	Select this option to access Completions
Compliance	Select this option to access Compliance
Connectivity mode	Choose the connectivity mode based on your environment and internet connectivity
Reset customer code	Reset to access different customer codes

11.10.2 NAVIGATE TO FORMS AND TASKS

11.10.3 CONSIDERATIONS

Your administrator assigns all projects, modules, and categories through permissions on the Compliance or Completions web application. You must have an assignment on an organization or project for them to show in the InEight application.

11.11 PROJECTS

You can select any projects you have permission for on the Projects page. You can also use the Search bar to enter specific text characters and hit enter to filter down to a particular project.

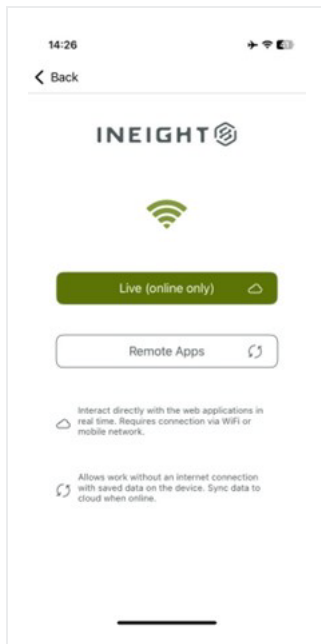

**NOTE**

You can select any project to which you have access. The InEight mobile application makes live calls and displays the content. No project data is loaded onto the device, so the information displayed is near real-time, from the last refresh or loading of the screen.

11.12 INTERNET CONNECTION

11.12.1 CONNECTION

To work properly, the InEight mobile application requires an active internet connection, either through Wi-Fi or cellular data. The application does not store or sync any data outside of the content currently displayed on the screen. There may be situations where the internet connection is interrupted. While the mobile application will try to protect any progress made on forms and tasks, an interruption in connectivity could affect loading fields that require it and may even impact saving or submissions. Therefore, it's important to ensure a reliable internet connection in the area where the device will be used for a seamless experience. If internet connectivity is not available or if connection stability is a concern, the SQC mobile application is better suited to handle offline scenarios.

11.13 FILLING OUT AN EVENT OR TASK

When filling out a form or task, the top of the form or task shows the following information:

13:48

Report a Safety Incident

SECTIONS	QUESTIONS	ANSWERED	EXCEPTIONS
4	11	1	0

Cancel Save

* Incident date

month/day/year

* Incident time

Name	Description
Sections	The number of sections. Tap this number to open a slide-out panel of sections that you can navigate to without scrolling.
Questions	The total number of questions.
Answered	The number of questions answered.
Exceptions	The number of answers flagged as exceptions. Tap this number to open a slide-out panel of questions answered with exceptions. You can go to those questions by tapping them in the panel.

The information icon is next to the header numbers. When you tap it, a slide-out panel opens that provides more information about this event. Task functions the same way.

In the example below, there are 1 od 11 questions answered on this event.

The image displays two side-by-side screenshots of a mobile application interface for reporting a safety incident. Both screenshots show a top navigation bar with the title 'Report a Safety Incident' and a progress summary: 4 SECTIONS, 11 QUESTIONS, 1 ANSWERED, and 0 EXCEPTIONS. Below the navigation bar are buttons for 'Cancel', 'Save', and a menu icon. The left screenshot shows the main form with fields for 'Incident date', 'Incident time', 'Date & Time that the Incident was reported', and a dropdown for 'Select the name of the individual that the incident was initially reported to'. The right screenshot shows a slide-out menu with details: 'Event Title' (Report a Safety Incident), 'Organization/Project' (Safety), 'Module' (Safety), 'Category' (Incidents), 'Event Date' (10/08/2024), 'Start Date' (10/08/2024), 'Status' (Pending), 'Reporter' (Michael Brown), and 'Version' (129). A red box highlights the 'Details' icon in the left screenshot and the slide-out menu in the right screenshot.

The slide-out also provides you with the project and organization information, category, event date, status, reporter, event title, start date, module, and version. To close the slide-out, tap the **Close** icon at the top right of the page.

NOTE Using tasks will follow the same process.

Mandatory questions on an event or task are denoted with an asterisk (*). Sometimes, the Information icon provides more information, such as cautions or general information, to help you complete the event or task.

INITIAL INCIDENT INFORMATION - REQUIRED WITHIN 24 HOURS

* Incident date

month/day/year

* Incident time

Hour:Minute

* Date & Time that the Incident was reported

First level of supervision notified.
Search by **Last name** as multiple people go by different first names and may not appear.

incident was initially reported to.

Select one

You can use voice dictation in the Completions mobile application. Tap the microphone on the keyboard and speak.

The dictation will be transferred to the area you selected, making it convenient to fill out the event or task without the keypad.

11.13.1 COPY A SECTION

You can copy sections of a form or task when the template sections have been set up to allow it. If the copy option is enabled, you can use the Copy section button in the section header to copy the section below the current section.

NOTE

The Copy section button might have a different name depending on how the form or task template was set up.

You can also tap the **Remove** icon to remove a copied section.

A screenshot of a mobile application interface for a 'Demo form'. At the top, there is a header bar with 'Cancel', 'Save', and a menu icon. Below the header, the form content is visible. A section titled 'Crew information' is highlighted with a red box. Inside this section, there is a question: '* Crew had necessary tools and supplies on hand?' with three radio button options: 'Yes', 'No', and 'Not Applicable'. To the right of the 'Crew information' section header, there is a 'Copy section' button with a document icon, which is also highlighted with a red box. Below the 'Crew information' section, there is another section titled 'Work details'.

11.13.2 QUESTION TYPES

11.13.2.1 DATE AND TIME

Your event or task might include a field to indicate the date and time and lets you collect the date and time together or separately.

Select a date field. Select the date you want, which is then displayed in the date field.

27	28	29	30	31	1	2
3	4	5	6	7	8	9

TUESDAY, OCTOBER 15, 2024

The Time question defaults to the time at your current location. Choose from presented times or input your own time in AM or PM for your selection.

11.13.2.2 CHOICE

Choice questions are used for options like yes/no, pass/fail, and accept/reject. They use a radio button or icon.

The screenshot displays a mobile application interface for filling out an event or task. It features a section titled "Choice" with a horizontal line underneath. Below this, there are three distinct choice question types, each with a light gray header bar:

- Choice - Text:** This section contains three radio button options: "Option1" (which is selected, indicated by a green dot), "Option2", and "Not Applicable".
- Choice - Icons - checkmark and cross:** This section contains two icon-based options: a green circle with a white checkmark, and a white circle with a gray 'X'.
- Choice - Icons - Slider:** This section contains a single slider option, which is a green pill-shaped button with a white checkmark inside.

11.13.2.3 TEXT

Text questions are areas in the event or task that capture free text in short (250 characters) or long form (4,000 characters). For example, this can be used for descriptions, short descriptions, explanations, names of subcontractors, and locations. In the short or long text fields, you can type or use the microphone to dictate.

NOTE

On free text fields, the mobile application opens a full page for efficiency.

11.13.2.4 PEOPLE PICKER

A people picker question is available to use to select those users that have access to the module at the organization level in which the event or task is being performed against.

To access the names, begin typing the name or select the People Picker icon. Depending on how the administrator sets up the question, you can select multiple users or none, and the list of users can include only users with Completions roles or all users in the project. A new page is shown with the names of users. Select the name and it appears in the indicated field on the event or task.

Depending on how the question is set up, the selected user can receive an email notification.

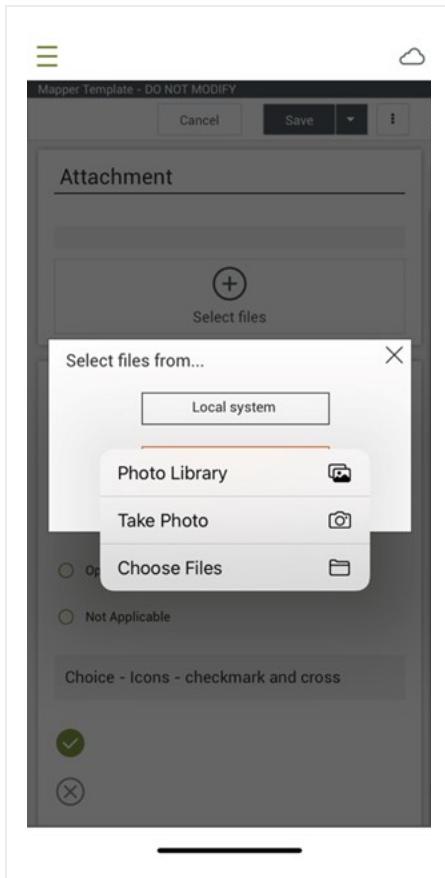

**NOTE**

The people who show in the list are the users who have a Completions web/Compliance assignment to the project for which the event or task is being filled out.

11.13.2.5 ATTACH PHOTOS

The Completions mobile application lets you take photographs and annotate the areas of focus while filling out the event or task. Select Attach photos to add photos to the form or task. After tapping attach photos, it will open a page from which you can select an option from the Photo Library or Take Photo using your device.

For example, you might attach location photos of buildings or objects, or a picture of a letter or certification.

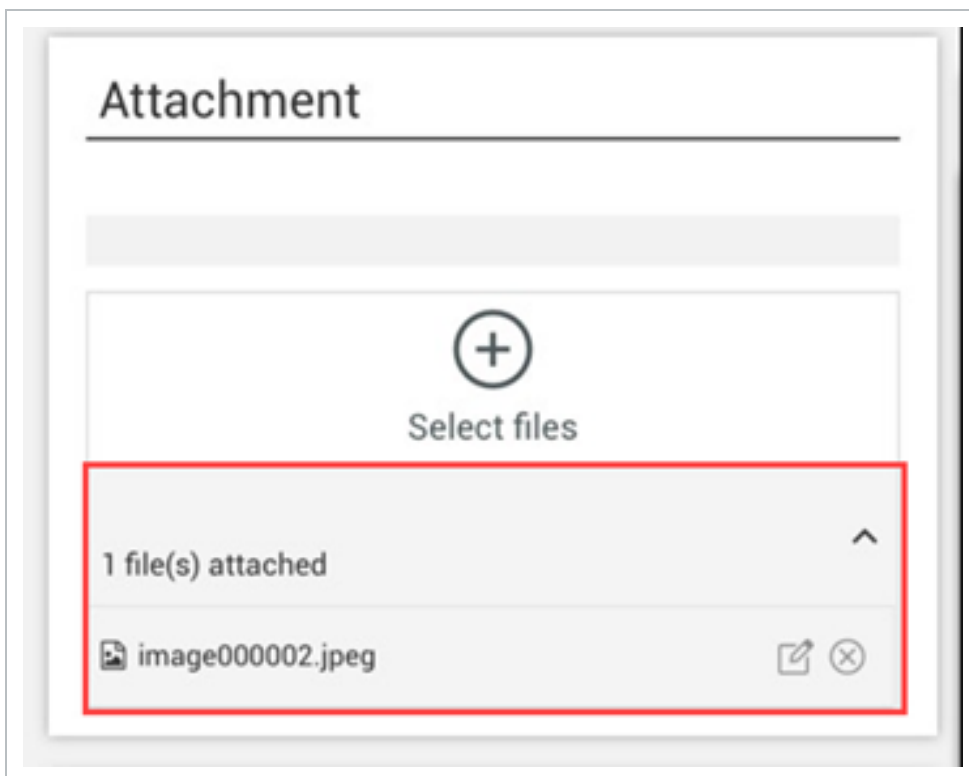

After the picture is taken, you can edit the photo by selecting the Edit button at the top right of the page. This opens editing and annotation options. There are colors, widths, and text options available. A time stamp is added when edits are made, and the stamp can be moved around the screen for optimal viewing. You can also edit the name of the image file to be more meaningful than the default name given by your device.

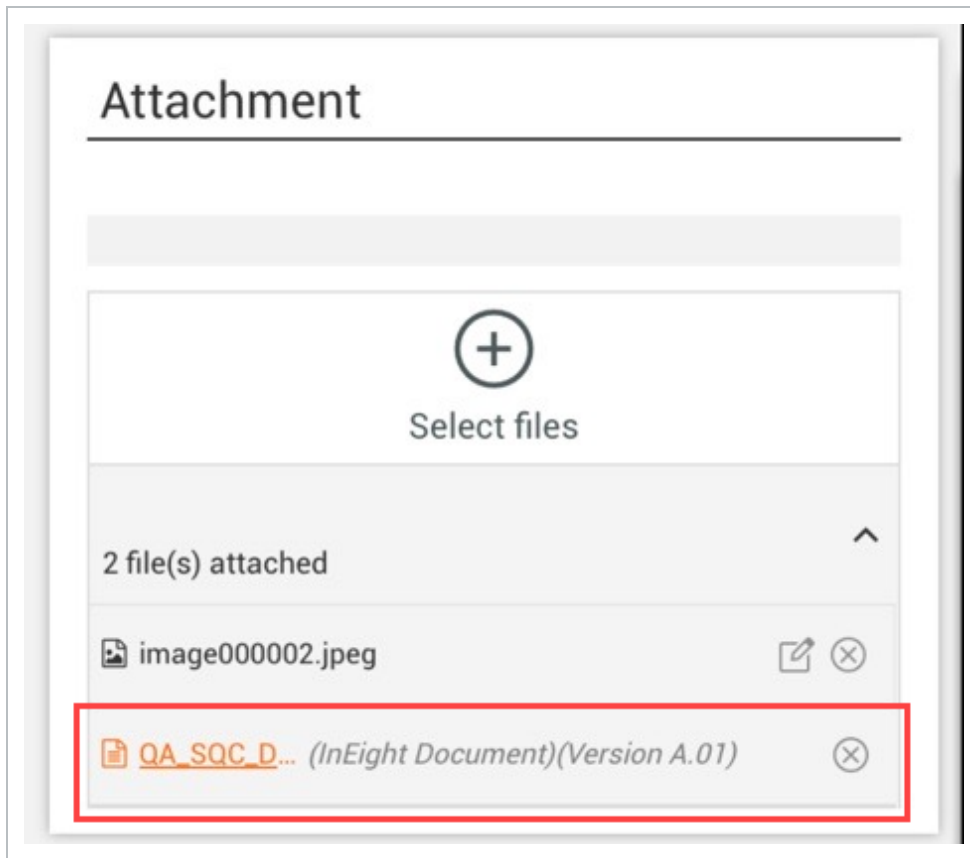

Before the image is saved, the undo icon in the menu bar above can remove edits.

When finished, tap the disc icon to save and return to the event or task page. You will see the included photo attachment links. If you want to view a photo, tap the attachment link to open it. If you want to include more photos, tap Attach photos again.

If integration with InEight Document is configured, you can also see if supporting documents from the Document application are attached when performing a form or task. Document links are shown in the list of attachments with the Document icon and document version numbers.

To remove an attachment, tap the Remove icon.

11.13.2.6 FORM FLOW

Users can access events with form flow in any step. The ability to advance or reverse the steps is based on the template configuration and still must be completed by responsible parties.

Form flow buttons have arrows next to them.

The screenshot displays the 'Mapper Template - DO NOT MODIFY' editor. At the top, there are 'Cancel', 'Save', and an information icon. The main area is divided into two sections: 'Form flow' and 'Buttons'. The 'Form flow' section contains a sequence of four steps: 'Form flow 1' with a right arrow, 'Reversal form flow button' with a left arrow, 'Form flow 2' with a right arrow, 'Reversal form flow button' with a left arrow, 'Form flow 3' with a right arrow, 'Reversal form flow button' with a left arrow, and 'Form flow 4' with a right arrow. The 'Buttons' section contains a single button labeled 'Multi use - Pending status with no form closure'.

11.13.2.7 GPS

A GPS question lets you provide your location by tapping GPS or by entering your coordinates directly in the fields. You can also tap Clear GPS to remove the information if you need to enter a different location.

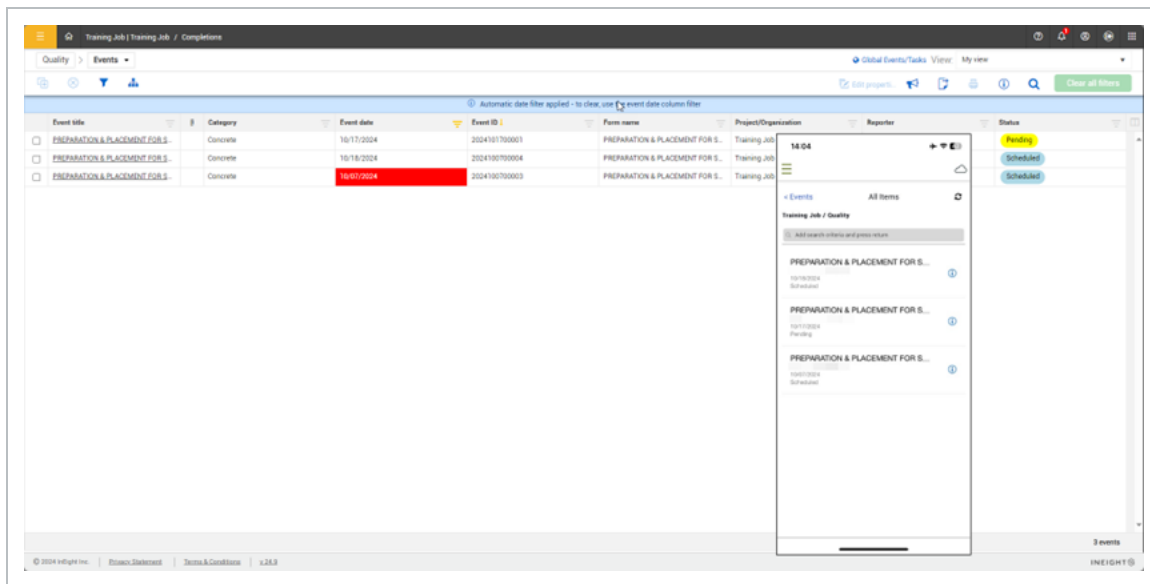

The screenshot shows a mobile application interface titled "Mapper Template - DO NOT MODIFY". At the top, there are "Cancel" and "Save" buttons. The form is divided into three sections, each titled "Please provide location information". Each section contains a "GPS" button, labels for "Latitude:" and "Longitude:", and a "Reset" button. The second section also includes example text: "Example: 41.257900" for Latitude and "Example: -96.080500" for Longitude. The third section is titled "Please provide location information - manual entry with elevation".

To use the GPS button on your mobile device, you must allow the InEight app to access your location when prompted.

NOTE If you enter GPS coordinates automatically, you cannot manually edit the coordinates.

11.13.3 FORM AND TASK STATUS

You can check the status of your forms and tasks in the respective Form or Tasks options: My Scheduled Items, My Opened Items, or All Items. All saved or submitted forms or tasks will be saved directly to the web server.

11.14 COMPLETE A FORM OR TASK

There are several ways to complete a form or task depending on how it is set up by your administrator and what the next steps are.

11.14.1 SAVE A FORM OR TASK

If you do not have enough time to complete a form or task, or not all information about the event is readily available, you can tap Save to save your work. You can then continue or close the form or task, and then come back later to complete and submit it.

11.14.2 ASSIGN A TASK

As part of filling out a task, you might have to assign it to someone else to complete part of the task. To assign a task, tap the Assign button. If you want to start a new task immediately after assigning the current task, tap Assign and start new task.

11.14.3 SUBMIT A FORM OR TASK

After you complete your event or task, tap the **Submit** button to submit it. The buttons may have other labels depending on how the form or task is configured. In this example, the button is labeled **Submit and Complete the form**.

INEIGHT

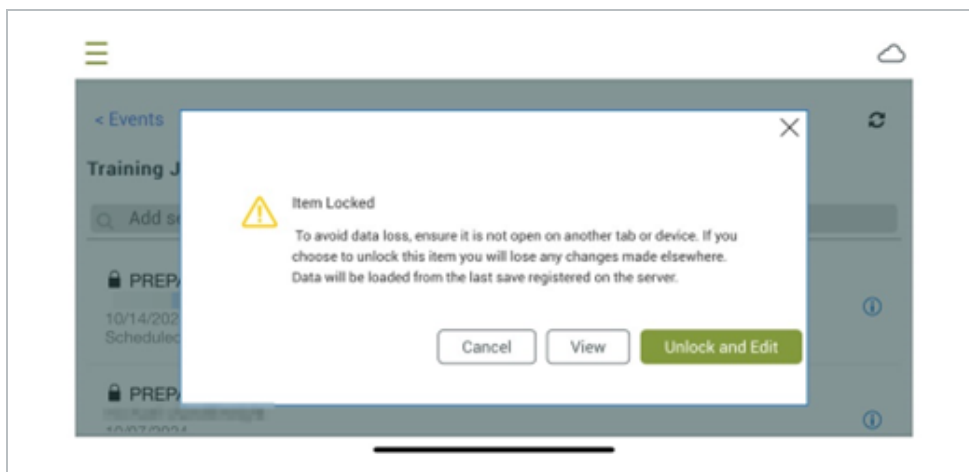

Once saved or submitted, the event or task will be available for others to access on the web via Completions web, Compliance, or the InEight mobile application.

11.15 LOCKED EVENTS AND TASKS

When you are completing a task or event on a mobile device via the InEight mobile application, a locking mechanism ensures your completion is not impacted or overwritten. This means another user cannot open your task or event. Additionally, events and tasks synced to the SQC mobile application will show a locked icon.

Events or tasks that are locked can be opened for viewing but may not be edited. If the same user has an event or task locked, the user could see an option to unlock the item. This option will load the last saved responses from the server.

11.16 PUSH NOTIFICATIONS

Push notifications are unavailable on the InEight mobile application and cannot be configured currently. SQC mobile users who have set up push notifications on their devices may see notifications related to that application while using the InEight mobile app. If you no longer want notifications for the SQC mobile application, you can control notification alerts using the iOS notification settings.
