Overview

This document explains the process for importing cost items from an Excel file into the CBS (Cost Breakdown Structure).

CBS Position Description						Cost Breakdown Structure (CBS) Register					
A	B	C	D	E	F	Drag columns here to group					
1	CBS Position Description	Optional Code	Forecast (T/O)	Unit of Measure	Unit Cost	CBS Position Code	Description	Optional Code	Forecast (T/O)	Quantity	Unit of Measure
2	JOB		20.00 Mile		\$284,052.58		JOB		20.00	Mile	\$284,052.58
3	Prime Bond	PRIME BOND	1.00 Lump Sum		\$46,026.21		Prime Bond	PRIME BOND	1.00	Lump Sum	\$46,026.21
4	Price % Add-On	PRICE % ADD-ON	1.00 Lump Sum		\$285,535.89		Price % Add-On	PRICE % ADD-ON	1.00	Lump Sum	\$285,535.89
5	Job Financing	FINANCE EXPENSE	1.00 Lump Sum		\$0.00		Job Financing	FINANCE EXPENSE	1.00	Lump Sum	\$0.00
6	Indirect Cost Escalation	V	1.00 Lump Sum		\$0.00		Indirect Cost Escalation	V	1.00	Lump Sum	\$0.00
7	Direct Cost Escalation	DIRECT COST ESCAL	1.00 Lump Sum		\$0.00		Direct Cost Escalation	DIRECT COST ESCALATION	1.00	Lump Sum	\$0.00
8	Indirect Cost Add-On	INDIRECT COST ADD-ON	1.00 Lump Sum		\$0.00		Indirect Cost Add-On	INDIRECT COST ADD-ON	1.00	Lump Sum	\$0.00
9	Job Management & Equipment	JOB MANAGEMENT & EQUIPMENT	1.00 Lump Sum		\$157,096.28		Job Management & Equipment	JOB MANAGEMENT & EQUIPMENT	1.00	Lump Sum	\$157,096.28
10	General Expense	GENERAL EXPENSE	1.00 Lump Sum		\$4,200.00		General Expense	GENERAL EXPENSE	1.00	Lump Sum	\$4,200.00
11	Direct Cost Add-On	DIRECT COST ADD-ON	1.00 Lump Sum		\$101,328.69		Direct Cost Add-On	DIRECT COST ADD-ON	1.00	Lump Sum	\$101,328.69
12	Mobilization	641 0100	1.00 Lump Sum		\$11,909.51		Mobilization	641 0100	1.00	Lump Sum	\$11,909.51
13	Clearing & Grubbing	202 0102	10.00 Acre		\$3,918.50		Clearing & Grubbing	202 0102	10.00	Acre	\$3,918.50

19	Finergrade Subgrade	4.2	400,000.00 Square Yard		\$0.19		Finergrade Subgrade	4.2	400,000.00	Square Yard	\$0.19
20	Install Aggregate Base	4.3	45,000.00 Ton		\$2.17		Install Aggregate Base	4.3	45,000.00	Ton	\$2.17
21	Place Aggregate Base	4.3.1	45,000.00 Ton		\$1.63		Place Aggregate Base	4.3.1	45,000.00	Ton	\$1.63

CBS Excel Import

The Excel import provides a way for you to define cost item data in a spreadsheet, and then import that data into the Master CBS or the Estimate CBS.

	A	B	C	D	E
	CBS Position Code	Description	Optional Code	Forecast (T/O)	Unit of Measure
1	5	Asphalt Concrete Hot Mix Type A	303 4263	35,000.00	Ton
2	5.1	Furnish & Haul Hot Mix	5.1	35,000.00	Ton
3	5.2	Install Hot Mix Type A	5.2	35,000.00	Ton
4	6	36 Inch RCP Culvert Class III	413(B) 0464	1,024.00	Linear Feet
5	6.1	Furnish RCP Materials	6.1	1,024.00	Linear Feet
6	6.2	Excavate RCP Trench	6.2	1,858.56	Cubic Yard
7	6.3	Install RCP Pipe	6.3	1,024.00	Linear Feet
8	6.4	Backfill RCP Pipe	6.4	1,587.20	Cubic Yard
9	7	10 Inch PVC Force Main (SDR21)	800 0220	12,000.00	Linear Feet
10	7.1	Furnish 10 Inch PVC Materials	7.1	12,000.00	Linear Feet
11	7.2	Excavate-Install-Backfill 10 Inch PVC	7.2	12,000.00	Linear Feet
12	8	24 Inch PVC Gravity Sewer (SDR35)	800 0330	3,000.00	Linear Feet
13	8.1	Excavate 24 Inch PVC		8.1 3,000.00	Linear Feet
14	8.1.1	Excavate 24 Inch PVC 0-6 ft Depth	8.1.1	1,390.00	Cubic Yard
15	8.1.2	Excavate 24 Inch PVC 6-10 ft Depth	8.1.2	3,610.00	Cubic Yard

This depends on how the data in the spreadsheet is mapped to Estimate fields in the corresponding Cost Breakdown Structure (CBS) Register.

You may want to first export your current CBS to be used as a template to import back into your Estimate. This way, you can alter an Excel spreadsheet that was exported directly from your Estimate, and copy/paste data from one Excel spreadsheet into the one you will import.

Additionally, a CBS Import Template is provided for you within the Documentation folder of your local Estimate install (Estimate Update > Version xx > InEight Estimate version xx > Bin > Documentation).

	A	B	C	D	E	F	G	H	I	J	K	L
1	CBS Position Code	Description	Forecast (T/O) Quantity	Unit of Measure	Optional Code	Account Code	Quote Group	Tag 1	Tag 2	Tag 3	Tag 4	Tag 5
2												
3												
4												
5												
6												

NOTES:

- All currency values imported from Excel are assumed to be in the job default currency.
- Excel imports that have an impact on a job's price and cost generate entries in the PBS Changes Register.

Prerequisites

The following items are required before you import:

- An Excel file (workbook) containing the source data to import into your CBS.
Enter the CBS column header names in your Excel file that you want to import into your CBS.
- If the workbook contains multiple worksheets, the import routing will read and import the first worksheet in the workbook regardless of its title.

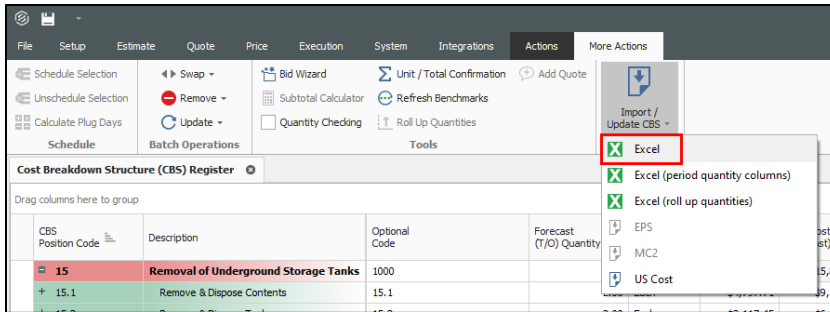

17	4	Aggregate Base
18	4.1	Furnish & Haul Base Material
19	4.2	Finegrade Subgrade
20	4.3	Install Aggregate Base
		Import July 09 Import July 12 +

- Determine whether you are:
 - Importing new cost items (without affecting existing cost items).
 - Importing new cost items and updating existing cost items (by re-importing a modified version of the spreadsheet to support incremental changes to the scope of the work).

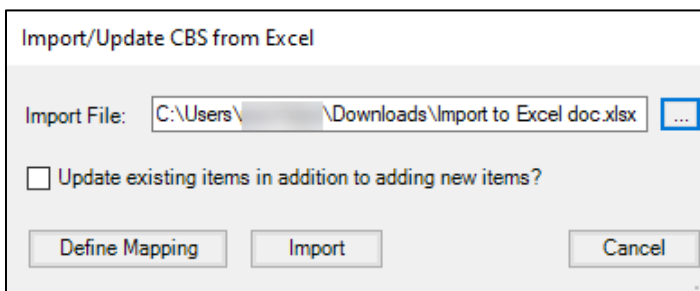

Importing Data

Selecting the Import File

1. In the Cost Breakdown Structure (CBS) Register menu, go to More Actions > Import/update CBS from > **Excel**.

2. In the Import File field, click the ellipsis to browse to your file system and to the preferred workbook (Excel file). Select the file, and then click **Open**.

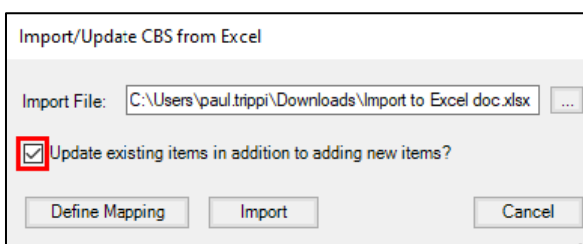

Define the Import Rules

The import routine lets you to add new cost items to the Cost Breakdown Structure (CBS) Register while not affecting existing cost items, or to add new cost items to the Cost Breakdown Structure (CBS) Register and, at the same time, update cost items that already exist in the CBS.

NOTE:

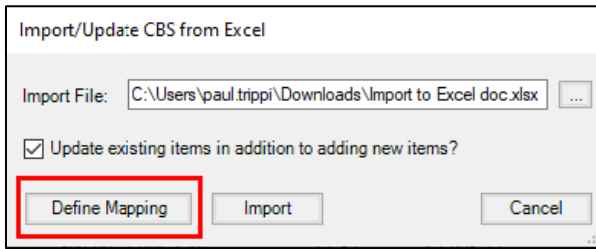

When updating existing items, the data fields for existing items are updated to reflect what is currently in the spreadsheet for the currently mapped fields. The items in the spreadsheet are matched to the items in the Cost Breakdown Structure (CBS) Register, based on the matching field specified on the Define Mapping dialog.

3. Now that your Excel file is selected, check the **Update existing items in addition to adding new items checkbox**.

- Alternatively, leaving the box unchecked will only add new cost items and not affect existing ones.

4. Select the **Define Mapping** box.

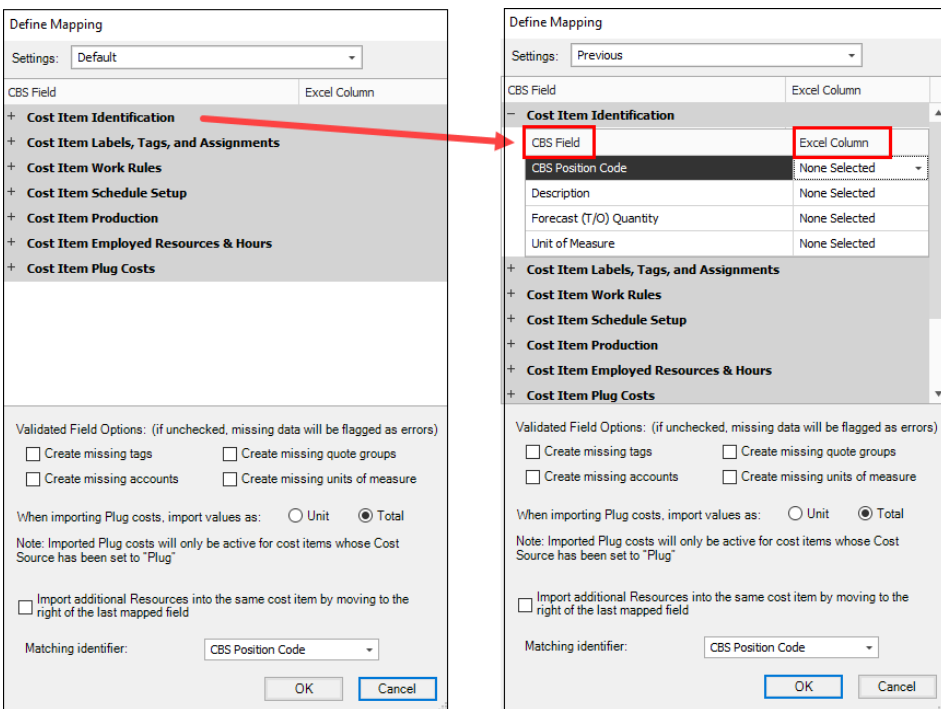

Import/Update CBS from Excel

Import File: ...

☒ Update existing items in addition to adding new items?

Define Mapping Import Cancel

5. The Define Mapping pop-up window appears. Selecting the + icon expands each of the CBS Field column names that show the CBS fields on the left, and the available Excel fields on the right to import.

Define Mapping

Settings:

CBS Field	Excel Column
+ Cost Item Identification	
+ Cost Item Labels, Tags, and Assignments	
+ Cost Item Work Rules	
+ Cost Item Schedule Setup	
+ Cost Item Production	
+ Cost Item Employed Resources & Hours	
+ Cost Item Plug Costs	

Validated Field Options: (if unchecked, missing data will be flagged as errors)

☐ Create missing tags ☐ Create missing quote groups

☐ Create missing accounts ☐ Create missing units of measure

When importing Plug costs, import values as: ☐ Unit ☒ Total

Note: Imported Plug costs will only be active for cost items whose Cost Source has been set to "Plug"

☐ Import additional Resources into the same cost item by moving to the right of the last mapped field

Matching identifier:

OK Cancel

Define Mapping

Settings:

CBS Field	Excel Column
- Cost Item Identification	
CBS Field	Excel Column
CBS Position Code	None Selected
Description	None Selected
Forecast (T/O) Quantity	None Selected
Unit of Measure	None Selected
+ Cost Item Labels, Tags, and Assignments	
+ Cost Item Work Rules	
+ Cost Item Schedule Setup	
+ Cost Item Production	
+ Cost Item Employed Resources & Hours	
+ Cost Item Plug Costs	

Validated Field Options: (if unchecked, missing data will be flagged as errors)

☐ Create missing tags ☐ Create missing quote groups

☐ Create missing accounts ☐ Create missing units of measure

When importing Plug costs, import values as: ☐ Unit ☒ Total

Note: Imported Plug costs will only be active for cost items whose Cost Source has been set to "Plug"

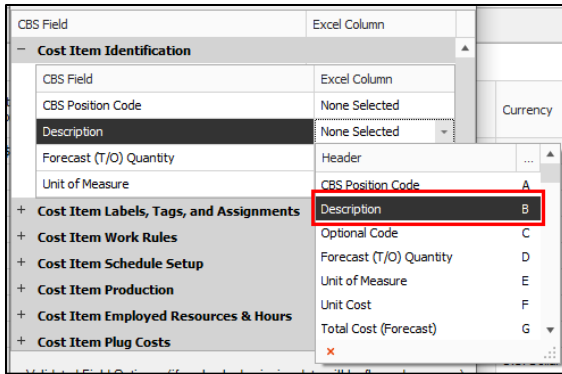

☐ Import additional Resources into the same cost item by moving to the right of the last mapped field

Matching identifier:

OK Cancel

6. Start the mapping process by selecting the Excel Column fields and mapping each one to the CBS Fields.

For example: Click within the Description field under the Excel column, then select the Excel header name that you entered as a Description header in Excel.

7. Perform the same actions in the previous step for all of the Excel column headers you wish to import into the CBS.
 - It's also possible to import hierarchical relationships in Excel such as importing superior subordinate cost items. In this scenario, create 2 records withing your Excel file. The first record will be your superior cost item, and the second record will be your subordinate.

	A	B	C	D
	CBS Position Code	Description	Forecast (T/O) Quantity	Unit of Measure
1	26	Pipe fittings for section 1A	100	Each
2	26.1	1/2 pipe fitting	50	Each

8. The *Validate Field Options* located on the bottom half of the Define Mapping pop up window allows the system to create certain missing records.

In this case, since all the options are unchecked, missing data will be flagged as errors. If one or all fields are checked, and you are attempting to import tags, accounts, quote groups, and/or UOMs, the system will create this data in the Foundation Setup Data register.

Validated Field Options: (if unchecked, missing data will be flagged as errors)

☐ Create missing tags
☐ Create missing accounts

☐ Create missing quote groups
☐ Create missing units of measure

When importing Plug costs, import values as: ☐ Unit ☒ Total

Note: Imported Plug costs will only be active for cost items whose Cost Source has been set to "Plug"

☐ Import additional Resources into the same cost item by moving to the right of the last mapped field

Matching identifier:

9. You also have the option to import Plug costs as either Unit or Total values. Total is the default selection.

Validated Field Options: (if unchecked, missing data will be flagged as errors)

☐ Create missing tags ☐ Create missing quote groups

☐ Create missing accounts ☐ Create missing units of measure

When importing Plug costs, import values as: ☐ Unit ☒ Total

Note: Imported Plug costs will only be active for cost items whose Cost Source has been set to "Plug"

☐ Import additional Resources into the same cost item by moving to the right of the last mapped field

Matching identifier: CBS Position Code

OK Cancel

10. Selecting the Import additional Resources option lets you setup your Excel file with additional columns to import resources. However, the columns need to be identical for each imported resource.

Validated Field Options: (if unchecked, missing data will be flagged as errors)

☐ Create missing tags ☐ Create missing quote groups

☐ Create missing accounts ☐ Create missing units of measure

When importing Plug costs, import values as: ☐ Unit ☒ Total

Note: Imported Plug costs will only be active for cost items whose Cost Source has been set to "Plug"

☐ Import additional Resources into the same cost item by moving to the right of the last mapped field

Matching identifier: CBS Position Code

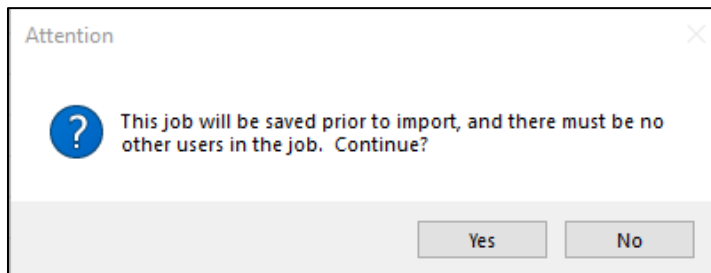

OK Cancel

- If imported resource codes match existing resources in the estimate, the resource description, cost (based on production), and type will populate for the resource associated with the cost item.

	A	B	C	D	AV	AW	AX	AY	AZ	BA	BB	BC	BD	BE
	CBS Position Code	Description	Forecast (T/O) Quantity	Unit of Measure	Man-Hours (Duration Driven)	Hours (Duration Driven)	Resource Code	Resource Quantity	Resource Code	Resource Quantity	Resource Code	Resource Quantity	Resource Code	Resource Quantity
1	1	Mobilization	1	LS	160.00		LL1	1	LT1	1	ETLT	1	ETTT	1
2	2	Clearing & Grubbing	15	Acre		120.00	LL2	2	LO4	1	LT1	1	LO1	2
3	3	Unclassified Excavation	50000	Cubic Yard										
4	3.1	Excavation	60000	Cubic Yard		300.00	LO2	1	LL2	1	LT1	5	LO4	1
5	3.2	Embankment	50000	Cubic Yard		180.00	LO4	1	LL2	1	LO1	3	EG14G	1

11. Select the OK button.
12. Select the Import button.

13. A prompt may appear telling you that the job will be saved prior to the import. Select Yes.

Post Import

- In this scenario, the Define Mappings columns are defined as follows:

Define Mapping	
Settings:	Previous
CBS Field	Excel Column
Cost Item Identification	
CBS Field	Excel Column
CBS Position Code	CBS Position Code
Description	Description
Forecast (T/O) Quantity	Forecast (T/O) Quan...
Unit of Measure	Unit of Measure

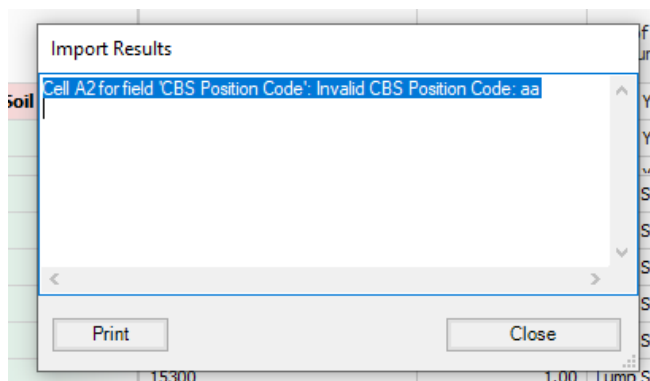

- Accordingly, the 3 cost items in Excel are also defined as follows:
 - CBS Position Code
 - Description
 - Forecast (T/O) Quantity
 - Unit of Measure

	A	B	C	D
1	CBS Position Code	Description	Forecast (T/O) Quantity	Unit of Measure
2	26	Pipe fittings for section 1A	100.00	Each
3	27	Concrete	1.00	Ton
4	28	Steel square tubes	20.00	Each

- CBS import results now display 3 records imported into the existing CBS with a CBS Position Code, Description, Quantity

CBS Position Code	Description	Optional Code	Forecast (T/O) Quantity	Unit of Measure
+ 17.8	Office Furniture	12510	1.00	Lump Sum
+ 17.9	Fire Protection Piping	15300	1.00	Lump Sum
+ 17.10	Interior Luminaires	16510	1.00	Lump Sum
+ 18	Guardrail Type 2	1500 0100	1,000.00	Linear Feet
+ 19	Guardrail Type 3A	1500 0200	200.00	Linear Feet
+ 20	Type 4 Signs	1600 0230	1,000.00	Square Feet
+ 21	Realignment of Water Line	CO1	1.00	Each
+ 22	Special Risk Allowance	UNASSIGNED DIRECT COST	1.00	Each
+ 23	Job Overhead - Indirect Costs	UNASSIGNED	1.00	Each
+ 23.1	Setup Yard	UNASSIGNED	1.00	Lump Sum
+ 23.2	Trailer Rent	UNASSIGNED	1.00	Month
+ 23.3	Utilities	UNASSIGNED	1.00	Month
+ 24	Change Orders		1.00	Each
+ 24.1	Change Order One- Realign the Water		1.00	Each
+ 24.1.1	Day One		1.00	Each
+ 24.1.2	Day Two		1.00	Each
+ 25	Toll Booth	1200 0100	1.00	Each
+ 25.1	Site Preparation	0220	1.00	Lump Sum
+ 25.2	Concrete Reinforcement	03200	1.00	Lump Sum
+ 25.3	Cast in Place Concrete	03300	1.00	Lump Sum
+ 25.4	Concrete Masonry Units	04220	1.00	Lump Sum
+ 25.5	Paneling	06420	1.00	Lump Sum
+ 25.6	Wood Doors	08210	1.00	Lump Sum
+ 25.7	Wood Flooring	09640	1.00	Lump Sum
+ 25.8	Office Furniture	12510	1.00	Lump Sum
+ 25.9	Fire Protection Piping	15300	1.00	Lump Sum
+ 25.10	Interior Luminaires	16510	1.00	Lump Sum
+ 26	Pipe fittings for section 1A		100.00	Each
+ 27	Concrete		1.00	Ton
+ 28	Steel square tubes		20.00	Each

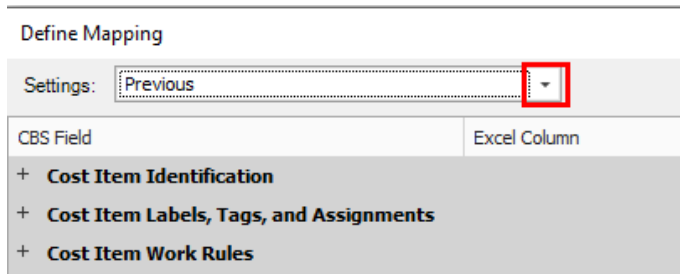

- If errors exist within your Excel file, the Import Results window will appear showing you the location of any errors. In this example, cell A2 contains a CBS Position Code of aa. Since the CBS Position Code is a numeric field, you will need to re-import this record with the correct values.

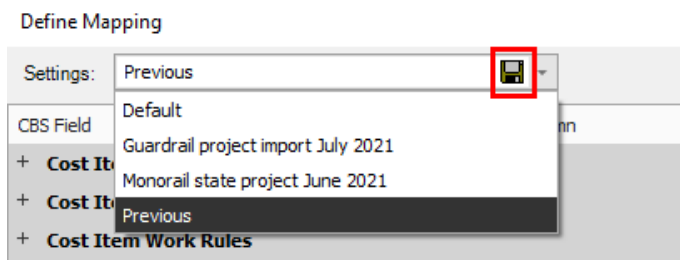

Save Mapping Settings

Save your mapped settings for future use. If you want to re-use these mapped settings later, you can save them to avoid having to go through the exercise of mapping your Excel columns with the CBS fields again.

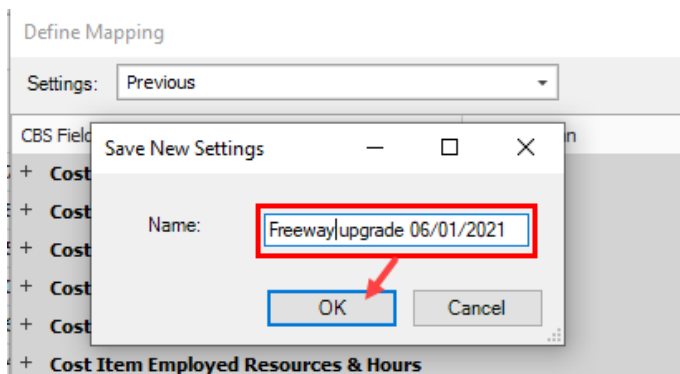

1. Navigate back into the Define Mapping window.
2. Select the drop down arrow next to Settings.

3. Select the Save icon.

4. Type in a name for the new settings, then select OK.

- The new setting is now saved and available for future use.
