1.1 ADVANCED OPTION OVERVIEW

1.1.1 ORGANIZATION SETTINGS

NOTE

The configuring of the project-wide settings for Progress as described below, are set up by your company's administrative user(s).

The organization settings for the additional daily planning codes available to be used should already be established for the company. In the project settings section below, you will be able to identify which of these settings you wish to activate and use on the project. If there is a needed code outside of what is already available, you will need to submit this request to the appropriate administrator within your company to have it added at the organizational level.

1.1.2 OVERVIEW

The advanced settings covered in this section can be used for both the Progress web and mobile applications.

- Reason codes are categories set up in your Organization and Project settings to provide options to assign hours. These categories can be set up as anything that would be helpful for payroll, such as Work, Bank time off, Vacation, PTO, etc.
- Premiums are assigned on an hourly basis and are used to ensure employees receive the correct pay for the work that is done. For example, if someone works on something outside their normal job duties and is awarded more money for those specific hours, a premium would be used
- The employee and equipment linking option allows an employee to be assigned to operate a piece of equipment

The Step by Step below walks you through how to turn on these advanced options for your daily plans.

PROJECT SETTINGS IN INEIGHT PROGRESS

1. From your project homepage, select the **Settings** tile at the bottom right (you may have to scroll) or select **Settings** from the menu on the left.

2. Under project settings, click the **Progress** icon on the left.

3. Navigate to the **General** tab.
4. Change the toggle buttons to **On** to allow employee and equipment linking on the project and to allow premiums on the project.

On

NOTE

Employee and equipment linking settings cannot be disabled once plans exist. Premium settings can only be modified when no plans exist.

5. Navigate to the **Time Configuration** tab and jump down to the settings for the employee reason codes and premiums.
6. To use the employee reason codes in Progress, toggle the button to **On**.

Time configuration

Select the time calculations that may be used to record daily time

Standard time

Overtime

Double time

Use employee reason codes

On

7. The **Employee reason codes** and **Employee premiums** you see available are the ones set up in the organization settings.

Employee reason codes

English						Español (América Latina)		ES	FR-CA
Position	ID	* Description	* Activity type	* Hour Type	Allow premiums	Display in W..	* Description		
36	Double time	Double time	Labor	Double time	☒	Yes	Double time		⊖
37	OT-maintenance	OT-maintenance	Maintenance	Overtime	☒	Yes	OT-maintenance		⊖
38	DT-Maintenance	DT-Maintenance	Maintenance	Double time	☒	Yes	DT-Maintenance		⊖
39	ST-Maintenance	ST-Maintenance	Maintenance	Standard time	☒	Yes	ST-Maintenance		⊖
40	Standard time	Standard time	Labor	Standard time	☒	Yes	Standard time		⊖

Employee premiums

English					Français		ES	FR-CA
Position	ID	* Description	* Activity type	Required	* Description			
01		Foreman	Labor	Yes	Contremaître			⊖
02		Lead hand	Labor	Yes	Chef d'équipe			⊖
03		Night	Labor	Yes	Nuit			⊖
04		First Aid	Labor	Yes	Premiers soins			⊖

- Each code listed is available to be listed in English, Spanish, French, Portuguese, and Dutch. Use the toggle in the upper-right of the table to change your display language in addition to English
8. Use the **Add** and **Remove** icons on the right to add or remove the code for your project to use.
 9. Use the on/off toggle under **Allow Premiums** to identify which codes would allow a premium as set up in your ERP system.

1.2 REASON CODES

1.2.1 REASON CODES

Reason codes are categories set up in your Organizational and Project settings to provide more options that are useful to assign hours to. These categories can be set up as anything that would be helpful for payroll tracking, such Work, Approved Time Off, Vacation, or PTO, which can be associated with standard time, overtime, and double time.

1.2.2 PREMIUMS

When assigning hours to your reason codes, you can also indicate a premium rate. Premiums are assigned on an hourly basis and are used to ensure employees receive the correct pay for the work

that is done. If someone works something outside their normal job duties and are awarded more money for those specific hours, a premium would be used. For example, one of your employees may work at a regular labor rate for 6 hours and as a welder for 2 hours. You can have two reason codes for that employee, one for 6 hours and one for 2, and you can assign a premium code, such as “HSS Welder” to the 2 hours. This will ensure the correct rate gets accounted for when the information goes to payroll.

The following steps assume that Reason codes were already set up by an administrator in your Organization settings and enabled in your Project settings (see section 10.1) and walk you through how to assign hours to reason codes on your daily plans.

TIP

The Step by Step examples in this lesson use the Progress mobile application. You would use the same functionality for the Progress web application.

ASSIGN HOURS USING REASON CODES

This practice can be used for both the web and mobile versions of **Daily Planning**.

1. Open the daily plan you are working in and navigate to the **Time sheet** tab.

2. Select the tile next to an employee.

The screenshot shows the 'Plans' screen in the InEight mobile app, specifically the 'Timesheet' tab. The top status bar indicates 'iPad', '2:21 PM', and '73%' battery. The app header shows 'JR TEST' and 'Thursday, September 20, 2018'. Below the header, there are tabs for 'Overview', 'Timesheet', 'Quantities', 'Notes/Issues', 'Productivity', and 'Sign out'. A green 'Submit' button is on the right. On the left, there are buttons for 'Tasks & resources', 'Maintenance', and 'Clear hours'. The main area displays a list of users and a task 'Bolted Connections' with a grid for recording hours. The first cell for John Walsh Jr is highlighted with a red border.

	1006				
	Bolted Connections				
	MH: 0	EQ: 0			
John Walsh Jr 00376348 MH: 0					
Joseph Kelly 00386639 MH: 0					
Kenneth Moore 00012238 MH: 0					
Troy Brown 00342546 MH: 0					
GROVE-RT880E 137793 EQ: 0					

- Notice that instead of Standard time, Overtime, and Double time, you now have reason codes

3. Select the **Add** icon to see more examples of reason codes.
- These categories can be set up in the Organization settings as anything that would be helpful for payroll, such as, Work, time off, Vacation, PTO, etc

4. In the blank field, enter your employee's hours.

5. Select the **Premium** icon to the right of the hours..

The screenshot shows a 'Labor hours' dialog box. At the top, there are 'Cancel' and 'Done' buttons. Below them, the task and employee information are displayed: 'Task: 0018200.10293000 - 0018200 JB LABOR AND EQUIPMENT C...' and 'Employee: 1115801 - A Josh - T/C Description'. A table with three rows is shown: 'Work', 'Operate Equipment', and 'Vacation'. Each row has a 'No premiums assigned' status, a numeric input field (showing '8' for Work), a premium icon (a blue square with a white 'P'), and a red 'X' icon. The 'Work' row's premium icon is highlighted with a red box. To the right of the table is a numeric keypad with digits 1-9, 0, and a decimal point, along with buttons for .25, .50, and .75. At the bottom, there are two radio buttons: 'Apply hours to selected employees' (selected) and 'Apply hours to all employees for the task'. A 'Total labor hours' field shows '8'.

6. Select a premium from the list, and then select **Done**.

7. Select **Done** in the Labor Hours dialog box.

8. Select the white box next to another employee.

9. Select the **Add** icon.

10. Select a reason code.

- Now the reason code appears as a field to enter hours

11. Enter your employee's time under the reason code for the employee.

12. Select **Done**.

NOTE

If you change the reason code on an employee that has a premium assigned to it, the premium will be removed, unless the previously assigned premium is valid for the new reason code as well.

1.3 EMPLOYEE EQUIPMENT LINKING

Scenario

You are the field engineer responsible for tracking what employee has been operating specific equipment and for how long. You can link the employee to equipment in the daily plan and input the hours they were operating vs labor.

With the employee and equipment linking option turned on in project settings, you can link employees and equipment on the time sheet, so you can see which employee is assigned to operate each piece of equipment.

With employee equipment linking enabled, when you enter hours for an employee, you can also specify the equipment they operate and their hours.

The screenshot shows a dialog box titled "Equipment hours" with a close button (X) in the top right corner. Inside the dialog, the following information is displayed:

- Task: 019200.10293333 - 019200 JB LABOR COST TYPE INVALID AND EQUIPMENT COST TYPE VALID
- Equipment: R45372 17 Ford F550

Below this information is a table with the following structure:

Operate			
Nichols, E	4		

Below the table is a green plus icon (+) and a green "Clear all hours" link. At the bottom of the dialog, there are two buttons: "Cancel" and "Done".

With employees and equipment linked, you then see a color-coded bar on the tile of the crew member and its associated equipment.

The screenshot shows a grid of tiles in the Progress mobile application. Two tiles are highlighted with a red border:

- The top tile shows a crew member: Troy Brown, ID 00342546, MH: 18. To the right of the tile is a large number "8".
- The bottom tile shows equipment: 131113 - Pickup - 1, ID 150693, EQ: 13. To the right of the tile are the words "Operated" and "Other" with the number "8" next to "Operated".

In the Progress mobile application, employee and equipment links are indicated by dots.

The following steps walk you through linking an employee to equipment on the Time sheet tab of a daily plan. The images in this Step by Step are from the Progress mobile application.

LINKING EMPLOYEES AND EQUIPMENT

- 1. Open the daily plan you are working in, and then go to the **Time sheet** tab.

- 2. Select the **white tile** next to an employee tile.

The screenshot shows the 'Plans' screen in the InEight mobile app. The top bar is blue with the title 'Plans' and the date 'Monday, February 01, 2021'. Below the bar, there are tabs for 'Overview', 'Timesheet', 'Notes/Issues', and 'Sign in/Sign out'. A green 'Submit' button is on the right. The main area is a grid for tracking labor hours and equipment usage. On the left, there are cards for 'John Doe' and 'Crane'. The grid has columns for 'MH' (Man Hours) and 'EQ' (Equipment). A red box highlights a blank field in the grid, indicating where to enter labor hours.

3. Enter the labor hours of the employee into the blank field.
4. Click the **Equipment** icon, and then select a piece of equipment.

Cancel

2.1 MAINTENANCE WORK ORDER OVERVIEW

2.1.1 ORGANIZATION SETTINGS

There is an optional setting in the **Progress** tab of the Organization settings for tracking maintenance work orders on the Time sheet tab of a daily plan.

Time configuration

Select the time calculations that may be used to record daily time

Standard time Overtime X Double time X

Use employee reason codes ☐ Off

Display maintenance in Daily Planning ☐ Off

If the maintenance work order feature isn't available in **Progress**, you will need to submit this request to the appropriate administrator within your company to have it added at the organizational level.

2.1.2 OVERVIEW

The tracking of maintenance-related work orders covered in this section can be used for both the web and mobile versions of Daily Planning.

- Maintenance work orders allow you to log employee hours against the maintenance work orders that are generated in your ERP system
- Work orders are created in your ERP system and brought into the InEight Project Suite via integration

2.2 UTILIZING MAINTENANCE WORK ORDERS

Daily planning tracks work related tasks, but you also may need to track maintenance related work orders. With the option to display maintenance turned on, you can use InEight Progress to log employee hours against your maintenance work orders.

- The option **Add Maintenance** in the daily plan will default to **By Work Orders**

TIP

The Step by Step examples in this lesson use the Progress web application. You would use the same functionality for the Progress mobile application.

ADD MAINTENANCE WORK ORDER TO TIME SHEET

This practice can be used for both the web and mobile versions of **Daily Planning**.

1. On the project dashboard, select the **Daily Planning** module under **Progress**.

2. In Daily Planning, check your daily plan and click the **edit** icon.
3. Navigate to the **Time sheet** tab.
4. Click the **+ Add Maintenance** button.

order” so that maintenance-related hours can be tracked

Add maintenance

BY WORK ORDERS

BY COST CODE

Enter equipment ID or description

Enter work order or maintenance component

- 5. Start typing an equipment code or equipment type in the search bar.
- 6. Select the piece of equipment from your plan and notice that the available work orders appear in the adjacent window.

Add maintenance

BY WORK ORDERS

BY COST CODE

1

Select from equipment below

137793 - GROVE-RT880E

150693 - 131113 - Pickup - 1/2 Ton

152687 - Rental - Manlift - 150' - 1500SJ

Enter work order or maintenance component

	Work orders	Maintenance components
	4051418 - Mounted Tank 1Y Ce...	540 - Undercarriage Or Tires
	5056209 - 82 - 6M Fire Suppres...	540 - Undercarriage Or Tires

- 7. Click the + to add the work order.

Add maintenance

BY WORK ORDERS

BY COST CODE

1

Select from equipment below

137793 - GROVE-RT880E

150693 - 131113 - Pickup - 1/2 Ton

152687 - Rental - Manlift - 150' - 1500SJ

Enter work order or maintenance component

	Work orders	Maintenance components
	4051418 - Mounted Tank 1Y Cert	540 - Undercarriage Or Tires
	5056209 - 82 - 6M Fire Suppres...	540 - Undercarriage Or Tires

- Notice that the work order shows displays in the Time Sheet tab. The colors are inverted from the task code blocks

- For work orders added by work order, the tile displays the cost center, work order number, and work order description
- Only labor hours can be added to work orders, not equipment hours. Note in the above the equipment-related tile is dimmed to reflect this
- You can then add labor hours to any given employee related to the maintenance work order through the typical time sheet process

2.3 TIME CENTER NAVIGATION

2.3.1 TIME CENTER OVERVIEW

Time Center serves as a final repository to review and correct Time sheet information before importing into your payroll system. Time Center allows you to review entries, called **time cards**, brought in from:

- Daily plans approved within the Progress Daily Planning (Web and Mobile) application
- Progress Weekly Time sheet module

2.3.1.1 TIME CENTER PURPOSE

The purpose of Time Center is to:

- Review the daily plans (time cards) received from Plan and Progress
- Ensure time cards have the correct properties and data elements
- Edit and correct any potential errors
- Send the reviewed and corrected time cards to your payroll system to process for payment
- Eliminate the need to edit time cards via payroll system database tables or side spreadsheets exported from Excel

2.3.1.2 DISPLAY CONFIGURATIONS

The Time center UI is designed for full HD resolution 1920 x 1080 with browser zoom of 100% and Windows display scaling of 100%. Display configurations other than what is recommended might not

render correctly.

Each InEight application has its own supported display configurations, which might be different than the configuration above.

2.3.1.3 TIME CENTER ACCESS

NOTE

To access projects in Time center the project setting [Use Employee Reason Codes](#) must be toggled on. This setting is required prior to creating daily plans and cannot be changed once daily plans are created.

The Progress time center will show as a sub-level menu option under the account level.

You need to have organization or account access to see the sub-level option for Time center.

This option requires level 2 or 3 administrator levels. To set the correct administrator level, Go to Suite administration > Roles and permissions, and then click the Add role icon.

Under Role details, the Administrator level field includes a drop-down menu.

The administrator level can be set and saved only once for every new role.

Overview - Time Center Register Page

Title		Description
1	Employee / Equipment Tabs	Select the appropriate tab to view the time cards for either employees or equipment.
2	Date Filter	Select the date to filter using a custom date range or from a predefined calendar.
3	Toolbar	Add, edit, delete or copy time cards using the toolbar on the left. View summary information, make bulk edits, and export time cards using the toolbar on the right.
4	Query Shortcut Icons	The double arrow is a shortcut to expand the Query builder slide out panel. The blue filter icon indicates how many queries are applied. Yellow filter icons appear for each filter applied.
5	Side Panel	The upper portion has preset filters to view just time-cards with issues, time cards in progress, time cards not sent, time cards sent, or all time cards. The lower portion contains the Query builder to create queries to search for specific time cards. You can save your queries under My queries, and access Shared queries.
6	Time card register	Contains rows and columns that house all time card data imported from daily plans and weekly Time sheets.
7	View	Views can be saved, removed, and shared with users and roles. Permissions are required for Time Center access.

2.3.2 TIME CENTER REGISTER COLUMNS

The Time Center register contains all the information captured using the Progress application for your daily plans in the field, as well as weekly Time sheets from the Weekly Time sheets module. The register columns fixed to the left are pertinent for identifying the time cards and include the Plan ID, Time card ID, Employee ID, Employee name and Labor/Equipment hours columns. The columns on the right contain additional data brought in from InEight Progress for you to review for issues.

The following table lists the columns available in the Time center register. You will edit these fields as needed to make corrections to your time cards. Fields not editable in Time Center can be edited in either InEight Progress or in your Payroll application, depending on the field.

Column	Editable in Time Center?	Sortable?	Filterable?

NOTE The Integration status indicates whether the time cards have been sent to the payroll system.

2.3.2.4 SORT COLUMNS

You can sort in ascending or descending (both for alpha and numeric fields) on any column’s header. Click once to sort the column in ascending order (A-Z, 1-10). A yellow arrow displays on the column header pointing upward.

Click a second time on the column header to sort in descending order (Z-A, 10-1), and the arrow will point downward. Click a third time to reset the column to its default state.

2.3.2.5 MOVE COLUMNS

You can move columns using drag and drop to rearrange them as needed and the system will remember the column order the next time you log in.

2.3.2.6 FILTER COLUMNS

Depending on the project, you may have thousands of time cards to sift through. You can filter your time cards using column filters to drill down by date, employee, or whatever other criteria you need. To filter on a column, select the filter icon on the column’s header, then hover over the Filter menu option.

	Plan ID	Time card ID	Employee ID	Employee name	Labor hours	Reason co
	8780	RD1279230	10429508	Allen Robert		ERM
	8916	RD1281743	10429508	Allen Robert		PT
	8929	RD1281944	1259	Rabbiyah Nannan-		
	8929	RD1281946	0101Divya	Divya Bhuvarahan	1	OPT

On the resulting Filter window, you can select an operator and value to filter by.

Employee name	Labor hours	Reason code	Task ID

2.3.2.7 GROUP COLUMNS

With column grouping, you can organize your time cards into groups by the values of a selected column. By organizing time cards into groups, you can review time cards more efficiently. Grouping columns lets you group information most applicable to your process, and you can group by any column without affecting any of the time card data.

To group by a column, click on the column’s header and drag it into the grey area just above the column headers.

Drag a column header and drop it here to group by that column

Your time cards are now organized into groups based on the values within the column. Each group is collapsible and subtotals the labor or equipment hours of the time cards within each group.

The screenshot shows a table with columns: Plan ID, Time card ID, Employee ID, Employee name, Labor hours, Reason code, and Ta. A group header is visible: "Plan status: Approved Labor Hours: 313.25". Below it are three rows of data. Red boxes highlight the group header and the Reason code column for each row.

Plan status: Approved Labor Hours: 313.25						
7301	PI12549	1115801	A Josh		NRC	
7953	PI14226	1115801	A Josh		Premium	25
7953	PI14227	040404	Ajay Ananthan		Premium	

To remove a grouping, click the x on the grouped column header within the grouping area.

The column will return to its placement within the register.

NOTE When a Group filter is applied, sorting on any of the data fields will be disabled.

2.3.2.8 PROJECT GROUPS

You can view one or more projects at a time in a single grid of data with the project groups option. Go to Progress Time center, and then click on the drop-down menu labeled **Select project group**. You can select previously saved groups, and edit or add a new project group.

To add a new group, name the new project group, and then select from the available projects or organizations.

If your resources go across projects, this helps to check employees assigned to multiple projects on a single page instead of checking each project individually.

You can still work with a single project. The option to create groups has been added as a quicker work flow option.

NOTE Saved views will migrate while working with groups.

2.3.2.9 UNIQUE BUDGET CODE SEGMENTS

You can populate budget segments to show a unique code label. Unique budget code segments contain additional options to identify a cost item using four independent fields that are separated by periods. When you configure unique budget codes at the organization level (All projects & organizations > Edit organization) the segment numbers are matched with the corresponding columns in Time Center.

2.3.3 UNAPPROVED TIME CARDS

Note that time cards that have not yet been approved and are still in Execution or Awaiting Approval status are not editable within the Time Center register. You can only edit approved time cards.

☐	Plan ID	Plan status	Time card ID	Employee ID	Employee name	Notes
☐	16202	Approved	RD127687	0046	Ajay Aj	
☐	16202	Approved	RD127690	0046	Ajay Aj	
☐	16202	Approved	RD127695	0046	Ajay Aj	
☐	16303	Approved	RD129094	1018552	Nick v	
☐	16303	Approved	RD129098	1018552	Nick v	
☐	16321	Awaiting Appr...	RD129437	1144018	Colin robert	
☐	16321	Awaiting Appr...	RD129439	1144018	Colin robert	
☐	16321	Awaiting Appr...	RD129440	1144018	Colin robert	

2.3.4 DATE FILTER

You can filter to a specific date for your time cards by either typing the date in the Date field or by selecting the date from the calendar icon.

To select a date range, click the add date icon and select an end date.

2.3.5 TIME CARD PRE-SET FILTERS

The upper portion of the left side panel contains pre-set filters to help you focus on the time cards that need review. You have four pre-set filter options you can select from:

- **Issues** – Time cards that have information on them tagged as issues
- **In Progress** – Time cards that are in a processing status before sending to Payroll.
- **Not sent** – Filters to time cards that have an Integration status of Not sent.
- **Sent** – Filters to time cards that have an Integration status of Sent, or time cards that have been sent to Payroll
- **All** – Shows all time cards within the selected date(s)

2.3.6 QUERY BUILDER

In addition to the filters you can set on individual columns, you can also add filters using the Query Builder. The following steps walk you through creating a query using the Query Builder.

2.3 STEP BY STEP 1 – CREATE A QUERY

1. From the Time Center register, do one of the following to open the Query Builder:

- Click on the **double arrows** next to the left side bar.

- Click the **Add new query** link on the left side bar.

- Type the name of the query in the New query name field.
- Select **Plan ID** from the Column drop-down list.
- Select **Equal** from the Operator drop-down list.
- Type a Plan ID value into the Value field.
- Click **Apply**.
 - The query applies to the timecards on the left
- Click on the **Save query** icon to save the query.

- Your query will now show up under **My queries**. No one will be able to see this query unless you share it
- The Share query icon appears. You can share your saved queries with others, so they can use the queries as well

8. Select the **Share query** icon.

- The query will now show up under Shared queries

NOTE

When you share your query, you cannot edit it until you unshare it.

When you are granted level 2 or 3 permission and the Removed shared queries permission is enabled, you can unshare a shared query, removing from the shared list for all users.

2.3.6.10 FILTER INDICATORS

The number next to the top filter indicator shows how many queries have been applied.

An additional filter indicator displays in yellow for each filter applied.

You can hover over the indicator of each applied filter to see the filter name, and you can click on each indicator to remove them from being applied.

2.3.7 ERROR INDICATORS

2.3.7.11 ERRORS

Fields that appear in red indicate an error with information on the time card. Time cards with red error indicators cannot be sent to Payroll. Hovering over the X will give you the reason for the error, so you can correct information as needed.

2.4 TIME CARD MANAGEMENT

2.4.1 TIME CARD MANAGEMENT OVERVIEW

As one who oversees payroll for the project, such as a Project Accountant or Business Manager, you will use the Time Center page to ensure that the time card entries you received from the Progress application contain the correct information before passing them on to your accounting system for processing payroll.

Prior to editing timecards in Time Center, your company will have already established options which should be available on your time cards, such as for unions, reason codes, allowances, and premiums, based on your payroll needs.

2.4.2 TIME CARD REVIEW

Within the Time Center register, you can validate your time card data, reviewing each time card for issues, and resolving them as needed. Most issues are highlighted in red with an X, such as the Employee ID fields in the example below.

These Employee IDs may be invalid for reasons such as:

- They may not be assigned to this project
- May have an inactive status during this project

2.4.2.1 DATA VALIDATION ERRORS

Below is a list of time card errors and their causes. Errors must be resolved before they can be sent to Payroll.

Error	Causes
Invalid Work Order Number	Work Order status is not active and is assigned to the Equipment Repaired Number. Work Order status is active and is not assigned to the Equipment Repaired Number.

Error	Causes
Invalid Equipment Repaired Number	Equipment status is not active. Equipment status is active, but not assigned to current project.
Invalid Allowances	Employee has an allowance assigned that is not valid for that type of employee or for the union it belongs to.
Invalid Employees	Time card date is not between the employee start and end dates. Employee status is not active. Employee status is set to not report time. Employee is not currently assigned to the project. Time card has an operated equipment reason code and the Employee ID is blank.
Invalid Equipment	Equipment status is not active. Equipment is not assigned to the project. Employee reason code is "operated", but Equipment ID is blank.
Invalid Task ID	Task is closed for either employees or equipment. The task is a TEMP (temporary) task. Cost code is not active. Cost code is a TEMP (temporary) cost code. Cost code is not active.
Invalid Labor Cost Type and Invalid Equipment Cost Type	Cost Type value is not found in the list of available cost types for the Task ID.
Invalid Reason Code - Maintenance Record	Reason code is something other than the AWK (Work) reason code.

Depending on the root cause of the error, you may need to make changes in:

- The Time Center register
- InEight Progress
- InEight Suite Administration
- Your payroll system

2.4.2.2 CORRECTING ISSUES OUTSIDE OF TIME CENTER

The error message displayed below indicates that the “employee is not active for the selected plan date.”

Plan ID	Time card ID	Employee ID	Employee name	Labor hours	R
	WT21012	080808	Srinivasan Krishnan	1	1
	WT21071	545			1

This means the employee was not contracted during the period of time of the project. The employee would need to be edited within Suite Administration (accessed from the 1st Level Menu from the project’s Home page), to be active during the date of the time card. Once corrected, this error would be removed.

2.4.2.3 CORRECTING ISSUES IN TIME CENTER

Many of the fields within Time Center are editable. Errors can therefore be corrected directly in Time Center. For example, perhaps a Reason Code is used on a time card that is associated with an allowance that is not available.

Reason code	Task ID	Task description
NRC		
AWK		

You can edit the Reason Code, changing it to one with a valid allowance for the employee on the time card.

Note that a blue dot appears when any changes have been made prior to saving.

Reason code

PLC

2.4.2.4 OTHER TIME CARD ADJUSTMENTS

You may need to make time card adjustments, even when there is no error. For example, you may need to override the craft assignment of an employee. You can make this change in the Override Craft column of the time card.

ID129439	1144018	Colin robert				

NOTE

For craft and trade overrides, the override craft or trade specified for the employee must pertain to the appropriate union, as assigned at the project level or as defined and imported from the ERP, otherwise there will be an error.

You can also assign or correct premiums. There are identified premiums (created at the project level) from which you can choose.

					First Aid		

Do not confuse premiums with allowances (known as Extra Pay in the Progress application). Unlike premiums, allowances apply for the entire day.

2.4.3 SAVING CHANGES

As you make changes, be sure to click **Save** in the upper right-hand corner to save your edits.

2.4.4 ADD TIME CARD

At times you may need to account for employee hours, allowances, or maintenance hours that were not captured in a daily plan or weekly Time sheet. Perhaps they were missed, or you need to make a quick adjustment without going back to the InEight Progress application. You can add a new time card to record the hours by clicking the **Add time card** button and selecting the type of time card to add.

NOTE

Until you save your changes, you will not be able to add or delete any time cards.

A slide out panel opens on the right to fill out and add the time card.

A screenshot of the 'Add employee timecard' slide-out panel in the InEight Progress application. The panel has a title bar with a close button (X) and a search icon. Below the title bar are three buttons: 'Cancel', 'Save', and 'Send selected'. The panel is divided into two tabs: 'BY DAILY PLAN' (selected) and 'BY WEEKLY TIMESHEET'. Under the 'BY DAILY PLAN' tab, there are several input fields: 'Plan' (a dropdown menu with 'Select one' and a hint 'Type plan name or ID'), 'Employee' (a text input field with a hint 'Type employee name or ID'), 'Task' (a text input field with a hint 'Type task ID or description'), 'Reason code' (a dropdown menu with 'Select one'), 'Hours' (a text input field), 'Override craft' (a dropdown menu with 'Select one'), 'Uplift override' (a toggle switch), and 'Premiums' (a text input field with a hint 'Enter premium name; Select up to 6 premiums'). At the bottom of the panel are two buttons: 'Cancel' and 'Add'.

This same process is followed when you want to create time cards for allowances and maintenance.

2.4.5 DELETE TIME CARD

To delete a time card, you check the row header check box of the time card and select the **Delete time card** button.

2.4.6 EXPORT TIME CARDS

In Time Center > Export time cards > **New data export**, you can export time cards with will then send you to the Export history page. There you can also download previous time card history exports. The export is a Microsoft Excel file with nearly unlimited time card export count restrictions. If you do not need to export a specific time card and only need to view the Export history, follow the same steps as above and select **View export history** from the drop down list.

2.4.7 REALLOCATE TIME CARDS

You can move Weekly time sheet time cards from one project to another project. To move time cards to another project, you must first create a query that includes all time cards you want to reallocate. After you create the query, click **Time card reallocation** in the upper right of the page. In the slide-out panel, select the query and the start and end dates of all the time cards you want to move. You must then enter the new project ID. You can also move all time cards to a new task in the new project.

NOTE

If you leave the Old task field blank, you can reallocate all selected time cards to one new task. This is a many-to-one reallocation. If you select a task in the Old task field, only time cards with that task are reallocated. To do a many-to-many reallocation, you must perform multiple reallocations.

The screenshot shows a 'Time card reallocation' dialog box. At the top, there are buttons for 'Cancel', 'Save', and 'Send selected'. Below these is a tab labeled 'Time card reallocation' with a red box around it and a hand cursor pointing to it. The dialog contains the following fields:

- Query:** A dropdown menu with 'Select one'.
- Start date:** A date field showing 'Monday, March 15, 2021' with a calendar icon.
- End date:** A date field showing 'Monday, March 15, 2021' with a calendar icon.
- Project ID:** A text input field with a magnifying glass icon.
- Old task:** A dropdown menu.
- New task:** A text input field.

At the bottom of the dialog are 'Cancel' and 'Start' buttons.

2.4.8 SUBMIT TO PAYROLL

When all the time cards are reviewed and issues resolved, you can either select the time cards individually, hold the shift key to multi select or check the box to select all time cards.

☒	Plan ID ↑	Time card ID	Employee ID	Employee name
☒	7953	RD1230708	10429508	Allen Robert
☒	7953	RD1230720	10429508	Allen Robert
☒	7953	RD1230751	10429508	Allen Robert

With the time cards selected, click the **Send Selected** button.

This sends the selected time cards to your Payroll system.

2.4.9 APPROVAL DELEGATION PERMISSION

The **Approve team time sheets for others** option allows the selected employee to submit time sheets (other than a supervisor). Go to Roles and permissions > Weekly time sheet, and then select Approve team time sheets for others.

- If there are errors, that time card will not be sent
- If there are no errors, the records are put in queue and sent to your ERP system to be processed for payroll

Once processed, you will get back a result from Payroll indicating whether it succeeded or failed. If successful, the Integration status updates to **Sent – current**.

☐	Plan ID	Time card ID	Employee ID	Employee name	Labor hours	Integration status	Pla
☐	7301	PI12548	040404	Ajay Ananthan	0	Sent - current	Ap
☐	7301	RD1176628	1115801	A Josh	1	Sent - current	Ap
